CENTRAL OFFICE OF INFORMATION

Hercules Road, Westminster Bridge Road, S.E.1
 [Waterloo: 2345]

The Central Office of Information is a common service department which produces information and publicity material, and supplies publicity services,

required by all other Government departments. In the United Kingdom it conducts Government display press and poster advertising (except for the National Savings Committee), produces and distributes booklets, leaflets, films, television material, exhibitions, photographs and other visual material; carries out social surveys, and distributes departmental press notices. For the overseas departments it supplies British Information posts overseas with press, radio and television material, booklets, magazines, reference services, films, exhibitions, photographs, display and reading room material; manages schemes for promoting the overseas sale of British books, periodicals and newspapers; arranges tours in the United Kingdom for official visitors from overseas; and provides exhibition stands at trade fairs (for the Board of Trade). Administratively, the Central Office of Information is responsible to Treasury ministers, while the ministers whose departments it serves are responsible for the policy expressed in its work.

BOARD OF INLAND REVENUE

Somerset House, W.C.2
[Temple Bar: 2407]

The Board of Inland Revenue was constituted under the Inland Revenue Board Act, 1849, by the consolidation of the Board of Excise and the Board of Stamps and Taxes. In 1909 the administration of excise duties was transferred to the Board of Customs. The Board of Inland Revenue is responsible for the management and collection of income tax, surtax, profits tax, estate duty, stamp duties and other direct taxes, and also for the valuation of freehold and leasehold property for Inland Revenue taxation, for certain purposes on behalf of other Government Departments and public authorities and, in England and Wales, for local authority rating. Since April 1, 1960, the Board has also been responsible for the management

and collection of tithe redemption annuities. Salaries and expenses of the Board for 1961/62 were estimated at £56,513,000.

MINISTRY OF LABOUR

8 St. James's Square, S.W.1.

[Whitehall 6200]

The Ministry of Labour was set up in 1916 to take over certain duties of the Board of Trade, including the administration throughout Great Britain of employment exchanges established under the *Labour Exchanges Act, 1909*. The first 62 had opened on February 1, 1910, and there are now over 1,000. The Ministry provides a free service for employers seeking labour and for workers who are unemployed or wish to change their jobs. The arrangements cover all categories of labour, including men and women with technical and scientific qualifications, professional and executive workers, those released from H.M. Forces, discharged prisoners and foreign workers. The exchanges also act as agencies for other Government Departments in such matters as the payment of unemployment benefit and the issue of passports.

Through its 17 Industrial Rehabilitation Units the Ministry helps disabled and handicapped men and women to regain working fitness, and in 15 Government Training Centres provides courses to help individuals in need of training or re-training. It is also responsible for the central, and some local, administration of the Youth Employment Service; the promotion of safety, health and welfare amongst workpeople in factories and certain other premises; the enforcement of statutory minimum wages, holidays and hours of work laid down by Wages Councils; and the collection and publication of statistics about manpower, wages, hours of work, and the index of retail prices.

The Department, through its advisory and conciliation services, assists in the prevention or settlement of industrial disputes, and its activities overseas include the maintenance of labour attachés in certain foreign countries and liaison with the International Labour Organisation.

H.M. LAND REGISTRY

Lincoln's Inn Fields, W.C.2
[Holborn: 3488]

H.M. Land Registry was established in pursuance
of a recommendation of a Royal Commission by
the Land Registry Act 1862. The aim of the Act
was to render dealings with land more simple and
economical by establishing a State register of land-
owners who voluntarily submitted the titles to their
land for examination and approval by the Registrar
on behalf of the State. The Registry was reformed
by the Land Transfer Act, 1875, which, while
making many changes in the system, continued
its voluntary basis. In 1897 the Land Transfer
Act introduced the principle of compulsory

registration, and four Orders in Council under that Act between 1898 and 1902 made the system compulsory on sale in the administrative county of London. By further Orders registration was made compulsory on sale in 1925 in Eastbourne; in 1923 in Hastings, in 1936 in the administrative county of Middlesex, in 1938 in the County Borough of Croydon, in 1952 in the administrative County of Surrey, in 1954 in the City of Oxford, in 1956 in the County Borough of Oldham, in 1957 in the Medway area of Kent and in the County Borough of Leicester, in 1958 in eastern areas of Kent and the City of Canterbury and in 1961 in the remainder of Kent. The Land Registration Act, 1925, consolidated the previous Acts, and made such changes in the system as the experience of a generation had shown to be necessary. The keynote of the system is that the machinery for the purchase and sale of land is assimilated to that for stocks and shares. Absolute titles granted by the Land Registry are guaranteed by the State. Simple forms, analogous to those used on transfers of stocks and shares, are provided. The cost of buying, selling or mortgaging registered land is much less than the cost in the case of unregistered land. It is open to any County Council or Council of a County Borough to apply to the Privy Council for an order making registration of title compulsory in its area. The Land Registry is administered under the Lord Chancellor by the Chief Land Registrar, who also controls the Land Charges Department under the Land Charges Act, 1925, and the Agricultural Credits Act, 1928 (Sec. 9).

Readers' room open on weekdays, 9.30 a.m. to 6 p.m. (Saturdays, 5 p.m.); closed on Sundays. Admission by Reader's Ticket.

Founded by Royal Charter, 1907, and maintained by annual grant from the Treasury. One of the six libraries entitled to certain privileges under Copyright Act. Contains nearly 2,000,000 printed books, 30,000 manuscripts, 3,500,000 deeds and documents, and numerous maps, prints and drawings. Specializes in manuscripts and books relating to Wales and the Celtic peoples. Repository for pre-1858 Welsh probate records. Approved by the Master of the Rolls as a repository for manorial records and title documents, and by the Lord Chancellor for certain legal records. Bureau of the Regional Libraries Scheme for Wales and Monmouthshire.

Librarian, E. D. Jones.

Deputy Librarian, G. Tibbott.

NATIONAL CENTRAL LIBRARY

Malet Place, W.C.1

[Euston: 6262]

Incorporated by Royal Charter and maintained by annual grants from the Treasury, Municipal and County Authorities, University and special libraries, Adult Education bodies, and public Trusts.

The Library is the national centre for the loan of books (other than fiction and students' text-books) and periodicals to readers in all parts of the British Isles, through their public, university, or other library; and also to and from foreign libraries through their national centres. It is able to draw on over 21,000,000 books in nearly all the principal British libraries. Other work undertaken by the Library includes loans to organized classes of adult students; and the recording of duplicates and discarded books and periodicals and their distribution to appropriate libraries at home and abroad (for which work a special department, the British National Book Centre, is responsible).

Applications to borrow books must be made through the reader's library and not directly to the National Central Library.

Librarian and Secretary to the Trustees, S. P. L. Filon.
Deputy Librarian, I. P. Gibb.

SCOTTISH CENTRAL LIBRARY

Lawnmarket, Edinburgh, 1

Carries out in Scotland functions similar to those of the National Central Library, i.e. acts as a clearing-house for inter-library lending, and maintains a Union Catalogue and other records of books held by Scottish libraries. Its own stock of 35,000 books is freely available to all. Applications to borrow books must be made through the reader's library.

Librarian and Secretary to the Trustees, M. C. Pottinger, D.S.C.
Deputy Librarian, Miss E. M. Swinton.

MERSEY DOCKS AND HARBOUR BOARD

Dock Office, Liverpool 3

The Mersey Docks and Harbour Board, constituted by Act of Parliament in 1857 to take over the entire control of the port accommodation at Liverpool and Birkenhead, is a body composed of 28 members. Twenty-four are elected by the dock ratepayers and 4 appointed by the Minister of Transport, in whom is vested the powers originally granted to the Mersey Conservancy Commissioners. The borrowing powers of the Board authorised to July 1, 1960, were £95,953,583 and the capital expenditure at this date was £80,116,130.

THE BRITISH MUSEUM

Bloomsbury, W.C.1

[Museum: 1551]

Exhibitions.—Manuscripts, Printed Books, Egyptian, Assyrian, Greek and Roman Sculptures, Romano-British, Prehistoric and Oriental Antiquities and Ethnography (Main Entrance, Great Russell Street, W.C.1). Select Exhibition of works of art and antiquities in the King Edward VII Gallery. Prints and Drawings, Oriental Paintings, Egyptian and Babylonian antiquities (North Entrance, Montague Place, W.C.1). Open weekdays 10 to 5 and Sundays 2.30 to 6. Closed on Good Friday and Christmas Day. Admission free.

Reading-room open daily to readers, from 9 to 5, (Tues. and Thurs., 9 p.m.), and Newspaper Room (at Colindale), from 10 to 5 throughout the year, except Good Friday, Christmas and Boxing Day and Sundays. Closed for cleaning the week beginning with first Monday in May. Long-period tickets of admission for purposes of research and reference which cannot be carried on elsewhere, are granted on written application beforehand to the Director. The applicant should state abode, business or profession and full particulars of purpose, and should send a recommendation from a person of recognized position.

The British Museum may be said to date from 1753, when Parliament granted funds to purchase the collections of Sir Hans Sloane and the Harleian manuscripts, and for their proper housing and maintenance. The building (Montague House) was opened in 1759. The present buildings were erected between 1823 and the present day, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Acts. The administrative expenses were estimated at £887,438 in 1961-62, and were met by a vote under "Education and Broadcasting," Class IV of the Civil Estimates.

THE BRITISH MUSEUM (NATURAL HISTORY)

Cromwell Road S.W.7
 [Kensington: 6323]

Open free on week-days (except Good Friday and Christmas Day) 10 to 6, and on Sundays from 2.30 to 6.

Official Guide-lecturers conduct visitors round some portion of the collections at 3 p.m. daily on weekdays free of charge, and their services are available at other times for special parties (also free of charge) by arrangement with the Director. Students are admitted daily for the special study of the collections, and to make drawings and take photographs of specimens, under special regulations to be obtained from the Director. The Museum issues a large variety of publications, comprising scientific monographs and catalogues, popular guide-books and manuals, instructions for collectors, economic pamphlets, and picture postcards, both monochrome and in colour.

The Natural History Collections were removed from the British Museum (Bloomsbury) to South Kensington in 1881-85, the new Museum being opened to the public in 1881. The collections comprise all branches of natural history. The Zoological Museum, Tring [Tring: 2255], bequeathed by the second Lord Rothschild, has formed part of the British Museum (Natural History) since 1938.

The administrative expenses were estimated at £82,668 in 1961-62.

THE LONDON MUSEUM

Kensington Palace, W.8

[Western: 9816]

The Museum illustrates the history of London from the earliest times to the present. It has good collections of archaeological remains, topographical pictures and models, costumes and royal relics. Originally at Kensington Palace, the collections were transferred to Lancaster House in 1914. After the second world war, when most of Lancaster House was converted for use solely as a centre for government hospitality, the Museum was granted temporary accommodation for its offices, and for such of its exhibition as space permitted, at Kensington Palace by King George VI. In 1956 the State Apartments at Kensington Palace were re-opened to the public under the administrative control of the London Museum. The Apartments contain pictures from the royal collections, royal costumes and furniture formerly belonging to Queen Mary.

Director and Accounting Officer, D. B. Harden, O.B.E., F.S.A..... £3,050
Asst. Keepers, M. R. Holmes, F.S.A.; B. W. Spencer, F.S.A.; J. T. Hayes.

THE VICTORIA AND ALBERT MUSEUM

South Kensington, S.W.7

[Kensington: 6371]

Hours 10 to 6 (weekdays and Bank Holidays); Sundays, 2.30 to 6. Admission Free. Art Library (10 to 6) and Print Room (10 to 5) open free (closed Sunday). Is a museum of all branches of fine and applied art, under the Ministry of Education.

The Museum descends direct from the Museum of Manufactures (later called Museum of Ornamental Art) opened in Marlborough House in 1852. The nucleus was a selection of objects bought for £5,000 from the Great Exhibition of 1851 which, with objects illustrating historic styles, was to be devoted to the "application of fine art to the objects of utility" and "the improvement of the public taste in design." The Museum was moved in 1857 to become part of the collective South Kensington Museum. Most of the older buildings date from 1860-82; the new parts from 1899-1909. The South Kensington Museum was re-named the Victoria and Albert Museum in 1899, and only became an exclusively art museum in 1909. Besides comprising the departments named below, the Museum contains the national collections of post-classical sculpture (excluding modern), of British miniatures and of water-colours, the National Art Library, and of art lantern slides. The branch museum at Bethnal Green (composed of a building formerly at South Kensington) was opened in 1872. The Victoria and Albert Museum also administers the Wellington Museum (Apsley House); Ham House, Richmond and Osterley Park, Middlesex.

THE COMMONWEALTH INSTITUTE

South Kensington, S.W.7

[Kensington: 3264]

The Institute was founded in 1887 as a memorial of Queen Victoria's Golden Jubilee. Its primary purposes were firstly, to give scientific and technical advice in the interests of the economic development of the natural resources of the Empire, and secondly educational, to promote wider public knowledge of the life, scenery and industries of the Commonwealth.

Since April 1, 1949, as a direct result of recommendations adopted by the Commonwealth Scientific Conference of 1946, the scientific and technical activities of the Institute have been transferred to the control of other departments; the Institute retaining its educational functions. From the same date the Minister responsible to Parliament for the administration and finance of the Institute is the Minister of Education, who includes in the Estimate for his Department an annual grant-in-aid from Parliament to supplement the annual grants to the Institute from Overseas Empire Governments and the annual income from its invested endowment funds. The name was changed from Imperial Institute to Commonwealth Institute by the Commonwealth Institute Act, 1958.

The management of the Institute is vested in a Board of Governors of which Sir James Robertson, G.C.M.G., G.C.V.O., K.B.E. is the Chairman and Sir Griffith Williams, K.B.E., C.B., Vice-Chairman. Membership of the Board consists of the High Commissioners in London of the Commonwealth Governments and of representatives of Colonial, educational, cultural and commercial interests as appointed by the Minister. United Kingdom Government Departments are represented by Assessors.

IMPERIAL WAR MUSEUM

Lambeth Road, S.E.1

[Reliance: 2636]

Open free daily (except Good Friday and Christmas Day), 10 a.m.; Sundays, 2 p.m. Closes at 6 p.m.

The Museum was founded by the War Cabinet in March, 1917, and established by Act of Parliament in 1920 as a memorial of the effort and sacrifice made by the men and women of the Empire during the Great War of 1914-1918 and to provide a record and a place for the study of that period. On the outbreak of the Second World War in 1939, the Trustees were authorized to collect exhibits and records of the War of 1939-1945 on similar lines. In 1953 it was decided that the Museum should concern itself with all operations in which British Forces have been, or shall be, engaged since August 1914. The exhibition galleries contain relics, models, weapons, uniforms, badges, and medals and record the achievements of the three fighting services and the war effort and experiences of the home front. There are also picture galleries containing works by prominent British artists who recorded the wars in paintings, drawings, or sculpture. The reference library contains more than 90,000 printed and manuscript works in many languages, dealing with all aspects of the military, social, political and economic history of the wars, and files of the many service journals and other periodicals published during those periods. The Photographic Department contains all the official and many unofficial war photographs, to a total of over 4,000,000 prints. Prints may be purchased and reproductions authorized. The official cinematograph war films are also in the Trustees' custody.

NATIONAL MARITIME MUSEUM

Greenwich, S.E.10

[Greenwich: 4422]

Open weekdays 10 till 6; Sundays 2.30 to 6. Closed on Good Friday, Christmas Eve and Christmas Day. Admission free. The old Royal Observatory now forms part of the Museum, and a part of it, now called Flamsteed House, was opened by H.M. The Queen in July, 1960.

Reading Room and Students' Section of the Print Room open on weekdays 10 to 5 (Saturdays, 12.30); tickets of admission on written application to the Director.

The National Maritime Museum was established by Act of Parliament on July 24, 1934, for the illustration of the maritime history, archaeology and art of Great Britain. The Museum, which has absorbed the Royal Naval Museum and the Painted Hall Collections, is accommodated in the Queen's House (built by Inigo Jones, 1617-35) and the Caird Galleries (converted at the expense of Sir James Caird, Bt.). The collections include paintings; ship-models; ships' lines; prints and drawings; maps, atlases and charts; navigational instruments; relics; books and MSS. The amount for salaries and expenses, including a Grant-in-Aid, was estimated at £88,207 in 1961-62.

NATIONAL PARKS COMMISSION

3 Chester Gate, Regent's Park, N.W.1

[Welbeck: 0366]

The National Parks Commission, a body corporate, was established under the National Parks and Access to the Countryside Act, 1949. Members are appointed by the Minister of Housing and Local Government, to whom the Commission reports annually. This report is laid before each House of Parliament.

The Commission is entrusted with the task of designating National Parks and areas of outstanding natural beauty in England and Wales. The former are extensive tracts of country affording facilities for open-air recreation. The Parks, when approved by the Minister of Housing and Local Government, are administered by Local Planning Authorities, subject to a general supervision by the Parks Commission. Ten have been established—the Peak District, Lake District, Snowdonia, Dartmoor, Pembrokeshire Coast, North York Moors, Yorkshire Dales, Exmoor, Northumberland and the Brecon Beacons, covering in all some 5,246 square miles. Areas in the Gower Peninsula, Llyn, the Malvern Hills, Cornwall, North and South Devon, the Quantock Hills, the Northumberland coast, the Surrey hills, Shropshire hills, Cannock Chase and Dorset have been established as areas of outstanding natural beauty.

The Commission is also required to report to the Minister of Housing and Local Government on long-distance routes, along which there will be continuous right of way for walkers and riders, e.g. the Pennine Way; to make representations to Ministers or Local Planning Authorities on any proposed development likely to be prejudicial to the natural beauty of any area; and to provide information services for the public.

THE NATURE CONSERVANCY

19, Belgrave Square, S.W.1

[Belgravia: 3241]

The Nature Conservancy was set up by Royal Charter in March, 1949, and is directly responsible to the Lord President of the Council and Minister for Science as Chairman of the Privy Council

Committee for Nature Conservation. The National Parks and Access to the Countryside Act, 1949, provided the necessary powers for the proper discharge of the responsibilities laid on the Conservancy.

In Great Britain eighty-eight Nature Reserves, covering 177,061 acres, had been declared up to June 30, 1961. The Conservancy has powers under Part III of the National Parks and Access to the Countryside Act, 1949, to make byelaws for the protection of National Nature Reserves.

Research stations have been set up at Grange-over-Sands, Lancashire; Wareham, Dorset; Bangor, Caernarvonshire and Aviemore, Inverness-shire. An experimental station is being set up at Monks' Wood, Huntingdon. Field stations have been set up at Moor House, Westmorland and Killochewe, Ross-shire.

ROYAL OBSERVATORIES

Royal Greenwich Observatory

[Herstmonceux: 3171]

The Royal Observatory was established at Greenwich in 1675 by Charles II for improving methods of navigation. Latterly the growth of London, with its smoke and bright lights, seriously

hampered astronomical observations there, and it was decided in 1946 to move the telescopes to Herstmonceux Castle in Sussex. The removal was completed by 1958. The meridian of zero longitude still passes through the old site, which now houses the astronomical section of the National Maritime Museum.

At the Observatory astronomical measurements are made of the positions, motions and distances of the heavenly bodies, and of such physical characteristics as their luminosities, masses and temperatures. Two meridian instruments and seven equatorially-mounted telescopes are devoted to this work. The Observatory is responsible for the time service of the United Kingdom, for the maintenance of chronometers and watches used by H.M. armed forces, and for the periodical issue of world magnetic charts. At an outstation at Hartland, Devon, continuous observations are made of the strength and direction of the earth's magnetic field.

SCOTLAND

Royal Observatory

Blackford Hill, Edinburgh 9

[Newington: 3321]

The Observatory was founded by the Astronomical Institution in 1818. Originally situated on Calton Hill, near the centre of the city, it was moved southwards to its present site in 1896. It is primarily a research institution concerned with work in astrophysics and stellar astronomy, and undertakes spectroscopic and photometric observations. The Observatory operates an outstation at Earlyburn in Peeblesshire. The Library contains the valuable collection of Lord Crawford.

PAYMASTER GENERAL'S OFFICE

Russell Square House, Russell Square, W.C.1
[Museum: 8646]

The Paymaster General's Office was formed by the consolidation in 1835 of various separate pay departments then existing, some of which dated back at least to the Restoration of 1660. Other offices were incorporated in 1848. Its function is that of paying agent for the different Government Departments, other than the Revenue Departments. The majority of its payments are made through banks, to whose accounts the necessary transfers are made at the Bank of England. The payment of pensions is an important feature of its work. The Establishment expenses were estimated at £59,870 in 1960-61.

NATIONAL INSURANCE ADVISORY
COMMITTEE

10 John Adam Street, W.C.2

[Whitehall: 9066]

The National Insurance Advisory Committee was appointed on Oct. 28, 1947, under the National Insurance Act, 1946, to give advice and assistance to the Minister of Pensions and National Insurance in connection with the discharge of his functions under the Act, and to perform any other duties allotted to it under the Act. These other duties include the consideration of preliminary drafts of regulations to be made under the National Insurance Acts, and of representations received thereon. When the regulations are laid before Parliament, the Committee's Report on the preliminary draft is laid with them, together with a statement by the Minister showing what amendments to the preliminary draft have been made, what effect has been given to the Committee's recommendations, and, if effect has not been given to any recommendation, the reasons for not adopting it. The Minister may also refer to the Committee for consideration and advice any questions relating to the operation of the Acts (including questions as to the advisability of amending the Acts).

Chairman, Sir Ifor Evans.

Members, H. Collison, C.B.E.; J. A. Faris; Mrs. J. M. Howell; J. C. Lennox, O.B.E.; H. M. D. Parker, C.B.; C.B.E.; Sir Richard Snedden, C.B.E.; Prof. R. M. Titmuss; N. C. Turner.

WORKMEN'S COMPENSATION
SUPPLEMENTATION BOARD

and

PNEUMOCONIOSIS AND BYSSINOSIS
BENEFIT BOARD

Thames House South, Millbank, S.W.1
[Abbey: 1200]

The Workmen's Compensation Supplementation Board was appointed on July 11, 1951, under the Workmen's Compensation (Supplementation) Scheme, 1951, to consider and determine all claims arising and any other questions assigned to it under the scheme. The scheme deals solely with persons who have rights under the Workmen's Compensation Acts on account of an accident which happened (or industrial disease contracted) before January 1, 1924. It gives them allowances out of the Industrial Injuries Fund to bring their compensation up to about the level it would have stood at if the later Workmen's Compensation Acts had applied to them.

The Pneumoconiosis and Byssinosis Benefit Board was appointed on March 10, 1952, under the Pneumoconiosis and Byssinosis Benefit Scheme, 1952, to consider and determine all claims arising and all questions assigned to it under the scheme. The scheme provides for payments out of the Industrial Injuries Fund for disablement or death from pneumoconiosis or byssinosis in certain cases which are not covered by either the Workmen's Compensation Acts or the Industrial Injuries Act. The Board also deals with claims arising under the Industrial Diseases (Miscellaneous) Benefit Scheme, 1954, which makes corresponding provision for uncompensated cases of certain other industrial diseases of a malignant nature.

PUBLIC HEALTH LABORATORY SERVICE

24 Park Crescent, W.1
[Museum: 2223]

The Service was originally set up in 1939 as an emergency service to augment the existing public health resources of England and Wales in combating outbreaks of infectious diseases such as might arise from enemy action or abnormal condition in time of war. In 1945 the Government decided to retain the Service on a permanent footing, and statutory authority for doing so was included in the National Health Service Act, 1946, the Minister of Health being empowered to provide a Bacteriological Service in England and Wales for the control of the spread of infectious diseases. The Service was administered by the Medical Research Council, as agents of the Ministry of Health until August 1, 1961, when, under the provision of the Public Health Laboratory Service Act, 1960, a new Public Health Laboratory Service Board was established as a statutory body capable of acting in its own right as agent for the Ministry.

PUBLIC TRUSTEE OFFICE

Sardinia Street, Kingsway, W.C.2
[Holborn: 4300]

This is a Government Office (opened in 1908) by means of which the State acts as executor and trustee under a will, or as trustee under a settlement, and in other capacities of a like nature. The value of the trusts accepted up to March 31, 1961, was £644,500,000.

The facts of any trust, new or old, in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview. The appointment is effected in the same way as a private trustee, or by an Order of the Court. He can act solely or jointly with others.

In the case of a will, all that the testator need say is, "I appoint the Public Trustee executor and trustee of this my Will"; or the appointment may be a joint one with others. Executors who have obtained probate can transfer their duties to him under an Order of the Court. He can also act as administrator with, or without, the will annexed.

Strict secrecy is observed in all matters dealt with in the Department. Accounts in simple

form are furnished to the beneficiaries as required. An interview with the Public Trustee or with any of his senior officers can be arranged at any time. A pamphlet giving particulars and details of the fees can be obtained free of cost from the Office of the Public Trustee, Kingsway, W.C.2.

PUBLIC WORKS LOAN BOARD

19 Old Jewry, E.C.2

[Monarch: 6234]

The Board is an independent statutory body, consisting of 12 unpaid Commissioners appointed by the Crown to hold office for 4 years; 3 Commissioners retire each year and may be re-appointed.

The functions of the Commissioners, derived chiefly from the Public Works Loans Act, 1875, and the Local Authorities Loans Act, 1945, are to consider applications for loans by Local Authorities and other prescribed bodies, and, when loans are approved, to collect the repayments.

Funds for loans are provided from time to time by Acts of Parliament and are drawn from the Local Loans Fund through the National Debt Commissioners. Rates of interest on the Board's loans and fees to cover management expenses are fixed by the Treasury.

During the year ended March 31, 1961, 3,701 applications for loans totalling £41,065,032 were approved and advances totalling £39,932,655 were made.

HOUSE OF LORDS RECORD OFFICE

House of Lords, S.W.1

[Whitchall: 6240]

Until 1497 the records of Parliament were normally transmitted at the end of a session to Chancery, and are now therefore preserved in the Public Record Office. Since 1497 the records of Parliament as a whole, and also of the House of Lords, have been kept within the Palace of Westminster. They are in the custody of the Clerk of the Parliaments, who in 1046 established a record department to supervise their preservation and production to students. The Search Room of this office is open to the public throughout the year, Mondays to Fridays inclusive, from 10 to 5. The records preserved number some 1,500,000 documents, and include Acts of Parliament from 1497, Journals of the House from 1510, Minutes and Committee proceedings from 1621, and Papers laid before Parliament, from 1531. Amongst the records are the Petition of Right, the Death Warrant of Charles I, the Declaration of Breda and the Bill of Rights. The House of Lords Record Office can also arrange access for students to the Journals of the House of Commons (from 1547), and to the other surviving records of the Commons (from 1572). The records of both Houses are preserved in the Victoria Tower at the Houses of Parliament.

ROYAL COMMISSION ON
HISTORICAL MANUSCRIPTSQuality House, Quality Court, Chancery Lane
W.C.2

[Chancery: 2981.

National Register of Archives, Chancery: 3205]

The Historical Manuscripts Commission was first appointed by Royal Warrant in 1869, and was empowered to make enquiry into the place of deposit of collections of manuscripts and papers of historical interest and with the consent of the owners to publish their contents. The Commission was reconstituted by Royal Warrant in 1959, with wider terms of reference, including the preservation of records and assistance to other bodies working in the same field. The Master of the Rolls, who is the Chairman of the Commission, now exercises through the Commission his responsibility under the Law of Property Act, 1922, and the Tithe Act, 1936, for manorial and tithe documents. The Commission has published over 200 volumes of printed reports upon manuscripts of historical import, and under its authority is compiled the *National Register of Archives*, which now contains over 7,000 typed reports upon privately-owned records, with extensive indexes, and may be consulted by historical scholars. At present a grant-in-aid is made through the Commission to the *Records Preservation Section* of the British Records Association. The Commission undertakes to advise owners upon the preservation and use of their manuscripts and records.

H.M. Stationery Office was established in 1786 and is the British Government's central organization for the supply of printing, binding, office supplies and office machinery of all kinds, and published books and periodicals, for the Public Service at home and abroad; It also undertakes duplicating and distributing services for government departments. The Stationery Office is the publisher for the government, and has bookshops for the sale of government publications in London, Edinburgh, Cardiff, Manchester, Bristol, Birmingham and Belfast; leading booksellers in the larger towns act as agents; and there are wholesale depart-

ments in London, Edinburgh and Belfast from which booksellers may obtain supplies. It is also the agent for the sale of publications of the United Nations and its specialized agencies and for certain other international organizations. The Controller of the Stationery Office is under Letters Patent the Queen's Printer of Acts of Parliament and in him is vested the Copyright in all British Government documents.

Government publications are of a wide and varied range and about 5,000 titles are published each year. They include the *London Gazette*, which has been issued twice weekly since 1665, and *Hansard*, the verbatim report of the proceedings in both Houses of Parliament, available on the morning following the debate. The Stationery Office has in stock some 300,000 titles and its subscription and standing order lists contain 110,000 names. The annual sales total about 17,000,000 copies.

The aggregate net estimate for the department in 1961-62 was £15,900,100 (a decrease of £1,535,000 on the same estimate for 1960-61). The gross estimate amounts to £26,640,100 and includes £3,137,000 for salaries and wages of office and warehouse staffs, £7,530,000 for printing and binding (inclusive of salaries and wages of printing works staff), £6,574,000 for paper, £7,115,000 for office supplies and office machinery and £1,145,000 for published books, periodicals and maps. The receipts side includes £1,797,000 from the sale of government publications and £75,000 from the sale of waste paper recovered from all departments.

Generally the department obtains its supplies from commercial sources by competitive tender. For printing and binding, however, the Stationery Office has its own printing works and binderies which produce about one-third of the total requirement, including telephone directories, pension allowance books, national savings certificates and stamps, postal orders, premium bonds, National Insurance stamps, road fund licences, television and wireless licences. The annual face value of these certificates, orders, bonds and stamps is nearly £1,451,000,000.

The staff employed on April 4, 1961, was 6,734, including 1,799 in warehouses and 2,346 at printing works; the total space occupied was two million square feet, including 1,250,000 sq. ft. for warehouse space and 474,000 sq. ft. for the printing works. St. Stephen's Parliamentary Printing Press, specially built to undertake parliamentary printing, was opened in Sept. 1961.

SUGAR BOARD

52, Mark Lane, E.C.3

[Royal 6221]

The Sugar Board was constituted under the
 Sugar Act, 1956, on October 15, 1956. The
 Board buys the sugar which the United Kingdom
 has contracted to buy under the Commonwealth
 Sugar Agreement at prices negotiated annually
 by the Government and resells the sugar com-
 mercially at world prices. The Board also pro-
 vides temporary finance for the British Sugar
 Corporation and receives from or pays to the
 Corporation any surplus or deficit arising on the
 production and refining of home grown beet sugar.
 The Board, in turn, balances its accounts, taking
 one year with another, by receiving a surcharge
 or making a distribution payment, on all imported
 and home produced sugar and molasses.

THE TREASURY

Great George Street, S.W.1

[Whitehall: 1234]

The office of the Lord High Treasurer has been continuously in commission for well over 200 years. The Lords Commissioners of H.M. Treasury consist of the First Lord of the Treasury (who is also the Prime Minister), the Chancellor of the Exchequer and five Junior Lords. This Board of Commissioners is assisted at present by a Parliamentary Secretary, a Financial Secretary and an Economic Secretary who are also Ministers, and joint Permanent Secretaries. The Prime Minister and First Lord is not primarily concerned in the day-to-day aspects of Treasury business, and the Junior Lords and the Parliamentary Secretary are Government Whips in the House of Commons. The higher departmental direction of Treasury business, therefore, devolves on the Chancellor of the Exchequer, assisted at Ministerial level by the Financial Secretary and the Economic Secretary, who advise the Chancellor on general financial and economic policy. The Financial Secretary devotes himself in particular to the Treasury's long-standing responsibilities for financial administration, including questions relating to the Civil Service.

COUNCIL ON TRIBUNALS

6 Spring Gardens, Cockspur Street, S.W.1

[Whitehall: 8691]

The Council on Tribunals, with its Scottish Committee, was constituted in 1958 under the provisions of the Tribunals and Inquiries Act of that year to act as an advisory body in the field of administrative tribunals and statutory inquiries.

Its principal functions under the Tribunals and Inquiries Act are (a) to keep under review the constitution and working of the various tribunals which have been placed under its general supervision by the Act; (b) to report on particular matters relating to any tribunal which may be referred to it by the Lord Chancellor and the Secretary of State for Scotland; and (c) to report on matters relating to statutory inquiries which may be similarly referred to it or which the Council may determine to be of special importance. In addition, the Council must be consulted both about rules of procedure for statutory inquiries and before rules are made for any of the tribunals under its general supervision, and it may make general recommendations about appointments to membership of such tribunals. The numerous tribunals which have been placed under the Council's supervision are concerned with a wide variety of matters varying from agriculture and road traffic to independent schools and pensions. They include the National Assistance appeal tribunals, and the main National Health Service and National Insurance Tribunals, together with such tribunals as the Air Transport Licensing Board, the Lands Tribunal, the Mental Health Review Tribunals, the Performing Right Tribunal and the Transport Tribunal.

The Scottish Committee of the Council considers Scottish tribunals and matters relating only to Scotland.

The Members of the Council are appointed by the Lord Chancellor and the Secretary of State for Scotland. The Scottish Committee is composed partly of members of the Council designated by the Secretary of State for Scotland and partly of other persons appointed by him.

The Council submits an annual report on its proceedings and those of the Scottish Committee to the Lord Chancellor and the Secretary of State for Scotland, which must be laid before Parliament.

TRINITY HOUSE

Tower Hill, E.C.3

[Royal: 6601]

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the Institution its first charter in 1514, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and

Acts of Parliament been entrusted to the Corporation of Trinity House, and until 1874 Masters of the Navy were examined by the Elder Brethren of the Corporation. In the present day, the principal duty of the Corporation of Trinity House, as a Public Department, is the administration of the Lighthouse, &c., Service of England and Wales with certain statutory jurisdiction in regard to lighthouses and other seamarks in Scotland, Ireland, the Channel Islands and Gibraltar, while the Corporation is also the chief Pilotage Authority in the United Kingdom, and in its capacity as a private corporation or guild it administers certain Charitable Trusts specifically dedicated to the relief of aged and distressed master mariners, their widows and spinster daughters. The Corporation controls some 60 lighthouses and 40 lightships, and maintains a fleet of 9 steam and motor vessels. The Active Elder Brethren of the Corporation also sit with the Judges of the Admiralty Division of the High Court of Justice to act as Nautical Assessors in Marine Causes tried in that Court. The Lighthouse Service of Trinity House is maintained out of the General Lighthouse Fund, this fund being provided by means of special dues called Light Dues levied on shipping using the ports of the United Kingdom. The accounts are submitted annually to Parliament.

COMMONWEALTH WAR GRAVES COMMISSION

32 Grosvenor Gardens, S.W.1
[Sloane: 0751]

Wooburn House, Wooburn Green,
High Wycombe, Bucks.
[Bourne End: 594]

The Commonwealth War Graves Commission was incorporated by Royal Charter in 1917 under its then title "Imperial War Graves Commission"; its title was changed on April 1, 1960, by a Supplemental Royal Charter. The Commission's duty is to commemorate individually and in perpetuity each one of those, from whatever part of the Commonwealth they came, who fell in the two world wars of 1914-18 and 1939-45. More than one million graves are maintained in War Cemeteries, large and small, which have been constructed in nearly one hundred and fifty different countries throughout the world, and about 750,000 names are commemorated on memorials to those with no known grave. The funds of the Commission are derived from the seven Governments participating in their work—The United Kingdom, Canada, Australia, New Zealand, South Africa, India and Pakistan.

ROYAL COMMISSIONS, ETC.

Foreign Compensation Commission

1 Princes Gate, S. W. 7

The Commission was set up by the Foreign Compensation Act, 1950, to distribute funds paid by foreign governments as compensation for expropriated British property and other losses sustained by British nationals. The Commission has completed the final distribution of the funds contributed by Yugoslavia. Distributions are being made as sufficient funds become available from Czechoslovakia. Agreements with Hungary, Bulgaria, Poland and Roumania to create similar funds have been made, and the Commission is registering certain British claims in Czechoslovakia and the Baltic States and other States acquired by the Soviet Union. Distributions are being made on Polish guaranteed debts and nationalization claims as sufficient funds become available from Poland. The two sums of £75,000 allocated under the agreement with Poland in respect of pre-war commercial debts and pre-war banking debts, respectively, are mainly distributed. Distribution orders for various types of Bulgarian claims came into operation on March 2, 1958, and for Hungarian claims on April 14, 1958. A limited interim distribution is being made on Hungarian claims. Payments on Bulgarian claims are expected to be completed in 1962. The £27,500,000 compensation paid by the United

THE NATIONAL TRUST

40-42 Queen Anne's Gate, Westminster, S.W. 1

The National Trust was founded in 1895 by Miss Octavia Hill, Sir Robert Hunter and Canon Rawnsley, their object being to preserve as much as possible of the history and beauty of their country for its people. It has since become an organization incorporated by Act of Parliament to ensure the preservation of lands and buildings of historic interest or natural beauty for public access and benefit. It is independent of the State and relies mainly on the voluntary support of private individuals for working funds. The State, however, allows it certain tax exemptions. A further, and only recently instituted, branch of the Trust's work is the acquisition and preservation, with the co-operation of the Royal Horticultural Society, of gardens of national importance. It also has under its care bird sanctuaries and nature reserves, together with several hundred farms.

The National Trust now administers more than 290,000 acres of land in England, Wales and Northern Ireland; and in this area are over 1,000 properties. These properties have come into its hands mainly by gift or bequest; but since 1946 certain land and buildings accepted by the Treasury in lieu of death duties have been handed over to the Trust, the Treasury recompensing itself from the National Land Fund. The properties acquired by the National Trust before last year include the Ashridge Estate (Bucks. and Herts.); Cliveden (Bucks.); West Wycombe Park and village (Bucks.); Wicken Fen (Cambs.); Lyme Park (Cheshire); Cotehele House (Cornwall); Pentire Head (Cornwall); St. Michael's Mount

THE PILGRIM TRUST

Millbank House, 2 Great Peter Street, S.W. 1

Trustees, The Lord Evershed, Master of the Rolls (*Chairman*); The Right Hon. Sir Oliver Franks,

G.C.M.G., K.C.B., C.B.E.; Richard Fleming, M.C.; The Earl of Crawford and Balcarres, K.T., G.B.E.; W. F. Oakeshott; The Lord Bridges, P.C., G.C.B., G.C.V.O., M.C.

Secretary, The Lord Kilmaine, C.B.E.

The Pilgrim Trust was founded in 1930 by the late Edward S. Harkness of New York, who placed in the hands of British trustees £2,000,000 for the benefit of Great Britain. Since then the Trust has been able to make substantial grants for the repair of ancient buildings, the preservation of historical records, the support of learned societies, the purchase of works of art and the assistance of social welfare schemes.

Since its foundation the Trust has made grants amounting to £3,607,997 and in 1960 the Trustees voted sums totalling £185,723. These grants were made under the following three heads:—

Preservation £98,423

Art and Learning . . £74,800

Social Welfare . . . £12,500

£28,350 was voted for the restoration of the historic buildings of the Cambridge Colleges; £9,000 to the Oxford Preservation Trust; £10,000 to the National Trust and £10,000 to the National Trust for Scotland.

Under the heading Art and Learning the Trustees contributed a sum of £25,000 towards the purchase by the National Gallery of Gainsborough's painting of Mr. and Mrs. Robert Andrews.

Other grants included the sum of £7,500 towards the repair of the fabric of Farnham Castle.

THE BRITISH COUNCIL

65 Davies Street, W.1

The British Council was established in 1934 to promote abroad a wider knowledge of the United Kingdom and of the English language, and to develop closer cultural relations between the United Kingdom and other countries. Almost the whole of the Council's funds are derived from grants voted by Parliament. Grants for 1961-62 amounted to £6,626,850.

The Council's activities include the promotion of English language teaching and British studies in universities, training colleges and schools abroad, maintenance and expansion of British libraries and cultural centres, Anglophile societies and British schools abroad; the fostering of personal contacts between British and overseas people, especially in the educational, scientific and professional fields. Scholarships and bursaries for study in this country of British institutions, methods and achievements are granted to overseas graduates and others.

In June, 1961, the Council had staffs at work in most European countries, in many Latin-American Republics, in most countries of the Middle East and North Africa, in Burma, Indonesia, Japan, Nepal, Thailand and Viet-Nam, in Canada, Australia, India, Pakistan, Ceylon, Ghana, Malaya, Nigeria, Cyprus, Sierra Leone and in most British colonies. It promotes cultural relations with the Soviet Union, primarily by sponsoring visits in both directions by professional groups.

The Council maintains centres in the United Kingdom, mainly in university cities, to provide services for students, professional visitors, holders of U.N. and Colombo Plan awards and others from overseas. It is responsible for accommodation and welfare services for the main body of colonial and certain other overseas students in the U.K.

President, General Sir Ronald Adam, Bt., G.C.B., D.S.O., O.B.E.

Chairman, The Lord Bridges, P.C., G.C.B., G.C.V.O., M.C., F.R.S.

Director-General, Sir Paul Sinker, K.C.M.G., C.B.

THE ARTS COUNCIL OF GREAT BRITAIN

4 St James's Square, S.W.1

The Arts Council of Great Britain was incorporated under Royal Charter on August 9, 1945, "for the purpose of developing greater knowledge, understanding and practice of the fine arts exclusively, and in particular to increase the accessibility of the fine arts to the public . . . to improve the standard of execution of the fine arts and to advise and co-operate with . . . Government Departments, Local Authorities and other bodies on any matters concerned directly or indirectly with those objects. . . ."

The Members of the Council, who may not exceed 16 in number, are appointed by the Chancellor of the Exchequer after consultation with the Minister of Education and the Secretary of State for Scotland. They normally serve for a period of five years.

The Council receives an annual grant from the Treasury. For the year 1961-62 the amount was £1,675,000.

Chairman, The Lord Cottesloe, G.B.E., T.D.

Secretary-General, Sir William Emrys Williams, C.B.E.

COUNCIL OF INDUSTRIAL DESIGN

28 Haymarket, S.W.1

The Council of Industrial Design, with its Scottish Committee, was set up in December, 1944, by the President of the Board of Trade, "to promote . . . the improvement of design in the products of British industry." For manufacturers, the Council provides advice on the application of design policy, and recommends designers from its Record of Designers. For retailers, it provides courses for buyers and salesmen on design appreciation, and organizes exhibitions in retail stores. For the public it provides selective exhibitions of well designed goods.

In April, 1956, the Council launched the Design Centre for British Industries, which occupies an 8,000 sq. ft. showroom at 28 Haymarket, S.W.1. In 1957 the Scottish Design Centre was established at 46 West George Street, Glasgow, C.2.

The Council maintains a selective, pictorial and sample record of well designed goods in current production known as *Design Index*, which is available for consultation at the Design Centre. The Council also maintains a photograph and slide library, press and information services and a lecture panel, and publishes a monthly journal *Design*.

Chairman, Sir Duncan Oppenheim.

Chairman of Scottish Committee, I. W. S. Wilson.

Director, Paul Reilly.

Chief Executive Scottish Committee, R. A. Clark, 46 West George Street, Glasgow, C.2.

LONDON COURT OF ARBITRATION

69-73 Cannon Street, E.C.4.

The London Court of Arbitration, formed in 1892, is an impartial body prepared to appoint arbitrators at the request of disputants to settle disputes which may, under the law of England, be submitted to arbitration. The Court is administered by members appointed by the Corporation of London and the London Chamber of Commerce.

The Court's Services are available to any person, firm, company or organization of any nationality. Parties in the British Commonwealth and in foreign countries often request the Court to appoint an arbitrator to settle their disputes.

Chairman, A. C. Colman.

Deputy Chairman, C. G. Hayes, C.C.

Registrar, J. G. Allanby.

THE BANK OF ENGLAND

Threadneedle Street, E.C.2

The Bank of England was incorporated in 1694 under Royal Charter. It is the banker of the Government on whose behalf it manages the Note Issue, the profits on which are paid to H.M. Treasury. It also manages the National Debt and administers the Exchange Control regulations. As central reserve bank of the country, the Bank keeps the accounts of British banks, who maintain with it a proportion of their cash resources, and of most overseas central banks; but it has gradually withdrawn from new commercial business.

As from March 1, 1946, the capital stock, amounting to £14,553,000, was transferred to a nominee of the Treasury (the Treasury Solicitor), under the provisions of the Bank of England Act, 1946, holders receiving in exchange 3 per cent. Treasury Stock, to such an amount as provided them with annual interest equal to the annual gross dividend of the previous 20 years, namely, 12 per cent.

NOTE.—The legal weight of a penny is one-third and of the halfpenny one-fifth of an ounce avoirdupois; the halfpenny is one inch in diameter.

The "Remedy" is the amount of variation from standard permitted in fineness and in weight of coins when first issued from the Mint.

Bank of England Notes are issued for sums of 10s., £1 and £5. As from April 22, 1943, the Bank of England ceased to issue bank notes of denominations of £10 and upwards, and commenced to withdraw those already issued; notes of these denominations ceased to be legal tender on May 1, 1945.

Silver.—No silver coins have been struck since 1946, except Maundy money.

Nickel Brass is an alloy of copper 79 parts, nickel 1 part and zinc 20 parts.

Bronze is an alloy of copper 97 parts, tin ½ part and zinc 2½ parts. These proportions are subject to slight variation.

Cupro-nickel is an alloy of nickel 25 parts and copper 75 parts.

Currency Notes.—Under the provisions of the *Currency and Bank Notes Act, 1928*, Currency Notes (popularly known as Treasury notes) of the value of £1 and 10s. were replaced by Bank of England Notes and the profits of the whole Note issue were paid over by the Bank to H.M. Treasury.

Legal Tender of Money.—Bank of England Notes of £1 and 10s. are legal tender in Great Britain and Northern Ireland for the payment of any amount; those of £5 are legal tender in England and Wales only. Notes of £5 issued before February 21, 1957 (the old white "fivers") are not now legal tender but, like notes of £10 to £1,000, are payable when presented at the Bank of England. Change cannot be demanded except from the Bank of England. Gold (dated 1838 onwards), if of or above the least current weight, is legal tender to any amount. Silver (dated 1816 onwards), and cupro-nickel are legal tender for sums up

to £2, nickel brass 3d. up to 2 shillings, and bronze (introduced 1860, to replace copper) up to 12d.

Work of the Royal Mint in 1960.—In 1960 the Royal Mint struck 707,257,329 coins—a slight decrease from the record output of 709,650,207 in 1959. Of the 1960 total, 305,566,731 were United Kingdom coins and 401,690,598 were struck in some 70 denominations for 24 overseas governments, both Commonwealth and foreign. No sovereigns or pennies were struck. Crown pieces were struck for the first time since 1953. Once again the most numerous coin to be minted was the sixpence: 103,000,000 were struck, bringing the number in circulation to 1,400,000,000. During the 10 years 1951–1960 the circulation of the sixpence doubled, that of the shilling increased by 60 per cent., while those of the florin and half-crown declined by 7 per cent. £2,500,000 silver coin was withdrawn and replaced with cupro-nickel, compared with £4,250,000 in 1959. Some 5,000,000 pennies were withdrawn as surplus, bringing the total so withdrawn during the past ten years to 300,000,000. Under a Royal Proclamation of October 26, 1960, the farthing ceased to be legal tender on December 31, 1960.

1961 operations.—During the first nine months of 1961 there were only moderate demands for United Kingdom coin and there were signs of slackening in the expansion of the currency that had been a feature of the post-war years. No pennies had been minted by September, 1961. The Mint, however, was busy executing large orders for coin from overseas governments and, although on a reduced scale, in withdrawing silver coin and replacing it with cupro-nickel.

Bank of England note circulation.—On December 21, 1960 the circulation stood at £2,378,000,000, an increase of £59,000,000 on the previous record figure of £2,319,000,000 on July 27, 1960. On August 2, 1961, the circulation was £2,415,000,000. £5 notes bearing dates between Sept. 2, 1944 and Sept. 20, 1956 ceased to be legal tender on March 14, 1961. None of the old black and white notes are now legal tender. On February 20, 1957 there were 52,000,000 £5 notes representing 14 per cent. of the total circulation. On July 5, 1961, there were 192,000,000 £5 notes representing 41 per cent. of the circulation.

Notes of higher denomination.—The issue of £10, £20, £50, £100, £500 and £1,000 notes was discontinued in 1943 and that of £200 notes in 1928. However, notes of these values were still outstanding on Feb. 28, 1961, to a total of £1,905,000. The Bank of England has announced its intention of re-introducing the £10 note (date unspecified).

STERLING BALANCES

In the middle of 1939 United Kingdom net external liabilities amounted to rather more than £500 million. During the war years overseas sterling holdings rose extremely fast, reaching nearly £3,600 million at the end of 1945. Of this total a large proportion represented obligations to other countries arising from the exigencies of war rather than their working balances or normal reserves voluntarily held in London. The trends in the sterling holdings of different regions since the war are shown in the following table.

*Includes Dominion & Colonial securities £115m.

The existence of currency and many other funds in sterling is due to the fact that the colonies do not possess developed local capital markets and therefore hold in London the very large funds which governments require for many and diverse purposes. Colonial currencies are very largely backed by sterling securities. The steadily increasing circulations which have accompanied rising populations, the increased use of money and increasing external incomes have thus produced an almost automatic increase in the Currency Boards' investments in United Kingdom and other government securities. Special funds, particularly those of savings banks, have also risen steadily, as have general government funds for planned development expenditures and for current working balances. The other funds, which are held with United Kingdom banks, represent the general banking assets of commercial banks operating in the colonies and the known liquid funds of companies and individuals resident there, held in London.

The underlying reason for the growth of the total holdings was the expansion of colonial economies at a time of rising prices and, in particular, the unprecedentedly high level of export earnings in the years following the outbreak of the Korean War. More recently, the colonial territories have been in deficit on current account but as there has also been

a large capital inflow there has been little change in the general level of sterling holdings.

Independent sterling area holdings.—It is the normal practice of central banks in independent sterling area countries to hold the bulk of their foreign exchange reserves in sterling. Moreover, they are often required by statute to hold certain minimum reserves in foreign exchange (which may include sterling) against local currency issues. A large proportion of these statutory reserves is in practice held in sterling.

Much of the fall in the holdings of independent sterling area countries took place in the first few years after the war and represented the reduction of surplus balances built up during the war years. During the last few years trends in individual countries have been diverse. India's holding has recently been run down further to finance the second five-year development plan, and the holdings of Australia and New Zealand have fluctuated widely, largely under the influence of changes in the prices of their exports of primary products and their import policies. On the other hand, the balances of the middle east sterling area countries have increased considerably.

Non-sterling countries.—After allowance is made for special holdings by the German authorities, the holdings of the O.E.E.C. countries nowadays represent sterling held by residents of these countries for commercial and financial reasons. Their size varies with the scale of the holders' business in sterling and the attractions of London as a financial centre in which to hold funds. The same generalization applies to the small net balances of sterling held by the dollar area countries. The very large fall in the holdings of other non-sterling countries since the war was due to the fact that several of these countries had accumulated large surpluses of sterling well beyond their normal commercial requirements during the war period. Egypt was an outstanding example, and in this and some other cases the funds were transferred to special or "blocked" accounts and provisions made for regular annual releases. Apart from these special accumulations, which have now been mainly used up, most of the countries in this group (including countries in the far east, middle east, western hemispheres and Soviet bloc) only hold sterling funds for financing foreign trade, particularly with sterling area countries.

NOTE ON CIVIL COURTS.—Smaller civil actions

are heard locally in County Courts which, with

some exceptions, deal with all common law cases

where the sum involved is less than £400. Jurisdiction given by special statutes is of the widest range and cases under such statutes are dealt with irrespective of the amount involved. County Courts are presided over by a paid judge sitting alone. The county court for the City of London is the Mayor's and City of London Court, which deals with small cases and has also jurisdiction unlimited in amount. Bankruptcy cases arising in London are dealt with in the London Bankruptcy Court, Carey Street, W.C.2; those arising out of London are dealt with in the county courts.

Actions in the High Court are distributed among the several Divisions of the High Court according to their nature. Certain classes of actions, e.g., those dealing with the administration of estates of deceased persons, partnerships, trusts and mortgages, specific performance of contracts between vendors and purchasers of real estates, including contracts for leases, partition or sale of real estates, wardship of infants and the care of infants, estates, and company and bankruptcy cases, are usually commenced in the Chancery Division. The Queen's Bench Division deals with most ordinary civil cases. Actions may be tried in London or the Assizes. The Probate, Divorce and Admiralty Division has jurisdiction in matters concerning wills, divorces, and Admiralty, prize and shipping cases.

COUNTY COURTS

In 1960 the total number of proceedings in County Courts of England and Wales (including the Mayor's and City of London Court) was 1,508,048 (as against 1,339,071 for the year 1959). The number of debtors imprisoned under the *Debtors Act*, 1869, was 5,355 (1959) and 5,675 (1960) and of the last number 3,825 served the full terms of imprisonment for "Contempt of Court" in failing to comply with the order for payment.

CROWN COURTS

The Criminal Justice Administration Act, 1956, authorized the setting up of two new courts, known as the Crown Court of Liverpool and the Crown Court of Manchester. These Courts took over the jurisdiction of the former Courts of Quarter Session for Liverpool and Manchester and the criminal jurisdiction of the Assize Courts for the West Derby and Salford Divisions of Lancashire. The Courts are normally presided over by the Recorders of Liverpool and Manchester who have power to refer assize cases for trial by a judge of the High Court.

ROYAL MARINES

The Corps of Royal Marines (instituted 1664) is trained for service on sea and land. Duties at sea include the provision of gun crews, emergency landing parties and guards. The Corps also provides minor landing craft crews, special boat sections (frogmen) and other detachments required for amphibious operations. There are five commandos one of three abroad being affiliated with the first British Commando Carrier, H.M.S. *Bulwark*.

Estimated strength of the Royal Marines in 1961-1962, 8,600 all ranks.

Commandant-General, *Royal Marines*, General Sir Ian H. Riches, K.C.B., D.S.O.
 Lieutenant-General, M. C. Cartwright-Taylor, C.B.

SERVICE PAY AND PENSIONS

Pay and Pensions of the Armed Forces are reviewed regularly at intervals of not more than two years, taking into account movements in civilian earnings in a range of occupations. The following tables show rates of pay and pensions current with effect from April 1, 1960. Rates of other ranks' pensions shown (which were unaltered in 1960) came into effect on April 1, 1959. Rates of marriage allowance and quartering charges (see Whitaker, 1959) remain unchanged. In general the rates shown below are for United Kingdom-based regulars of the three Services; where Army ranks only are shown, rates apply equally to equivalent ranks in the other Services. Full details appear in *Service Pay and Pensions* (Cmd. 945) and *Armed Forces Pensions* (Cmd. 675, 1959).

THE TERRITORIAL ARMY

The Territorial Army has now reverted to its traditional all volunteer status and consists of both men and women. National Service men on completion of their two years with the Regular Army continue to have their 3½ years' reserve liability with the Territorial Army, but compulsory part-time training for them has been suspended.

The rôle of the Territorial Army is to form a reserve of trained and disciplined manpower in the country, trained to fight in any emergency.

The Territorial Army is organised on a divisional/district basis. It has centres in towns and villages all over the country. Each unit carries out 15 days training in camp annually. During the remainder of the year units train in the evenings and at weekends.

THE ARMY EMERGENCY RESERVE

Like the Territorial Army the Army Emergency Reserve consists of volunteers (men and women) and National Service men who are allotted to units but do no part-time training. Its rôle is to provide units and individuals required overseas in peacetime emergencies, and to provide units and individuals to complete the mobilization order of battle of the Army on the outbreak of war. The majority of units are of a specialist nature. A.E.R. training is 15 days annually. During the rest of the year, one category of the A.E.R. does some training in the evenings or at weekends.

NAVY, ARMY AND AIR FORCE RESERVES ACT, 1959

From June 30, 1959, men who served between September 1939 and December 31, 1948, and were generally known as "Z" Reservists (from 1954, R.N. and R.M. Emergency Reservists or Army General Reservists Group "P") and R.A.F. "G" Reservists, ceased to have any further liability for service. The number of men affected by the Act is nearly 3,000,000 and the Minister of Defence hoped that many of them would volunteer for the Civil Defence Service or for the Royal Naval Reserve, the Royal Marine Forces Volunteer Reserve, R.N. Minewatching Service, The Territorial Army, Army Emergency Reserve, Royal Auxiliary Air

Force or the Royal Observer Corps, where they would be welcomed.

National Servicemen and volunteers joining the Forces after 1948, on completion of the normal period of whole or part-time service become Royal Naval Special Reservists, Army General Reservists Group "N" or R.A.F. Reservists Class "G", with liability to recall in a grave national emergency until June 30, 1964. The Act does not affect the position of men in the other reserves.

Officers whose service is similar in date to the groups above are similarly affected.

RELATIVE RANK—SEA, LAND AND AIR

Officers of the Royal Navy, The Army, and The Royal Air Force rank with one another according to Seniority or Date of Appointment, as shown in the following table. Recognized abbreviations are shown in brackets. Comparable ranks in the Women's Royal Naval Service and Women's Royal Air Force appear in *italics*. Commissioned ranks of the Women's Royal Army Corps are named as for the Army, the Director holding the rank of Brigadier.

NAVY, ARMY AND AIR FORCE INSTITUTES

Imperial Court, Kennington Lane, S.E.11.

[Reliance : 1200]

Navy, Army and Air Force Institutes, known to the Services as NAAFI, is H.M. Forces' official trading organisation. In addition to the provision of clubs and canteens at home and overseas and in H.M. Ships, NAAFI is responsible for the provision of a large part of the items required for the messing of H.M. Forces. Registered under the Companies Act as an Association not for profit, NAAFI exists for the exclusive benefit of the serving element of H.M. Forces.

For the year ended Oct. 29, 1960, rebate and discount amounting to £2,220,633 were paid to the Services. Extra rebate totalling £272,521 was also placed at the disposal of the Service Ministries for the welfare of the Forces.

THE UNION JACK CLUB

Waterloo Road, S.E.1. Tel. : Waterloo 6401.

This is one of our great National Institutions where Sailors, Soldiers and Airmen can go when on leave or passing through London; a place where they may obtain at moderate charges good meals and comfortable bedrooms and where they find the usual amenities of a club, including Library and Writing Room, Billiards Room, Television, Baths, Barber's Shop, and also a Club Shop in which articles of everyday use and almost everything that Service men require may be purchased. It is open throughout the day and night and has a total accommodation of 940 beds.

The Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War, and other campaigns, and was opened in 1907. Membership is open to those below the rank of Officer

who are serving on the Active List of the Regular Forces, honorary membership being extended to the Colonial Permanent Forces and to the Navies, Armies and Air Forces of Foreign Powers visiting England. A limited number of ex-Service Warrant Officers, Petty Officers, N.C. Officers and men may also be elected members.

THE UNION JACK FAMILIES CLUB

Exton Street, Waterloo Road, S.E.1.

Warden : Miss L. V. Byers.

This Club was established in 1913, largely as a result of grants made by the South African Garrison Institutes, and provides board and temporary accommodation at moderate rates for the wives and children (with or without their husbands and fathers) of members and ex-members of the Royal Navy, Army and Royal Air Force, below commissioned rank.

THE UNION JACK WOMEN'S SERVICES CLUB

THE METEOROLOGICAL OFFICE

London Road, Bracknell, Berks.

[Bracknell: 2420]

The Meteorological Office is the State Meteorological Service. It forms part of the Air Ministry, the Director-General being responsible to the Secretary of State for Air through the Permanent Under-Secretary of State. The general functions of the Meteorological Office are:—Provision of meteorological services to the Army, Royal Air Force, Civil Aviation, the Merchant Navy and Fishing Fleets; Liaison with the Naval Weather Service of the Admiralty and provision of basic meteorological information for use by that Service; Meteorological services to other Government Departments, public corporations, local authorities, the Press and the general public; Organization of meteorological observations in Great Britain and Northern Ireland, and in certain colonies; Collection, distribution and publication of meteorological

information from all parts of the world; Maintenance of certain British observatories and publication and distribution of magnetic and seismological information obtained from them; Research in meteorology and geophysics.

The Meteorological Office also takes a leading part in international co-operation in meteorology. The Director-General is the permanent representative of the U.K. on the World Meteorological Organisation.

Except for the common services provided by other Government Departments as part of their normal function, the cost of the Meteorological Office is born by Air Votes.

The gross annual expenditure by the Exchequer, including that on the common services, is of the order of £5,500,000. Of the expenditure chargeable to Air Votes, about £3,500,000 represents expenditure associated with staff and £1,500,000 expenditure on stores, communications and miscellaneous services. Of the total expenditure, over £1,000,000 is recovered from other Government Departments and outside bodies in respect of special services rendered, sales of meteorological equipment, etc.

THE CHURCH OF SCOTLAND

THE CHURCH OF SCOTLAND is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries. It is presided over by a Moderator (chosen annually by the Assembly), to whom Her Majesty the Queen has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £4,000 towards his expenses. The country, for Church purposes, was, before the union of the Church of Scotland with the United Free Church of Scotland, which was effected at a joint meeting of the General Assemblies of both Churches on October 2, 1929, divided into 16 Synods and 66 Presbyteries, and there were about 2,600 ministers and licentiates engaged in ministerial and other work. There have since been added: (1) The Presbytery of England and (2) The Presbyteries of (a) Northern Europe, (b) Southern Europe, (c) Spain and Portugal, (d) a number of Indian and Colonial Presbyteries, making 77 in all. The figures at Dec. 31, 1960, are:—

Congregations, 2,130; total membership 301,280; Sunday Schools, 2,771, with 297,192 scholars and 40,735 teachers. In 18 Foreign Mission fields, there are 270 European missionaries (and in addition many missionaries' wives, most of whom are doing mission work in the various fields) and over 15,000 evangelists and teachers, including in both cases those of the Women's Foreign Mission.

In 1560 the Scots Parliament abolished the jurisdiction of the Pope, proscribed the Mass, and ratified a Confession of Faith drawn up by John Knox and others. In all essentials the articles of the ancient creeds of the Church were adhered to. Ceremonies were declared to be temporary in their nature, and should be altered when they began to foster superstition. Presbytery was settled in 1590. The restoration of the rights of the Bishops, civil and ecclesiastical, was, however, sanctioned by the General Assembly of 1620, and three Scottish Bishops were in that year consecrated in London. Further innovations by King James VI. alarmed the people, and the attempt of Charles I. to impose on the Church a Book of Canons and a Liturgy was met by the

National Covenant and the restoration of Presbyterian forms, which culminated in the *Westminster Confession of Faith* in 1646. At the Restoration the Church again became Episcopal, but in 1690 the Scottish Parliament re-established Presbyterianism. By the Treaty of Union between England and Scotland (ratified by the English Parliament 6 Anne c. 11.) the Church of Scotland was secured in its Presbyterian form of government, and the very first official act of a sovereign of the British Empire or his or her accession is to take an oath to maintain inviolably this settlement. In 1921 Parliament passed the *Church of Scotland Act, 1921*, to declare the lawfulness of certain Articles declaratory of the constitution of the Church of Scotland. These Articles were framed with a view to facilitating the union of other Churches with the Church of Scotland. A committee, appointed by the Secretary for Scotland, enquired into the question of endowments, following upon which the Church of Scotland (Property and Endowments) Bill was introduced and was passed into law (15 and 16 Geo. V. c. 33) in 1925. The primary purpose of this legislative measure was to transfer to and vest in the Church of Scotland General Trustees, incorporated under the Church of Scotland (General Trustees) Order Confirmation Act, 1921, the whole properties and endowments belonging to the Church as it then existed, for behoof the latter. Further legislation with reference to these was embodied in The Church of Scotland Trust Order Confirmation Act, 1932, and The Church of Scotland (Property and Endowments) Amendment Act, 1933.

The total amount of Christian Liberty received by Parishes and Charges in 1959 was £4,535,716.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, the Sovereign, as one of its members, being supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the annuitant Bishops and Clergy (the annuities provided were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the GENERAL SYNOD are 21 Diocesan Synods, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese was formerly chosen by the clerical and lay members of the Diocesan Synod, but since Dec. 1, 1959, has been chosen by an Electoral College. The Primate is chosen by the House of Bishops from amongst their own number.

The financial trustees of the Church are the REPRESENTATIVE BODY, composed of the Archbishops and Bishops, 14 clergymen and 28 laymen, chosen by the Diocesan Synods, with 14 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The funds, however, in the custody of the Representative Body amount in all to £14,924,231, made up of Parochial Sustentation £10,301,721, General Synod Funds £930,204, Miscellaneous purposes £3,692,306.

Since 1869 members of the Church have paid in to the Representative Body a total sum of £16,776,187. The interest of the Diocesan and Parochial Sustentation and other Funds is approximately £503,835.

THE METHODIST CHURCH

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revd. John Wesley (born June 17, 1703; died March 2, 1791) and his brother, Revd. Charles Wesley (born Dec. 18, 1707; died March 29, 1788).

THE METHODIST CHURCH

On September 20, 1932, the Wesleyan Methodist Church, the Primitive Methodist Church and the United Methodist Church, were united and became "The Methodist Church."

The Methodist Church is governed primarily by the Conference, secondarily by the District Synods (held in September and May), consisting of all the ministers and of selected laymen in each district, over which a chairman is appointed by the Conference; and thirdly by circuit quarterly meeting of the ministers and lay officers of each circuit. The authority of both Synods and Quarterly Meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism.

President of the Conference (July, 1961-62), Rev. M. L. Edwards, M.A., D.D., Ph.D.

Vice-President of the Conference (July, 1961-62), Mrs. M. W. Lonsdale, M.A., B.D., Ph.D.

Secretary of the Conference, Rev. E. W. Baker, M.A., D.D., Ph.D., 2 Central Buildings, Westminster, S.W.1.

President Designate (1962-3), Rev. L. Davison, B.D.

Vice-President Designate (1962-3), A. L. Creed, M.A.

Statistics.—In 1960 in association with the Conference in Great Britain (at home and abroad) there were 5,172 Ministers, 38,154 Local Preachers, 1,204,534 Members and Probationers, 17,178 Churches, 13,222 Sunday Schools, 121,539 Sunday School Officers and Teachers, and 802,377 Sunday Scholars.

The *World Methodist Council*, founded 1881, re-organized 1951, associates Methodism throughout the world in 82 countries. The statistics of world Methodism are: churches and preaching places, 99,500; ministers, 66,500; local preachers, 83,000; Sunday schools, 76,400; officers and teachers, 825,000; scholars, 8,200,000; recorded membership, 19,100,000.

The Methodist Church was founded in 1739 by the two brothers Wesley and rapidly spread throughout the British Isles and to America before 1770. The Methodist Church in Great Britain was united in 1932 by the fusion of the Wesleyan

Methodist Church which was the original section, the Primitive Methodist Church, which arose through the evangelists Hugh Bourne and William Clowes in 1810, and the United Methodist Church, itself a fusion in 1907 of the Methodist New Connexion which dated from 1797, the Bible Christian Methodist Church, which dates from 1825 and the United Methodist Free Churches which originated in controversies in 1828 and 1849. The Methodist Church of America was formed by a union of three great Methodist denominations in 1939. Australasia, New Zealand and South Africa are separate autonomous Methodist Churches, and other branches throughout the world have originated from the Methodist Church either in Great Britain or in America.

METHODIST CHURCH IN IRELAND

The Methodist Church in Ireland has 249 Ministers, 363 Lay Preachers, 31,730 Adult and 17,833 Junior Members, 1,957 Sunday School Teachers and 14,671 Scholars.

President (1961-62), Rev. C. W. Ranson, B.Litt., D.Theol.

Secretary, Rev. R. D. E. Gallagher, M.A., B.D., The Grosvenor Hall, Belfast, 12.

THE UNITED CHURCH OF CANADA

The United Church of Canada is the result of the union (1925) of Methodist, Presbyterian and Congregational Churches in Canada. *Sec. of General Council*, Rev. Ernest E. Long, B.A., D.D., The United Church House, 85 St. Clair E., Toronto.

INDEPENDENT METHODISTS

Independent Methodists.—This body is Congregational in its organization, with an unpaid Ministry. Its first Conference was held in 1805. In 1961 there were in Great Britain 292 Ministers, 8,415 Members, 152 Chapels and 10,306 Sunday School Scholars. *Secretary*, W. Drummond Brown, 21 Ashley Drive, Swinton, Lancs.

WESLEYAN REFORM UNION

This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry. It is the remnant of the original Reformers expelled from Wesleyan Methodism in 1849. The adherents are mainly in the Midland and Northern counties. In 1961 there were in Great Britain 24 Ministers, 280 Lay Preachers, 5,964 Members, 164 Chapels and 8,321 Sunday Scholars. —*President* (1961-2), T. O. Roberts, Barnsley. *General Secretary and Connexional Editor*, Rev. A. Halladay, Wesleyan Reform Church House, 87-89 West Bar, Sheffield, 3.

THE CALVINISTIC METHODIST CHURCH OF WALES

THE CALVINISTIC METHODIST OR PRESBYTERIAN CHURCH OF WALES is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. Its form of government being Presbyterian, it is a constituent of the Pan-Presbyterian Council or Alliance. It is also a member of the British Council of Churches and the World Council of Churches. It has foreign missions in Assam and India.

In 1956 the body numbered—churches, 1,435; chapels and other buildings for Sunday-school branches, 1,670; ministers and preachers, 816; elders, 7,351; communicants, 147,132; Sunday-school teachers and officers, 12,633; Sunday-school scholars, 87,823; adherents (including communicants), 201,068. Contributions for various religious purposes (including the ministry), £816,517.

One of the features of the Welsh churches is the

Sunday-school, which is attended by adults as well as children.

The *Eastern Association*, which now includes nine of the English Presbyteries, was formed in 1947 and has 356 chapels and 28,459 communicants.

On 18 July, 1933, the Calvinistic Methodist or Presbyterian Church of Wales Act, 1933, received the Royal Assent. By this measure the autonomy of the Church in matters spiritual and the establishment of a Properties Board have been secured.

Moderators of Associations (1961-62)—*South Wales*, Evan Evans, London; *North Wales*, Rev. J. P. Davies, M.A., Portmadoc; *The East*, Rev. D. O. Calvin Thomas, M.A., Tenby.

Moderator of General Assembly (1961-62), Rev. William Morris, Caernarvon.

Chief Secretary, Rev. R. B. Owen, B.A., The Manse, Plas Avenue, Prestatyn, Flint.

THE INDEPENDENTS AND THE BAPTISTS

The INDEPENDENTS, or CONGREGATIONALISTS, are the most ancient community of Dissenters. In 1831 the majority of their churches united to form the Congregational Union of England and Wales, incorporated in 1902, and in 1920 nine provinces were formed, each with a Moderator. There are 51 county and other Associations in the British Isles, with 2,970 churches and preaching stations with 1,838 ministers and 211,329 members in England and Wales. *Chairman of the Congregational Union of England and Wales (1961-62)*, Rev. H. A. Hamilton, B.A. *Secretary*, Rev. H. S. Stanley, M.A. *Office and Publication Department*, Memorial Hall, Farringdon Street, E.C.4.

The *Countess of Huntingdon's Connexion*, with 37 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. Most of the churches are affiliated with the Congregational Union.

Secretary, B. Touch. *Offices*, 27 Dorking Road, Great Bookham, Surrey.

Other Religious Denominations.

The General Assembly of Unitarian and Free Christian Churches has about 243 ministers, 330 chapels and other places of worship in Great Britain and Ireland. *Gen. Sec.*, Rev. John Kielty, Essex Hall, Essex Street, W.C.2.

The Salvation Army, first known as the Christian Mission, was founded by William Booth, in the East End of London in 1865. In 1878 it took its present name and adopted a quasi-military method of government. Since then it has become established in all parts of the world. The head of the denomination, known as the General, is elected by a High Council consisting of all the Commissioners of the Army. In 1960 there were, in Great Britain, 1,218 Corps (Churches), 3,152 Officers engaged in evangelistic work and 53,650 Local Officers (lay workers). The latest statistics for the world (1960) are 16,557 Corps and 26,996 Officers. *General*, Wilfred Kitching (elected May 11, 1954).

International Headquarters:—113 Queen Victoria Street, E.C.4.

The Brethren number about 80,000, of whom five-eighths belong to the "Open" body. The Society of Friends (Quakers) consists of 21,222 members in Great Britain, and has 441 places of

THE CONGREGATIONAL UNION OF SCOTLAND. In 1795 James and Robert Haldane left the Church of Scotland and the churches which they founded formed the Congregational Union in 1812, which in 1896 united with the Evangelical Union (founded in 1843 by James Morison). There are 145 Churches of the Congregational Union of Scotland with a membership of 33,993. Of the 167 Ministers, 129 are Pastors. *President*, Rev. G. V. Jones, M.A., B.Litt., Glasgow. *Secretary*, Rev. J. T. George, 217 West George Street, Glasgow, G.2.

The BAPTISTS have over 23,000,000 members in all countries. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1960, 2,100 pastors and deaconesses. The members numbered 317,682, Sunday-school teachers 40,055, and Sunday scholars 265,655. *President of the Baptist Union (1961-62)*, E. R. Grief. *Secretary*, Rev. E. A. Payne, M.A., D.D., I.L.D. *Office*, 4 Southampton Row, W.C.1.

worship (*Recording Clerk*, Stephen J. Thorne). The total number in the world is about 160,000 (110,000 are in U.S.A. and Canada). *Central Offices (Great Britain)*, Friends House, Euston Road, N.W.1, (Ireland), 6 Eustace Street, Dublin. The Oxford Group ("Moral Re-Armament"), *Hqrs.*, 4 Hays Mews, Berkeley Square, W.1. The First Church of Christ, Scientist, in Boston, Massachusetts, U.S.A. (District Manager, Committees on Publication for Great Britain and Ireland, 30 Norfolk Street, Strand, W.C.2), has 336 branch churches and societies in Great Britain and Ireland. The Moravian Church, 5 Muswell Hill, N.10, has in the U.K. 40 congregations and preaching stations, with 2,807 communicants. The Free Church of England (otherwise called The Reformed Episcopal Church) has 43 churches in England, *Gen. Sec.*, Rt. Rev. W. Rodgers, 3 Langdale Road, Wallasey, Cheshire. The Seventh Day Adventists (*Hqrs.*, Stanborough Park, Watford, Herts.), have 112 organized churches, 45 companies and 9,252 members in the British Isles. At Woking, Surrey, is the Shah Jehan Mosque for Moslems, built in 1889. There are also Mosques at Southfield, S.W.18, Commercial Road E.1, Birmingham, Manchester, Cardiff and Glasgow.

THE JEWS

It is estimated that about 450,000 Jews are resident in the British Isles, some 280,000 being domiciled in Greater London. Of the total number in Great Britain about 90 per cent. are described as adhering to orthodox views.

The Board of Deputies of British Jews, established in 1760, is the representative body of British Jewry and is recognized by H.M. Government. The basis of representation is primarily synagogal, but secular organizations are now also represented. It is a deliberative body and its objects are to watch over the interests of British Jewry, to protect Jews against any disability which they may suffer by reason of their creed and to take such action as may be conducive to their welfare. *President of the Board of Deputies (Woburn House, Upper Woburn Place, W.C.1)*, Sir Barnett Janner, M.P. *Secretary*, A. G. Brotman. *CHIEF RABBI*—The Very Rev. Dr. Israel Brodie, born 1895, appointed 1948.

Secretary, Michael Wallach, *Office*, 85 Hamilton Terrace, N.W.8.

The *Beth Din* (Court of Judgment) is a rabbinic body consisting of *Dayanim* (Assessors) and the Chief Rabbi, who is President of the Court. The Court arbitrates when requested in cases between Jew and Jew and gives decisions on religious questions. The decisions are based on Jewish Law and practice and do not conflict with the law of the land. The *Beth Din* also deals with matters concerning dietary laws and marriages and divorces, according to Jewish Law.

Dayanim, L. Grossnass; A. Rapoport; Dr. M. Lew; M. Steinberg; M. Swift.

Clerk to the Court, Marcus Carr, Adler House, Tavistock Square, W.C.1.

Chief Rabbi of the Community of Spanish and Portuguese Jews in London (Established 1657), Dr. Solomon Gaon.

THE ROMAN CATHOLIC CHURCH

HIS HOLINESS POPE JOHN XXIII (Angelo Giuseppe Roncalli), Roman Pontiff, born in Sotto il Monte, Italy, November 25, 1881; ordained priest August 10, 1904; Archbishop of Areopolis March 3, 1925; Cardinal January 12, 1953; Patriarch of Venice January 15, 1953; elected Pope October 28, 1958; crowned November 4, 1958.

THE SACRED COLLEGE OF CARDINALS, when complete, consists of six Cardinal Bishops, fifty Cardinal Priests and fourteen Cardinal Deacons. This number was fixed by Pope Sixtus V in 1586. Pope John XXIII created 23 new Cardinals on December 15, 1958, a further 8 new Cardinals on December 14, 1959, 7 on March 28, 1960, and 4 more on Jan. 16, 1961. In August, 1961 there were 81 cardinals. The Cardinals are the advisers and assistants of the Sovereign Pontiff and form the supreme council or Senate of the Church. On the death of the Pope they elect his successor. The assembly of the Cardinals at the Vatican for the election of a new Pope is known as the Conclave in which, in complete seclusion, the Cardinals elect by secret ballot; a two-thirds majority is necessary before the vote can be accepted as final. When a Cardinal receives the necessary votes the Dean of the Sacred College formally asks him if he will accept election and the name by which he wishes to be known. On his acceptance of the office the Conclave is dissolved and the First Cardinal Deacon announces the election to the assembled crowd in St. Peter's Square. On the first Sunday or Holyday following the election the new Pope is crowned with the tiara, the triple crown, the symbol of his supreme spiritual authority. A new pontificate is dated from the coronation.

The Catholic Directory estimates the Roman Catholic population of England and Wales at 3,545,500, Scotland (1960) 787,170, Republic of Ireland (1955) 2,786,033, Northern Ireland (1960) 484,224. The figures for Canada (1956) are 6,260,546, Australia (1960) 2,051,124, New Zealand (1960) 313,106, India (1959) 5,392,272, Pakistan (1960) 304,446, Ceylon (1957) 609,928, Malta (1958) 290,600, Federation of Malaya (1960) 106,712, State of Singapore (1960) 43,600, Trinidad (1959) 247,500, Jamaica (1960) 111,554, Tanganyika (1960) 1,331,296, Uganda (1960) 1,698,569, Nigeria (1961) 1,630,352, Ghana (1960) 563,345; world total (estimated) 527,643,000.

LONDON CATHEDRALS, CHURCHES, ETC.

ST. PAUL'S CATHEDRAL, City of London, E.C.4 (1675-1710), cost £747,660. The cross on the dome is 365 ft. above the ground level, the inner cupola 218 ft. above the floor. "Great Paul," in S.W. tower, weighs 17 tons. Organ by Father Smith (enlarged by Willis) in case carved by Grinling Gibbons (who also carved the choir stalls). The choir and high altar were restored in 1958 after war damage and an American War Memorial Chapel was consecrated in November, 1958. The Chapel of the Most Excellent Order of the British Empire in the Crypt of the Cathedral was dedicated on May 20, 1960. Nave and transepts free; fees to the following parts (on weekdays only, 11 a.m. to 3.30 p.m. and—during Summer Time only—4.45 p.m. to 5.30 p.m.): Crypt, 6d. Library, whispering gallery and stone gallery, 1s.; golden gallery 1s.; ball, 1s.; total, 3s. 6d. Service on Sundays at 8, *10.30, *3.15, and *6.30. Weekdays at 8, *10, *4. Also Wednesdays, *12.30 p.m. Litany; Fridays, *12.30 p.m. short mid-day service. (*Services are choral.) To the S. are remains of the Chapter House and Cloisters of "Old St. Paul's," destroyed by the Fire of London in 1666.

WESTMINSTER ABBEY, S.W.1 (built A.D. 1050-1760).—Open on weekdays at 8 a.m. Admission to Royal Chapels by fee of 1s. (children 6d.), (weekdays) except on Mondays (open free). Transepts and Nave open on Sundays only between services. Holy Communion at 8; matins at 10.30; Holy Communion at 11.30. Evensong at 3. Evening service with Sermon at 6.30; Daily—Holy Communion at 8 a.m.; Westminster School Service at 9 a.m.; matins, 10 a.m.; evensong (choral), 5.0 p.m. (Saturday and Bank Holidays, 3 p.m.). Chapel of Henry VII, Chapter House and Cloisters; King Edward the Confessor's shrine, A.D. 1269, tombs of kings (Edward I, Edward III, Henry V, Mary, Queen of Scots, Queen Elizabeth I), and many other monuments and objects of interest, including the grave of "An Unknown Warrior" and St. George's Chapel at the W. end of Nave (1920), and Poets' Corner. The Coronation Chair encloses the "Stone of Scone," brought from Scotland by Edward I in 1297.

SOUTHWARK CATHEDRAL, south side of the Thames, near London Bridge, S.E.1.—Mainly 13th century, but the nave is largely rebuilt. Known as St. Mary Overie before 1540. Open 7.30 a.m. to 6.45 p.m., free. Sunday services, Holy Communion, 8.30 and 11 a.m., Morning Prayer, 10.15 a.m., Evening Prayer, 3 p.m., Nave Service, 6.30 p.m. Weekdays: 7.30, 8 and 5.30 p.m. (choral except Wednesdays) (5 p.m. on Saturdays). The tomb of John Gower (1330-1408) is between the Bunyan and Chaucer memorial windows, in the N. aisle; Shakespeare effigy backed by view of Southwark and Globe Theatre in S. aisle; the altar screen (erected 1520) has been restored; the tomb of Bishop Andrewes (died 1626) is near screen. The Early English Lady Chapel (behind the choir), restored 1930, is the scene of the Consistory Courts of the reign of Mary (Gardiner and Bonner); and is still used for this purpose. John Harvard, founder of Harvard University, was baptised here in 1607.

Education

ENGLAND AND WALES

Education in England and Wales is organized under the *Education Act, 1944* (Butler Act). Minor amending Acts were passed in 1946, 1948 and 1953. The main features of the system are (a) that the State school system is highly decentralized, education being the responsibility of 146 local education authorities (61 administrative counties, 83 county boroughs, 1 joint board and London). The County Authorities exercise their powers in many instances through Divisional Executive Committees and the Education Committees of Excepted Districts; (b) that voluntary agencies play an important part in educational provision often in co-operation with the State. The Ministry of Education controls the system mainly through the scheme of inspection and with power derived from statute. The expenditure of local education authorities is met partly from rates and partly from central government grants. The latter are paid mainly in the form of a general grant from the Ministry of Housing and Local Government

covering local health and other services as well as education. Detailed suggestions to L.E.A.s. are issued in Ministry of Education circulars and administrative memoranda. There are central advisory councils dealing with education in England and in Wales respectively.

A statutory report with full statistical tables is published yearly by the Ministry.

The State System

The State system is in transition as the 1944 Act is being implemented. The administrative system has been reorganized and the school-leaving age raised (April 1, 1947) to 15. The major problem at present is the provision of teachers and accommodation for the increased number of children at school between 1952 and 1962. Special attention is being paid to the development of technical education. Nearly 5,000 students were enrolled for courses leading to the Diploma in Technology in the 1960–61 session (3,800 in the preceding year). By Dec. 31, 1960, 344 had gained the Diploma and

by the end of the year 29 had applied to register as candidates for the new higher award of Membership of the College of Technologists. The number of Colleges of Advanced Technology rose to nine with the designation of the Bristol College. The total number of students attending full-time and sandwich courses in 1959-60 was over 9,000 and this will probably increase to 14,000.

The nine existing Colleges of Advanced Technology (see p. 534) had in 1961 some 9,000 students, of whom 3,800 were working for the Diploma in Technology. An additional college is designated at Acton. The Minister proposes that all the designated colleges should be given a status similar to that of Loughborough, which is administered by its own governing body and receives direct grant from the Ministry. All the premises and assets would be transferred from the local authorities to the new governing bodies, which would also take over liabilities such as loan charges for new buildings and buildings in course of construction. The total running cost of the colleges will rise to about £5,000,000 when the extension plans in hand are completed, and the Minister's proposal would relieve the local authorities of about £2,500,000 of rate-borne expenditure. Further developments will await the report of the Robbins Committee.

Education is envisaged in the 1944 Act in three stages:—

Primary Stage (for children up to 11 years). *Nursery Schools* to age 5 (must be provided by Local Education Authority for all parents who desire them); *Infant Schools*—from age 5 (compulsory school age); *Junior Schools*—from age 8 to 11.

About the age of 11 all children are to go to a secondary school. The suitability of the school may be reviewed at age 13.

Secondary Stage (11 years to 15 years, later to be raised to 16)—*Secondary Grammar Schools* (giving an academic education); *Secondary Technical Schools* (for those whose abilities are of a more practical character); *Secondary Modern Schools* (giving a general and practical education).

These Secondary Schools are intended to be of equal status and can be combined into a single multi-lateral or "comprehensive" school. The prevailing tendency is to foster wide experiment and flexibility in the organization of secondary schools. Education in Primary and Secondary Schools is free.

In 1956 Leicestershire began an important, limited experiment, transferring all children at 11 to non-selective "high schools" and transferring at 14 all children whose parents wish it and will keep them at school till 16 to grammar schools, thus doing away with the "11 plus" examination. Nottingham has established twelve secondary modern schools providing a 5 years' course to G.C.E. standard in either grammar or technical subjects.

Pupils in Secondary Schools may sit for the examinations leading to the award of the General Certificate of Education. The nine examining bodies set papers at three levels, ordinary, advanced and scholarship. Entrance to the Universities and to many courses of professional training depends on the results in these examinations. The total number of candidates at the 1960 summer examination was 356,617 at Ordinary level and 94,467 at Advanced, including 25,819 from secondary modern schools at Ordinary and 597 at Advanced. In accordance with the Third Report of the Secondary School Examinations Council a new and uniform system of grading and presentation of results of G.C.E. examinations at A level will be used by all examining bodies. There will be five grades of pass awards on main or

"basic" papers and two "supplementary" gradings (Distinction and Merit) for abler candidates who take "S" papers in addition to main papers: the existing Scholarship papers will be discontinued.

Since 1944 various bodies have set up examinations to meet the needs of pupils for whom the G.C.E. is not suitable. The Minister has accepted in principle the recommendation made by the Secondary School Examinations Committee in its 1961 report, *The Certificate of Secondary Education*, that new school-leaving examinations leading to such a certificate should be nationally established on a regional basis, and he has appointed a working party to consider the scope and standard of these examinations. The Council proposes that pupils should have completed five years of secondary education, that the examinations should be on a "subject" basis—i.e., that candidates should be free to enter for any subject or combination of subjects—and should be conducted largely under the control of teachers, but should be co-ordinated by the Council itself, which would advise the Minister on questions of recognition and standards, and should have the help of an examinations research and development unit. This follows the main recommendation of the Beloe Committee.

Further Stage. [Includes all types of provision for education after 15 (later 16).] *County Colleges* which, when established, all children not receiving full-time education will attend for the equivalent of one day a week from age 15 (later 16) to age 16 (later to be raised to 18); *Technical Colleges and Colleges of Art and Commerce* (providing specialist studies); *Evening Institutes* (evening classes in vocational and other subjects); *Service of youth* (recreational and other services for youth provided in co-operation with voluntary bodies); *Adult Education* (liberal education for adults provided in co-operation with voluntary bodies); *Community Centres*, etc.

In January, 1960, 6,924,281 children were present in the primary or secondary schools maintained, aided or controlled by Local Education Authorities. Of these 1,637,879 were in modern schools, 672,881 in grammar, 101,923 in technical, 38,359 in bilateral and multilateral and 128,835 in comprehensive.

There were nearly 16,000 more infants than in 1959. Both the decline in the number of juniors and the rise in the number of seniors were substantially less than in 1958. The number of pupils aged 15 and over rose by almost 50,000. The number in sixth forms was 99,214—12,157 more than in 1959. There were 120,338 in all direct grant schools, 294,286 in independent schools recognized as efficient, and 202,521 in other independent schools. The number of pupils in all special schools, including hospital, was 65,950. The number of children in all-age schools in 1960 was 267,350. The percentage of primary school children in classes of over 40 had gone down from 24.2 to 21.7. The percentage of children in senior classes of over 30 fell from 64.2 to 62.9 though the number of these classes increased by just over 1,000. In grant-aided establishments for further education, in October 1960, full-time students numbered 106,185, sandwich, 8,674 and part-time day-release students, 440,835.

Expenditure by local education authorities, during the year ending March, 1960 (excluding meals and milk) amounted to £597,000,000, compared with £536,000,000 the previous year.

The Youth Service

The Minister has issued regulations for the recognition by the Ministry of Qualified Youth Leaders, on a salary scale of £680 by £35(8) and £40 to £1,000: L.E.A.'s may pay £100-350 a year extra for posts of greater responsibility. Such

leaders must either hold a university diploma or a degree in social science, or have completed five years' satisfactory service by Aug. 1, 1963 as full-time leaders employed by a local education authority or by a national voluntary grant-aided organization, or complete a course of training for full-time leadership provided by the National College, Leicester; Westhill Training College, Birmingham; University College, Swansea; the N.A.B.C. in co-operation with Liverpool University; or the National Council of Y.M.C.A.'s. In cases of existing full-time leaders who cannot fulfil either of these conditions the Minister will consider with the Joint Negotiating Committee what further training they will need for qualification. Unqualified full-time leaders may be paid on the scale £500 by £30(6) to £680. It is proposed to double the number of full-time leaders in five years but the Youth Service must continue to rely upon the participation of many thousand part-time workers, who should have adequate opportunity for training, and such training in all areas should reach the same high standard.

Voluntary Agencies

The school system is complicated by voluntary agencies which have assisted greatly in educational development. A number of the primary and secondary schools are still provided by voluntary bodies, mainly religious, but have long been maintained by L.E.A.'s. Under the 1944 Act, the managers of such schools could obtain half of the funds required for rebuilding to modern standards, the schools remaining under their partial control as "aided schools" and the cost of running the schools being met by the Local Education Authority. Under the Act of 1959 the building grant has been increased to 75 per cent. in respect of existing schools and of new secondary schools where these are required to accommodate pupils from existing primary schools. If the managers cannot raise money necessary for rebuilding, schools become "controlled schools" under the management of the Local Education Authority, though with provisions enabling denominational religious instruction to be given. In January, 1960, there were 88,822 pupils in Church of England schools, 547,088 in Roman Catholic, and 146,797 in others; of these 956,922 were in aided schools, 543,524 in controlled and 49,199 in special agreement schools. Since 1945, grants of £13,018,098 and loan advances of £4,730,989 have been made for building. Of the 10,344 voluntary schools or departments (primary and secondary) in January, 1960, 4,782 had been given controlled, 5,442 aided and 120 special agreement status.

The Direct Grant Grammar Schools (non-profit-making and with some non-local characteristics) occupy a semi-independent position, getting grants direct from the Ministry. They are run by Boards of Governors with Local Education Authority representatives and take fee-paying pupils chosen by themselves. For these pupils fees are graded according to parent's means. At least 25 per cent. of the places must be free, and Local Authorities may claim up to a further 25 per cent. of places, for which no further fees are paid by parents. In Jan., 1960 there were 178 such schools with 108,663 pupils (8,978 being boarders). In January, 1960, there were 5 Direct Grant Secondary Technical Schools with 825 pupils.

About 90 Public Boarding Schools and nearly 4,400 Private Schools remain independent of the State system, except that many Public Schools give a limited number of places to nominees of Local Education Authorities. Under the 1944 Act all schools are being inspected by the Ministry and can be closed if found inefficient. Of these 4,400

schools, with about 500,000 pupils, 1,489 have been recognized as efficient 2,577 registered and 81 (of which 35 had come into existence during the year) provisionally registered.

In the field of Further Education many private bodies, often receiving grants of money from Local Education Authorities and from the Ministry, are associated with the public authorities.

Teachers

The number of teachers in the maintained primary and secondary schools must be further raised from 267,551, of whom 19.4 per cent. are graduates (March, 1960), to deal with the increasing child population. In particular there is a shortage of women teachers. The total number of teachers in grant-aided establishments is 304,046, of whom 22 per cent. are graduates. Teachers are trained in a total of 183 institutions of various types. These include 24 University Departments of Education providing a one-year course for graduates. In October, 1960, these had 3,217 students. The remainder provide a three-year course for non-graduates and, in certain instances, a one-year course for graduates, the number of whom is to be increased. In October, 1960, these had 29,419 students. 101 of the colleges are provided by Local Education Authorities. A large-scale plan of expansion has now been initiated, providing 24,000 additional places in the training colleges (the equivalent of 3 new universities) by 1966, thus about doubling the previous number of places. The voluntary colleges receive from the Government 75 per cent. of the building costs involved. Day training colleges, mainly for older and more mature students, have already been established in 5 areas and 3 others were opened in September, 1961. Teachers, other than graduates, must have satisfactorily completed a course of training. A degree or its equivalent entitles the holder to be given qualified teacher status but the National Advisory Council on the Training and Supply of Teachers has recommended the Minister to make training compulsory after 1968 for graduates who wish to teach in maintained schools. In March, 1960, the percentages of graduate teachers in maintained schools were, primary 3.9, modern 17.3, grammar 78.7. Slightly over half were untrained. In 1959-60 the Ministry approved the employment of 3,054 "temporary teachers", most being *bona-fide* candidates for admission to a training college or a full-time degree course. Of the 2,108 approved in 1957-58 only 113 remained unqualified in employment: 571 left teaching. In April, 1960, the Minister relaxed conditions for the approval of men as "temporary teachers", this to be reviewed not later than 1963. Payment of teachers is regulated by the Burnham Scale which provides £520 to £1,000 per annum and £468 to £800 per annum basic rates for men and women Assistant Teachers respectively, with, in every case, supplementary payment for degrees, specially responsible posts, etc., and for Headmasters and Headmistresses according to the size of the school. Salaries of men and women teachers have since been made equal. New salary scales proposed in 1961 had not been settled at the time of going to press.

EDUCATION IN SCOTLAND

The educational system of Scotland has developed independently of that of England and presents a number of distinctive features. The Scottish Education Department is the central body and the Education Authorities are the local bodies concerned in administering the provisions of the Education (Scotland) Act, 1946. These authorities are the councils of the four cities (Aberdeen, Dundee, Edinburgh and Glasgow) and 31 county councils or joint county councils. Educational facilities of

various kinds are also provided by the governing bodies of grant-aided schools, independent schools, central institutions providing advanced technical education and national voluntary organizations in the field of informal further education. The "Scottish solution" of the question of denominational schools arrived at in 1918 provided for the transfer of any denominational voluntary school to the management of the Education Authority subject to certain conditions relating to religious observances and the appointment of staff designed to preserve the denominational character of the school. Denominational schools provided by Education Authorities are subject to the same conditions.

Schools in Scotland fall into three main classes, viz. public schools, which in Scotland means schools managed by Education Authorities; grant-aided schools, conducted by voluntary managers who receive grants direct from the Department; and independent schools which receive no direct grant, but which are subject to inspection and registration. In the year ended July 31, 1960, there were 3,281 public schools, with a roll of 872,031, 48 grant-aided schools, with a roll of 21,778 and 137 independent schools, attended by 17,138 pupils.

Children between 5 and 11½ to 12½ attend primary schools. The secondary courses are junior, for pupils leaving school at 15, and senior, extending to four, five or six years. Some schools, called "comprehensive", offer both junior and senior secondary courses. There are 29 grant-aided secondary schools, mostly large and of considerable standing.

The Scottish Certificate of Education (formerly the Scottish Leaving Certificate) is awarded by the Department and is normally taken at the end of senior secondary courses of four or five years' duration. Pupils may take as many of a wide range of subjects as they are capable of attempting on either the Ordinary grade, corresponding to the G.C.E. Ordinary Level, or on the Higher, which, because there is less specialized study in sixth forms as understood in England, is not of so high a standard as the G.C.E. Advanced. In the award of a pass on either grade the teacher's estimate is taken into account as well as performance in the written examination.

Facilities for further education are provided by 16 Central Institutions (advanced colleges administered by independent Boards of Governors) and by further education centres managed by Education Authorities. The Central Institutions provide the highest form of specialized and fully organized instruction in science and technology, agriculture, commerce, domestic science and the arts. These colleges issue their own Diplomas and Associateships which are, in certain cases, equivalent in academic status to honours degrees and ordinary degrees.

The further education centres provide less advanced courses which are mainly part-time covering vocational and non-vocational subjects. The vocational courses normally lead to Craft certificates, certificates of the City and Guilds of London Institute or National Certificates. Courses are provided in any subject for which there is a reasonable demand.

There are seven Colleges of Education in Scotland. Six of the colleges (of which two are Roman Catholic residential colleges for women) provide both one- and three-year courses and are associated with a university. The seventh is a residential college of physical education for women. All men teachers must possess a university degree (except in certain "practical" subjects) and normally take a year's professional training at a College of Education. A considerable proportion of women

teachers take a degree or diploma and a year's training, but those who do not must take three years' training. The basic scales of teachers' salaries are non-graduate, graduate and honours graduate, with additional payment for posts of special responsibility.

EDUCATION IN NORTHERN IRELAND

The statutory system of education in Northern Ireland is broadly similar to the system in Great Britain. Under the 1947 Act primary education is provided in primary schools for children up to 11½ years of age or thereabouts when they are transferred to one or other of the types of secondary schools. Those who pass to secondary intermediate schools follow a practical curriculum and the remainder, most of whom have attained a qualifying standard at an examination conducted by the Ministry of Education, proceed to secondary grammar schools. A child who is successful at the qualifying test for entry to a grammar school is awarded a scholarship by the local education authority of the area in which he is normally resident. Reciprocal arrangements between local education authorities in the United Kingdom ensure that in the event of a change of residence of the parents of a pupil who has passed the necessary test either in Great Britain or in Northern Ireland, the pupil's grammar school education will be continued.

In 1960, the number of schools provided, maintained and assisted by Local Education Authorities in Northern Ireland was 1,782 with 285,239 children on the rolls. The estimated cost to the Exchequer for 1961-62 is £17,115,150 and from rates £5,102,583.

THE UNIVERSITIES

There are seventeen degree-giving universities in England (Birmingham, Bristol, Cambridge, Durham, Exeter, Hull, Leeds, Leicester, Liverpool, London, Manchester, Nottingham, Oxford, Reading, Sheffield, Southampton and Sussex): one in Wales (the University of Wales with Colleges at Aberystwyth, Bangor, Cardiff and Swansea); four in Scotland (Aberdeen, Edinburgh, Glasgow and St. Andrews); and one in Northern Ireland (the Queen's University, Belfast). There is also the University College of North Staffordshire which is empowered to grant its own B.A. degree. All these institutions are self-governing. The newly-founded University of Sussex admitted its first students in October, 1961, and plans are in hand for the establishment of new Universities of East Anglia (at Norwich), of Essex (at Colchester), of Kent (at Canterbury), of Warwickshire (at Coventry), and of York. A seventh new university is under consideration. The total number of full-time students in the existing universities (excluding the Queen's University, Belfast) and other university institutions receiving grants from the University Grants Committee in the session 1959-60 was 104,009 of whom 24,972 were women (compared with a total of 100,204 in the previous year and just over 50,000 in 1939). Plans are in progress for a possible expansion to 170,000 full-time students by the early 1970's. 82.4 per cent. of the students were assisted in whole or part by scholarships or other awards from public or private funds. The Government has accepted the recommendation of the Anderson Committee that an award from public funds should be given to all students admitted to degree courses who have two G.C.E. passes at A level or the equivalent. The recurrent expenditure of university institutions in Great Britain in 1959-60 amounted to £58,505,072. Grants for capital expenditure in 1961-62 are estimated at £24,900,000.

THE ASSOCIATION OF UNIVERSITIES OF THE BRITISH COMMONWEALTH

36 Gordon Square, W.C.1
(Branch Office: Marlborough House,
Pall Mall, S.W. 1.)

The Association holds quinquennial Congresses of the Universities of the Commonwealth, and other meetings in the intervening years, publishes the *Commonwealth Universities Yearbook*, etc., acts as a general information centre, and provides an advisory service for the filling of university teaching staff appointments overseas. It also supplies the secretariat for the Committee of Vice-Chancellors and Principals of the Universities of the United Kingdom, for the Commonwealth Scholarship Commission in the United Kingdom and for the Marshall Aid Commemoration Commission.

Secretary, J. F. Foster, M.A., LL.D.

ADULT EDUCATION

Adult Education is carried on in the United Kingdom by universities and university colleges (pp. 502-510), local education authorities (pp. 514-516) and by a wide variety of voluntary organizations.

The Universities Council for Adult Education, consisting of two representatives from each university was constituted in 1946 for interchange of ideas and formulation of common policy on extramural education.—*Hon. Secretary*, W. E. Salt, O.B.E., Dept. of Extra-Mural Studies, The University, Bristol.

The National Institute of Adult Education (England and Wales), 35 Queen Anne Street, W.1 (*Sec.*, E. M. Hutchinson, M.A.) and the Scottish Institute of Adult Education, Education Offices, Alloa, Clackmannan, exist to provide a means of consultation and cooperation between the various forces in adult education.

National Advisory Council on Education for Industry and Commerce

Established in 1948 to advise the Minister on national educational policy relating to industry and commerce.

Chairman, Sir Harry Pilkington.

Regional Advisory Councils

Set up in 1947 (i) to bring education and industry together to find out the needs of young workers and advise on the provision required, and (ii) to secure reasonable economy of provision. They also have certain responsibilities in connection with the procedure for the approval by the Ministry of Education of advanced courses, and issue handbooks, etc., giving, for the guidance of students and teachers, information about the facilities available within a region or district for various types of training (e.g. electrical engineering, textiles, building and chemistry). There are ten Regional Advisory Councils, in England and Wales:—

- REGION 1 (LONDON AND HOME COUNTIES).—Regional Advisory Council for Technological Education, Tavistock House South, Tavistock Square, W.C.1.
- 2 (SOUTHERN).—Regional Council for Further Education, 22 The Forbury, Reading.

Technical Colleges

The majority of the technical colleges in England and Wales are maintained or assisted by local education authorities. There are four main types.

Colleges of Advanced Technology. These provide a broad range and substantial volume of work exclusively at advanced level (whether in full-time, sandwich or part-time courses), including post-graduate and research work. They are required to fulfil certain conditions as to the constitution of the governing body, staffing, accommodation, etc., which are prescribed by the Minister of Education. Up to the present, nine establishments have been formally designated by the Minister as colleges of advanced technology:—

BIRMINGHAM COLLEGE OF ADVANCED TECHNOLOGY.—*Princ.*, P. F. R. Venables, Ph.D.

BRADFORD INSTITUTE OF TECHNOLOGY.—*Princ.*, E. G. Edwards, Ph.D.

BRISTOL COLLEGE OF TECHNOLOGY, Ashley Down.—*Princ.*, G. H. Moore.

LONDON: BATTERSEA COLLEGE OF TECHNOLOGY, Battersea Park Road, S.W.11.—*Princ.*, D. M. A. Leggett, M.A., Ph.D., D.Sc.

SALFORD ROYAL TECHNICAL COLLEGE.—*Princ.*, C. Whitworth, Ph.D.

CARDIFF: WELSH COLLEGE OF ADVANCED TECHNOLOGY.—*Princ.*, A. Harvey, Ph.D.

Regional Colleges. These are colleges which do a substantial amount of advanced work, including in particular, full-time and sandwich courses, but in which the volume and character of the advanced work are not such as to make it realistic for the colleges to concentrate entirely on such work. There are at present 22 regional colleges:—

ACTON: BRUNEL COLLEGE OF TECHNOLOGY.—*Princ.*, J. Topping, Ph.D.

BRIGHTON TECHNICAL COLLEGE.—*Princ.*, G. E. Watts, C.B.E., Ph.D.

Huddersfield COLLEGE OF TECHNOLOGY.—*Princ.*, W. E. Scott, M.B.E., Ph.D.

NOTTINGHAM AND DISTRICT TECHNICAL COLLEGE.—*Princ.*, D. A. R. Clark.

PLYMOUTH AND DEVONPORT TECHNICAL COLLEGE.—*Princ.*, E. Bailey.

PORTSMOUTH COLLEGE OF TECHNOLOGY.—*Princ.*, W. Davey, Ph.D.

RUGBY COLLEGE OF ENGINEERING TECHNOLOGY.—*Princ.*, G. S. Atkinson, Ph.D.

STOKE-ON-TRENT: NORTH STAFFORDSHIRE COLLEGE OF TECHNOLOGY.—*Princ.*, E. R. Patrick, Ph.D.

SUNDERLAND TECHNICAL COLLEGE.—*Princ.*, M. Hutton.

TREFOREST: GLAMORGAN COLLEGE OF TECHNOLOGY.—*Princ.*, D. P. Evans, Ph.D.

WEST HAM COLLEGE OF TECHNOLOGY.—*Princ.*, G. W. Bulmer, Ph.D.

Area Colleges. There are about 160 of these, providing mainly part-time courses up to the level of Higher National Certificate or its equivalent.

Local Colleges, of which there are about 270, provide on the vocational side a wide range of mainly part-time courses up to Ordinary National Certificate level or its equivalent.

In addition to these four main categories of technical college, there are some 8,500 *Evening Institutes* ranging in size from those with a few classes for adults in such subjects as music and arts and crafts to those catering for thousands of students in a wide variety of vocational as well as non-vocational classes.

There are also six *National Colleges* providing advanced and post-graduate courses for the comparatively few students from certain highly specialized industries for whom it would be impracticable to provide the highest level of training on a local basis. These colleges, which are financed partly by contributions from the industries concerned but, principally by means of grant from the Minister of Education are:—

COLLEGE OF AERONAUTICS, Cranfield, Bletchley, Bucks.

NATIONAL COLLEGE FOR HEATING, VENTILATING, REFRIGERATION AND FAN ENGINEERING, Borough Polytechnic, Borough Road, S.E.1.

NATIONAL COLLEGE OF FOOD TECHNOLOGY, St. George's Avenue, Weybridge, Surrey.—*Principal*, J. D. Mounfield, Ph.D.

NATIONAL COLLEGE OF RUBBER TECHNOLOGY, Northern Polytechnic, Holloway Road, N.7.

NATIONAL FOUNDRY COLLEGE, Stafford Street, Wolverhampton.

NATIONAL LEATHERSELLERS COLLEGE, Tower Bridge Road, S.E.1.—*Principal*, J. P. Danby, Ph.D., B.Sc.

SCOTLAND

Scottish Technical Education Consultative Council

The former regional advisory councils for technical education have been replaced by the Consultative Council which represents both sides of industry and educational interests. The Council's object is "to secure the widest possible measure of consultation on vocational further education between employers, employees and those responsible for its provision, and to advise, and generally to promote, the development of such education".—*Sec.*, W. A. M. Good, Scottish Education Department, St. Andrew's House, Edinburgh, 1.

Technical Colleges

Technical education is available at 95 day-course schools and colleges in Scotland, including those which specialize in a particular subject. The following are among those recognized by the Scottish Education Department as "central institutions" (colleges for higher technical learning); other Scottish central institutions appear under Agriculture, Art, Commerce, Domestic Science and Music.

PREPARATORY SCHOOLS

500 preparatory schools in England and Wales are members of the Incorporated Association of Preparatory Schools, recognition by the Ministry of Education as efficient being a condition of membership. The Association has a Joint Standing Committee with the Headmasters' Conference, and the Common Examination for entry to public schools is conducted by a committee of the Headmasters' Conference and I.A.P.S. *Secretary*, I.A.P.S., L. P. Dealtry, 31 Melbury Court, W.8.

HEADMASTERS' CONFERENCE SCHOOLS

THE HEADMASTERS' CONFERENCE.—*Chairman*, C. P. C. Smith (Haileybury and I.S.C.). *Sec.*, F. L. Allan, M.B.E., M.C., 29 Gordon Square, W.C.1. The annual meetings are, as a rule, held in September.

The election of a Headmaster to membership of the Conference depends on the following criteria: (1) the degree of independence enjoyed by the Governing Body and Headmaster; (2) the number of boys over 13 years of age in the school; (3) the number in proportion to this doing post-School Certificate work, and the quality and variety of that work; (4) the number of Undergraduates from the School in British Universities.

THE CENTENARIES OF 1962

The year opened with the Queen and nation in mourning for the Prince Consort, who had died in December, 1861, and with continued tension between Britain and the United States as a result of incidents arising from the American Civil War. The release by the Federal Government in January of Mason and Slidell, the Confederate Commissioners who had been taken by the Captain of a Federal vessel from the British mail steamer *Trent*, removed one source of contention, but, as the year progressed, others arose. On July 29, the *Alabama*, which had been building at Birkenhead, left the Mersey under pretence that she was proceeding on a trial trip, and sailed to Terceira, where she took on board Captain Sumner, under whose command she was used with great success to disrupt Federal commerce. Meanwhile the blockade of the Southern ports caused a shortage of cotton which brought about serious distress in Lancashire. A Cotton District Relief Fund was opened in July, to which the Queen contributed £2,000, and an Act was passed enlarging the powers of boards of guardians to relieve distress. At one time more than 140,000 persons in Lancashire were receiving outdoor relief. In October, Mr. Gladstone, then Chancellor of the Exchequer, gave some offence by an unguarded statement that Jefferson Davis, the Confederate President, had made a nation. This pronouncement was in contrast to the more cautious attitude of Earl Russell, the Foreign Secretary, who on behalf of the Government declined officially to recognize the Confederate States.

The Civil War itself continued inconclusively, although when the Federal Army was defeated on Aug. 30 at the second Battle of Bull Run, and Generals Lee and Jackson invaded Maryland, the cause of the South appeared to be prospering. On Sept. 22, President Lincoln declared his intention to recommend Congress to abolish slavery in states in rebellion against the United States. On Oct. 30, Napoleon III proposed to the English and Russian Governments that they, together with France, should act as mediators in America, and seek to secure a suspension of hostilities for six months. A fortnight later, however, Earl Russell rejected the suggestion on the ground that there was no reason to suppose that it would be accepted by the Federal Government.

Napoleon III was also unsuccessful in the part of mediator in Italy. French troops remained in Rome, but the French Emperor was unable to effect a reconciliation between the Pope and the new Italian Government which by then controlled all Italy except Rome and Venetia. In July, Garibaldi assembled a body of volunteers in Sicily with the intention of marching to Rome and raising the Italian flag there. In August the force crossed to the mainland but was defeated at Aspromonte on Aug. 29. Garibaldi was captured, but in October he and his followers were amnestied. These events had some repercussions in England, when on Oct. 5 a riot took place in Hyde Park between Roman Catholics and Garibaldian sympathisers, followed later in the month by similar disorders at Birkenhead.

In Prussia the year was marked by constitutional struggles. The Lower Chamber of the Diet refused to vote the sums proposed in the Budget for the great expansion of the army which was taking place under General von Roon. After various unsuccessful moves, the King, in September, chose Herr von Bismarck as Minister, and the latter closed the Chambers and proceeded to levy the taxes without parliamentary sanction.

In October, King Otto of Greece abdicated after an insurrection against his Government, and the throne was offered to Prince Alfred, Queen Victoria's second son. Apart however from other considerations, the convention of 1832, excluding members of the English, French and Russian dynasties from the Greek throne, made acceptance impossible.

On May 1, the Second International Exhibition to be held in London was opened at Brompton by the Duke of Cambridge. The Exhibition remained open for six months, during which it was attended by 6,117,450 visitors, only 50,000 fewer than were attracted to its more famous precursor of 1851.

Many improvements took place or were fore-shadowed during the year in London. On the Queen's birthday, May 24, the new Westminster Bridge was fully opened to public traffic, and in August the Royal Assent was given to the Thames Embankment Bill, empowering the Metropolitan Board of Works to embank the river from Westminster to Blackfriars. In March, George Peabody, an American merchant living in London, announced a gift of £100,000 to the poor of the metropolis. This, the first of many similar benefactions on his part, was used, in accordance with his suggestion, to build the first of the improved dwellings which later bore his name.

Princess Alice, Queen Victoria's second daughter, was married at Osborne on July 1 to Prince Louis of Hesse-Darmstadt and on November 4 the Prince of Wales's engagement to Princess Alexandra, daughter of Prince Christian, heir to the throne of Denmark, was announced.

At Wolverhampton, on July 17, Glaisher and Coxwell, the aeronauts, made their first ascent in Coxwell's celebrated new balloon. During the year they made several more ascents, from the Crystal Palace and elsewhere, one of which nearly ended in disaster, when at a height of more than 36,000 feet Glaisher became unconscious through cold, but Coxwell, who had lost the use of his hands, contrived to pull the valve string with his teeth and the balloon descended.

The most serious disaster of the year occurred on January 26, at Hartley Colliery near Newcastle-on-Tyne, when 204 miners lost their lives in consequence of the pumping apparatus collapsing and falling down the shaft.

During the year, Elizabeth Barrett Browning's *Last Poems* were published posthumously, Thackeray's *Adventures of Philip* were concluded in the *Cornhill Magazine* and George Borrow's *Wild Wales* appeared.

INCREASE OF THE PEOPLE

In England and Wales during the 19th Century, inter-censal increases in the population ranged from 18.06 per cent. to 11.65 per cent., an average of 14 per cent. every ten years; there was an average proportion of 1,050 females to 1,000 males. Between the censuses of 1951 and 1961 the increase was 5.3 per cent. The proportion of 1,088 females to 1,000 males in 1931 declined to 1,082 in 1951 and to 1,066 in 1961.

Estimates of the future total population of the United Kingdom, based on the mid-1959 annual estimate, have been prepared by the Government Actuary in consultation with the Registrars-General. It is assumed in their projections below that, at ages under 45, death rates will decline

steadily until at the end of 25 years they are at one-half of the present rates; at ages over 45, rates of decline become progressively smaller as age advances; after 25 years death rates at all ages will remain at the levels then reached; annual births are assumed to average 860,000 during the first 5 years, thereafter rising gradually to 935,000 in 1999. The ratio of male to female births is taken as 1.06 throughout and a net outward migration of 30,000 persons per year is assumed.

THE ANNUAL ESTIMATES OF POPULATION

Since 1948, estimates of the total population and of populations of counties and other local authority areas at June 30 each year have been prepared by the Registrars-General and published by Her Majesty's Stationery Office. The following table shows the estimated home population of the United Kingdom at June 30, 1960, and its distribution. Estimated populations at the same date for the counties and other administrative areas on pp. 632 *et seq* have in this edition been replaced by the preliminary figures for the Census of Population held in April, 1961.

ALIENS AND NATURALIZATION

Aliens.—Figures in the following table show the number of aliens registered with the police in the United Kingdom on Dec. 31, 1960. These figures exclude among others children under 16, diplomatic and consular officials, certain officials of international organizations and visitors spending less than three months in the country. Under the Aliens Order, 1960, aliens to whose stay in this country no conditions are attached are exempt from registration with the police.

Naturalization.—In the years 1946-1960, 98,083 certificates of naturalization were issued by the Home Department, an average of 10,621 each year in 1946-1950 and of 4,498 in 1951-1960. Numbers of persons naturalized by principal countries of origin are shown below. Figures for Russia include former nationals of Estonia, Latvia and Lithuania.

IMMIGRATION AND EMIGRATION, 1960

Immigration.—In the year 1960, a total of 74,700 persons from Commonwealth countries arrived in the United Kingdom for a stay of one year or more, 12,600 more than in 1959. Arrivals from the principal countries (with 1959 figures in brackets) were: from Canada 11,300 (12,200); Australia, 12,700 (10,900); New Zealand, 4,800 (4,100); South Africa, 6,100 (3,600); Rhodesia and Nyasaland, 2,900 (2,400); East and West Africa, 5,000 (4,300); India, Pakistan and Ceylon, 6,400 (6,500); Malaya and Borneo 4,600 (5,500);

West Indies and Bermuda, 15,600 (8,800); Other Commonwealth Countries, 5,200 (3,800). 7,700 persons arrived from the United States (1959, 7,200), and 2,400 from other foreign countries (1959, 2,300). Total immigration from all countries in 1960, 84,700 (1959, 71,600). *Emigration.*—In the year 1960, 80,100 persons left the United Kingdom for Commonwealth Countries for a stay of one year or more, 6,900 less than in 1959: to Canada 11,300 (12,400); Australia, 39,300 (39,100); New Zealand 6,500 (8,800);

South Africa, 2,800 (4,500); Rhodesia and Nyasaland, 2,000 (2,700); East and West Africa, 4,200 (4,300); India, Pakistan and Ceylon, 3,300 (3,400); Malaya and Borneo, 4,300 (4,200); West Indies and Bermuda, 3,500 (4,300); Other Commonwealth Countries, 2,700 (3,200). 11,100 persons emigrated to the United States (1959, 12,300) and 2,000 to other foreign countries (1959, 2,100). Total emigrants from U.K. to all countries in 1960, 93,200 (1959, 101,400).

TOURISTS IN THE UNITED KINGDOM

The number of tourists, including business visitors, to the United Kingdom in 1960 was 20 per cent. greater than in 1959, the total being 1,669,000 of which 55 per cent. travelled by air. In 1960 there were substantial increases in the numbers of visitors from the United States—426,500 compared with 356,500 in 1959—and from the Commonwealth countries—383,800 compared with 306,700 in 1959.

Tourist earnings in 1960 increased by £34,400,000 to £187,400,000; expenditure by visitors from N. America, £69,200,000; from Latin American countries, £5,700,000; sterling area, £66,800,000; Western Europe, £36,800,000; and from other non-sterling countries, £9,000,000.

ROAD ACCIDENTS IN 1960

It is estimated by the Royal Society for the Prevention of Accidents that there have been nearly 6 million casualties in road accidents in Great Britain since the beginning of this century. This figure includes 260,000 persons killed. Personal-injury accidents in 1960 totalled 271,787, resulting in 347,551 casualties (6,970 killed, 84,443 seriously injured, 256,738 slightly injured). Casualties to children totalled 53,667 (747 deaths, 11,857 serious injuries, 41,063 slight injuries). Vehicles licensed in 1960 totalled 9,383,817, a record figure. The cost of all road accidents in 1960 was estimated to be £229,000,000.

New Houses and Flats

Of the 103,235 new dwellings completed by local authorities in 1960, 42.4 per cent. were flats, 37.8 per cent. of the new dwellings had 3 bedrooms, 34.4 had 2 bedrooms, 26.2 per cent. had 1 bedroom and 1.6 per cent. 4 or more bedrooms.

Cost.—In the first quarter of 1952, the average tender approved by the Ministry of Housing and Local Government was £1,380 (or 28s. 0½d. per square foot) for a traditional three-bedroom house of an average floor area of 984 sq. feet (including out-buildings). The average tender price for this type of house at the beginning of 1956 was £1,448 (or 31s. 6½d. per square foot), with a smaller average floor area of 918 square feet. In the last quarter of 1960, the average tender price for all types of three-bedroom houses (including new traditional houses) was £1,644 or 36s. 10½d. per sq. ft., providing an average floor area per house of 892 sq. ft.

Conversions and Improvements

In 1960, applications for grants under the Housing Acts for the improvement or conversion of 130,832 houses were approved, including applications made by local authorities and housing associations for the conversion of 1,488 dwellings, for improvements to 8,060 dwellings and for provision of standard amenities in 33,138 dwellings. Applications by private persons were approved for 3,537 conversions, improvements in 34,928 dwellings and provision of standard amenities in 49,681 dwellings.

Slum Clearance and Repair

In 1960, 56,992 houses were demolished or closed in England and Wales, including 29,450 in scheduled clearance areas, and 158,450 persons were moved to other housing in consequence. At the end of 1960, a total of 34,367 unfit houses were retained in temporary occupation. As a result of informal action by local authorities, 152,463 dwellings were made fit or had defects remedied; in formal proceedings under the Health or Housing Acts, a further 82,807 dwellings were made fit or brought up to standard by their owners or by local authorities in default of action by the owners. 362 houses were reconstructed, enlarged or improved under the Housing Act, 1957.

Cases of Murder

The Homicide Act, 1957, in operation from March 21, 1957, removed from the category of

murder homicides (a) which were previously murder only by doctrine of constructive malice; (b) under severe provocation by words alone; (c) in pursuance of a suicide pact. It provided that a person charged with murder should not be found guilty of that offence if at the time of the offence he was suffering from diminished responsibility, but instead should be found guilty of manslaughter. The death penalty should not be imposed for murders other than capital murders* except where the murderer had committed another murder on a different occasion.

In 1960, 144 cases of murder of persons aged one year or over were known to the police. In 18 cases the offence was reduced to manslaughter. *Capital murder.**—In 2 cases which appeared to be of capital murder, the murderers had not yet been detected. 29 victims were murdered by 34 known murderers or suspects. Of these, 9 victims were murdered by 8 persons who committed suicide before arrest. In proceedings taken against 26 persons for the murder of the remaining 20 victims, four persons (including one person concerned in the murder of 3 victims) were found insane on arraignment, one person was discharged, 6 persons were acquitted, 3 persons (including one convicted of non-capital murder) were convicted and ordered to be detained during H.M. Pleasure (under 18), 2 persons convicted of non-capital murder were sentenced to life imprisonment. Of 10 persons sentenced to death, 7 were executed; in 3 cases sentence was commuted to life imprisonment. *Non-Capital Murder.*—In 2 cases which appeared to be of non-capital murder, the murderers were not yet detected. 93 victims were murdered by 98

known murderers or suspects. Of these, 33 victims were murdered by 29 persons who committed suicide before arrest. In proceedings taken against 69 persons for the murder of 60 victims, 2 were discharged. Of 67 persons committed for trial 10 persons were found insane on arraignment and 18 were acquitted. 7 persons were found guilty but insane. 32 persons were sentenced to life imprisonment.

Suicide

Coroners' returns for 1959 and 1960 show that 5,119 persons (female, 2,061) committed suicide in 1960 compared with 5,236 in 1959 and 5,237 in 1958. 5,145 cases of attempted suicide were

known to the police in 1960, compared with 4,980 in 1959 and 5,060 in 1958.

Cases of Murder.—In 1960, sixteen cases of murder were known to the police. Six of the 18 victims were under 10 years of age and one man was over 60. Of eight persons proceeded against, three were found insane and unfit for trial. Five persons were tried, of which two were found guilty of capital murder and sentenced to death; one was executed and one reprieved and imprisoned. Three persons were found guilty of murder of which two were sentenced to life imprisonment and one to be detained during H.M. Pleasure (under 18). Three persons were found guilty of murder and sentenced to life imprisonment.

Juvenile Crime.—In 1960, 21,441 juveniles were proceeded against for crimes and offences of all

kinds. 755 of these were acquitted or the charge against them was withdrawn. In 4,848 cases the charge was proved and an order made without a finding of guilt. In 15,459 cases where charges were proved with a finding of guilt, 5,589 juveniles were admonished, etc; 248 were cautioned (with or without surety); and 24 were found mentally defective. 680 juveniles were committed to approved schools, 603 to remand homes, 92 for Borstal training and 38 to the care of fit persons. 6 were placed on probation. 7,324 offenders were fined, and in 855 cases fines were imposed on the parent or guardian of the offender. 379 juveniles were discharged without trial, 2 as insane or weak-minded persons, and 377 otherwise discharged.

PRISON POPULATIONS IN 1959 AND 1960

The daily average population of all British prisons and Borstal institutions in 1960 was 30,206, compared with 29,732 in 1959. Figures of receptions by Prisons and Borstal institutions in 1959 and 1960 were:—

ORDINARY REVENUE OF THE UNITED KINGDOM. DISTRIBUTION

Following are summary details of Ordinary United Kingdom revenue, totals of which appear "above the line" in the *Financial Statement* presented to Parliament in the Budget annually. Items shown "below the line" are concerned with capital expenditure of the State and involve receipts applicable by statute to debt interest which would otherwise be paid out of revenue, receipts applicable to redemption of debt and payments for which the Treasury has power to borrow. A deficit "below the line" is met by Government borrowing or from surplus arising in revenue and expenditure "above the line"; a surplus is used to reduce the National Debt.

Year ended March 31.

TONNAGE LAUNCHED TO LLOYD'S REGISTER CLASS

Of the World tonnage launched during 1960, 46 per cent (3,880,130 tons) was to Lloyd's Register Class. This figure includes 1,298,892 tons (98 per cent.) of the tonnage built in British yards.

BRITISH RAILWAYS IN 1960

The *British Transport Commission* set up by the terms of the *Transport Act, 1947*, organized the Railways of Britain in six Regions under the control of the Railway Executive

(1) The *London Midland Region*, corresponding to the system of the London, Midland and Scottish Company in England and Wales.

(2) The *Western Region*, corresponding to the system of the Great Western Railway.

(3) The *Southern Region*, corresponding to the system of the Southern Railway.

(4) The *Eastern Region*, corresponding to the Southern Area of the London and North Eastern Railway.

(5) The *North Eastern Region*, corresponding to the North Eastern Area of the London and North Eastern Railway.

(6) The *Scottish Region*, corresponding to the Scottish systems of the London, Midland and Scottish and London and North Eastern Railway.

Certain revisions in the Regional boundaries have subsequently taken place, notably in the cases of the London Midland, Southern and Western Regions.

By the terms of the *Transport Act, 1953*, the Railway Executive ceased to exist on September 30, 1953, when its functions, together with those of the other Executives excepting the London Transport Executive, were assumed by the British Transport Commission.

Under the terms of the 1953 Act, the Commission was required to submit to the Minister of Transport and Civil Aviation a scheme for the reorganization of British Railways incorporating de-centralization of management whilst reserving to the Commission general financial control and general control of charges. This scheme, providing for the introduction of Area Boards, was received by the Minister on April 15, 1954, and came into effect on Jan. 1, 1955.

BRITISH TRANSPORT COMMISSION FINANCIAL RESULTS

OPERATING RATIOS.—Working expenses of the British Transport Commission in the operation of railways in 1960 amounted to 114 per cent. of gross receipts, compared with 109 per cent. in 1959 and 110 per cent. in 1958; in the operation of ships, working expenses were 80 per cent. of gross receipts in 1960 compared with 79 per cent. in 1959 and 86 per cent. in 1958.

OPERATING STATISTICS

In the year 1960, British Railways had 49,181 miles of standard gauge lines and sidings in use, including 18,369 miles of first track of which 1,264 miles were electrified. The total length of electrified track in 1960 was 3,394 miles. Standard rail on main lines has a weight of 109 lbs. per yard. British railways had 15,961 locomotives (steam, 13,276; diesel and diesel electric, 2,550; and electric, 135); 2,312 multiple-unit diesel power cars and 2,806 multiple-unit electric power cars in 1960. Engine miles run in passenger service totalled 252,879,000 and in shunting coaches 13,438,000. 40,091 passenger-carrying vehicles had a total of 2,330,583 seats or berths. 1,036,688,000 passenger journeys were made during the year, including 58,116,000 made by holders of Early Morning Tickets. The average distance of each passenger journey on ordinary fare was 23.89 miles; on Early Morning fare, 13.97 miles and on season ticket, 15.5 miles. Passenger stations in use in 1960 numbered 1,658 and freight stations 2,406.

Freight.—There were 961,947 freight vehicles and 14,871 other vehicles in the non-passenger-carrying stock. 40,048,000 tons of merchandise and livestock were carried in 1960, 148,064,000 tons of coal and coke and 60,388,000 tons of other minerals. Engine miles run in freight service totalled 122,563,000 and in shunting 64,831,000. Freight train miles per train engine hour were 9.16 in steam, 10.72 in diesel and 9.56 in electric locomotives. 642 net ton miles were run per total traction hour in traffic. 37,733 railway motor vehicles were in use in 1960 and 49,071 containers.

Staff and Wages

On Dec. 31, 1960, British Railways employed a total staff of 514,500 persons. Average weekly earnings at March 26, 1960, (with numbers of staff) were:—Men (455,825) £14 5s.; Women (30,048) £8 18s.; Youths and Boys (21,866) £7 5s.; and Girls (2,109) £4 0s.

MODERNIZATION

The British Transport Commission announced early in 1955, the Modernization and Re-equipment Plan for British Railways at a then estimated cost of £1,240,000,000. It has since made significant progress. The complete plan, covering a period of 15 years, envisages the provision of some 2,500 main-line diesel locomotives; about 8,200 vehicles for multiple-unit trains, of which some 3,600 are for electric and the remainder for diesel powered trains; a large number of diesel-shunting engines; electrification of certain main-line and suburban services; major improvements to goods marshalling yards and goods stations, and certain passenger stations; the provision of new rolling stock and carriage cleaning facilities.

Details of some of the major works and of new equipment provided under the Programme, include the following:—

Track and Signalling.—Long welded rails, giving lower maintenance costs, reduced train vibration and noise and diminished wear and tear of rolling stock, are now being produced at the rate of 300 miles a year. Modern signalling, including electric colour-light signals, more track circuits and power-operated signal boxes, and the extension of the automatic warning system, is now being installed on a large scale and work is in progress or planned in some 20 areas. In addition to many other improvements, extensive new signalling works are being carried out in connection with electrification programmes. A new fly-over at Blechley (London Midland Region) is now in use.

Electrification.—Following completion of the first phase of the Southern Region electrification of the Kent Coast lines, work is well advanced on the second and final phase (Maidstone East and Sevenoaks to Folkestone, Dover and Ramsgate, 132 miles) planned for completion in June, 1962; electric traction was being introduced progressively during 1961. In September, 1960, electric train services were brought into operation between Manchester and Crewe—the first stage of the London Midland main line electrification scheme (Manchester and Liverpool to Birmingham and London). Two other electrified services were inaugurated in November, 1960, the Liverpool Street-Enfield Town-Chingford-Hertford East-Bishop's Stortford scheme (Eastern Region) and the first phase of the Glasgow suburban services (Scottish Region). The London (Fenchurch Street) to Tilbury and Southend, and the Chelmsford to Colchester electrification projects were expected to be in operation during 1962.

Diesel Traction.—Of the 1,862 main-line diesel locomotives ordered, 1,019 had been delivered by July, 1961; by the end of 1961 about 1,300 were expected to be in service. Over 1,800 diesel shunting engines are in use, and nearly 4,000 diesel multiple-unit train vehicles. Main-line diesel services are in operation throughout the country. Five new diesel-electric air-conditioned Pullman trains with exceptional standards of comfort are now running between Manchester-London (St. Pancras), Bristol-London (Paddington), and Wolverhampton, Birmingham-London (Paddington). In mid-1961 some 75 per cent. of all the passenger train miles run were operated by diesel or electric traction.

Passenger Stations.—Improvements are in progress or have been carried out at many stations, including major schemes of reconstruction at Manchester (London Road) (to be renamed Piccadilly), Manchester (Oxford Road), Coventry, Stafford, Colchester, Plymouth (North Road), Cambuslang, Bishop's Stortford, Harlow, Broxbourne, Garscaden, Hyndland and Chichester. Planning for the comprehensive scheme for the combination of Leeds City and Central Stations is well advanced.

Freight Yards.—New freight marshalling yards are at present under construction or planned at more than 20 places, and include those at Millerhill (Edinburgh), Carlisle, Crewe (Basford Hall), Bescot, Newport (Tees-side), Lamesley and Perth. In 1960-61, new marshalling yards at Margam (Port Talbot) and Ripple Lane (Barking) were completed.

ROADS

The total mileage of public roads in Great Britain is 201,706 miles, of which 173,624 are in England and Wales and 28,082 in Scotland. The cost of maintenance, improvement (widening,

etc.) and new construction in 1954-55 was £28,500,000, and in 1959-60 approximately £188,028,000, which includes £53,325,000 spent on Trunk Roads but excludes sums recoverable from frontagers, public utilities, etc. The roads of Great Britain are classified by the Ministry of Transport, and out of the total mileage of 201,705 there are 8,438 miles of Trunk Roads, 19,738 of Class I, 17,606 of Class II and 48,913 of Class III roads.

Highway Authorities.—The Minister of Transport became the highway authority for some 8,190 miles of road in Great Britain under the Trunk Roads Acts of 1936 and 1946 (now consolidated in the Highways Act, 1959). These roads which comprise the national system of routes for through traffic, are known as trunk roads and the Minister (in Scotland from April 1, 1956, the Secretary of State) is responsible for their maintenance and improvement. Under the Local Government Act, 1929, county councils in England and Wales became (from April 1, 1930) the highway authorities for all roads in rural districts except trunk roads, and all country roads (which include Class I, Class II and Class III Roads) outside county boroughs and metropolitan boroughs. County boroughs are responsible for all roads within their boundaries with the exception of trunk roads. Borough and urban district councils are the highway authorities for roads other than trunk roads and county roads which lie within their areas. In Scotland similar provisions have been made. In England and Wales under the Act of 1929, provision is made for borough councils and urban district councils in certain circumstances to act as highway authorities for country roads.

Grants made to Highway Authorities for the year ended March 31, 1960, amounted to £53,881,000 (a decrease of £5,382,000 on previous year's figure). Payments for work carried out on trunk roads totalled £55,408,000 (compared with £45,441,000 for the previous financial year).

Motorways.—The motorway network planned for England and Wales is designed to carry through traffic at relatively high speeds between important centres of trade and industry. These new motorways are dual carriageway roads restricted to motor traffic which can enter or leave only from the left at a limited number of specially constructed junctions. They are planned so as to eliminate all sharp bends and steep gradients, and are carried over or under existing roads which cross their path. They are fenced throughout and no frontage development is permitted except at specified service areas where there are refreshment and refuelling facilities.

The network is based on five main motorways: the London-Birmingham-Lancashire Motorway, the Birmingham-South Wales Motorway, the London-South Wales Motorway, the London-Yorkshire Motorway, and the Medway Towns Motorway. Shorter motorways known as the Midland Links will connect the three main motorways converging on Birmingham from London, from South Wales, and from the North-West. Other lengths of motorway are planned to radiate from London, and will comprise the London-Basingstoke Motorway, the Brighton Radial extending to the south of Crawley, and the Norwich Radial to Bishop's Stortford. On the Great North Road (A.1), motorways will bypass Stevenage, Doncaster, Darlington and Durham; a motorway is also planned to run across the Pennines between Lancashire and Yorkshire.

By the middle of 1961, seven motorways had been opened to traffic. These were the London-Birmingham Motorway (73½ miles), the Preston

Bypass (8½ miles) and Lancaster Bypass (11½ miles) forming part of the London-Lancashire Motorway, the Ross Spur (20½ miles), the Maidstone Bypass (7½ miles), the Maidenhead Bypass (6 miles) forming part of the London-South Wales Motorway, and the Doncaster Bypass (15½ miles).

Work is now in hand on the 78-mile motorway from Birmingham to Preston, and construction of the three large viaducts on this route is well advanced. The 28 mile northern section of the Bristol-Birmingham Motorway is also under construction, and it is hoped that this section will be open to traffic in the Spring of 1962. On the route from London to South Wales work began in March, 1961, on the substructure of the huge suspension bridge which will carry the motorway over the River Severn. At the eastern end of the same route work is in hand on the Slough Bypass (5 miles) and on the Chiswick-Langley Motorway (12 miles) which will be carried on a viaduct for upwards of a mile some 20ft above the existing Great West Road. Work is also in progress on the 25-mile long Medway Towns Motorway leading to the Channel Ports.

Trunk Roads.—The modernization of the Great North Road (A.1), continued at an increasing rate in 1961. Among the many completed schemes are the Stamford and Doncaster By-passes. The latter was built to motorway standards. Schemes which are due to be completed in the first half of 1962 are the by-passes of Grantham and Stevenage. Other schemes in the road programme in course of construction include the Staines By-pass which, together with the associated new Runnymede Bridge, was due to be completed early in 1962 and the Queensferry By-pass in Flint. Another scheme in Wales of even greater national importance is the reconstruction of the Heads of the Valleys Road, A.465, two sections of which are well under way. A start will be made this year on schemes to complete the Oxford outer ring of By-passes.

Classified Roads.—In London about one-third of the work had been completed in mid-1961 on the £5,000,000 scheme between Hyde Park Corner and Marble Arch. Over half the work had been completed on the cantilevered flyover at Hammersmith which is expected to cost about £1,200,000 and forms an integral part of the Cromwell Road Extension scheme to provide a direct through route for traffic from central London to London Airport and the West. Outside London, work is continuing on many important projects such as the Inner Ring Roads of Birmingham, Wolverhampton, Southampton and the Swansea East Side Approach Road.

Runcorn-Widnes Bridge.—A new high-level bridge costing about £2,900,000 and incorporating the largest steel arch span in Great Britain (1,082 feet) was opened in July, 1961, replacing the old transporter bridge carrying road traffic over the River Mersey and the Manchester Ship Canal between Widnes in Lancashire and Runcorn in Cheshire. This has generally improved communication in the North-West and has saved much time for the heavy North-South traffic.

Tyne Tunnel.—Work started in 1961 on the driving of the new road tunnel under the River Tyne between Jarrow and Howden. At present there is no vehicular crossing of the Tyne between Newcastle and the sea, except by ferries. The tunnel with its approach roads, will connect the Gateshead-Sunderland Road (A.184) to the Newcastle-Tynemouth Road (A.1058), and proposed extensions of the approach roads will provide a by-pass round the east side of the main Tyneside urban area for traffic from the Great North Road. The tunnel itself will be nearly one mile long and

has a single 24 ft. carriageway within its internal diameter of 31 ft. 3 in. Separate tunnels for cyclists and pedestrians were opened in 1951 but the main scheme was deferred because of restrictions on capital expenditure on roadworks. Part of the cost will be recovered by tolls. The project will take about 5 years to complete and will cost approximately £12,500,000 towards which the Minister of Transport is making grants and loans amounting to £9,500,000.

New Thames Road Tunnel.—The driving of a new road tunnel under the Thames, from Dartford, Kent, to Purfleet, Essex, started on March 21, 1957. The project was authorized by Acts of Parliament in 1930 and 1937 and a pilot tunnel was completed in 1938, but progress was interrupted by the war. It is estimated that the scheme will take 5 years to complete and will cost about £11,000,000, of which three-quarters is to be repaid by toll revenue from 3,000,000 vehicles expected to use the tunnel each year. The tunnel and its approach roads will connect the London-Southend Road (A.13) and the London-Rochester Road (A.2), passing over or under intervening roads.

Situated in the Long Reach of the Thames, where the river is half a mile wide, the project provides for a single tunnel 4,700 feet long, carrying a roadway for two lanes of traffic. The roadway will fall from the tunnel entrances towards the river on gradients of 1 in 28 with a short section practically level underneath the river. At the lowest point in the tunnel the roadway will be 100 ft. below the high water level. The tunnel is iron lined to an internal diameter of 28 ft., using some 34,000 tons of cast iron and 260,000 bolts. The existing pilot tunnel of 12 ft. diameter was dismantled as construction of the full tunnel proceeded and its lining recovered for use elsewhere. The carriageway in the tunnel, carried on a reinforced concrete structure, will be 22 ft. wide between the kerbs, with minimum vertical headroom of 16 ft. at the kerb. Pedestrians will not be admitted to the tunnel.

Duplication of Blackwall Tunnel.—In June, 1960, work started on the duplication of the road traffic tunnel under the Thames at Blackwall. The new tunnel will be about 250 yards downstream from the old one. It will have a 20 ft. carriageway and on completion in 1965 will take southbound traffic only, while the old tunnel will carry northbound traffic. The northern approaches have been redesigned accordingly. The tunnel will cost about £6,700,000, towards which the Ministry of Transport will make a grant of about £5,000,000.

New Clyde Road Tunnel.—Work has been proceeding since June, 1957, on driving a new road tunnel under the River Clyde in Glasgow. This project, authorized by Act of Parliament in 1947, provides for two tunnels to link A.814 at Whiteinch with A.8 at Linthouse at a total cost now estimated at more than £10,000,000. The tunnels and approaches will provide two 12-ft. carriageways with a nominal headroom of 16 ft. 6 ins. and will cater for cyclists and pedestrians below the main carriageways. Difficult ground conditions caused serious delay at the end of 1960, but the first tunnel is expected to be open to traffic in 1963 and the second a year later.

New Road Bridge across the Firth of Forth.—Under powers conferred on the Forth Road Bridge Joint Board by Acts of Parliament between 1947 and 1960, a suspension bridge is being built to carry A.90 across the Firth of Forth at South Queensferry. Construction, begun in September, 1958, is expected to continue for 5 years and to cost about £16,000,000, of which £10,850,000 will be found by Government loan to be repaid from tolls

charged for the use of the bridge. The new bridge will be about half a mile upstream from the famous railway bridge and the clear centre span of 3,300 ft. will be the longest in Europe. Dual carriageways each of 24 ft. and, outside the main cables, cycle tracks and footpaths of 9 ft. and 6 ft. respectively will be provided. The main towers, rising to 500 feet above sea level, and the suspension cable anchorages were completed in 1961 and the spinning of the suspension cables by a process new on this side of the Atlantic ready to start. The contracts for the approach viaducts and for the approach roads on the north and south of the Forth have been let.

Motoring Offences.—A total of £2,491,986 in fines was paid by motorists in 1960. The number of persons charged in respect of 1,041,513 offences was 813,888. In addition written warnings were sent to 219,346 persons in respect of 245,105 alleged offences. Of the 594,542 persons prosecuted, 15,336 were arrested.

Convictions numbered 765,365 (against 744,783 in 1959) and a sentence of imprisonment without the option of a fine was passed on 2,093 persons for 5,793 offences. The number of motorists fined was 566,225 for 744,345 offences. Endorsements of licences numbered 226,557, of which 47,729 involved disqualification.

INLAND WATERWAYS

There are about 2,400 miles of inland waterways in use in Great Britain. Of these about 2,000 miles are administered by British Transport Waterways. In the year 1960, 9,621,000 tons of goods—coal and other fuel, liquids in bulk and general merchandise—were carried on the inland waterways, compared with 9,037,000 tons in 1959 and 9,298,000 tons in 1958.

The Thames Conservancy had 136 miles of waterways in use in 1960 and carried 140,390 tons of goods; Manchester Ship Canal (36 miles) carried 17,704,422 tons and its Bridgewater Division (40 miles) carried 522,922 tons of goods.

AERODROMES AND AIRPORTS

Cost of the State Airports

Under the Civil Aviation Act, 1946, 22 civil airports are operated by the Ministry of Aviation. They include the three major international airports, London (Heathrow), London (Gatwick) and Prestwick; and eleven other airports which either cater in part for international traffic or are locally important—Aberdeen, Belfast, Blackpool, Bournemouth, Cardiff, Edinburgh, Inverness, Isles of Scilly, Land's End, Renfrew and Stansted. The remainder are used by air services operated to meet the need for air communication in the Scottish highlands and islands—Benbecula, Islay, Kirkwall, Machrihanish, Stornoway, Sumburgh, Tiree and Wick. Following are brief details of revenue and expenditure of the state airports in 1959-60. Assets (land, runways and aprons, buildings, plant, services and equipment) were valued at £45,828,754 on March 31, 1960.

Airport	Revenue	Expenditure	Net Cost, 1959-60
London (Heathrow).....	£4,875,069	£6,037,295	£1,162,226

ALL STATE AIRPORTS.....	£7,356,040	£12,876,146	£5,520,106

*The eleven airports mentioned above, together with Birmingham and Liverpool (now operated by the Birmingham and Liverpool Corporations), Southampton (now privately owned), Blackburn and Croydon (now closed), but excluding Edinburgh (taken over by the Ministry of Aviation on July 1, 1960).

AIRLINES

STATE AIRLINES

In 1960 the United Kingdom Airways Corporation, British European Airways and British Overseas Airways, together with companies operating scheduled services under Associate Agreements, flew respectively 38,879,000, 53,278,000 and 14,277,000 aircraft miles, and carried 3,866,000, 734,000 and 1,275,000 passengers. Passenger miles flown were 1,352,167,000, 2,332,613,000 and 272,316,000 respectively. Total freight and mail ton-miles flown were 22,666,000, 72,351,000 and 16,425,000 respectively.

FUEL USED

Electricity.—Consumption of coal in the production of electricity rose from 14,010 thousand tons in 1938, to 50,500 thousand tons in 1960. Coke, including coke breeze, consumed in 1938 was 176,000 tons; in 1960 888,000 tons. Oil consumption rose from 20,000 tons in 1938 to 5,292,000 tons in 1960.

Gas.—Consumption of coal in the production of gas rose from 19.1 million tons in 1938 to 22.0 million tons in 1960-61. Oil for gasmaking rose from 124,000 tons in 1938 to 751,700 tons in 1960-61.

EMPLOYMENT IN 1960

Distribution of total manpower in Great Britain

Consistent with a rise in the total working population between 1950 and 1960 of 1,480,000 (males, 560,000; females, 920,000), total manpower in Great Britain on June 30, 1961, was 24,590,000 (males, 16,283,000; females, 8,307,000). The total number of persons in civil employment was 23,865,000 (men, 15,640,000; women, 8,225,000) including persons temporarily stopped.

STOPPAGES OF WORK IN 1960

In the United Kingdom in 1960, there were 2,832 new stoppages of work and a further 17 which had been in progress at the beginning of the year, a total of 2,849, compared with 2,105 stoppages in progress in 1959. 819,000 workers were involved in these stoppages, of whom approximately 118,000 were thrown out of work at the establishments where the stoppages occurred, but were not parties to the dispute. The comparable figures for 1959 were 646,000 and 124,000.

3,024,000 working days were lost in 1960 through stoppages in progress during the year (1959, 5,270,000), an average of 5 days lost per worker, compared with 10½ days per worker in 1959. Approximately 515,000 working days were lost in the motor and cycle manufacturing industries, 494,000 in coal mining, 421,000 in port and inland water transport, 387,000 in shipbuilding and marine engineering, 293,000 in engineering (other than marine or electrical), 124,000 in sea transport, 11,000 in construction, 108,000 in bakery (bread, flour confectionery and biscuits) and 101,000 in electrical machinery, apparatus and goods.

FOREIGN WORKERS

During 1960 a total of 50,355 permits were issued for the admission of foreign workers for employment in Great Britain, an increase of 6,984 over the total in 1959. 2,004 permits were refused.

The principal occupations for which permits were issued were: Domestic service, 20,969; Concert,

stage, film, variety and other entertainment, 4,986; Industry and commerce, 7,538; Hotel and restaurant service, 6,293; Teaching, 1,585; Nursing, 2,224; Student Employees, 6,716; Film Technicians, 44.

Special facilities are offered by the Ministry of Labour to undermanned industries and services for the bulk recruitment of Italian workers. During 1960, a total of 1,061 Italian men and women were brought to vacancies in Great Britain through these facilities.

Nationalities of workers who received permits in 1959 and 1960 were as follows:—

AGRICULTURE

Agricultural Holdings

Of the total number of agricultural holdings in Great Britain in 1960, 78 per cent. were of 100 acres or less in area. In England the average size was 74 acres, compared with Scotland's 71 acres, and an average of 51 acres in Wales. In 1957, 69 per cent. of the farms in England and Wales had mains electricity supply. The National Farm Survey of England and Wales, carried out in the early years of the last war, showed that 47 per cent. of the holdings with farm houses had a piped water supply, while 45 per cent. relied on wells as the principal source of water. The number of agricultural holdings in Great Britain in 1960, excluding rough grazing and holdings consisting solely of mountain and heathland, was:—

Productive Objectives and Price Guarantees

In the Annual Review and Determination of Guarantees presented to Parliament in March 1961, the Government announced that agricultural net output in 1960-61 was forecast at 72 per cent. above pre-war, compared with 69 per cent. for 1959-60, which was the record figure.

A new index of agricultural net output was introduced in 1960 which discards comparison with pre-war years. This takes the average net output of the years 1954-55 to 1956-57 as 100. On this basis net output for 1960-61 was forecast at 114 compared with 104 for 1958-59 and 114 for 1959-60.

There was a greater acreage under cereals in 1960 but the prolonged rains from July made harvesting difficult and although yields of most crops increased, quality suffered. The number of calves retained for beef production declined but the size of pig-breeding herds recovered slightly. Production of mutton and lamb remained stable. Milk production continued to rise at a faster rate than consumption and there was a lower output of eggs, although a moderate increase is forecast for 1961-62.

In their Annual Review and Determination of Guarantees, 1961, the Government have borne in mind the conclusions reached in the talks which took place between the Agricultural Departments of the United Kingdom and the Farmers' Unions of Great Britain in the latter part of 1960 and covered a wider range of topics than possible in the annual review.

When the Agricultural Act was passed in 1947 the need was for a general increase in output. Now this has been achieved, here and in other countries, so expansion must be directed where there can be greater efficiency and where home produced goods can become more competitive with overseas products without a great increase in Government subsidies. In the cases where British products largely satisfy the home demand, e.g. milk, eggs, and potatoes, the scope for profitable expansion depends on the producers ability to expand the consumers market.

The Unions emphasized the importance of improving marketing arrangements and techniques to ensure greater efficiency and more constant supply, especially important for barley whose price drops quickly in the large sales just after harvest.

The income of the industry rose slightly on a normal weather basis despite rain at harvest time, and the forecast for 1960-61, adjusted to normal weather conditions, is £373 million. This is £18 million more than in 1959-60, even though there has been a net increase in the cost of goods and services used in agriculture of £19 million compared with £13 million in 1959-60, mainly because of increases in wages and rents. For 1961-62 the Government will increase the total value of guarantees by £14 million to £1,293 million.

The guaranteed price of fat cattle is raised by 10s. a live cwt. to encourage beef production, and as this is a long term investment policy for the farmer the price will not be reduced in the next review.

The guaranteed price for fat pigs is increased by 3d. per score in the hope of building up the breeding herd, and, in an attempt to rid the industry of recurrent pig cycles, a flexible guarantee arrangement has been devised whereby adjustments are made to the basic price each quarter.

The crop of potatoes was again large and producers' returns were low. The guaranteed price is raised by 5s. a ton, and as roughly the present acreage is needed to meet demand in years of average yield, the Government and the Potato Marketing Board have agreed to establish a Market Support Fund to strengthen the market for potatoes in years of heavy surplus.

The rate of subsidy on barley is nearly half the market price, proportionally far greater than for any other commodity. The guaranteed price has been reduced by 1s. 2d. per cwt. and to prevent the drop in prices during the glut after harvest, the average rate of acreage payment to growers who deliver barley after sale in the later months of the cereal year will be greater than in the earlier months. The guaranteed price of wheat is unchanged and that of oats increased by 3d. per cwt.

The Crops of 1961

Following is the index of the condition of each principal crop in Great Britain on September 1, 1961, published in *The Times*, with its 10-year average. 100 is taken to represent healthy condition, full growth and freedom from injury: wheat, 92 (94); barley, 92 (92); oats, 89 (89); potatoes, 87 (89); sugar beet, 88 (92); grass, 89 (92).

CLOSE TIMES FOR WILD BIRDS AND GAME

Wild Birds.—The *Protection of Wild Birds Act, 1954*, lays down a close season for wild birds (other than Game Birds) from February 1 to August 31 inclusive, each year. Exceptions to these dates are made for—

Capercaille and (except Scotland) *Woodcock*, Feb. 1—Sept. 30.

Snipe, Feb. 1—Aug. 11.

Wild Duck and *Wild Goose* (in or over water areas), Feb. 21—Aug. 31.

Birds which may be killed or taken outside the close season (except in Scotland on Sundays, on Christmas Day or in a prescribed area) are the above and coot, curlew (other than stone curlew), bar-tailed godwit, moorhen, plover (golden or grey), common red-shank, certain wild duck (common pochard, gadwall, mallard, pintail, shoveller, teal, tufted duck, widgeon) and certain wild geese (bean, Canada, pink-footed and white-footed).

Certain wild birds may be killed or taken at any time by authorized persons—cormorant, crow, gull (black-backed or herring), jackdaw, jay, magpie, rook, shag, sparrow, sparrowhawk, starling, stock-dove and wood pigeon; and, in Scotland only, goosander, red-breasted merganser and rock-dove. The sale of Wild Bird's Eggs is prohibited, except that gulls' eggs may be sold at any time and those of the lapwing (green or black plover) from Jan. 1—April 14 inclusive.

Game Birds—In each case the dates are inclusive:—

Black Game—Dec. 11 to Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).

* *Grouse*—Dec. 11 to Aug. 11.

* *Partridge*—Feb. 2 to Aug. 31.

* *Pheasant*—Feb. 2 to Sept. 30.

* *Plumage*—(Scotland only) Dec. 11 to Aug. 11.

It is also unlawful (in *England and Wales*) to kill the game marked * on a Sunday or Christmas Day.

LOCAL GOVERNMENT IN THE UNITED KINGDOM

ENGLAND AND WALES

Local government is carried on by directly elected councils whose powers and duties are defined by statute, under the general supervision of various departments of the central government. Departments principally concerned are the Ministries of Housing and Local Government, Education, Health and Transport; and, in matters affecting law and order, police, fire services, care of children, civil defence preparations, etc., the Home Office. Supervision is by means of inspections and enquiries, issue of Regulations and Orders, approval of bye-laws, loan sanctions for capital expenditure, examination of accounts and the administration of government grants.

County Councils.—Constituted by the Local Government Act, 1888, they were made responsible for administrative duties which were previously performed by the justices of the peace in quarter sessions. In the main their functions relate to the more important services. In most cases the area of the administrative county is that of the geographical county, excluding county boroughs. Lincolnshire, Suffolk, Sussex and Yorkshire are exceptions, being divided into parts, each with a separate council, for administrative convenience. Councils consist of a chairman, aldermen and councillors. The chairman, who may receive remuneration, is elected annually by the council, either from among the aldermen or councillors or from persons eligible for election as aldermen or councillors. The aldermen form a quarter of the council; they are elected by the councillors from among themselves or persons eligible to be councillors and hold office for six years, half retiring every three years. Councillors are elected by local government electors for three years. Excluding London there are 61 county councils in England and Wales (see pp. 630-1; Wales, pp. 676-7).

County Borough Councils.—Boroughs with populations of 50,000 or more in 1888 and some ancient counties of cities were constituted by the Local Government Act, 1888, as county boroughs; their councils were given the same powers and duties as county councils, but they are also governed by the general law affecting boroughs and have the same constitution. Until 1926 other boroughs reaching 50,000 population could seek county borough status but the figure was then raised to 75,000. The Local Government Act, 1958, again raised the figure, to 100,000, and placed a 15-year prohibition on Private Bills for this purpose. (Although important, level of population is only one factor in the attainment of county borough status.) There are 83 county borough councils in England and Wales (see pp. 664-71; Wales, p. 676).

The district councils within a county are borough councils (other than county borough councils), urban district councils and rural district councils.

Borough Councils.—Constituted in their present form by the Municipal Corporations Act, 1882. Urban district councils may by royal charter be incorporated as boroughs. Borough councils consist of a mayor, aldermen and councillors. The mayor, who presides at council meetings and may be paid, and the aldermen, are elected and hold office for the same terms as chairmen and aldermen of county councils (see above). Councillors are elected by the burgesses (local government electors of the borough) for a term of three years, one-third of the council retiring each year. The lists on pp. 672-4 indicate how the political parties were represented on the councils of the more important boroughs in 1960. There are 317 non-county boroughs in England and Wales (see pp. 664-71; Wales, p. 676).

Urban and Rural District Councils.—The Public Health Act, 1875, consolidated legislation on public health and conferred various powers and duties on local sanitary authorities and these bodies were reconstituted by the Local Government Act, 1894, as urban and rural district councils. They are corporate bodies and have a common seal. District councils consist of a chairman, elected annually by the council, and councillors elected for a term of three years. The chairman may receive an allowance. An important part of their responsibility is in the local administration of the Public Health Acts and Housing Acts. Urban district councils are also highway authorities. Both types of authority levy rates; they may raise loans for various purposes and make bye-laws with the sanction of the central Government. There are 564 urban district councils and 474 rural district councils in England and Wales.

Parish Councils and Parish Meetings.—Local government responsibility is for the area of the civil parish in rural areas and for purely secular matters. Parish meetings consist of all the local government electors of the parish under a chairman chosen by the meeting and must be held at least twice a year where there is no parish council. Parish councils consist of a chairman and a number of councillors which may vary from five to twenty-one, elected for three years. Parishes with a population of more than 300 must have a parish council. A parish meeting must be held annually and is presided over by the chairman of the parish council. Rates to meet the expenses of the parish council are levied by the rural district council.

London.—Local government is carried on by London County Council (see pp. 640-643), the Corporation of the City of London (pp. 634-640) and by the councils of the 28 metropolitan boroughs listed on p. 633. A Royal Commission set up to review local government in Greater London reported in October, 1960, recommending a new structure for the conurbation which would involve the creation of a Greater London Council and 52 boroughs with populations in the range 100,000 to 250,000. The Commission's proposals are under consideration by the Government.

Local Government Act, 1958.—The Act provides new machinery for the review and alteration where necessary of the organization of local government in the rest of England and Wales.

Local Government Elections

Generally speaking all British subjects or citizens of the Republic of Ireland of 21 years or over resident on the qualifying date in the area for which the election is being held are entitled to vote at local government elections. There is also a non-resident qualification (see p. 1153-4). A register of electors is prepared and published annually by local electoral registration officers. There are 9,328,967 local government electors in county boroughs, 15,731,195 in municipal boroughs, urban districts, the City of London and the metropolitan boroughs, and 5,909,326 in rural districts. These figures exclude "Y" voters, i.e. persons having their 21st birthday between Oct. 12 and June 16, who are entitled to vote at elections held after Oct. 1 following. County council elections are held triennially, usually in April, and elections for other authorities annually or triennially in May.

Voting takes place at polling stations arranged by the local authority and under the supervision of a presiding officer specially appointed for the purpose. Candidates, who are subject to various statutory qualifications and disqualifications designed to secure that they are suitable persons to

hold office, must be nominated by two electors and, except in metropolitan borough, rural district or parish council elections, must secure the assent of eight other electors to the nomination. County council elections are based on divisions of the county regulated by the Home Secretary, each of which returns a single member; most boroughs, including county and metropolitan boroughs, are divided into wards, each electing its own members; other authorities may be so divided or may remain as single units depending upon their sizes.

Local Government Services

Local authorities must in their areas provide the services and carry out the functions required by various Acts of Parliament. They may provide additional services under general permissive legislation or under "local" Acts of Parliament which they have promoted as Private Bills. The nature of the duties imposed on local authorities and the scope of the services which they provide vary according to the type of authority. The only all-purpose council is that of the county borough. In the counties functions are divided between the county council and the borough and district councils and there is considerable delegation of functions by the county council to these other authorities, e.g. in education and planning matters. Principal subjects of local government administration are:—

Public health services (prevention of epidemics, abatement of sanitary nuisances, etc.) under the Public Health Act, 1936; local health services under the National Health Service; Care of deprived children; Welfare services for the aged and infirm and for the handicapped, under the National Assistance Act, 1948.

Housing; Land drainage; Water supply; Sewerage; Refuse collection and disposal; Baths and washhouses; Cemeteries.

Town and country planning; Parks and recreation grounds; Smallholdings and allotments.

Roads and bridges; Road safety; Street lighting; Harbours, docks and piers; Passenger transport.

Education; Public libraries, museums and art galleries; Municipal entertainments; Civic restaurants; Information centres.

Police; Fire services; Civil defence services.

Food and drugs inspection; Weights and measures.

Local Government Committees and Staff

Detailed administration of local government services is commonly carried out by committees, matters of policy being decided by the council as a whole; the appointment of certain committees is made compulsory by Act of Parliament. Committees may be executive or advisory; they may be constituted on a permanent basis as Standing Committees or as Special Committees set up for a limited period to deal with a particular subject; their powers and duties are laid down in the Standing Orders of the Council (subject in some cases to special statutory provisions). Where services such as water supply and sewerage are shared between two or more authorities, Joint Committees or Boards of representatives of the authorities concerned are set up to administer the service. Police forces of counties are administered in this way by the Standing Joint Committee of members drawn in equal numbers from the county council and the justices in quarter sessions.

The executive policy of the local authority is carried out by a salaried staff varying in number according to the type of authority. The chief official is, in boroughs, the Town Clerk, and else-

where the Clerk of the Council, and these appointments, together with those of certain other executive officers, are compulsory. Appointments of staff (including professional, technical and clerical classes, and manual workers) are made to a set establishment.

Local Government Finance

Local government is financed from various sources. (1) *Rates*.—Levied by county borough, borough and district councils and in London by the City Corporation and the metropolitan boroughs. Sums required by county councils are included in the rates levied by metropolitan and non-county borough and district councils. Rates are levied by a poundage tax on the rateable value of property in the area of the rating authority. *De-rating*.—Agricultural land and buildings are exempt from rates under the Local Government Act, 1929. The same Act, as amended by the Local Government Act, 1958, provides for industrial and freight-transport hereditaments to be rated at 50 per cent. of their net annual values. The Rating and Valuation Act, 1957, effected a temporary reduction of 20 per cent. in the rateable values of shops, offices, hotels and other commercial property, for the duration of the present valuation lists. Valuation for rating, formerly the responsibility of local authorities, was transferred to the Board of Inland Revenue by the Local Government Act, 1948. (2) *Government Grants*.—From 1948-49 to 1958-59, the Exchequer made annual equalization grants to counties and county boroughs whose rateable value was below the average rateable value per head of weighted population in England and Wales to bring their respective rateable values up to the average level. Equalization grants replaced the former "block" grants paid to local authorities until 1948, which included an element of compensation for loss of revenue through de-rating. Percentage grants covered an agreed proportion of expenditure on approved services such as education, health, police and fire services. Special grants were also made.

The Local Government Act, 1958, provided for a new general grant, payable from 1959-60 onwards, in replacement of the grants for education, etc., services mentioned above and the grants on certain other services. The amount of the general grant is fixed in advance for a short period of years though not necessarily at the same level for each year of the period. If it appears that expenditure which previously attracted specific grant is bound to vary materially in the later years of a period the amount to be distributed by way of general grant will be graduated accordingly. This general grant is distributed to all County and County Borough Councils by reference to objective factors (mainly of weighted population) which are readily ascertainable and afford a fair and reasonable measure of the relative needs of each authority.

The equalization grant mentioned above ceased to be payable after 1958-59, except for balances due in respect of previous years, and was replaced for 1959-60 onwards by a rate deficiency grant based on rate products instead of rateable values as hitherto. This is paid direct to County District Councils and to Counties and County Boroughs whose resources in terms of rate product per head of population are below the average.

(3) *Loans*.—Local authorities may raise loans on the security of the rates, with the sanction of the central Government department directly concerned, for capital expenditure on housing, roads, markets, municipal transport services, sewerage works, etc. On March 31, 1959, there were outstanding loans in England and Wales to the amount of

£5,294,133,000; against this total the sum of £28,482,000 stood at the credit of various sinking funds.

SCOTLAND

Scotland is divided for local government purposes into counties, burghs and districts, and local authorities are similar to those in England and Wales.

County Councils.—First constituted in 1889, they are responsible for local government of the geographical area of the county excluding for most purposes the large burghs. For certain purposes the counties of Perth and Kinross, and Moray and Nairn are combined. County councils include representatives from the landward areas and from all the burghs which are within the county for any purpose, town councils electing representatives from among their own members. Councillors are elected triennially. The chairman of the county council is the convener of the County. There are 33 county councils in Scotland (see pp. 680-1).

Town Councils.—The town councils of the counties of cities (Edinburgh, Glasgow, Aberdeen and Dundee) are all-purpose authorities similar to the county borough councils in England and Wales and are presided over by the Lord Provost.

Scottish burghs are Royal burghs (incorporated by Royal Charter, 69), Parliamentary burghs (created by the Reform Act, 1832, with the right to send members to Parliament, 14) and Police burghs (all other burghs with a population of 7,000 or more, 115). Town councils consist of a provost (chairman), bailies and councillors. The provost and bailies (the equivalent of aldermen in England) are elected by the councillors from among themselves and hold office for three years; they are the magistrates of the burgh.

Large burghs other than the counties of cities, are independent for all purposes except that for valuation, electoral registration, education and, in some cases, police, they are included in the county; small burghs are within the county not only for these purposes but also for such purposes as classified roads, planning, etc.

There are 198 town councils in Scotland (counties of cities, 4; other large burghs, 20; small burghs 174). (See pp. 681-2; 684-5.)

District Councils.—Outside the burghs the county council is responsible for most local government functions but district councils have statutory functions with regard to recreation grounds, rights of way, allotments, bus shelters and other local matters. Two counties—Kinross and Nairn—are not divided into districts. District councils consist of elected members and the county councillors for the district *ex officio*. There are 199 district councils in Scotland.

Local Government Electors.—In Scotland there are 1,286,196 electors in counties of cities, 569,392 in other large burghs, 600,585 in small burghs and 984,764 in landward areas—Total 3,422,937.

Product of 1d. rate in Scottish Cities

The estimated product of 1d. in Glasgow in 1960-61 was £65,183; in Edinburgh, £32,725;

in Dundee, £10,341; and in Aberdeen, £10,629. Amounts of rates raised per head were: Glasgow, 399s. 2d.; Edinburgh, 310s. 1d.; Dundee, 318s. 4d.; and Aberdeen, 352s. 4d.

NORTHERN IRELAND

The structure of local government in Northern Ireland is similar to that of England and Wales. Types of local authority are: county councils, 6; county boroughs, 2; non-county boroughs or municipal councils, 9; urban district councils, 25; town commissioners, 1; and rural district councils, 31. (See p. 690.)

Electors.—The register published on Feb. 15, 1961, contained the names of 645,461 local government electors. Of this total, 198,639 related to the County Borough of Belfast and 22,414 to Londonderry County Borough. A new electoral register will be published on Feb. 15, 1964.

Local Government Debts.—The total amount of outstanding loans and capitalized annuities in Northern Ireland on March 31, 1959, was £100,653,084 (excluding Hospitals).

POLICE

The Police of England and Wales are administered by the Home Office, those of Scotland by the Scottish Home Department and those of Northern Ireland by the Ministry of Home Affairs.

In 1960 there were 2,272 women police in England and Wales; in Scotland there were 293.

On Dec. 31, 1960, the number of special constables enrolled in England and Wales was: Men, 47,630; Women, 969; Scotland (May, 1961): Men, 7,187; Women, 100.

* Including the Metropolitan Police, 17,243 (Women 436); City of London Police, 693 (Women, 10).

LONDON FIRE BRIGADE

Headquarters: Albert Embankment, S.E.1.

The former Metropolitan Fire Brigade (founded 1867) was taken over by London County Council under the Local Government Act, 1888, and in 1904 the title "London Fire Brigade" was adopted. The Brigade was considerably augmented during the 1939-45 war, when it was part of the National Fire Service (1941-48). It was returned to the control of London County Council on April 1, 1948.

The number of calls to which the Brigade responded during the year ending December 31, 1960, totalled 25,559, the fires numbered 10,968, chimney fires 3,674, false alarms 7,030 (including 3,257 malicious false alarms), and the calls to perform special services numbered 3,887.

Under the provisions of the Civil Defence Act, 1948, an Auxiliary Fire Service was re-established. Chief Officer.—F. W. Delve, C.B.E. Deputy Chief Officer.—L. W. T. Leete, M.B.E. Assistant Chief Officer, J. K. H. Cunningham, M.B.E. Administrative Officer.—E. W. Parker.

THE KINGDOM OF ENGLAND

Position and Extent.—The Kingdom of England occupies the southern portion of the island of Great Britain and lies between $55^{\circ} 46'$ and $49^{\circ} 57' 30''$ N. latitude (from the mouth of the Tweed to the Lizard), and between $1^{\circ} 46'$ E. and $5^{\circ} 43'$ W. (from Lowestoft to Land's End). England is bounded on the north by the summit of the Cheviot Hills, which form a natural boundary with the Kingdom of Scotland; on the south by the English Channel; on the east by the Straits of Dover (Pas de Calais) and the North Sea; and on the west by the Atlantic Ocean, Wales and the Irish Sea. Area, 50,331 square miles. Population (Census of 1961, preliminary), 43,430,972, compared with 41,159,213 at the Census of 1951.

Relief.—There is a natural orographic division into the hilly districts of the north, west and south-west, and the undulating downs and low-lying plains of the east and south-east. In the extreme north the Cheviot Hills run from east to west, culminating in the Cheviot, 2,676 feet above mean sea level. Divided from the Cheviots by the Tyne Gap is the Pennine Chain, running N. by W. to S. by E., with its highest point in Cross Fell, 2,930 feet above mean sea level. West of the Pennines are the Cumbrian Mountains, which contain in Scafell Pike (3,210 feet) the highest land in England, and east of the Pennines are the Yorkshire Moors, their highest point being Urre Moor (1,489 feet). South of the Pennines are the Peak of Derbyshire (2,088 feet) and Dartmoor (High Willhays, 2,039 feet). In the western county of Shropshire are the isolated Wrekin (1,335 feet), Longmynd (1,696 feet), and Brown Clee (1,792 feet); in Herefordshire the Black Mountain (2,310 feet); in Worcestershire the Malvern Hills (1,395 feet); in Monmouthshire (now usually grouped with Wales) the Sugar Loaf (1,955 feet) and Coity (1,905 feet), and the Cotswold Hills of Gloucestershire contain Cleve Cleve Cloud (1,134 feet).

Hydrography.—The Thames is the longest and most important river of England, with a total length of 210 miles from its source in the Cotswold Hills to its outflow into the North Sea, and is navigable by ocean-going steamers to London Bridge. The Thames is tidal to Teddington (69 miles from its mouth) and forms county boundaries almost throughout its course; on its banks are situated London, the capital of the British Commonwealth; Windsor Castle, the home of the Sovereign; Eton College, the first of the public schools, and Oxford, the oldest university in the kingdom. The Severn is the longest river in Great Britain, rising in the north-eastern slopes of Plinlimmon (Wales) and entering England in Shropshire, with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the left the Bristol Avon, and on the right the Wye, its other tributaries being the Vyrnwy, Tern, Stour, Teme and Upper (or Warwickshire) Avon. The Severn is tidal below Gloucester, and a high bore or tidal wave sometimes reverses the flow as high as Tewkesbury (13½ miles above Gloucester). The scenery of the greater part of the river is very picturesque and beautiful, and the Severn is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester and Berkeley Ship Canal (16½ miles), which admits vessels of 350 tons to Gloucester. The Severn Tunnel, 14 miles below the Sharpness Bridge, begun in 1873 and completed in 1886 (at a cost of £2,000,000) after many difficulties from flooding is 4 miles 624 yards in length (of which 2½ miles are under the river). The construction of a road bridge over the Severn estuary,

between Haysgate, Mon., and Almondsbury, Glos. (which will be the largest in Europe and the third largest in the world, with a centre span of 3,300 ft.) was authorized on Aug. 1, 1947, the estimated cost being £9,000,000. Of the remaining English rivers those flowing into the North Sea are the Tyne, Wear, Tees, Ouse and Trent from the Pennine Range, the Great Ouse (160 miles) from the Central Plain, and the Orwell and Stour from the hills of East Anglia. Flowing into the English Channel are the Sussex Ouse from the Weald, the Itchen from the Wiltshire and Hampshire Hills, and the Axe, Teign, Dart, Tamar and Exe from the Devonian Hills; and flowing into the Irish Sea are the Mersey, Ribble and Eden from the western slopes of the Pennines and the Derwent from the Cumbrian Mountains. The English Lakes are noteworthy rather for their picturesque scenery and poetic associations than for their size. These lie mainly in Cumberland, but partly in Westmorland and Lancashire, the largest being Windermere (30 miles long), Ullswater and Derwentwater.

Islands.—The Isle of Wight is separated from Hampshire by the Solent; total area 147 sq. miles, population 1961 Census preliminary, 95,479. The climate is mild and healthy, and many watering places have grown up during the last century. Capital, Newport, at the head of the estuary of the Medina, Cowes (at the mouth) being the chief port; other centres are Ryde, Sandown, Shanklin, Ventnor, Freshwater, Yarmouth, Totland Bay, Seaview and Bembridge. The Scilly Islands, 25 miles from Land's End, consist of about 40 islands, with a total area of about 4,000 acres, only St. Mary's, Tresco, St. Martin's, St. Agnes and Bryher being inhabited. The capital is Hugh Town, in St. Mary's. The climate is unusually mild, and vegetation luxuriant, semi-tropical plants flourishing in the open. Lundy (=Island), 11 miles N.W. of Hartland Point, Devon, is about 2 miles long and about ½ mile broad (average), with a total area of about 1,050 acres (mainly picturesque), and a population of about 20; it contains the seat of the proprietor of the island and 3 lighthouses (one disused).

Climate.—The mean annual air temperature reduced to sea-level varies from 52° F. at Penzance and the Scilly Islands to 48° F. near Berwick-on-Tweed. In January the south and west are warmer than the east, the mean temperature reduced to sea-level being less than 40° F. over the eastern half of the country. In July the warmest districts are more definitely in the south and inland, the range being from 63° F. around London to less than 59° F. in the extreme north. The decrease of mean temperature with height is about 1° F. per 300 ft. The coldest month of the year is January and the warmest July. Sea temperature reaches its maximum rather later than air temperature. The average annual rainfall decreases from west to east, owing to the preponderance of south-west winds, and also increases with altitude. Of the total area 55 per cent. has an average less than 30 in., 29 per cent. between 30 in. and 40 in. and 16 per cent. more than 40 in. In the neighbourhood of the Thames Estuary the average is only 20 in.; at Seathwaite, Cumberland, 122 in.; and at the wettest spot in the Lake District 285 in. The months of least rain are March to June and the wettest months October to January. September is on the average drier than July and August. The mean annual number of hours of bright sunshine varies from 1,750 hours along the south-east coast to less than 1,300 hours in the neighbourhood of the Pennine range. June is the sunniest month fol-

lowed by May, July, August and September in that order.

EARLY INHABITANTS

Prehistoric Man.—Paleolithic and Neolithic remains are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about 2000 to 1500 B.C., and a date between these years has been given to *Stonehenge* (10 miles N. of Salisbury, Wiltshire) which consists of two circles of menhirs (the largest monolith being 22½ feet in height). The village of *Avebury* and its surroundings were scheduled in 1937, and in 1943 about 1,000 acres at Avebury were purchased by the National Trust, thus preserving the Circle of megalithic monuments, the Avenue, Silbury Hill, etc., relics of Stone Age culture of 1900–1800 B.C., which make this one of the most important archaeological sites in Europe. The *Devil's Arrows*, near Boroughbridge, Yorkshire, are regarded as the finest remaining megalithic monoliths in northern Europe; the tallest arrow is 30 ft. 6 in. high and its greatest circumference is 16 ft. In the latter part of the Bronze Age the *Goidels*, a people of Celtic race, and in the Iron Age other Celtic races of *Brythons* and *Belgae*, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest.—Julius Cæsar raised Britain in 55 B.C. and 54 B.C. The Emperor Claudius, nearly 100 years later (A.D. 42), dispatched Aulus Plautius, with a well-equipped force of 40,000 all arms, and himself followed with reinforcements in the same year. The British leader from A.D. 48–51 was *Camtacus* (Caractacus), who was finally captured and sent to Rome. By A.D. 70 the conquest of South Britain was completed, a great revolt under *Boadicea*, Queen of the Iceni, being crushed in A.D. 61. In A.D. 122, the Emperor Hadrian visited Britain and built a continuous rampart, since known as *Hadrian's Wall*, from Wallsend to Bowness (Tyne to Solway). The work was entrusted by the Emperor Hadrian to Aulus Platorius Nepos, legate of Britain from 122 to 126, the work being now regarded as "the greatest and most impressive relic of the Roman frontier system in Europe." The Romans administered Britain as a Province under a Governor, with a well-defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St. Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. Well-preserved Roman towns have been uncovered at (or near) *Silchester* (Calleva Atrebatum), 10 miles south of Reading, *Wroxeter* (Viroconium), near Shrewsbury, and *St. Albans* (Verulamium) in Hertfordshire. Four main groups of roads radiated from London, and a fifth (the Fosse) ran obliquely from Ermine Street (at Lincoln), through Leicester, Cirencester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as *Watling Street*) ran through Verulamium to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. Christianity reached the Roman province of Britain from Gaul in the 3rd century (or possibly earlier), *Alban*, "the

protomartyr of Britain," being put to death as a Christian during the persecution of Diocletian (June 22, 303), at his native town Verulamium. The Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attended the Council of Arles in 314. The Roman garrison of Britain was much harassed in the 4th century by Saxon pirates, who invaded the eastern counties. A system of coast defence was organized from the Wash to Southampton Water, with forts at Brancaster, Burgh Castle (Yarmouth), Walton (Felixstowe), Bradwell, Reculver, Richborough, Dover, Stutfall, Pevensey and Porchester (Portsmouth). About A.D. 350 incursions in the north of Irish (Scott) and Picts became most formidable, and towards the end of the 4th century many troops were removed from Britain for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders and Britain was cut off from Rome. The last Roman garrison was withdrawn from Britain in A.D. 442 and the S.E. portion was conquered by the Saxons. The Latin-speaking Celts of England were replaced by their heathen and Teutonic conquerors, to the submergence of the Christian religion and the loss of Latin speech. According to legend, the British King *Vortigern* called in the Saxons to defend him against the Picts, the Saxon chieftains being *Hengist* and *Horsa*, who landed at Ebbsfleet, Kent, and established themselves in the Isle of Thanet. Bede, a Northumbrian monk, author of the Ecclesiastical History at the opening of the 8th century, described these settlers as Jutes, and there are traces of differences in Kentish customs from those of other Anglo-Saxon kingdoms.

Anglo-Saxons and Normans.—What happened in Britain during the 150 years which elapsed between the final break with Rome and the coming of St. Augustine is shrouded in the deepest mystery. The Jutes, the Saxons and the Angles (whose gods Twi, Woden, Thunor and Frigg are commemorated in "Tuesday, Wednesday, Thursday and Friday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbishoprics at Canterbury and York, and England appears to have been again converted by the end of the 7th century. In the 8th century Offa, King of Mercia, is stated to have built a wall and rampart, afterwards known as *Offa's Dike*, from the mouth of the Dee to that of the Wye, as a protection against the Welsh. The greatest of the English kingdoms was *Wessex*, with its capital at Winchester, and the greatest of the Wessex kings was *Alfred the Great* (871–901), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th century the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resist the invaders, and England paid tribute (*Danegelt*) for many years, and was ruled by Danish Kings from 1016 to 1042, when Edward the Confessor was recalled from exile. In 1066 Harold (brother-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England, but after defeating (at Stamford Bridge, Yorkshire, Sept. 25) an invading army under Harald Hadrada, King of Norway (aided by the outlawed Earl Tostig, of Northumbria, younger son of Earl Godwin), he was himself defeated at the *Battle of Hastings* on Oct. 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy.

(a) Administrative Counties, excluding County Boroughs, named in the First Schedule of the Local Government Act, 1933; (b) Geographical Counties, including County Boroughs; in each case as at the Census of April, 1961 (preliminary figures); (c) includes value of property occupied by the Crown for public purposes upon which contributions in lieu of rates are paid.

Lords Lieutenant of Counties.—The actual words used in the Letters Patent relative to these appointments are "Her Majesty's Lieutenant of and in the County of . . ." and this is the official title whether the individual appointed be a Peer or a Commoner. In documents of the highest formality the proper term is therefore "Her Majesty's Lieutenant." In less formal and informal documents and colloquially, the style "Lord Lieutenant" has been applied to H. M. Lieutenants, Peers and Commoners alike, for a great many years. The duties of the Lord Lieutenant are to advise the Lord Chancellor as to the appointment of magistrates to the county bench, to appoint Deputy Lieutenants and to raise the militia, if need be, in time of riot or invasion. The Lord Lieutenant is usually a peer or a baronet and a large landowner and is often appointed *custos rotulorum* (keeper of the records).

THE GOVERNMENT OF LONDON

LONDON, the capital of England and of the British Commonwealth of Nations, is situated on both banks of the River Thames, 50 miles from the North Sea.

Greater London includes the administrative counties of LONDON (the City of London and 28 metropolitan boroughs); MIDDLESEX (18 boroughs and 8 urban districts); and parts of SURREY (the County Borough of Croydon, the 10 Boroughs of Barnes, Beddington and Wallington, Epsom and Ewell, Kingston-upon-Thames, Malden and Coombe, Mitcham, Richmond, Surbiton, Sutton and Cheam, and Wimbledon); and the 5 Urban Districts of Banstead, Carshalton, Coulsdon and Purley, Esher, and Merton and Morden); parts of KENT (the 4 Boroughs of Beckenham, Bexley, Bromley, and Erith; and the 4 Urban Districts of Chislehurst and Sidcup, Crayford, Orpington and Penge); parts of HERTFORDSHIRE (the 4 Urban Districts of Barnet, Bushey, Cheshunt and East Barnet; and the Elstree Rural District); parts of ESSEX (the County Boroughs of East Ham and West Ham, the 7 Boroughs of Barking, Chingford, Dagenham, Ilford, Leyton, Walthamstow, and Wanstead and Woodford; and 2 Urban Districts, Chigwell and Waltham Holy Cross). It covers an area of 461,882 acres (722 sq. miles) and in April, 1961, had a population (Census preliminary figures) of 8,171,902 (within the County of London, 3,195,114; Middlesex and the Home Counties, 4,976,788).

The City of London (see pp. 634-640) represents London within its ancient boundaries.

The City of Westminster, which is bounded by the City of London on the east, by Chelsea and

Kensington on the west, by Paddington, St. Marylebone and Holborn on the north, and by the Thames and Chelsea on the south, was formed into a borough by the London Government Act of 1899, and was created a city by Royal Charter of Oct. 29, 1900, the Council consisting of a Mayor, 10 Aldermen and 60 Councillors. Extending from the eastern end of the Strand to Kensington Gardens, and from Oxford Street to the Thames, it includes within its boundaries a large number of the finest buildings in London. The Abbey and the Roman Catholic Cathedral, the Houses of Parliament and the Law Courts, Buckingham Palace and St. James's, and the principal government offices, clubs and theatres are situated in Westminster.

Metropolitan Boroughs.—Under the London Government Act of 1899, the administrative functions of the various vestries in the Metropolitan districts surrounding the City of London were transferred to 28 Metropolitan Boroughs, of which one became afterwards the City of Westminster. The area covered by these boroughs extends northwards to include Stoke Newington, southwards to Wandsworth and Lewisham, eastwards to Woolwich, and westwards to Hammersmith.

London County Council.—For County purposes the affairs of London are administered by the London County Council (see pp. 640-3), which was created by the Local Government Act of 1888.

Miscellaneous Authorities.—For Police purposes the administration is invested in the Corporation of London as to the City Police and in the Home

Office as to the Metropolitan Police. The water authority is the Metropolitan Water Board; while the River Thames is administered as to its tidal portion by the Port of London Authority and above Teddington by the Thames Conservancy; the Port Health Committee of the Corporation is the Health

Authority for the River, the lighthouse and pilotage authority being Trinity House. The bridges are maintained in the City of London by the Bridge House Estates Committee of the Corporation and in the remaining area by the London County Council.

THE CORPORATION OF LONDON

The City of London is the historic centre at the heart of London known as "the square mile" and around which the vast metropolises have grown over the centuries. The civic government is carried on by the Corporation of London through the Court of Common Council, a body consisting of the Lord Mayor, 25 other Aldermen and a number of Common Councillors. The legal title of the Corporation is "the Mayor and Commonalty and Citizens of the City of London."

The City is the financial and business centre of London and includes the head-offices of the principal banks, insurance companies and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall and the 15th century Guildhall, to the massive splendour of St. Paul's Cathedral and the architectural beauty of Wren's spires.

The City of London at the time of the revolt of the Iceni (A.D. 61) was described by Tacitus (born A.D. 55; died A.D. 120) as "a busy emporium for trade and traders." In Saxon times it was, in reality, a small independent federated State of Wards (holding *wardmotes*) with a *folk-mote*, predecessor of the present Common Council, for general affairs. Its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them, and granted a charter, which is still preserved. The mayoralty was established on the recognition of the corporate unity of the citizens by Prince John in 1191, the first Mayor being Henry Fitz Alwyn, who filled the office for 21 years and was succeeded by Fitz Alan (1212-15). A new charter was granted by King John in 1215, directing the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times, A.D. 1397, 1398, 1406, 1419); and many modern cases have occurred.

The earliest instance of the phrase "Lord Mayor" in English is in 1214. It is used more generally in the latter part of the 15th century and becomes invariable from 1535 onwards. At Michaelmas the Liverymen in Common Hall choose two Aldermen who have served the office of Sheriff for presentation to the Court of Aldermen, and one is chosen to be Lord Mayor for the ensuing mayoral year. The Lord Mayor is presented to the Lord Chief Justice at the Royal Courts of Justice on the second Saturday in November to make the final declaration of office, having been sworn in at Guildhall on the preceding day. The procession to the Royal Courts of Justice is popularly known as the *Lord Mayor's Show*.

Aldermen are mentioned in the 11th century and their office is of Saxon origin. They were elected annually between 1377 and 1394, when a charter of Richard II. directed them to be chosen for life. The *Common Council*, elected annually on St. Thomas's Day (Dec. 22), was, at an early date, substituted for a popular assembly called the *Folk-mote*. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having at present as many as 12 members, and none fewer than four.

The Corporation, by Acts of Common Council, has decided to reduce the number of Common Councillors from 206 to 150 as at St. Thomas's Day, 1965, casual vacancies occurring by death or resignation in the meantime not being filled so long as the representation of any Ward does not fall below the number specified in the Acts.

Sheriffs were Saxon officers; their predecessors were the *wit-reeves* and *portreeves* of London and Middlesex. At first they were officers of the Crown, and were named by the Barons of the Exchequer; but Henry I. (in 1132) gave the citizens permission to choose their own Sheriffs, and the annual election of Sheriffs became fully operative under King John's charter of 1199. The citizens lost this privilege, as far as the election of Sheriff of

Middlesex is concerned, by the Local Government Act, 1888; but the Liverymen continue, as heretofore, to choose two Sheriffs of the City of London, who are appointed on Midsummer Day, and take office at Michaelmas.

Officers.—The Recorder was first appointed in 1298. The office of Chamberlain is an ancient one, the first contemporary record of which is 1276. The Town Clerk (or Common Clerk) is mentioned in 1274 and the Common Serjeant in 1291.

Activities.—The work is assigned to a number of committees which present reports to the Court of Common Council. These Committees are:—City Lands, Bridge House Estates, Coal and Corn and Finance, Rates Finance, Improvements and Town Planning, Streets, Central Markets, Cattle Markets, Billingsgate and Leadenhall Markets, Spitalfields Market, Police, Port and City of London Health, Library (Library, Records, Art Gallery and Museum), City of London Schools, Freeman's School, Music (Guildhall School of Music and Drama), General Purposes, Officers and Clerks, Civil Defence, and Housing. The Committees specially appointed are:—Gresham (City side), Epping Forest, West Ham Park, Special, Privileges, Labour, Special (Guildhall Reconstruction), Barbican and Licensing Planning.

The Honourable the *Irish Society*, which manages the Corporation's Estates in Ulster, consists of a Governor and 5 other Aldermen, the Recorder, and 20 Common Councilmen, of whom one is elected Deputy Governor.

The *City's Estate*, in the possession of which

the Corporation of London differs from other municipalities in the Kingdom, is managed by the City Lands Committee, the Chairmanship of which carries with it the title of "Chief Commoner."

The *Coal and Corn and Finance Committee* manages the funds derived from the City's Estate and other sources and receives accounts of the Bridge House Estates (which are employed in the provision and maintenance of London, Blackfriars, Southwark and Tower Bridges). The cost of Civil Government and other public services, including the maintenance of open spaces outside the City, are met from the City's Cash, which also provides for the expenses of Epping Forest and West Ham Park, open spaces under the management of separate Committees, and the net expense of the City of London School, the City of London School for Girls, the City of London Freeman's School, and the Guildhall School of Music and Drama.

The *Rates Finance Committee* supervises the collection of rates and the expenditure of money so collected, two rates being levied by the Corporation, a Poor Rate and a General Rate. The Poor Rate is levied mainly to satisfy the precept served on the Corporation by the London County Council for the City's share of rate-borne expenditure, and also to meet the contribution the Corporation is required to make under the London Rates Equalization Scheme. The General Rate is levied to meet the net cost of the services which the Corporation as a local authority is required to maintain (see below).

THE CITY GUILDS (LIVERY COMPANIES)

The Livery Companies of the City of London derive their name from the assumption of a distinctive dress or livery by their members in the 14th century.

The order of precedence (according to 2nd Report of Municipal Corporations' Commissioners, 1837) and omitting extinct companies, is given in parentheses after the name of each Company. There are 82 Guilds in existence. The Comb-makers, Silk-throwers, Silkmn, Pinmakers, Soap-makers, Hatbandmakers, Tobacco Pipe Makers, Long-bow Stringmakers, Woodmongers, Starch-makers and Fishermen are extinct.

About 10,000 Liverymen of the Guilds are entitled to vote at elections in Common Hall.

The liveryies of the Shipwrights (500), Carmen (420), Horners (407), Stationers and Newspaper Makers (406), and Apothecaries (379), are the

most numerous, the Ironmongers (36) the smallest, MERCERS (1). *Hall*, 4 Ironmonger Lane, E.C.2. *Livery*, 206.—Clerk, G. E. Logsdon; *Master*, J. P. Winckworth.

THE LONDON COUNTY COUNCIL

Offices, The County Hall, Westminster Bridge, S.E.1.

THE London County Council was constituted under the Local Government Act of 1888. London is an administrative county, covering an area of 117 square miles, with a population (1961 Census, preliminary) of 3,195,114.

The City of London is a county for non-administrative purposes, such as justices, &c., and the Metropolis outside the City is also a county for non-administrative purposes, by name the County of London. The offices of Clerk of the Council and Clerk of the Peace are not held jointly in the County.

The Council comprises 21 aldermen, and 126 councillors, together 147, or, if the chairman of the Council be also an elected member or alderman, 146. The term of office for aldermen is 6 years, and half their number retires every 3 years. The councillors are elected for 3 years, and they elect the aldermen. The position of aldermen and councillors is the same, except as to the method of election and the term of office.

Meetings of the Council are held fortnightly in session time, and the standing committees meet fortnightly, except a few which meet monthly.

The Finance Committee has important statutory powers. No costs, debt or liability exceeding £100 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council has a net debt, according to the latest returns of £331,340,400 (£261,585,700 represents debt incurred for housing). Its annual expenditure on revenue account is about £130,000,000 and on capital account about £33,000,000. Advances amounting to £13,500,000 have been made on loan under the Housing and Small Dwellings Acquisition Acts to people who wish to buy a home.

The General Purposes Committee is responsible for advising the Council on the more important general questions, allocation of duties to Committees and heads of departments, consultation with other local authorities and government departments, matters relating to legislation, senior staff appointments, the development of the South Bank and the Crystal Palace site and the management of the Royal Festival Hall, and civil defence.

The Children's Committee is charged with the care of some 9,000 deprived and neglected children.

The Education Committee comprises thirty-eight members of the Council and twelve co-opted members. Women as well as men must be included.

The Establishment Committee is responsible for the efficient and economical use of manpower and

for a general control over numbers, grading, pay and conditions of staff (except teachers). The Council employs over 65,000 staff of all grades.

The Fire Brigade Committee is responsible for carrying out the duties laid on the Council by the Fire Services Act, 1947.

The Health Committee, set up under the National Health Service Act, 1946, is responsible for health services provided under that Act and for discharging the functions of the Council under the Mental Health Acts and the Clean Air Act, 1956. Under this committee are nine Divisional Health Committees, the majority of whose members are drawn from the Corporation of the City of London and the Metropolitan Borough Councils. These divisional committees are entrusted with considerable responsibilities for the day-to-day administration of the personal health services.

The Housing Committee performs the duties placed upon the Council by the various Housing Acts, including the clearance of insanitary areas and the relief of overcrowding. The total capital expenditure incurred up to March 31, 1961, in respect of all schemes was over £305,000,000. The income (rents &c.) for 1961-62 in respect of dwellings and housing estates of the Council is estimated at over £23,000,000. The total of the Exchequer subsidy in respect of the Council's housing operations is estimated at £4,710,000.

The Supplies Committee is responsible for supplying stores, etc., arranging contracts for printing etc., sale and disposal of old or surplus materials and general oversight of transport.

The Rivers and Drainage Committee administers the Metropolitan Main Drainage system which covers about 179 square miles, including certain districts outside the county, and comprises about 420 miles of main, storm-relief, intercepting and outfall sewers, twelve pumping stations, two sewage outfalls, and three sludge vessels. The total capital outlay on main drainage is over £25,000,000, and further work is in progress. This committee is also responsible for Thames flood prevention, the upkeep of the Thames tunnels, most of the Thames bridges and Woolwich Ferry.

The Town Planning Committee deals with questions relating to town-planning, the carrying out of street improvements and construction of bridges, tunnels and ferries, the naming of streets and numbering of houses, the maintenance of historic buildings and monuments, and also regulates under statute such matters as the construction and safety of buildings, building lines, space about buildings, and means of escape in case of fire.

The *Welfare Committee* provides residential accommodation for the aged and infirm and for other people in need of care and attention, including homeless families. They are also charged with the welfare of blind and other handicapped persons.

The *Parks Committee* is responsible for the acquisition and maintenance of parks and open spaces, and the provision of facilities for sport, open-air entertainment and exhibitions in them; the *Public Control Committee* is responsible for the control of storage of explosive substances and petroleum; testing weights and measures; the granting of licences for music, dancing, boxing and wrestling; administration of the Shops Acts; licensing and inspection of employment agencies, nurse's agencies and massage establishments; licensing of premises under the Cinematograph Acts; registration of motor cars; collection of duties on motor cars, dog, game, gun and certain other local taxation licences.

The *expenditure* of the Council, including loans to other local authorities, is met by two chief sources of supply—capital money raised by external borrowing, or by the use of the Sinking Fund of the Council's debt, the Superannuation

Fund, etc., and current income raised in a county rate or by the revenue of undertakings. Substantial contributions are received from the Exchequer by way of housing subsidies, the General Grant, grants in respect of school meals and capital grants towards the cost of road improvements. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure generally within a period of 60 years (in a few cases the limit is 80 years). The total stock outstanding at March 31, 1961, was £174,242,590 and in addition £176,000,000 had been borrowed from the Public Works Loan Board and other sources.

The *Rating* for the year 1961-62, as shown by the statement below (which relates to rate accounts only), amounted to 9s. 6½d. in the pound over the whole county, including the City, and a further rate over the county outside the City of 1½d. in the pound, together 9s. 8d. The total rate for 1960-61 was 9s. 2d. The *Rateable Value* of the County of London, on April 6, 1961, was estimated to be approximately £106,800,000—a 1d. rate over the whole county producing £445,000.

Public and Private Buildings in London

ADELPHI, Strand, W.C.2.—Adelphi Terrace and district commemorate the four architect brothers, James, John, Robert and William ADAM, who laid out the district (formerly Durham House) at the close of the 18th century. Four of the streets in the Adelphi were formerly called James, John, Robert, and William Streets to commemorate these founders of the Adam style of architecture and internal decoration. They are now Adam Street, John Adam Street, Robert Street and Durham House Street. Extensive rebuilding took place between the two World Wars, and there are now few 18th-century houses left in the district. In the neighbourhood of the Adelphi was York House, built by the Duke of Buckingham in 1625 (the Water Gate of which still stands in Embankment Gardens), the commemorative streets being *Charles Street*, *Villiers Street*, *Duke Street*, *Of Lane*, *Buckingham Street* (Of Lane is now "York Buildings").

AUSTRALIA HOUSE, Strand, W.C.2.—A handsome and imposing building, erected 1911-14 by the Commonwealth of Australia as the offices of the High Commissioner for the Commonwealth. NEW SOUTH WALES, QUEENSLAND, VICTORIA and WESTERN AUSTRALIA have separate offices in the Strand; TASMANIA at Golden Cross House, Charing Cross, and SOUTH AUSTRALIA at S.A. House, Marble Arch.

BANK OF ENGLAND, Threadneedle Street, E.C.2. (Not open to sightseers).—The Bank of England, founded in 1694, has always been closely connected with the Government. The present building, completed in 1940 to the designs of Sir Herbert Baker, incorporates features reminiscent of the earlier architects, Sampson (1734), Sir Robert Taylor (1765) and Sir John Soane (1788). A Bank piquet is mounted every evening by the Brigade of Guards.

BRIDGES.—The bridges over the Thames (from East to West) are the *Tower Bridge* (built by the Corporation of London and opened in 1894), with its bascules, affording a fine view of the Pool and of the metropolis; *London Bridge* (opened after rebuilding in 1831, and until 1750 the only bridge over the Thames in London), with the London Monument (*q.v.*) and Fishmongers' Hall; *Southwark Bridge* (opened in 1829, and rebuilt by the Corporation of London, 1921); *Blackfriars Bridge* (opened in 1869 and widened by the Corporation of London in 1908); width, 105 ft.; *Waterloo Bridge* (Rennie), width, 42 ft. 6 ins. (opened in 1817) commanding a fine view of western London (rebuilt by L.C.C. and re-opened 1946); *Hungerford Bridge* (for pedestrians only); *Westminster Bridge* (built in 1750 and then presenting a view that inspired Wordsworth's sonnet; re-built and re-opened in 1862; width, 84 ft.) with Thornycroft's *Boadicea* at the north-eastern end; this bridge leads from Westminster Abbey and the Houses of Parliament to the County Hall (*q.v.*) and St. Thomas's Hospital; *Lambeth Bridge* (rebuilt by L.C.C. and opened in 1932) leading from Lambeth Palace to Millbank; *Vauxhall Bridge* (rebuilt in 1906) leading to Kennington Oval; *Chelsea Bridge*, leading from Chelsea Hospital to Battersea Park (reconstructed and widened 1937); and *Albert Bridge* (1873); *Battersea Bridge* (opened in 1890); *Wandsworth Bridge* (opened in 1873); *Putney Bridge* (opened in 1886 and widened in 1933) where the Oxford and Cambridge Boat Race is started for Mortlake; *Hammermith Bridge* (rebuilt 1887); *Barnes Bridge* (for pedestrians only, 1933); *Chiswick Bridge* (opened in 1933); *King*

Edward VII. Bridge, Kew (rebuilt in 1902), leading to the Royal Botanic Gardens, Kew; *Twickenham Lock Bridge*; *Twickenham Bridge* (opened in 1933); *Richmond Bridge* (opened in 1777); *Kingston Bridge* and *Hampton Court Bridge* (rebuilt, 1933).

BUCKINGHAM PALACE, St. James's Park, S.W.1. (Not open to the public).—Was purchased by King George III. in 1762 from the heir of the Duke of Buckingham, and was altered by Nash for King George IV. The London home of the Sovereign since Queen Victoria's accession in 1837. Re-fronted in stone (part of the Queen Victoria Memorial) by Sir Aston Webb in 1923.

The Royal Mews is open to visitors on Wednesday afternoons. Applications for tickets should be addressed in writing to the Superintendent, accompanied by an addressed envelope. The following charges, the proceeds of which are devoted to charities, are payable on admission: *Adults*, 2s.; *Children under 16*, 6d.; *Children in arms*, free.

CANADA HOUSE, Trafalgar Square, S.W.1.—A conspicuous building on the Western side of the Square, in which are the Offices of the High Commissioner of the Dominion and Officials dealing with Trade, Emigration, etc. Designed by Sir Robert Smirke in 1820, it was renovated and embellished when vacated by the Union Club. Certain interior features of the original building are preserved, and the spacious, richly furnished room now occupied by the High Commissioner is much admired. Surrounded by Offices of Canadian Banks, Steamship, Railway and other Dominion Companies, the Canadian Building is one of London's landmarks. It was opened by H.M. King George V. in June, 1925.

CANONBURY TOWER, Canonbury, N.1.—Till recently a club for boys and girls from the vicinity (in the remains of the 16th-century house of the Priors of St. Bartholomew), but at the moment partly in use as headquarters of a theatre company. Contains the "Spencer" and "Compton" oak-panelled rooms. Other relics of Canonbury House can be seen nearby.

CARLYLE'S HOUSE, 24 Cheyne Row, Chelsea, S.W.3. The home of Thomas Carlyle for 47 years until his death in 1881, and containing much of his furniture, etc. Now the property of the National Trust. Open daily, except Tuesdays, 10-1, 2-6, or dusk, if earlier. Sundays, 2-6. Admission, 2s.; Children and Students, 1s.

CATHOLIC CENTRAL LIBRARY, St. Francis Friary, 47 Francis Street, S.W.1.—Founded as a private library in 1914 and administered as the Catholic Truth Society Library from 1922 until 1940, the stock being presented to the Catholic Central Library then set up. Now administered by the Graymoor Friars. Stock of 25,000 volumes for lending and reference, on many aspects of religion (devotional, Church history, doctrine, etc.), sociology, fine arts, literature, history, travel, biography and fiction. Books are sent by post when required. Hours of opening: Mon.-Fri. 11-7; Sat. 11-5.

CEMETERIES.—For *Bunhill Fields*, see p. 498. In *Kensal Green Cemetery*, North Kensington, W.10 (90 acres), are tombs of W. M. Thackeray, Anthony Trollope, Sydney Smith, Shirley Brooks, Wilkie Collins, Tom Hood, W. Mulready, George Cruikshank, John Leech, Leigh Hunt, Brunel ("Great Eastern"), Ross (Arctic), Charles Kemble and Charles Mathews (Actors). In *Highgate Cemetery*, N.6., are the tombs of George Eliot, Herbert Spencer, Michael Faraday, and G. J. Holyoake. In

Abney Park Cemetery, Stoke Newington, N.16, at the tomb of General Booth, founder of the Salvation Army, and memorials to many Nonconformist Divines. In the *South Metropolitan Cemetery*, Norwood, S.E.27, are the tombs of C. H. Spurgeon, Lord Alverstone, Douglas Jerrold, John Belcher, R.A., Theodore Watts-Dunton, Dr. Moffat (Missionary), Sir H. Bessemer, Sir H. Maxim, Sir J. Barnby, Sir A. Manns, and J. Whitaker, F.S.A. (*Whitaker's Almanack*). In the churchyard of the former *Marylebone Chapel* are buried Allan Ramsay (poet), Hoyle (whist), Ferguson (astronomer), Charles Wesley (hymn writer) and his son Samuel Wesley (musician). The chapel itself was demolished in 1949. **CREMATORIA**.—*Ilford* (City of London); *Norwood*; *Hendon*; *Streatham Park*; *Finchley* (St. Marylebone) and *Golders Green* (12 acres), near Hampstead Heath, with "Garden of Rest" and memorials to famous men and women.

CENOTAPH, Whitehall, S.W.1.—(Literally "empty tomb"). Monument erected "To the Glorious Dead," as a memorial to all ranks of the Sea, Land and Air Forces who gave their lives in the service of the Empire during the First World War. Erected as a temporary memorial in 1919 and replaced by a permanent structure in 1920. Unveiled by King George V. on Armistice Day, 1920. An additional inscription was added after the 1939-45 War, to commemorate those who gave their lives in that conflict.

CHARTERHOUSE, Charterhouse Square, E.C.1. (*Master* (vacant); *Registrar and Clerk to the Governors*, N. Long-Brown, M.A., LL.B.), a Carthusian monastery until 1538, purchased from the Earl of Suffolk in 1611 by Thomas Sutton as a home for aged "Brothers" and a School (at Godalming since 1872). The buildings are partly 14th (but mainly 16th) century. They suffered much damage during the 1939-45 War but are now restored and can accommodate 40 "Brothers." Visitors must apply to the Master or the Registrar for permission to see the Hall, etc. Roger Williams, the founder and governor of Rhode Island, U.S.A., was on June 25, 1621, elected a scholar of Sutton's Hospital. Other famous Carthusians are John Wesley; the poets Crashaw and Lovelace; Addison and Steele; Sir William Blackstone and Thackeray, who described "Greyfriars School" (Charterhouse) in "The Newcomes."

CHELSEA PHYSIC GARDEN, Royal Hospital Road, S.W.3.—A garden of general botanical research, established in latter part of 17th century by the Society of Apothecaries, occupies site presented in 1722 by Sir Hans Sloane. Transferred in 1899 to the Trustees of the London Parochial Charities. Tickets of admission for approved students obtainable from the Clerk to the Trustees, 3 Temple Gardens, E.C.4.

CHELSEA ROYAL HOSPITAL (founded by Charles II. in 1682, and built by Wren; opened in 1694), Royal Hospital Road, Chelsea, S.W.3, for old and disabled soldiers. Great Hall now used as Dining Hall for in-pensioners. Much damaged by bombs in the Second World War. The extensive grounds include the former Ranelagh Gardens. Open daily 10 to 12 and 2 to 4, and on Sunday afternoons. *Governor*, General Sir Frank Simpson, G.B.E., K.C.B., D.S.O., *Lieut.-Governor and Secretary*, Major-Gen. Sir Douglas Campbell, K.B.E., C.B., D.S.O., M.C.

COLLEGE OF ARMS OR HERALDS' COLLEGE, Queen Victoria Street, E.C.4.—The Royal Officers of Arms (Kings, Heralds and Pursuivants of Arms) were incorporated by Richard III., and granted Derby House on the site of the present College building by Queen Mary I. The building now in use was built after the Fire of London. The powers

vested by the Crown in the Earl Marshal (The Duke of Norfolk) with regard to all State ceremonial, and the granting and use of Armorial Bearings, are exercised through this College. Enquiry may be made to the Officer on duty in the Public Office every day between 10 a.m. and 4 p.m. Saturdays, 10 to 1.

COUNTY HALL, Westminster Bridge, S.E.1.—The Headquarters of the London County Council (see pp. 640-3) built on the Pedlar's Acre; Lambeth, from the designs of Ralph Knott, with a river façade of 750 ft. Foundation stone laid by His late Majesty King George V., March 9, 1912, and the ceremonial opening of the first three sections of the building by His late Majesty, July 17, 1922. In 1939 the two central sections of the north and south blocks were completed on a site to the east of the main building. The main building contains, in addition to office accommodation, the council chamber, a conference hall, committee and conference rooms; education library for teachers; county record office; and a members' library with maps, prints, drawings, books and manuscripts on London, which is open to the public for reference purposes. *Librarian*, Miss I. Darlington, M.A., F.L.A. The Council, when in session, meets in public in the council chamber fortnightly on Tuesday afternoons at 3 p.m. The times for public inspection of the building are, on Saturdays from 10.30 a.m. to 12 noon and from 1.30 p.m. to 3.30 p.m.; and on Easter Monday, Whit Monday and August Bank Holiday, from 10.30 a.m. to 12 noon and from 1.30 p.m. to 4.30 p.m. Admission free.

CUSTOM HOUSE, Lower Thames Street, E.C.3.—Built early in 19th century, with a wide quay on Thames. The *Long Room* is about 190 ft. long.

DICKENS HOUSE, 48 Doughty Street, W.C.1.—In this house Charles Dickens lived from 1837 to 1839, and here he completed *Pickwick Papers*. It is the headquarters of The Dickens Fellowship, and contains many relics of the novelist. It is open to the public daily, 10 to 12.30 and 2 to 5 (Sundays and Bank Holidays excepted); admission 1s.

DR. JOHNSON'S HOUSE, Gough Square, Fleet Street, E.C.4.—An imposing late 17th-century house, in the garret of which, with the aid of six amanuenses, Samuel Johnson compiled his Dictionary. Open daily (except Sundays and Bank Holidays) from 10.30 to 4.30 or 5 (according to season). Admission 2s.

ELY PLACE, Holborn Circus, E.C.1.—The site of the London house of former Bishops of Ely, Ely Place is a private street whose affairs are administered by Commissioners under a special Act of Parliament. The 14th-century chapel, now St. Etheldreda's (R.C.) Church, is open daily until dusk.

FULHAM PALACE, Bishop's Avenue, Fulham, S.W.6.—The courtyard is 15th century, remainder 18th century. Residence of the Bishop of London. Grounds of 37 acres, surrounded by ancient moat. Previous application to visit should be made to the Bishop's Secretary.

GEFFRYE MUSEUM, Kingsland Road, E.2.—Open on Tuesdays to Saturdays 10 to 5, Sundays 2 to 5. Closed on Christmas Day and on Mondays except Bank Holidays. Admission free.

The Museum is housed in a building erected originally as almshouses in 1715. It was eventually purchased by the London County Council and opened as a museum in 1914. The exhibits are shown in a series of period rooms dating from 1600 to the present day, each containing furniture and domestic equipment of a middle-class English home. Photographic enlargements illustrate the costume of each period. Architectural features, mainly 18th century, an 18th century wood-

worker's shop, a downhearth kitchen and a gallery of tools are also shown. Temporary exhibitions and periodic series of evening lectures and recitals are held in the Lecture Hall. There is a reference library of books on furniture, social history and art. Special arrangements for children visiting the Museum in school parties and in their leisure time. *Curator*, Mrs. M. Harrison.

GEORGE INN, Southwark.—Near London Bridge Station. Given to National Trust in 1937. Last galleried inn in London, built in 1677. Open during licensed hours.

GUILDHALL, King Street, City, E.C.2 (dating from early 15th century).—Burnt out by incendiary bombs, 1940. The main hall and crypt have been restored. The Library, Museum and Art Gallery adjoining mainly escaped damage, and are in part open to the public. Admission free. The Library (with Commercial Reference Room adjoining) contains Plan of London, 1570; Deed of Sale with Shakespeare's signature; first, second and fourth folios of Shakespeare's plays, etc. Open free on week-days, 9.30 a.m. to 5 p.m. and Sundays (May-Sept.), 2 p.m. to 5 p.m. *Keeper of the Guildhall*, F. R. Tomkins.

HONOURABLE ARTILLERY COMPANY'S HEAD-QUARTERS, City Road, E.C.1.—The H.A.C. (Sec., Brig. E. Foster Hall, M.C.) received its charter of incorporation from Henry VIII. in 1537, and has occupied its present ground since 1642. The Armoury House dates from 1735. Four of its members who emigrated in the 17th century, founded in 1638 the Ancient and Honorable Artillery Company of Massachusetts. The H.A.C. is the senior regiment of the Territorial Army.

HORNIMAN MUSEUM AND LIBRARY, London Road, Forest Hill, S.E.23. Open daily except Tuesdays and Christmas Day, 10.30 to 6, Sundays 2 to 6. Admission free. The Museum was presented in 1901 to the London County Council by the founder, Mr. F. J. Horniman, M.P. The Museum has two main departments, one devoted to ethnology and the other to zoology. In the former department the very large collections include exhibits illustrating man's progress in the arts and crafts from primitive times and an outstanding collection of musical instruments. The Zoological department includes an aquarium. The reference library contains forty thousand volumes dealing with the subjects represented in the Museum. *Curator*, O. W. Samson.

HORSE GUARDS, Whitehall, S.W.1.—Archway and offices built about 1753. The mounting of the guard (Life Guards, or Royal Horse Guards) at 11 a.m. (10 a.m. on Sundays) and the dismounting at 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive through the gates and archway into *Horse Guards' Parade* (230,000 sq. ft.), where the Colour is "trooped" on the Queen's Official Birthday. (Trafalgar Square is 268,850 sq. ft.; Parliament Square, 136,900 sq. ft.; Leicester Square, 100,000 sq. ft.).

HOUSES OF PARLIAMENT, Westminster, S.W.1.—The Palace of Westminster was re-built in 1840-68 from the designs of Sir Charles Barry and Augustus Welby Pugin, at a cost of over £2,000,000.—Open to visitors on Saturdays, on Mondays in August and on Easter and Whit Mondays if neither House be sitting. Admission at the Norman Porch, House of Lords, on the above-mentioned days, from 10 a.m. to 4.30 p.m. Admission to the Strangers' Gallery of the House of Commons, during session, by member's order, or order obtained on personal application at the Admission Order Office in St. Stephen's Hall. The present House of Commons was used for the first time on October 26, 1950,

the original Chamber having been destroyed by bombs in 1941. The Victoria Tower (House of Lords) is about 330 ft. high, and when Parliament is sitting the Union Jack flies by day from its flagstaff. The Clock Tower of the House of Commons is about 320 ft. high and contains "Big Ben", the Hour Bell, named after Sir Benjamin Hall, First Commissioner of Works when the original bell was cast in 1856. This bell which weighed 16 tons 12 cwt., was found cracked in 1857. The present bell (13½ tons) is a recasting of the original and was first brought into use in July, 1859. A light is displayed from this tower at night when Parliament is sitting.

INNS OF COURT.—The *Inner* and *Middle Temple*, S. of Fleet Street, E.C.4, and N. of Victoria Embankment, to which the gardens extend, have occupied (since early 14th century) the site of the buildings of the Order of Knights Templars. *Inner Temple Hall* is open to the public on Monday-Friday, 10-11.30 a.m. and 2.30-4 p.m., except during Vacations. *Temple Church*, restored in 1958 after severe damage by bombing, is open on week-days 10-5 p.m. and the public are admitted to Sunday services (see p. 497). *Middle Temple Hall* (Sixteenth Century) is open to the public, Monday-Friday, 10-12 and 3-5 p.m.; Saturday, 10-4.30. Closed 1-2 p.m. and Sundays. In *Middle Temple Gardens* Shakespeare (Henry VI., Part I.) places the incident which led to the "Wars of the Roses" (1455-85). *Lincoln's Inn*, from Chancery Lane to Lincoln's Inn Fields, W.C.2, occupies the site of the palace of a former Bishop of Chichester and of a Black Friars monastery. It was founded early in the 14th century. The new Hall is modern, the Library is 15th century, and the old Hall early 16th century, the Chapel (Inigo Jones) early 17th century. *Lincoln's Inn Fields* (7 acres); the Square contains many fine old houses with handsome interiors. *Gray's Inn*, Gray's Inn Road, W.C.1, was founded in the late 14th century. The squares and roadways are open to the public during the day and the gardens from 12-2 p.m. (August and Sept., 9 a.m.-7 p.m.). The 16th-century Hall, where the "Comedy of Errors" was performed in 1594, was reduced to a shell by bombs. The Gardens were laid out (according to tradition) by Lord Chancellor Bacon (died 1626). No other "Inns" are active, but what remains of *Staple Inn* is worth visiting as a relic of Elizabethan London; though heavy damage was done by a flying-bomb, it retains a picturesque gabled front on Holborn (opposite Gray's Inn Road). *Clement's Inn* (near St. Clement Dane's Church), *Clifford's Inn*, Fleet Street, and *Thavies Inn*, Holborn Circus, are all rebuilt. *Serjeants' Inn*, Fleet Street (damaged by bombing), and another (now demolished) of the same name in Chancery Lane, were composed of *Serjeants-at-Law*, the last of whom died in 1922.

JEWISH MUSEUM, Woburn House, Upper Woburn Place, W.C.1.—Opened in 1932, the Museum contains a comprehensive collection of Jewish antiquities, liturgical paraphernalia and "Anglo-Judaica." Open free (Mon.-Thurs.), 2.30-5; (Fri. and Sun.), 10 a.m.-1 p.m. Closed on Saturdays and Jewish Holydays. Conducted tours of parties by arrangement with the Secretary/Curator.

KEATS HOUSE AND MUSEUM, Keats Grove, Hampstead, N.W.3.—In one of two houses here, now made into one, John Keats lived at various times between 1818 and 1820. The house and the museum are open free, week-days, 10 a.m. to 6 p.m. The special student's library in the adjoining building is open free on weekdays, 9 a.m. to 7 p.m. (Monday and Thursday to 8 p.m.)

KENSINGTON PALACE, W.8.—Enlarged by Christopher Wren for King William III. (1691), and

continued as a royal residence until 1760. The birthplace of Queen Victoria in 1819. State apartments, re-opened to the public in 1956 under administrative control of the London Museum, contain pictures from the royal collections, royal costumes and furniture formerly belonging to Queen Mary. *Hours of Opening:* (March 1-Sept. 30) 10 a.m.-6 p.m.; Sundays, 2-6 p.m.; (Oct. 1-Feb. 28) 10-4; Sundays, 2-4 p.m. *Kensington Gardens* (q.v.) adjoin.

KING HENRY VIII WINE CELLAR, Horse Guards Avenue, Whitehall, S.W.1.—Built in Cardinal Wolsey's time, the Cellar is one of the few remains of the Tudor Palace of Whitehall which King Henry VIII appropriated from the See of York when the Cardinal was deprived of the Great Seal in 1529. The Wine Cellar is open to the public on Saturdays at 2.30 p.m. from Easter Saturday to mid-December. Admission is free but is by appointment only and application for a pass must be made in advance to the Secretary, Ministry of Works (A.S.8.L.), Lambeth Bridge House, Albert Embankment, S.E.1.

LAMBETH PALACE, S.E.1.—The official residence of the Archbishop of Canterbury, on south bank of Thames; the oldest part is 13th century, the house itself is early 19th century. For leave to visit the historical portions, applications should be made by letter to the Archbishop's Secretary.

LIVERY COMPANIES' HALLS.—The Principal Companies (see pp. 637-39) have magnificent halls, but admission to view them has generally to be arranged beforehand. Among the finest or more interesting may be mentioned the following: Goldsmiths' Hall, Foster Lane. The present hall was completed in 1835, and contains some magnificent rooms. Exhibitions of plate have been shown here periodically in recent years. Fishmongers' Hall, London Bridge (built 1831-3), now admirably restored after severe bomb damage, also contains fine rooms. Apothecaries' Hall, Water Lane, was rebuilt in 1670, after the Great Fire, and has library, hall and kitchen which are good examples of this period, together with a pleasant courtyard. Vintners' Hall, Upper Thames Street, was also rebuilt after the Great Fire, and its hall has very fine late 17th century panelling. The Watermen and Lightermen's Company is not, strictly speaking, a Livery Company, but its hall, in St. Mary at Hill, is a good example of a smaller 18th century building, with pilastered façade. It was completed in 1780. Stationers' Hall, in Stationers' Hall Court, behind Ludgate Hill, another post-Fire Hall, standing in its own court, has a particularly finely carved screen. Barbers' Hall, Monkwell Street, with a Hall attributed to Inigo Jones, was completely destroyed by bombing, but is to be rebuilt. The new hall is to be built some 30 ft. from the old site to enable one of the bastions and part of the wall of the Roman fort to remain exposed to view. Mercers' Hall, Cheapside, built to replace the hall destroyed by bombing, was opened in 1958.

LOYD'S, Lime Street, E.C.3.—Housed in the Royal Exchange for 150 years and in Leadenhall Street from 1928-1957. The present building was opened by H.M. Queen Elizabeth the Queen Mother on Nov. 14, 1957. The underwriting space has an area of 44,250 sq. ft.

LORD'S CRICKET GROUND, St. John's Wood Road, N.W.8.—The headquarters (since 1814) of the Marylebone Cricket Club, the premier cricket club in England and the governing body of cricket, the scene of some of the principal matches of the season and Middlesex County headquarters. Tennis court in building behind members' pavilion.

MANSION HOUSE, City, E.C.4.—(Reconstructed 1930-31.) The official residence of the Lord

Mayor; the Egyptian Hall and Ballroom are the chief attractions. Admission by order from the Lord Mayor's Secretary.

MARKETS.—The London markets (administered by the Corporation of the City of London) provide foodstuffs for 8,500,000 to 9,000,000 people. The dead meat market at Smithfield is the largest in the world, the supplies marketed amounting to nearly 500,000 tons annually. *Central Meat, Fish, Fruit, Vegetable, and Poultry Markets,* Smithfield (the Poultry Market was gutted by fire in January, 1958); *Leadenhall Market* (Meat and Poultry); *Billingsgate* (Fish), Thames Street; *Spitalfields, E.1* (Vegetables, Fruit, etc.), enlarged 1928, and opened by the late Queen Mary; *London Fruit Exchange,* Brushfield Street (built by Corporation of London 1928-29) faces Spitalfields Market. Other markets are—*Covent Garden, W.C.2* (established under a charter of Charles II, in 1661) and *Borough Market, S.E.1*, for vegetables, fruit, flowers, etc.

MARLBOROUGH HOUSE, Pall Mall, S.W.1.—The London home of Queen Mary until her death in 1953. (Not open to the public.)—Built by Wren for the great Duke of Marlborough about 1710, and purchased by the Crown in 1817. Prince Leopold lived there until 1831, and Queen Adelaide from 1837 until her death in 1849. In 1863 it became the London house of the Prince of Wales. The Queen's Chapel, Marlborough Gate, begun in 1623 from the designs of Inigo Jones for the Infanta Maria of Spain, and completed for Queen Henrietta Maria, is open to the public for services during part of the year. In 1959 Marlborough House was given by the Queen as a Commonwealth centre and a meeting place for Commonwealth Premiers.

LONDON MONUMENT, (commonly called "The Monument"), Monument Street, E.C.3.—Built from designs of Wren, 1671-77, to commemorate the *Great Fire of London*, which broke out in Pudding Lane, Sept. 2, 1666. The fluted Doric column is 120 ft. high (the moulded cylinder above the balcony supporting a flaming vase of gilt bronze is 42 ft. in addition), and is based on a square plinth 40 ft. high, with fine carvings on W. face (making a total height of 202 ft.). Splendid views of London from gallery at top of column (311 steps) Admission 6d., Monday to Saturday, 9 a.m. to 6 p.m. (Oct.—March to 4 p.m.). Sundays—May to Sept., 2-6 p.m. Parties of 20 or more school children in charge of an adult 3d. each.

PERCIVAL DAVID FOUNDATION OF CHINESE ART, 53 Gordon Square, W.C.1.—Set up in 1950 to promote the study and teaching of the art and culture of China and the surrounding regions, and provide facilities necessary to that end. The Foundation contains the collection of Chinese ceramics formed by Sir Percival David and his important library of books on Chinese art. To these was added a gift from the Hon. Mountstuart Elphinstone of part of his collection of Chinese monochrome porcelains. The galleries were opened to the public in 1952. The Foundation is administered on behalf of the University of London by the School of Oriental and African Studies. *Hours of opening:* Galleries, Mon. 2 to 5 p.m.; Tues. to Fri. 10.30 a.m. to 5 p.m.; Sat. 10.30 a.m. to 1 p.m.; Library, Mon. 2.30 to 4.30 p.m.; Tues. to Fri. 10.30 a.m. to 12.30 p.m.; 1.30 to 4.30 p.m.; Sat. 10.30 a.m. to 12.30 p.m. *Secretary-Librarian,* Miss B. W. D. Martin.

PORT OF LONDON.—The Port of London comprises the tidal portion of the River Thames from Teddington to the sea, a distance of 69 miles and five dock systems covering an area of 4,140 acres, of which 673 acres are water. The governing body is the Port of London Authority, whose Head Offices in Trinity Square, E.C.3, were designed by Sir Edwin Cooper. Particulars of the docks are as follow:—*London & St. Katharine Docks, E.1.*—Area 125½ acres including 45 acres water. Chief commodities handled are Wool, Ivory, Spices, Shells, Tea, Rubber, Wine, Marble, Canned Goods, Hides, Perfumes, etc., and general cargo from Continental and coastwise ports. *Surrey Commercial Docks, S.E.16.*—Area 381 acres, including 134 acres water. The chief centre of the London and Provincial Soft-wood Trade. Also handles Hardwood, Grain, Canadian Dairy Produce, etc. *West India & Millwall Docks, E.14.*—Area 466 acres including 133½ acres water. Principal commodities handled are Rum, Sugar, Grain, Hardwood, Fruit, Plywood and Wood pulp. In Millwall Dock a special feature is the Granary. *East India Dock, E.14.*—Area 49 acres including 23 acres water. *Royal Victoria & Albert & King George V. Docks, E.16.*—Area 1,102½ acres including 235 acres water—have special facilities for handling Frozen and Chilled Meat, Grain, Tobacco and Bananas. Large quantities of Wool, Fruit, Dairy Produce and general cargo are also dealt with. The *King George V. Dock*, opened in 1921, provides accommodation for

vessels up to 30,000 tons. *Tilbury Docks, Essex.*—Area 725 acres, including 104 acres water. These docks are 26 miles below London Bridge and are used principally by vessels plying on the Australian, Indian and other Eastern routes. The Cargo Jetty in the River at Tilbury is available for vessels to discharge or load part cargoes. Tilbury Passenger Landing Stage provides accommodation for liners at all states of the tide and adjoins Tilbury Riverside Station, giving direct rail connection with London, the Midlands and the North.

PRINCE HENRY'S ROOM, 17 Fleet Street, E.C.4.—Early 17th century timber-framed house containing fine room on first floor with panelling and modelled plaster ceiling. Open Mon. to Fri. 1.45 p.m. to 5 p.m.; Sat. to 4.30 p.m. Closed Christmas Day and Good Friday. Available for evening lettings to societies, etc. on application to the Architect, County Hall, S.E.1.

ROMAN LONDON.—Though visible remains are very few, almost every excavation for the foundations of new buildings in the City reveals Roman remains. Sections of the City wall, often however merely a mediæval re-build on the Roman foundations, are the most striking remains still to be seen. Fragments may be seen near the White Tower in the Tower of London, Trinity Square, No. 1 Crutched Friars, All Hallows, London Wall—its semi-circular vestry being built on the remains of a round bastion—St. Alphage, London Wall, recently restored by the Corporation of London and showing a striking succession of building and repairs from Roman till later mediæval times. St. Giles, Cripplegate and, by permission only, the great bastion beneath the pavement of the yard of the G.P.O. in Giltspur Street. Recent excavations in the Cripplegate area have revealed that a fort was built in this area and later incorporated in the town wall in this north-west corner of the City. Evidence from these excavations proves that the fort was not built until about 100–120 A.D., and the date of the town wall must therefore be considerably later. Remains of a bath building are preserved beneath the Coal Exchange in Lower Thames Street and other foundations may be seen in the Crypt of All Hallows Barking by the Tower. The governmental headquarters of the town was a great basilica, more than 400 ft. long from east to west, the massive walls of which have been encountered, extending from Leadenhall Market across Gracechurch Street as far as St. Michael's, Cornhill. Excavations during the past few years have shown that buildings over the river front were erected on huge oaken piles and a framework of timber for a considerable distance both east and west of the present London Bridge. The "Roman Bath," in Strand Lane, which is not now held by most authorities to be of Roman origin, is maintained by the L.C.C. on behalf of the National Trust, and is open to the public on weekdays from 10 a.m. to 12.30 p.m. (*Admission, 1s.*). Excavations since 1948 on a bombed site in Walbrook, on the banks of the old Wall Brook, have produced many interesting discoveries, including a Temple of Mithras, from which the splendid marble statues have been placed in Guildhall Museum, now in the Royal Exchange, where many other relics from the Roman City may be seen.

ROYAL EXCHANGE, E.C.3 (founded by Sir Thomas Gresham, 1566, opened as "The Bourse" and proclaimed "The Royal Exchange" by Queen Elizabeth I., 1571, rebuilt 1667–69 and 1842–44).—Open to the public, free. Statues of Queen Elizabeth I., Charles II., Queen Victoria, Sir Thomas Gresham, and others; mural paintings in the ambulatory by Leighton, Abbey, Brangwyn, Wyllie, and others. Part of the Guildhall Museum

is now housed in the building and from time to time various exhibitions are held there. The carillon of the Royal Exchange (reinstated 1950) plays English, Scottish, Irish, Welsh, Canadian and Australian melodies at 9 a.m., 12 noon and 3 and 6 p.m. With the exception of the courtyard ambulatory and the shops the whole of the building is now occupied by the Royal Exchange Assurance (which has had its head office there since 1720) and is administered by the Gresham Committee (Clerk, Mercers' Hall, Ironmonger Lane, E.C.2.).

ROYAL GEOGRAPHICAL SOCIETY, Kensington Gore, S.W.7.—Map Room open to public, free.

ROYAL MINT, Tower Hill, E.C.3 (building erected 1811), where coins for the United Kingdom and abroad are struck. Admission by order only, application for which should be made to the Deputy Master of the Mint, at least 6 weeks in advance of intended visit. Hours of admission, 9.30 a.m. to 3 p.m., Mon. to Fri., except Bank Holidays, etc., when the Mint is closed.

ROYAL UNITED SERVICE MUSEUM, WHITEHALL, S.W.1.—Open on weekdays, 10 to 5. Admission: adults: 2s. 6d., children under 14, 1s. Special arrangements for school parties. Services in uniform free. This private Museum is housed in the Banqueting House of Old Whitehall Palace, which was designed by Inigo Jones and completed in 1622. The ceiling consists of magnificent and massive paintings by Rubens. From this building King Charles I. walked to the scaffold erected near the present entrance. The exhibits are some of the greatest treasures of the Navy, Army and Air Force, and include models of Trafalgar and Waterloo, dioramas of other famous events from the landing of Julius Caesar to the invasion of Normandy, models of ships and aircraft, and many personal relics of national heroes. Other exhibits are uniforms, medals, swords, small arms, model guns and tanks. Curator, Capt. J. H. Laing.

ST. JAMES'S PALACE, in Pall Mall, S.W.1.—(Not open to the public.) Built by Henry VIII.; the Gatehouse and Presence Chamber remain, and part of the Chapel Royal, which in 1955 was reopened to the public for services during part of the year. A royal residence from 1697 to 1837. Representatives of Foreign Powers are still accredited "to the Court of St. James's" and (by the permission of the Crown) the Conference of the Allies (1921) and later conferences have been held here.

ST. JOHN'S GATE, Clerkenwell, E.C.1.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the gate of the Priory of that Order, of which the gate house (early 16th century) and crypt of Church (12th century) alone survive. The gatehouse may be inspected on application to the Secretary at the Chancery.

SIR JOHN SOANE'S MUSEUM, 13 Lincoln's Inn Fields, W.C.2. The house and galleries, built 1812-24, are the work of the founder, Sir John Soane (1753-1837) and contain his collections, arranged as he left them, in pursuance of an Act procured by him in 1833. Exhibits include the Sarcophagus of Seti I. (1370 B.C.), classical vases and marbles, Hogarth's *Rake's Progress* and *Election* series, paintings by Canaletto, Reynolds, Turner, Lawrence, etc., and sculpture by Chantrey, Flaxman, etc. Soane's library of 8,000 vols. and a collection of 20,000 architectural drawings are available for study. Open Tues.-Sat. inclusive, 10 a.m. to 5 p.m. Closed Bank Holidays and throughout August. Curator: Sir John Summerson, C.B.E., F.B.A. *Inspector*: Miss D. Stroud, F.S.A.

SOMERSET HOUSE, Strand, W.C.2, and Victoria Embankment, W.C.2.—The beautiful river façade (600 ft. long) was built at the close of the 18th century from the designs of Sir W. Chambers; the

remainder of the building is early 19th century. Somerset House was the property of Lord Protector Somerset, at whose attainder in 1552 the palace passed to the Crown, and it was a royal residence until about the close of the 17th century. The building is now occupied by the Board of Inland Revenue and other branches of the Civil Service and by the Principal Probate Registry. In the Probate Registry (Central Hall) are the wills of (*inter alios*) Shakespeare, Newton, Van Dyck, Pitt, Dr. Johnson, Nelson, Wellington and Burke.

STOCK EXCHANGE, E.C.2.—The foundation stone of the present building was laid in 1801, but the building was almost entirely reconstructed in 1854 from the designs of Thomas Allason. The most notable alteration since that date occurred in 1885 when an east wing was added: this is surmounted by a dome, the apex of which is more than 100 feet above the floor. The area of the floor is about 25,000 square feet. The Stock Exchange provides a market for the purchase and sale of about 9,500 securities quoted in the Stock Exchange Daily Official List and valued at over £50,000,000,000 and also securities listed on other Exchanges. At present the members of the Stock Exchange, who consist of brokers (agents for clients) and jobbers (dealers in specific securities) number about 3,500. Visitors' Gallery (entrance, 8 Throgmorton Street) open between 10.30 a.m. and 3 p.m. from Monday to Friday. Admission free and without ticket. Film show.

THAMES EMBANKMENTS.—The Victoria Embankment, on the N. side (from Westminster to Blackfriars), was constructed by Sir J. W. Bazalgette for the Metropolitan Board of Works, 1864-70 (the seats, of which the supports of some are a kneeling camel, laden with spicery, and of others a winged sphinx, were presented by the Grocers' Company, and by Rt. Hon. W. H. Smith, M.P., in 1874); the Albert Embankment on the S. side (from Westminster Bridge to Vauxhall), 1866-69; the Chelsea Embankment, 1871-74. The total cost exceeded £2,000,000. Sir J. W. Bazalgette (1819-91) also inaugurated the London main drainage system, 1858-65. A medallion has been placed on a pier of the Victoria Embankment to commemorate the engineer of the Thames waterside improvements ("Flumini vincula posuit"). The County Hall of the L.C.C. includes an embankment on the Surrey side.

THAMES TUNNELS.—The Rotherhithe Tunnel (foot passengers and vehicles), constructed by the L.C.C. and opened in 1908, connects Commercial Road East, with Lower Road, Rotherhithe; the total length is 1 mile 332 yards, of which 474 yards are under the river. The cost of the tunnel and its approaches was £1,506,914. The Blackwall Tunnel (foot passengers and vehicles), constructed by the L.C.C. and opened in 1897, connects East India Dock Road, Poplar, with Blackwall Lane, East Greenwich. The total length of the tunnel is 1 mile 279 yards, of which 377 yards are under the river. The cost of the tunnel with its approaches was about £1,323,663. Greenwich Tunnel (foot passengers only), constructed by the L.C.C. and opened in 1902, connects the Isle of Dogs, Poplar, with Greenwich. The length of the subway is 406 yards, and the cost was about £180,000. The Woolwich Tunnel (foot passengers only), constructed by the L.C.C. and opened in 1912, connects North and South Woolwich below the passenger and vehicular ferry from North Woolwich Station, E.16, to High Street, Woolwich, S.E.18. The length of the subway is 552 yards, and its cost was about £86,000. The Thames Tunnel (1,300 feet) was opened in 1843 to connect Wapping (N.) with Rotherhithe (S.). In 1866 it was closed to the public, and purchased by

the East London Railway Company. The *Tower Subway* for foot passengers was opened in 1870, and has long been closed.

TOWER HILL, E.C.1 and E.C.3, was formerly the place of execution for condemned prisoners from the Tower, the site of the scaffold being marked in the gardens of Trinity Square. A movement, sponsored by the Council for Tower Hill Improvement, aims at creating more open space around the Tower by the demolition of encroaching buildings and by opening Trinity Square Gardens to the public, thus restoring to Tower Hill its ancient title to be the City's pleasure, or "Board-royce."

TOWER OF LONDON, E.C.3.—Admission to a general view of the Tower, the White Tower (Armouries), the Beauchamp and Bloody Towers and the Chapels Royal—1s. Saturdays, admission free; to Jewel House—1s. Half-price for children. The Tower of London is closed on Sundays during the Winter period and on the mornings of the Summer time period, Good Friday and Christmas Day. On Sundays throughout the year the public is admitted to Holy Communion, 8.15 a.m. and Morning Service, 11.15 a.m. Open on weekdays, May 1 to Sept. 30, 10 a.m. to 5.30 p.m.; Oct. 1 to mid-March, 10 a.m. to 4 p.m.; mid-March to April 30, 10 a.m. to 4.30 p.m.; Sundays, first Sunday in April to last in Oct., 2 to 5 p.m. CONSTABLE, Field-Marshal The Earl Alexander of Tunis, K.G., P.C., G.C.B., O.M., G.C.M.G., C.S.I., D.S.O., M.C.; LIEUTENANT, Lieut.-General Sir Roger Bower, K.C.B., K.B.E.; MAJOR AND RESIDENT GOVERNOR, Col. Sir Thomas Butler, Bt., D.S.O., O.B.E.; KEEPER OF THE JEWEL HOUSE, Maj.-General H. D. W. Sitwell, C.B., M.C., F.S.A.; MASTER OF THE ARMOURIES, Sir James Mann, F.S.A.

The White Tower is the oldest and central building in Her Majesty's Royal Palace and Fortress of the Tower of London. It was built at the order of William I. and constructed by Gundulph, Bishop of Rochester, in the years 1078-98. The Inner Wall, with thirteen towers, was constructed by Henry III. in the 12th century. The Moat was extended and completed by Richard I. and the Wharf first mentioned in 1228. The Outer Wall was completed in the reign of Edward I. and now incorporates 6 towers and 2 bastions. The last Monarch to reside in the Tower of London was James I. The Crown Jewels came to the Tower in the reign of Henry III. All coinage used in Great Britain was minted in the Outer Ward of the Tower of London until 1810 when the Royal Mint was formed. The Tower of London has had a military garrison since 1098.

WELLINGTON MUSEUM, Apsley House, Hyde Park Corner, W.1.—Admission on weekdays and Bank Holidays, 10 to 6; Sundays, 2.30 to 6. Closed Good Friday and Christmas Day. Adults 1s., Children, 6d. Apsley House was designed by Robert Adam for Lord Bathurst and built 1771-8. It was bought in 1817 by the Duke of Wellington, who in 1828-29 employed Benjamin Wyatt to enlarge it, face it with Bath stone and add the Corinthian portico. The Museum contains many fine paintings, services of porcelain and silver plate and personal relics formerly belonging to the 1st Duke of Wellington (1769-1852) and was given to the Nation by the present Duke. It was first opened to the public in 1952, under the administration of the Victoria and Albert Museum.

WESTMINSTER HALL, S.W.1 (built by William Rufus, A.D. 1087-1100 and altered by Richard II., 1377-99), adjacent to and incorporated in the Houses of Parliament.—Westminster Hall is part of the old Palace of Westminster and survived the fire, which destroyed most of the remainder of the

Palace (Oct. 16, 1834). The Hall is about 240 ft. long, 68 ft. wide, and 90 ft. high. The hammer beam roof of carved oak, dating from 1399, is one of the principal attractions. King Charles I. was tried in the Hall. Extensive repairs to the Hall have recently been carried out. Admission: During sessions—Mon. to Thurs., 10 a.m. until one hour before House of Commons meets. Sat., 10 a.m.-4 p.m. During Recess—Mon. to Sat., except Good Friday and Christmas Day, 10 a.m.-4 p.m.

WHITECHAPEL ART GALLERY, High Street, E.1. Charitable institution founded in 1901 for the organization of temporary exhibitions of the Fine Arts and Architecture. There is no permanent collection. Open: Tuesdays to Saturdays 12-6, Sundays 2-6, closed Mondays. Admission Free. Director, Bryan Robertson, O.B.E.

ENVIRONS OF LONDON

BARNET AND HADLEY GREEN.—Scene of Battle, A.D. 1471. Hadley Woods.

BURNHAM BEECHES AND FLEET WOOD, Bucks.—Magnificent wooded scenery (425 acres), purchased by the Corporation of London for the benefit of the public in 1879; Fleet Wood (65 acres) presented in 1921. During summer omnibus runs daily, Sundays included, from Slough Station (Western Region), passing within 250 yards of "Gray's Elegy" Church. See "Stoke Poges."

BUSHY PARK (1,200 acres).—Adjoining Hampton Court, contains many fine trees and avenue of horse-chestnuts enclosed in a fourfold avenue of limes, planted by King William III. "Chestnut Sunday" (when the trees are in full bloom with their "candles") is usually about 1st to 15th May.

CHEQUERS, a country residence for Prime Ministers, was presented to the Nation (with an endowment to maintain the estate, etc.) by Lord and Lady Lee of Fareham, as the official country residence for the Prime Minister of the day, and the gift was approved by Parliament in the *Chequers Estate Act, 1917*. In 1921 the Chequers Estate of 700 acres was added to the gift by Lord Lee. Chequers is a mansion in Tudor style in the Chilterns, about 3 miles from Princes Risborough. Bucks, and contains a collection of Cromwellian portraits and relics.

CHILTERN HUNDREDS (Stoke, Burnham and Desborough, in Buckinghamshire).—No duly elected member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement, 1707 (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the Chiltern Hundreds, or of the Manor of Poyninges, or Northstead, or the Escheatorship of Munster, whereupon the seat is declared vacant (under the Place Act of 1742, which expressly permitted acceptance of such offices to serve as an excuse for resignation) and a new writ is issued by the Speaker.

DARWIN AND DOWN HOUSE, Downe, Farnborough, Kent.—Where Charles Darwin thought and worked for 40 years and died in 1882. Maintained by the Royal College of Surgeons. Open daily (except Fridays and Christmas Day) 11 to 5. Admission, 1s.; Children, 6d.

DULWICH, S.E.21 (5 miles from London), contains Dulwich College (founded by Edward Alleyn in 1619), the Horniman Museum and Dulwich Park (72 acres). The Dulwich Picture Gallery, built by Sir John Soane to house the collection bequeathed by the artist, Sir Francis Bourgeois, was damaged by enemy action in the Second World War. The pictures, however, were saved, and the gallery has been rebuilt with the aid of a grant from the Pilgrim Trust. It was reopened by Queen Elizabeth the Queen Mother on April 27, 1953. In Dulwich Village the rural characteristics of the pre-suburban period are preserved.

ELTHAM, Kent (20 miles from London by Southern Region). Remains of 13th–15th century Eltham Palace, the birthplace of John of Eltham (1316), son of Edward II. The hall, built by Edward IV., contains fine hammer-beam roof of chestnut. In the churchyard of St. John the Baptist is the tomb of Thomas Doggett, the comedian and founder of the Thames Watermen's championship (Doggett's Coat and Badge).

EPPING FOREST (6,000 acres, originally purchased by the Corporation of London for £250,000 and thrown open to the public in 1882; the present

forest is 12 miles long by 1 to 2 miles wide, about one-tenth of its original area). **LOUGHTON, BUCKHURST HILL, CHINGFORD, HIGH BRECH (London Transport and Eastern Region).** Beautiful forest scenery.

ETON COLLEGE.—22 miles from London. The most famous of English schools, founded by Henry VI. in 1440, the scholars numbering 1,160 in July, 1952. Buildings date from 1442.

GREENWICH, S.E.10.—A south-eastern metropolitan borough with a frontage of 4½ miles on the Thames. *Greenwich Hospital* (since 1873, the Royal Naval College) was built by Charles II., from designs by Inigo Jones, and by Queen Anne and William III., from designs by Wren, on the site of an ancient royal palace, and of the more recent *Placentia*, an enlarged edition of the palace, constructed by Humphrey, Duke of Gloucester (1391–1447), son of Henry IV. Henry VIII., Queen Mary I, and Queen Elizabeth I were born in the Royal Palace (which reverted to the Crown in 1447) and King Edward VI. died there. In the principal quadrangle is a marble statue of George II., by Rysbrack. (For National Maritime Museum, see p. 407.) *Painted Hall and Chapel* open daily except Thursdays from 2.30 p.m. to 5 p.m. in summer months. During winter months they are also closed on Sundays. Visitors are also admitted to Morning Service in the Chapel at 11 a.m., summer and winter, except during College vacations. *Greenwich Park* (185 acres) was enclosed by Humphrey, Duke of Gloucester, and laid out by Charles II., from the designs of Le Nôtre. On a hill in Greenwich Park is the old *Royal Observatory* (founded 1675), which is now removed to Herstmonceux Castle, Sussex (see p. 410). Part of its buildings at Greenwich have been taken over by the Maritime Museum and named *Flamsteed House*, after John Flamsteed, the first Astronomer Royal. The parish church of Greenwich (*St. Alfege*) was rebuilt by Hawksmoor (Wren's pupil) in 1718, and contains a pulpit and other carvings attributed to Grinling Gibbons. General Wolfe (Heights of Abraham) and Tallis ("the father of Church Music") are buried in the church. Henry VIII. was christened in the former church. The Ministerial *Whitebait Dinner*, at the "Ship" Hotel, was held in 1894. *Charlton House*: built in the early 17th century (1607–1612) for Adam Newton, tutor to Prince Henry, brother to Charles I. The house is largely in the Jacobean style of architecture. *Cutty Sark*, the last of the famous tea clippers, which has been preserved as a memorial to ships and men of a past era. The ship is fully restored and rerigged, with a museum of sail on board. Open to visitors: weekdays, 11 to 6, Sundays, 2.30 to 6.

HAM HOUSE, Richmond.—A notable example of 17th-century domestic architecture, long the home of the Tollemache family (Earls of Dysart). Now the property of the National Trust, which has let it on a long lease to the Ministry of Works. The contents, described as "probably the finest and most varied collection of Charles II.'s reign to survive," were purchased for the Victoria and Albert Museum which now administers the house. Opened to the public in May, 1950, Ham House may be seen on Tues.–Sun. inclusive and on Bank Holidays, 2–6 p.m., April–Oct., 12–4 p.m., Nov.–March. Closed Mon. (except Bank Holidays), Christmas Day and Good Friday. Admission, 1s.; Children, 6d.

HAMPTON COURT.—Sixteenth-century Palace built by Cardinal Wolsey, with additions by Sir Christopher Wren for William and Mary, 15 miles from London. Fine view of river. Beautiful gardens with maze and prolific grape vine (planted in 1769). Old Royal Apartments and collection of

pictures. Tennis Court, built by King Henry VIII. in 1530. The Palace is closed on Christmas Day and Good Friday. The State Apartments and Great Hall are open (May-Sept.), weekdays, 9.30-6; Sundays, 11-6; (March, April and October), weekdays, 9.30-5; Sundays, 2-5; (Nov.-Feb.), weekdays, 9.30-4, Sundays, 2-4. Admission 2s.; children half-price. Admission to the Tudor Kitchen, Wine Cellars and Great Hall cellars, 3d. (inclusive charge), no half-price. Orangery (Mantegna Pictures) open as State Apartments, 3d., no half-price. Tudor Tennis Court open daily (April-Sept.) at the same time as the State Apartments. Admission 3d. The Vine, admission 2d. (April 1-Sept. 30); free (Oct.-March); and the Maze, admission 3d., are open daily from 10.30 a.m. until 30 mins. before dusk. Tickets obtainable at the King's Staircase. The Banqueting House is open daily (April-Sept.) at the same time as the State Apartments. Admission 6d., children half-price. Refreshments can be obtained in the Tilt Yard gardens during the summer season. *Bushy Park* adjoins the Lion Gates of Hampton Court Palace.

HARROW-ON-THE-HILL.—20 miles by Metropolitan and other railways. Large public school (about 550 scholars), founded by John Lyon in 1571. The "Fourth Form Room" dates from 1608.

HUGHENDEN MANOR, High Wycombe, Bucks.—The home of Disraeli from 1847 till his death and contains much of his furniture, books, etc. Conveyed to the National Trust in 1947. Open daily including Sundays and Monday Bank Holidays (but not other Mondays and not the day after a Monday Bank Holiday), 2-6 or till dusk. Open also Saturdays and Sundays, 10-1. Closed all January. Admission (non-members), 2s.; children- 1s.; parties of 20 or more, 15-6d.

JORDANS AND CHALFONT ST. GILES, near Beaconsfield, Bucks, contain the Old *Quaker Meeting House* (1688) at Jordans, in the burial ground of which lies William Penn (Pennsylvania); a barn built out of the timbers of the *Mayflower* by the 17th-century owner of Jordans (Gardener). At Chalfont St. Giles is the cottage where Milton lived during the Great Plague (1665-1666).

KEW, Surrey, a parish contained since 1892 in the borough of Richmond, was a favourite home of the early Hanoverian monarchs. Kew House, the residence of Frederick, Prince of Wales, and later of his son, George III., was pulled down in 1803, but the earlier Dutch House, now known as Kew Palace, survives. It was built in 1631 and acquired by George III. as an annexe to Kew House in 1781. The famous Kew Gardens (see p. 650) were originally laid out as a private garden for Kew House for George III.'s mother in 1759 and were much enlarged in the nineteenth century, notably by the inclusion of the grounds of the former Richmond Lodge. Kew Green, between the Gardens and Kew Bridge, is very attractive and on the Green stands the parish church, built in 1714 and several times enlarged. Princess Mary of Cambridge and the Duke of Teck, the parents of the late Queen Mary, were married here in 1866 and the Church contains many reminders of Royal connections with Kew.

KINGSTON-UPON-THAMES, Surrey (about 12 miles from London), is the ancient place of coronation of the Kings of Saxon England. The Coronation Stone (hence the name "King's Stone") is preserved within railings adjoining the Guildhall.

NATIONAL ARMY MUSEUM, Royal Military Academy, Sandhurst, Camberley, Surrey.—Opened by H.M. the Queen on July 15, 1960. Also housed at Sandhurst are the museums of the Indian Army and of the disbanded Irish regiments.

OSTERLEY PARK, Isleworth.—House and park of 300 acres given to the National Trust by the Earl of Jersey in 1949. Part of the Elizabethan house, built in 1577 for Sir Thomas Gresham, remains, but it was largely remodelled by Robert Adam, and the staircases are among the best examples of Adam decoration. Open daily, except Mondays, (April-Sept.) 2-6 p.m.; (Oct.-March) 12 noon-4 p.m. Closed Monday (except Bank Holidays), Christmas Day and Good Friday. Admission 1s., children 6d.

RICHMOND, Surrey, contains the red brick gateway of *Richmond Palace* (Henry VII., 1485-1509) and buildings of the Jacobean, Queen Anne, and early Georgian periods, including *White Lodge* in Richmond Park, the former home of Queen Mary's mother (the Duke of Windsor was born there, June 23, 1894). The *Star and Garter Home* for Disabled Soldiers, Sailors, and Airmen (the Women's Memorial of the Great War) was opened by Queen Mary in 1924. *Richmond Park* (2,358 acres) contains herds of fallow and red deer. From the *Terrace Gardens*, Richmond Hill, can be obtained a wonderful view of the Valley of the Thames.

RUNNIMED.—A meadow of about 100 acres, on S. bank of Thames (part of the Crown Lands), between Windsor and Staines. From June 15-23, 1215, the hostile Barons encamped on this meadow during negotiations with King John, who rode over each day from Windsor. The 48 "Articles of the Barons" were accepted by the King on June 15, and were subsequently embodied in a charter, since known as *Magna Carta*, of which several copies were sealed on June 19. About half a mile N.E. of the meadow is *Magna Carta Island* (claimed as the actual site of the sealing), presented to the National Trust in 1930 by Lady Fairhaven and her sons.

A memorial at *Cooper's Hill*, near Runnymede, to members of the Commonwealth air forces who lost their lives in the Second World War while serving from bases in the United Kingdom and north-western Europe and have no known grave, was unveiled by the Queen on October 17, 1953.

ST. ALBANS.—A city in Hertfordshire, on the river Ver, 22 miles N.W. of London. The abbey church, built partly of materials from the old Roman city of Verulamium by Paul of Caen, was consecrated in 1125. Parts still remain of the Norman structure. The city was the scene of the overthrow of Henry VI. in 1455, and of the Earl of Warwick in 1461. On a printing press set up in the abbey the first English translation of the Bible was printed. The site of the pre-Roman city of King Tasciovanus and the remains of the ancient City of Verulamium, with well preserved theatre and many other features, excavated in recent years. St. Michael's Church, with tomb of Sir Francis Bacon.

STOKE POGES (2 miles from Slough station, Western Region) contains the 14th-century Church with the Churchyard of Gray's "Elegy" and "Ode on a Distant Prospect of Eton College." The poet was buried in the church in 1771.

SYON HOUSE, Brentford.—The town seat of the Duke of Northumberland. The house is part of the buildings of the Nunnery of Syon, erected by permission of Henry VI. in 1431. At the Dissolution of the Nunnery the Estate reverted to the Crown. In 1578 it was granted to the 9th Earl of Northumberland and in 1632 the house was repaired under superintendence of Inigo Jones. In 1766 the interior was transformed by Robert Adam, who also built the entrance gateway. The lion on the river-front was brought here in 1874 on the

demolition of Northumberland House in the Strand. Open (April, May, June), Wed.-Sat., also Easter Monday, Whit Sunday and Whit Monday; (July-Sept.), Wed.-Sun. 1 p.m. to 4.30 p.m. Admission 2s. 6d.; children, 1s.

WALTHAM ABBEY (or **WALTHAM HOLY CROSS**), 23 miles from London (Eastern Region).—The Abbey ruins, Harold's Bridge (11th century), the Nave of the former cruciform Abbey Church (the oldest Norman building in England (consecrated May 3, 1060) and the traditional burial place of King Harold II. (1066), and a Lady Chapel of Edward II., with crypt below. New evidence of the position and style of several buildings, which once stood on the site of the Augustinian monastery, were revealed by the prolonged drought in the summer of 1933. At Waltham Cross, 1 mile from the Abbey, is one of the crosses (partly restored) erected by Edward I. to mark a resting place of the corpse of Queen Eleanor on its way to Westminster Abbey. (Ten crosses were erected, but only those at Geddington, Northampton and Waltham remain; "Charing" Cross originally stood on the spot now occupied by the statue of Charles I. at Whitehall.)

WINDSOR CASTLE (begun by William the Conqueror, A.D. 1066-87).—22 miles from London, by Western and Southern Regions. The Castle Precincts are open daily, free of charge, from 10 a.m. to sunset. Official Guides are in attendance from 10 to 4, Oct. to March, and from 10 to 5, April to Sept. When the Court is not in residence, the *State Apartments* of Windsor Castle are open to the public, during Her Majesty's pleasure, on every

weekday and on certain Sunday afternoons during the summer months. When the *State Apartments* are open the charges for admission are for Adults, 1s. 6d., and for Children, 6d. By the Queen's command, the net proceeds go to charities. An authorized guide book can be obtained at the office, price 1s. 3d. The hours of admission to the *State Apartments* are from April 1 to May 31, and Oct. 1 to 31 between 11 and 4; June 1 to Sept. 30, 11 to 5; and from Nov. 1 to March 31, between 11 and 3 and on certain Sundays during the summer between 1.30 and 5. The *Queen's Doll's House* and the *Old Master Drawings* can be seen on the same days and hours as the *State Apartments*, admission 6d. each person to each. The *Albert Memorial Chapel* is open on the same days and at the same hours as the *State Apartments* (except between 1 and 2 p.m.) but not on Sundays; the *Round Tower or Keep* is open from April 1 to Sept. 30 (except when the Royal Standard is flying), the same days and hours as the *State Apartments*. Admission free. By permission of the Dean and Chapter, *St. George's Chapel* may be viewed on Mon.-Thurs., between 11 a.m. and 3.45 p.m.; Fridays, 1 p.m. to 3.45 p.m.; Sundays, 2.30 to 4 p.m. Admission 2s. per person, except at service times. The Chapel is usually closed during January. The *Daily Services* in the Chapel are open to the public. The *Curfew Tower* may be seen under the guidance of the Keeper, to whom application must be made at the entrance (admission 6d.). The *Royal Mausoleum*, Frogmore Gardens, Home Park, is open only on Whit Monday, from 11 a.m. to 4 p.m. Admission free.

THE PRINCIPAL ENGLISH CITIES

BIRMINGHAM

BIRMINGHAM (Warwickshire) is the second City in Britain and the chief centre of the hardware trade. It is practically equidistant from the other important trade centres in the country, being

111 miles from London, 85 miles from Manchester and 91 miles from Bristol. The municipal area is 51,247 acres (about 80 square miles), with a population (1961 Census, preliminary) of 1,105,651.

It is estimated that over 1,500 distinct trades

are carried on in the city, the chief industries being the manufacture of buttons, bedsteads, plastic goods, chocolate, chemicals, cycles, electro-plate, guns, machine tools, railway rolling-stock, glass, motor-cars and motor-cycles, motor tyres, nuts and bolts, pens and nibs, tubes, paint and enamels, tools, toys, electrical apparatus, wire, jewellery and brass working, etc.

Water is supplied by the City Corporation, which also owns the transport undertaking, airport, markets and Municipal Bank. The first section of Birmingham's new Queen Elizabeth Hospital, erected at Edgbaston at a cost of approximately £1,000,000, is claimed to be the finest of its type in Europe. The city has started work on the construction of an inner ring road round the centre of the city, with many improvements in the shopping centre and a redevelopment of industrial areas. The water supply from Mid-Wales has been further improved by the damming of the Claerwen at a cost of approximately £1,700,000.

The principal buildings are the Town Hall, built in 1832-1834; the Council House and Corporation Museum and Art Gallery (1878); Victoria Law Courts (1891); the University (1909); the Central Library; the 13th century Church of St. Martin (rebuilt 1873); the Cathedral (formerly St. Philip's Church); the Roman Catholic Cathedral of St. Chad (Pugin) and the Methodist Central Hall. Birmingham was incorporated as a borough in 1838, and was created a city in 1889; it is governed by a Lord Mayor and City Council of 38 Aldermen and 114 Councillors. The generally accepted derivation of "Birmingham" is the *ham* or dwelling-place of the *ing* or the family of *Beorma* presumed to have been a Saxon. Between the 11th and 16th centuries the de Berminghams were Lords of the Manor.

Lord Mayor and Principal City Officers.

The Lord Mayor (1961-62), E. E. Mole, O.B.E.

Recorder, J. A. Grieves, Q.C. (1960).

Stipendiary Magistrate, John Frederic Milward. (1951).

Town Clerk, T. H. Parkinson (1960).

Clerk of the Peace, G. M. Butts.

LIVERPOOL

LIVERPOOL (Lancashire), on the right bank of the river Mersey, 3 miles from the Irish Sea and 194 miles N.W. of London, is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic trade. The municipal area is 27,810 acres (which includes 2,883 acres in the bed of the river Mersey) (about 43 square miles, excluding the bed of the river), with a population (1961 Census, preliminary) of 747,490. Quays on both sides of the river are about 38 miles long, and the Gladstone Dock can accommodate the largest vessels afloat. The dock authority is the Mersey Docks and Harbour Board. A system of harbour supervision radar was inaugurated on July 31, 1948. The chief import is grain, those next in importance being sugar, fruit, oil, timber, cotton and provisions.

The Corporation owns large industrial estates at Speke, Kirkby and Aintree, on which many modern factories have been built. Speke and Aintree are now almost fully developed, and at Kirkby new land is constantly being leased, bringing many new industries into the area. In 1943 a lease for 99 years was taken of the Elizabethan mansion at Speke Hall at a nominal rent.

The principal buildings are the Cathedral, erected from the designs of Sir Giles Gilbert Scott and consecrated in 1924; when completed this will be the largest ecclesiastical building in England; St. George's Hall, erected 1838-1854, and regarded

as one of the finest modern examples of classical architecture; the Town Hall, erected 1754 from the designs of Wood; the Walker Art Gallery; the University; the Royal Infirmary; the Municipal Offices; and the Philharmonic Hall. A Roman Catholic Cathedral is in course of erection at Brownlow Hill.

The *Mersey Tunnel* (Queensway) connecting Liverpool and Birkenhead is one of the most important engineering achievements of recent years; begun in 1925, it was opened, to traffic on July 18, 1934, the total cost being estimated at £7,077,800. In 1960-61, 13,681,748 vehicles passed through it.

Liverpool was incorporated as a borough early in the 13th century and was created a city in 1880. The Corporation consists of a Lord Mayor and a City Council of 40 Aldermen and 120 Councillors. The name is believed to be derived from Norse words meaning the "Pool of the Slopes."

Principal City Officers.

The Lord Mayor (1961-62), P. McKernan.

Recorder, N. J. Laski, Q.C. (1956).

Stipendiary Magistrate, Arthur McFarland (1947).

Presiding Judge, Court of Passage, G. Glynn Blackledge, M.C., Q.C. (1950).

Town Clerk, T. Alker, C.B.E. (1947).

MANCHESTER

MANCHESTER (Lancashire) (the *Mancunium* of the Romans, who occupied it in A.D. 78) is 189 miles N.W. of London. The municipal area is 27,255 acres (about 43 square miles), the population (1961 Census, preliminary), 661,041.

Manchester is a commercial rather than an industrial centre, the industries being largely in the neighbouring towns. Within 25 miles radius, lives a population of 4,500,000 engaged in engineering, chemical, clothing, food processing and textile industries and in providing the packing, transport, banking, insurance and other distributive facilities for those industries. The city is connected with the sea by the Manchester Ship Canal, opened in 1894, 35½ miles long, and accommodating ships up to 15,000 tons. Tonnage of goods handled in 1960 was 17,707,422. The municipal airport has direct passenger services to America, Canada and to most European countries, and freight services to the United States, Europe and Africa.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R.A., together with a large extension; the Royal Exchange, built in 1869 and enlarged in 1921; the Central Library (1934); the Art Gallery; Heaton Hall; the Gallery of English Costume; the 17th century Chetham Library; the Rylands Library (1809), which includes the Althorp collection; the University (Owens College); the 15th century Cathedral (formerly the parish church) and the Free Trade Hall. Manchester is one of the principal centres of political, literary and scientific advancement, and the Hallé Concerts have placed the city in the forefront of musical development. The *Guardian* newspaper exercises a widespread influence throughout the English-speaking world.

The town received a charter of incorporation in 1838 and was created a city in 1853. The City Council consists of 38 Aldermen and 114 Councillors.

Principal City Officers.

The Lord Mayor (1961-62), L. W. Biggs.

Recorder, J. R. D. Crichton, Q.C. (1960).

Stipendiary Magistrate, F. B. Turner (1951).

Town Clerk, P. B. Dingle, C.B.E. (1944).

SHEFFIELD

SHEFFIELD (Yorkshire, West Riding), the centre of the special steel and cutlery trades, is situated

259 miles N.N.W. of London, at the junction of the Sheaf, Porter, Rivelin and Loxley with the river Don. The city is set in a beautiful countryside, its residential suburbs penetrating the Peak District of Derbyshire.

Sheffield has an area of 39,586 acres (nearly 62 square miles), including 3,332 acres of publicly owned parks and woodland, and a population (1961 Census, preliminary) of 493,954. Though its cutlery, silverware and plate have long been famous, Sheffield has other and now more important industries—special and alloy steels, engineering and tools in great variety. Titanium is one of the city's latest products. Refractory materials, silver refining, brush making, the manufacture of confectionery, canning, type-founding, ophthalmic optical goods and the making of snuff are other contrasting industries in Sheffield. In addition to those associated with the staple industries, important institutions are concerned with research in mining, glass technology and radiotherapy.

The parish church of St. Peter and St. Paul, founded in the twelfth century, became the Cathedral Church of the Diocese of Sheffield in 1924. Parts of the present building date from about 1435. The principal modern buildings are the Town Hall (1897 and 1923), the Cutlers' Hall (1832), the University (1905 and recent extensions), City Hall (1932), Central Library and Graves Art Gallery (1934) and the City Museum (1937).

Sheffield was created a borough on Aug. 24, 1843, a county borough in 1888 and a city in 1893, the Mayor becoming a Lord Mayor in 1897. It was made an Assize Town in 1955. The Corporation consists of 25 Aldermen and 75 Councillors.

Principal City Officers.

The Lord Mayor (1961-62), J. W. Sterland, M.B.E.
Recorder, R. Lyons, Q.C. (1961).
Master Cutler (1961-62) (*Master of the Company of Cutlers in Hallamshire*), G. Young.
Town Clerk, J. Heys, C.B.E. (1942).
Clerk of the Peace, P. T. Ward.

LEEDS

LEEDS (Yorkshire, West Riding) is a junction for road, rail and canal services and an important commercial centre, situated 185 miles N.N.W. of London. It is a centre of the wholesale clothing trade. The city has large foundries; engineering works producing textile machinery, machine tools, etc.; printing works, tanneries, and chemical works producing dyestuffs and related products.

The municipal area is 40,615 acres, the population (1961 Census, preliminary), 520,597.

The principal buildings are the Civic Hall (opened by King George V. in 1933), the Town Hall (1858), the Philosophical Hall, the Municipal Buildings and Art Gallery (1884) and the University. The Parish Church (St. Peter's) was rebuilt in 1840; the 17th century St. John's Church has a fine interior with a famous Renaissance screen; the 17th century Mill Hill Chapel was rebuilt in 1848. Kirkstall Abbey (about 3 miles from the centre of the city), founded by Henry de Lacy in 1152, is one of the most complete examples of Cistercian houses now remaining. Temple Newsam, birthplace of Lord Darnley, was acquired by the Corporation in 1922. The present mansion, a stately building in red brick, was built by Sir Arthur Ingram in 1622. Adel Church, about 5 miles from the centre of the city, is a fine Norman structure.

Leeds was first incorporated by Charles I. in 1626, made a county borough in 1889, and was created a city in 1893. The Lord Mayor presides over a Council of 28 Aldermen and 84 Councillors. The earliest forms of the name are *Loids* or *Ledes*, the origin of which is obscure.

Principal City Officers.

The Lord Mayor (1961-62), P. A. Woodward.
Recorder, G. S. Waller, O.B.E., Q.C. (1961).
Stipendiary Magistrate, Ralph Cleworth, Q.C. (1950).
Town Clerk, R. Crute (1952).
Clerk of the Peace, T. A. Whittington (1952).

BRISTOL

BRISTOL, situated on the borders of Gloucestershire and Somerset, is a City and County of itself, and is 129 miles W. of London. The present municipal area is 26,350 acres, with a population (1961 Census, preliminary) of 436,440.

Among the various industries are aircraft design and construction, paints, jams, pickles, preserves, milling, shipbuilding, rope making, chocolate, sugar and tobacco, motor and general engineering, clothing, printing, paper bag and cardboard making, glass and earthenware, soap, leather and chemical works, breweries and copper, lead and iron works. Bristol is noted for its maritime history and the docks within the Port are the City Docks, 6 miles from the entrance to the river Avon; the Royal Edward and Avonmouth Docks, at the mouth of the river; and the Portishead Docks, to the west of the river entrance. The principal imports are grain, cereal products, cocoa, molasses, feeding stuffs, bananas and other fruit, provisions, frozen meat, sugar, metals, ores, phosphates, oil-seeds, paper, petroleum and petroleum spirit, timber, tobacco, wines and spirits, wood pulp and general merchandise, and the chief exports are machinery, chemicals, stoneware, unmanufactured clay, motor vehicles and parts, coke, carbon black, prefabricated buildings and manufactured goods. A new municipal airport was opened at Lulsgate in May, 1957, replacing that at Whitchurch.

The chief buildings, in addition to the 14th century Cathedral (with later additions), with Norman Chapter House and gateway, the 14th century Church of St. Mary, Redcliffe (described by Queen Elizabeth I. as "the fairest, goodliest, and most famous parish church in England"), and Wesley's Chapel, Broadmead, are the Merchant Venturers' Almshouses, the Council House (opened by H.M. The Queen in April, 1956), Guildhall, Exchange, (erected from the designs of John Wood in 1743), Art Gallery, Central Library, Cabot Tower, the University and Clifton College, Red Lodge (Tudor), Georgian House, and Blaise Castle and Mansion with Folk Museum. The Clifton Suspension Bridge, with a span of 702 feet over the Avon, was projected by Brunel in 1836 but was not completed until 1864. The beautiful Clifton Down adjoins Durdham Down (making a total of 442 acres), with Leigh Woods and Nightingale Valley on the opposite side of the river; Ashton Court Estate (840 acres) was acquired by Bristol Corporation in Jan., 1960.

Bristol was a Royal Borough before the Norman Conquest. In 1373 it received from Edward III. a charter granting it county status and in 1899 its Mayor became a Lord Mayor. The Corporation includes 28 Aldermen and 84 Councillors. The earliest forms of the name are *Brigstowe* and *Bristow*.

Principal City Officers.

The Lord Mayor (1961-62), C. H. Smith.
Sheriff (1961-62), C. M. Hartnell.
Recorder, G. D. Roberts, O.B.E., Q.C. (1946).
Town Clerk, T. J. Urwin.
Clerk of the Peace, T. D. Corpe, O.B.E.

KINGSTON UPON HULL

HULL (officially "Kingston upon Hull") is situated in the East Riding of Yorkshire, at the

junction of the Hull with the Humber, 22 miles from the North Sea and 121 miles N. of London. The municipal area is 14,422 acres, with a population (1961 Census, preliminary) of 303,268.

Hull is one of the great seaports of the United Kingdom. It has docks covering a water area of 200 acres, well equipped for the rapid handling of cargoes of every kind, and its many industries include oil-extracting, saw-milling, flour-milling, engineering and chemical industries. It also claims to be the premier fishing port.

The City, restored after very heavy air raid damage during World War II, is well laid out with fine thoroughfares. It has good office and administrative buildings; its municipal centre being the Guildhall; its educational centre the University of Hull and its religious centre the Parish Church of the Holy Trinity, 272 feet in length.

Kingston upon Hull (anciently known as *Wyke*) was so named by Edward I, who granted the first of its Charter privileges in 1299. Later privileges included the creation of the office of Mayor (1331); Charter of Incorporation—the creation of the county of the town, with the power, annually exercised, to elect a Sheriff (1440); county area extended (1447); power given to elect a High Steward (1598); City status accorded (1897) and the office of Mayor raised to the dignity of Lord Mayor (1914). The City Council consists of a Lord Mayor, 21 Aldermen and 63 Councillors, representing the 21 wards of the City.

Principal City Officers.

The Lord Mayor (1961–62), K. Turner.

Recorder, P. S. Price, Q.C. (1958).

Sheriff, B. A. Parkes.

Stipendiary Magistrate, D. N. O'Sullivan (1952).

Town Clerk and Clerk of the Peace, J. H. W. Glen.

NEWCASTLE UPON TYNE

NEWCASTLE UPON TYNE (Northumberland) a City and a County on the north bank of the Tyne estuary, 8 miles from the North Sea and 272 miles N. of London, has an area of 11,094 acres (18 square miles) and a population (1961 Census, preliminary) of 269,389.

The city is conveniently placed on the estuary, in the centre of the Northumberland and Durham coalfields. The exports of the Port of Newcastle upon Tyne (River Tyne) include coal and coke, sulphate of ammonia, oil fuel (as cargo and bunkers), machinery, iron and steel manufactures, tar and pitch, petroleum spirit and other oils, textiles, firebricks and fireclay goods, grain and animal feeding stuffs; the chief imports are iron ore, metals and minerals, iron and steel manufactures and scrap, oil fuels and other oils, petroleum spirit, timber, grain, fertilisers, cement, fish, fruit and vegetables, and provisions. The chief industries are coal mining, shipbuilding, ship repairing, iron and steel manufactures, engineering and boilermaking shops, locomotives, lead works, chemical manufactures, flour milling, etc.

The principal buildings include the (12th century) "New" Castle, of which the walls, keep and chapel are well preserved, the Cathedral (St. Nicholas), St. Andrew's Church (11th century), St. John's (12th century), St. George's, Jesmond, the Roman Catholic Cathedral of Hexham and Newcastle, Holy Trinity War Memorial, Guildhall (1658) Moot Hall (1810), Exchange (1860), Central Public Library and Laing Art Gallery and Museum, Wood Memorial Hall (1870), and the Custom House. The beauty of Jesmond Dene (gift of Lord Armstrong) is much appreciated by visitors, as well as the Town Moor, a tract of over 900 acres of open grassland. The city is connected with the south bank of the Tyne by six bridges.

The pre-Norman borough of *Monkchester* was re-named Newcastle in the 12th century when the castle was erected as a defence against the Scots. In 1400 it was made a county and in 1589 was incorporated. The City Corporation now comprises a Lord Mayor (1906), 20 Aldermen and 60 Councillors.

Principal City Officers.

The Lord Mayor (1961–62), H. Russell.

Recorder, A. B. Boyle, C.B.E., Q.C. (1961).

Town Clerk and Clerk of the Peace, J. Atkinson (1937).

NOTTINGHAM

NOTTINGHAM (Nottinghamshire) stands on the River Trent, 124 miles N.N.W. of London in one of the most valuable coalfields of the country with excellent railway, water (being connected by canal with the Atlantic and the North Sea), and road facilities. The municipal area is 18,370 acres and population (1961 Census, preliminary), 311,645.

The principal industries are hosiery, lace, bleaching, dyeing and spinning, tanning, engineering and cycle works, brewing, the manufacture of tobacco, chemicals, furniture, typewriters and mechanical products.

Most public services are owned by the municipality. The amenities of the city include numerous public baths, libraries and parks, an art gallery and two museums. Approximately 30,480 houses have been built by Nottingham Corporation. The famous Nottingham Goose Fair is held in October each year.

The chief buildings are the 12th century Nottingham Castle (restored in 1878, and now the City Museum and Gallery of Art), Wollaton Hall (1580–88) owned by the Corporation and now a Natural History Museum, St. Mary's, St. Peter's, and St. Nicholas's Churches, the Roman Catholic Cathedral (Pugin, 1842–4), the Council House (1929), the Guildhall and Court House (1888), Shire Hall, Albert Hall, the University and Newstead Abbey, home of Lord Byron.

Snotengaham or *Notingeham*, "the home of the sons of Snod" (the Wise), is the Anglo-Saxon name for the Celtic *Tuigogobauc*, "Cave Homes." The city possesses a Charter of Henry II., and was created a city in 1897. The Corporation consists of 17 Aldermen and 51 Councillors (including the Lord Mayor).

Principal City Officers.

The Lord Mayor (1961–62), J. L. Davies.

Recorder, M. A. L. Cripps, D.S.O., T.D., Q.C. (1961).

Town Clerk, T. J. Owen.

Clerk of the Peace, G. A. Wharton, M.B.E., T.D.

BRADFORD

BRADFORD (Yorkshire, West Riding), 192 miles N.N.W. of London and 8 miles W. of Leeds, in the coal and iron district, is a centre of the woollen and worsted trade. The city is connected with the Mersey in the west and with the Humber in the east by canals, and is an important railway centre. The municipal area is 25,525 acres (about 40 square miles), with a population (1961 Census, preliminary) of 295,768.

The principal textile industries are worsteds, woollens, silks and cottons, and there are also important engineering and iron works and quarries of freestone.

The chief public buildings, in addition to the 15th century Cathedral (formerly the Parish Church) and Bolling Hall (14th century), are the Town Hall (1873), the tower of which contains a clock with dials, chimes and a carillon, Exchange (1867), Cartwright Memorial Hall (1904) commemorating the inventor of the power loom, the

Windsor Baths and Public Halls (1905), Grammar School (Charter, 1662), St. George's Hall (Concert Hall, 1853), Technical College (1882), the Mechanics' Institute (1832), Exchange (1867), Kirkgate Market Hall (1872), and Britannia House (1933).

The Saxon township was created a parliamentary borough in 1832, a borough in 1847, a county borough in 1889, and a city in 1897. The title of Lord Mayor was conferred on the Chief Magistrate in 1907. The Corporation consists of a Lord Mayor, 20 Aldermen and 60 Councillors.

Principal City Officers.

The Lord Mayor (1961-62), B. W. Berry.
Recorder, B. B. Gillis, Q.C. (1958).
Town Clerk, H. Patten (1960).
Clerk of the Peace, P. Denny.

OXFORD

OXFORD is a University City, an important industrial centre, and a county, assize, and market town.

It has been a City from time immemorial and a County Borough since 1889. It has an area of 8,785 acres, a population (1961 Census, preliminary) of 106,124 and a rateable value of £2,235,922. Oxford is a parliamentary constituency returning one member and is governed by a Council of 68 members of whom 12 are, by special enactment, elected by the University.

The University (see also pp. 502-4) has 27 Colleges, 5 Private Halls, 3 New Foundations and 1 Society.

Industry, consisting of printing and bookbinding, and the making of agricultural implements and marmalade, played a minor part in Oxford until the motor industry was established in 1912. To-day this and the adjoining pressed steel works employ about 15,000.

The City has filled a notable place in the story of the nation, first entering real history in A.D. 912 when, according to the Old English Chronicle, possession of it was taken by King Edward the Elder. It had a Mayor by 1122. It was a favourite residence of the Plantagenets, who gave the City its earliest charters and who built Beaumont Palace where Richard Cœur de Lion was born in 1157. The origins of the University are obscure, but it seems clear that it was already in existence in 1187, and by 1212 had a Chancellor. Colleges began to come into existence during the thirteenth century, the earliest being University, Balliol and Merton Colleges. The University became sufficiently powerful to secure the aid of the monarchy to establish an ascendancy over the Corporation, the outward forms of which were observed until 1825.

It is for its architecture that Oxford is of most interest to the visitor, its oldest specimens being the reputed Saxon tower of St. Michael's church, the remains of the Norman castle and city walls and the Norman church at Iffley. It is chiefly famous however, for its Gothic buildings, such as the Divinity Schools, the Old Library at Merton College, William of Wykeham's New College, Magdalen College and Christ Church and many other college buildings. Later centuries are not represented by so many examples, but mention can be made of the exquisite Laudian quadrangle at St. John's College, the renaissance Sheldonian Theatre by Wren, Trinity College chapel, and All Saints Church; Hawksmoor's mock-Gothic at All Souls College, and the superb example of eighteenth century architecture afforded by Queen's College. In addition to individual buildings, High Street and Radcliffe Square, just off it, both form architectural compositions of great beauty. Most of the Colleges have gardens, those of Magdalen, New College, St. John's (designed

by "Capability" Brown) and Worcester being the largest.

The visitor will always find some of the college chapels, halls and gardens open for public inspection between 10 a.m. and 5 p.m.

Principal City Officers.

Mayor (1961-62), L. E. Harrison.
Recorder, J. G. Foster, Q.C., M.P. (1956).
Town Clerk and Clerk of the Peace, Harry Plowman, C.B.E.

CAMBRIDGE

CAMBRIDGE, a settlement far older than its ancient University, lies on the Cam or Granta, 51 miles north of London and 65 miles south-west of Norwich. Its population in 1951, when it was raised to the dignity of a City, was 81,463 (1961 Census, preliminary, 95,358). Its area is 10,060 acres.

The city is a parliamentary and quarter sessions borough, county town and regional headquarters. Its industries, which include radio and electronics, flour milling, cement making and the manufacture of scientific instruments, are extensive but nowhere obtrusive. Among its open spaces are Jesus Green, Sheep's Green, Coe Fen, Parker's Piece, Christ's Pieces, the University Botanic Garden, and the Backs, or lawns and gardens through which the Cam winds behind the principal line of college buildings. East of the Cam, King's Parade, upon which stand Great St. Mary's Church, Gibbs' Senate House and King's College Chapel with Wilkins' screen, joins Trumpington Street to form one of the most beautiful thoroughfares in Europe.

University and College buildings provide the outstanding features of Cambridge architecture but several churches (especially St. Benet's, the oldest building in the City, and St. Sepulchre's, the Round Church) also make notable contributions. The modern Guildhall (1939) stands on a site of which at least part has held municipal buildings since 1224.

The City Council consists of a Mayor, 14 Aldermen and 42 Councillors. Four of the Councillors are elected by the Colleges and Halls and two by Grace of the Senate of the University. Two of the Aldermen are elected by the Council from the University and College representatives.

Principal City Officers.

Mayor (1961-62), A. Halcrow.
Recorder, S. Chapman, Q.C. (1961).
Town Clerk, A. H. I. Swift.
Clerk of the Peace, C. H. Parker.

CANTERBURY

CANTERBURY, the Metropolitan City of the Anglican Communion, has an unbroken history going back to prehistoric times. It was the Roman Durovernum and the Saxon Cantwaraburg (stronghold of the men of Kent). Here in 597 St. Augustine began the conversion of the English race to Christianity, when Ethelbert, King of Kent, was baptized. In 1170 the rivalry of Church and State culminated in the murder in Canterbury Cathedral, by Henry II's knights, of Archbishop Thomas Becket, whose shrine became a great centre of pilgrimage as described by Chaucer in his *Canterbury Tales*. After the Reformation pilgrimages ceased, but the prosperity of the City was strengthened by an influx of Huguenot refugees, who introduced weaving. In the first Elizabethan era Christopher Marlowe, the poetic genius and precursor of Shakespeare, was born and reared in Canterbury, and there are literary associations also with Defoe, Dickens and Barham, author of the *Ingoldsby Legends*. In the last war

the City received severe damage from air attacks, particularly in the great "Baedeker" raid of June 1, 1942. Fortunately the Cathedral (apart from the modern Library) was not severely harmed. Great progress has been made in re-building, before which the opportunity has been taken to excavate archaeologically the main areas of damage. As a result part of the street plan of Roman Canterbury has been recovered and many Roman buildings, including a large theatre, identified.

The Cathedral, with its glorious architecture ranging from the eleventh to the fifteenth centuries, is world-famous. Modern pilgrims are attracted particularly to the Martyrdom, the Black Prince's Tomb and other historic monuments, the Warriors' Chapel and the many examples of mediæval stained glass.

Of the Benedictine St. Augustine's Abbey, burial place of the Jutish Kings of Kent (whose capital Canterbury was) only extensive ruins remain. St. Martin's Church, on the eastern outskirts of the City, is stated by Bede to have been the place of worship of Queen Bertha, the Christian wife of King Ethelbert, before the advent of St. Augustine.

The mediæval City Walls are built on Roman foundations and the fourteenth century West Gate is one of the finest buildings of its kind in the country.

The city is a county borough and county of itself, with an area of 4,798 acres and a population (1961 Census, preliminary) of 30,376. Before the institution of the Mayoralty in 1448 it was governed by bailiffs and earlier still by prefects or provosts.

Principal City Officers.

Mayor (1961-62), A. V. Wilson.
Recorder, G. Lawrence, Q.C. (1952).
Sheriff (1961-62), Rev. C. Pare.
Town Clerk and Clerk of the Peace, J. Boyle.

YORK

YORK is a county borough, an archiepiscopal seat, the county town of Yorkshire and a county in its own right, its correct designation being "The City and County of the City of York", and it stands at the junction of the three Ridings. York has an area of 6,933 acres, and a population (1961 Census, preliminary) of 104,468. The city returns one member to Parliament and is governed by a Lord Mayor, who has the title of "Right Honourable," 13 Aldermen and 39 Councillors. The City Sheriff, who is the Sovereign's representative, is elected annually with the Lord Mayor.

The recorded history of York dates from A.D. 71, when the Roman Ninth Legion established a base which later became the fortress of Eboracum. Here Constantine the Great was proclaimed Emperor in A.D. 306. Under Edwin, in the 7th century, York became the capital of the Kingdom of Northumbria. Under the Danes it became a trading centre but suffered severely at the Norman Conquest. It is mentioned in the Domesday Book. By the 14th century it had become prosperous and was used as the chief base against the Scots. It became a great mercantile centre, chiefly owing to its control of the wool trade, but under the Tudors its fortunes declined, though Henry VIII. made it the headquarters of the Council of the North, so preserving its status as the Northern capital. During the Civil War it suffered heavily in the Royalist cause, but in the 18th century it became a social centre for the northern nobility and gentry.

With its development as a railway centre in the 19th century the commercial life of York expanded

and it is now a flourishing modern city. Chief industries are the manufacture of cocoa, chocolate and confectionery, railway carriage and wagon repair, scientific instrument making, printing and light engineering.

The city is rich in examples of architecture of all periods, but its finest features are the Minster with its stained glass, and the ancient walls and gateways. There are many examples of domestic architecture of the Tudor and Stuart periods, but perhaps more notable are the Georgian mansions of The Mount, Micklegate and Bootham. Its museums are world-famous, and its Art Gallery is now greatly enriched by the Lycett Green collection of Old Masters.

Principal Officers.

Mayor (1961-62), Mrs. I. G. Wightman.
Recorder, H. C. Scott, Q.C. (1961).
Sheriff, J. M. Wood.
Town Clerk and Clerk of the Peace, T. C. Benfield.

WINCHESTER

WINCHESTER, the ancient capital of England, is situated on the River Itchen 65 miles S.W. of London and 12 miles north of Southampton. The City has an area of 3,888 acres and a population (1961 Census, preliminary) of 28,643; it is a parliamentary and quarter session borough, an assize town and the county town of Hampshire.

Occupation of the city area can be traced back to 1800 B.C. but organized settlements appeared later, as at St. Catherine's Hill which was an Iron Age settlement from the 6th to 2nd century B.C. Winchester was known as Caer Gwent to the Celts and Venta Belgarum to the Romans; to the latter it was an important centre as the five roads radiating from the city testified. Saxon history is somewhat obscure but Winchester became the capital of Wessex and in the 9th century capital of all England. Alfred the Great made Winchester a centre of education. In the Saxon Cathedral there took place the coronation of Edward the Confessor. William the Conqueror was crowned in the city and made it his capital. It remained so for many years, its decline as a capital beginning during the civil war between Stephen and Matilda; and with the loss of Normandy in 1204, and the sack of Southampton in 1338 Winchester had lost its favourable position. Further damage to the city occurred in the Civil War. In the latter half of the 18th century many of the city's historic buildings, including four of the six gates and much of the city wall, were destroyed. Winchester is rich in architecture of all types but the Cathedral takes first place. The longest Gothic cathedral in the world, it was rebuilt in 1079-1093 and exhibits splendid examples of Norman, Early English and Perpendicular styles. Winchester College, founded in 1393, is one of the most famous public schools, the original building remaining almost unaltered. The Hospital of St. Cross, founded in 1136 by Henry de Blois, is a fine mediæval almshouse. The Great Hall, completed in 1235, is a part of the ancient castle built by William the Conqueror.

It is not certain when Winchester was first designated a city but it is probable that the term was applied between 650 and 700. Winchester is one of the oldest corporations in the country; the first written record of a Mayor occurs in 1200.

Principal Officers.

Mayor (1961-62), Mrs. V. D. Neate.
Recorder, J. F. E. Stephenson, Q.C. (1959).
Town Clerk and Clerk of the Peace, R. H. McCall.

MUNICIPAL DIRECTORY OF ENGLAND

A list of all CITIES (in SMALL CAPITALS) and Boroughs (in ordinary type), and of Urban Districts with a population exceeding 20,000 (in *italics*); the County Boroughs named in the First Schedule of the Local Government Act, 1933, are distinguished by having § prefixed. The first figures in parentheses show the County in which the City, Borough or U.D.C. is situated (*see p. 630*). The second figures in parentheses given in the case of cities and boroughs, show the date of the first recorded Charter of Incorporation.

THE PRINCIPALITY OF WALES AND MONMOUTHSHIRE

Position and Extent.—Wales and Monmouthshire occupy the extreme west of the central southern portion of the island of Great Britain, with a total area of 8,006 sq. miles (5,130,107 acres); they are bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheshire, Salop, and Hereford, and on the W. by St. George's Channel. Across the Menai Straits is the Welsh island-county of Anglesey or Môn (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826 (freed from toll as from Jan. 1, 1941) and by the tubular railway bridge (1,100 ft. long) of the former L.M. & S. Railway, built by Stephenson in 1850. Holyhead harbour, on Holy Isle (N.W. of Anglesey), provides accommodation for a fast steam packet service to Kingstown and Dublin (70 miles).

Population.—The population at the Census of 1961 was 2,640,362 (preliminary figures) (inclusive of Monmouthshire).

Relief.—Wales is generally mountainous, the chief systems being those of North Wales (Snowdon 3,560 ft., Carnedd Llywelyn 3,484 ft., Carnedd Dafydd 3,426 ft.); Berwyn (Aran-mawddwy 2,970 ft.); Powys (Plinlimmon 2,468 ft., Drygfan Fawr 2,115 ft., Radnor 2,163 ft.); and the Black Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,632 ft., Brecon Beacon 2,906 ft., Pen-y-gawer fawr 2,660 ft.).

Hydrography.—The principal river of those rising in Wales is the *Severn* (see England), which flows from the slopes of Plinlimmon to the English border, dividing Montgomeryshire on its way. The *Wye* (130 miles) also rises in the slopes of Plinlimmon, and flows between Radnor and Brecon on its course to England. The *Usk* (56 miles) flows into the Bristol Channel, through Monmouthshire. The *Dee* (70 miles) rises in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the Dee is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The *Towy* (68 miles), *Teifi* (50 miles), *Taff* (40 miles), *Dowey* (30 miles), *Taf* (25 miles), and *Conway* (23 miles), the last named broad and navigable, are wholly Welsh rivers.

The largest natural lake in Wales is *Bala* (Llyn Tegid) in Merionethshire, 4 miles long and about 1 mile wide; *Lake Vyrnwy* is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Elan and Claerwen valleys.

The Welsh Language.—Statistics published on July 6, 1955, show that just over 715,000 persons (of three years and over) in Wales and Monmouthshire were able to speak Welsh at the time of the 1951 Census, compared with 909,000 at the 1931 Census, a decline of 21 per cent. in 20 years. 48,000 persons could speak Welsh only, compared with 98,000 in 1931. The proportion of people speaking Welsh fell from 49.9 per cent. in 1901 to 28.9 per cent. in 1951; and of those speaking Welsh only from 15.1 to 1.7 per cent.

Flag.—A red dragon on a green and white field (per fess argent and vert a dragon passant gules). The flag was augmented in 1953 by a royal badge on a shield encircled with a ribbon bearing the words *Ddraig Goch Ddyry Cychwyn* and imperially crowned. Only the unaugmented flag is flown on Government offices in Wales and, where appro-

priate, in London. Both flags continue to be used elsewhere.

EARLY HISTORY

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the *Goidels* (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic *Brythons* and *Belgae* followed in the ensuing Iron Age. The Roman conquest of South Britain and Wales was for some time successfully opposed by *Caratacus* (Caractacus or Caradog), Chieftain of the Catuvellauni and son of *Cunobelinus* (Cymbeline) King of the Trinobantes. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). Christianity was introduced (during the Roman occupation) in the 4th century.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Celtic Goidels and Brythons into the mountain fastnesses of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Cornwall, giving them the name of *Waelisc*, or Welsh (=Foreign). The West Saxons' victory of Deorham (577) isolated Wales from Cornwall, while the battle of Chester (613) cut off communication with Strathclyde. In the 8th century the boundaries of the Welsh were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dike). In the 9th century Rhodri Mawr united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of *Gwynedd* (N.), *Powys* (Mid.), and *Dehenbarth* (S.) were divided among his three sons—Anarawd, Mervyn and Cadell—the son of the last named being Howel Dda who codified the laws of the country, while Lewelyn ap Seisyllt (husband of the heiress of Gwynedd) again united the provinces and reigned as Prince from 1015–1022.

The Norman Conquest.—After the Norman conquest of England, William I. created Palatine counties along the Welsh frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and erected fortresses from the Wye to Milford Haven. Henry I. introduced Flemish settlers into South Wales, but after his death the Welsh rose under the leadership of Griffith ap Rhys and routed the Norman-Flemish forces at the fords of the Teifi (Cardigan) in 1136. From the early years of the 13th century the house Gwynedd, in the north, gained an ascendancy over the whole of Wales, and Llywelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign. Llywelyn ap Gruffydd (grandson of Llywelyn ap Iorwerth), the last native prince, was killed in 1282 during hostilities between the Welsh and English. On Feb. 7, 1301, Edward of Caernarvon, son of Edward I., was created Prince of Wales.

The Welsh are a distinct nationality, with a language and literature of their own, and the national bardic festival (*Eisteddfod*), instituted by Prince Rhys ap Griffith in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorsedd* (assembly), which is believed to date from the time of Prydian, a ruling prince in an age many centuries before the Christian era.

CARDIFF

CARDIFF (Glamorgan), at the mouth of the rivers Taff (Caer Taff), Rhymney and Ely, the capital of Wales and the port of the South Wales coalfields, has an area of 15,085 acres, and a population (1961 Census, preliminary) of 256,270. Within the city there is a great variety of industry including iron and steel works, rolling mills and foundries, patent fuel works, engine wagon works, flour mills, breweries, jam, vinegar and ice factories, enamel-ware and hollow-ware, paint works, furniture and bedding, clothing and foot-wear, sweets and confectionery, tobacco, electrical goods and appliances, food products and building materials.

The principal buildings are Cardiff Castle, built in the 11th century, the National Museum of Wales, Public Library, the University College of South Wales and Monmouthshire, the Registry of the University of Wales, the Welsh College of Advanced Technology, City Hall, Law Courts, Glamorgan County Hall, Offices of Government Departments, and "The Temple of Peace and Health." The city returns 3 members to Parliament.

The Lord Mayor (1961-62), E. Pearce, M.B.E.
 Stipendiary Magistrate, P. G. D. Sixsmith (1948).
 Recorder, F. Elwyn Jones, Q.C., M.P. (1960).
 Town Clerk and Clerk of Peace, S. Tapper-Jones.

SWANSEA

SWANSEA (In Welsh, Abertawe), a seaport of Glamorgan, is a County Borough, at the mouth of the River Tawe. It is the chief centre of the copper, tinplate and spelter industry of Wales and of the United Kingdom. The trade of the port also includes coal, patent fuel, ores, and the import and export of oil. There is also a large ship-repairing industry. The municipal airport is situated at Fairwood Common, Gower, a few miles away from the town. The municipal area is 21,600 acres, with a population (1961 Census, preliminary) of 166,740.

The principal buildings are the Norman Castle (rebuilt in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), the University College at Singleton and the Guildhall, containing Brangwyn panels. Swansea was chartered by the Earl of Warwick, circa 1158-1184, and further charters were granted by King John, Henry III., Edward II., Edward III., and James II., 2 from Cromwell and 1 Lord Marcher. The borough returns 2 members to Parliament.

Mayor (1961-62), A. Morgan.
 Stipendiary Magistrate, H. L. Williams, Q.C. (1952).
 Recorder, E. R. Bowen, Q.C., M.P. (1960).
 Town Clerk, I. J. Watkins.

THE KINGDOM OF SCOTLAND

Position and Extent.—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between $60^{\circ} 51' 30''$ and $54^{\circ} 38' N.$ latitude and between $1^{\circ} 45' 32''$ and $6^{\circ} 24' W.$ longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest length of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The total area of the Kingdom is 29,795 square miles (or 19,068,724 acres) exclusive of inland water, tidal water and foreshore. The population (1961 Census, preliminary) was 5,178,490, an increase of 82,075 or 1.6 per cent. since the census of 1951. (The inter-censal increase 1931-51 had been 5.2 per cent.). The average density of the population was 174 persons per square mile, compared with 171 persons per sq. mile in 1951.

Land's End to John o' Groat's.—The customary measurement of the Island of Great Britain is from the site of John o' Groat's house, near Duncansby Head, Caithness (at the N.E. extremity of the island) to Land's End, Cornwall (at the S.W. extremity), a total distance of 603 miles in a straight line and (approximately) 900 by road. But the site of the house of John de Groot (with its 8 doors and octagonal table, to solve the question of precedence between John and his 7 brothers) is about 4 miles S.W. of Duncansby Head, while Dunnet Head (also in Caithness) extends farther N. than Duncansby. John de Groot is believed to have obtained permission to settle in Caithness (from the Netherlands) in the reign of James IV. (1488-1513).

Relief.—There are three natural orographic divisions of Scotland. The *Southern Uplands* have their highest points in Merrick (2,764 feet), Rinn of Kells (2,668 feet), and Cairnsmuir of Carsphairn (2,612 feet), in Kirkcudbright; Hartfell (2,651 feet) in Dumfriesshire; and Broad Law (2,754 feet) in Peebles. The *Central Lowlands* include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal seaport. The heather-clad *Northern Highlands* extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the *Great Glen*; they contain, in the central Grampian Hills, *Ben Nevis* (4,406 feet), the highest point in the British Isles, and *Ben Muich Dhui* (4,296 feet). The *Cheviot Hills* form a natural boundary between Scotland and England, their highest point being *The Cheviot* (2,676 feet).

Hydrography.—The principal river of Scotland is the *Clyde* (106 miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland. The *Clyde* is formed by the junction of *Daer* and *Portrail* water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque *Falls of Clyde*, Bonnington Linn (30 feet), Corra Linn (84 feet), Dundaff Linn (10 feet), and Stonebyres Linn (80 feet), above and below Lanark. The *Tweed* (96 miles) has important woollen industries ("Tweeds") in its valley. The *Tay*, noted for its salmon, and the longest river in Scotland (117 miles), flows into the North Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the *Tay Bridge* (2 miles 73 yards), opened in 1887 to replace that destroyed by a gale (Dec. 28, 1879). The *Dee* (90 miles), a noted salmon river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The *Spey* (110 miles), the swiftest

flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The *Forth* (66 miles), navigable to Stirling, is spanned by the *Forth (Railway) Bridge*, constructed 1882-9 at a cost of £3,000,000, with a length of 5,330 ft. (with approaches 8,295 ft.).

The *Falls of Glomach* in Ross-shire, with a drop of 370 feet, are the highest in the British Isles; the *Grey Mare's Tail* (Dumfriesshire) is 200 feet.

The *lochs* are the principal hydrographic feature of the Kingdom, both on the mainland and in many of the islands. The largest in the Kingdom and in Great Britain is *Loch Lomond* (24 miles long), with *Lochs Awe*, *Tay*, *Rannoch* and *Ericht* in the Grampian valleys; *Loch Ness* (24 miles long and 800 feet deep), with *Lochs Oich* and *Lochy*, in the *Great Glen*; and *Lochs Shin* (20 miles) and *Marce* in the northern Highlands.

Climate.—The general climatic values for Scotland are given below, together with the corresponding values for England and Wales within brackets—mean air temperature reduced to sea level $47^{\circ}\text{--}1^{\circ} F.$ (49-7); rainfall, 50.3 inches (35.2); number of days with rain 217 (188); mean hours per day of bright sunshine, 3.36 (3.96).

Gaelic Language.—The preliminary report on the 1961 Census of Scotland showed that 76,587 persons were Gaelic speakers, compared with 95,447 in 1951. 1,079 persons spoke Gaelic only and not English (compared with 2,178 in 1951), though it was considered from experience that this figure would be reduced after full examination of the Census returns. The majority of Gaelic speakers lived in the counties of Ross and Cromarty (38.29 per cent.) and Inverness (24.44 per cent.). 75,508 persons spoke both Gaelic and English, compared with 93,269 in 1951.

Commerce.—The principal exports are machinery, ships and vehicles, iron and steel manufactures, non-ferrous metals, woollen and worsted yarns and products, food and drink and textile materials. Whisky continues to be the leading export to dollar countries.

THE SCOTTISH ISLANDS

There were 147 inhabited islands in the Kingdom at the time of the 1951 Census, with a total population of 141,972, the number of inhabited islands having fallen by 18 since the census of 1931. Preliminary indications from the 1961 Census were of relatively large decreases in the populations of the islands since 1951. Among the islands showing a decline in population were *Islay* 3,866 (9.5 per cent. decrease); *Mull* (including *Iona*, etc.), 1,674 (14.6); *Coll* and *Tiree*, 1,143 (20.0); *Harris Group*, 3,285 (17.7); *Skye*, *Raasay*, etc., 7,765 (10.0); *Barra Group*, 1,467 (22.1); *N. Uist Group*, 1,921 (13.5).

Orkney.—About 6 miles N. of the Caithness coast, separated from the mainland by the *Pentland Firth*, is the island county of Orkney, a group of 90 islands and islets ("holms" and "skerries"), of which one-third are inhabited. The total area of the group is 375½ square miles, with a population (1961) of 18,743, a decrease of 11.8 per cent. compared with 1951. *Kirkwall*, in *Mainland*, the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) Islands contain *brochs* (Pictish towers) and other Pictish and Scandinavian remains. *Scapa Flow*, between *Mainland* and *Hoy*, was the war station of the Grand Fleet from 1914-19 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

Zetland.—About 50 miles N. of Orkney (with the detached *Fair Isle* at 25 miles N.) is the island county of Zetland or Shetland, a group of about

100 islands and islets, of which one-fifth are inhabited. The total area of the group is 551 square miles, with a population (1961 Census, prelim.) of 17,809. Lerwick, in *Mainland* (the largest and principal island), is the capital of the county. *Fair Isle*, the southernmost of the group, is famous for handknitted hosiery, and *Unst* for the finest of the Shetland woollen work, for which the country is famous. *Muckle Flugga*, about 1 mile N. of Unst, is the most northerly of the group and of the British Isles (60° 51' 30" N. lat.).

Western islands.—Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over 500 islands and islets, of which 102 are inhabited. The total area of these Western Islands is 2,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. *The Hebrides*.—Until the closing years of the 13th century "The Hebrides" included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire), the Isle of Man, and the (Irish) Isle of Rathlin. The origin of the name is stated to be the Greek *Eboudai*, latinized as *Hebudes* by Pliny, and corrupted to its present form. The Norwegian name *Sudreyjar* (Southern Islands) was latinized as *Sodorenses*, a name that survives in the Anglican bishopric of "Sodor and Man." *The Inner Hebrides* include the island of Skye (643 square miles—capital, Portree, famous as the refuge of Prince Charlie after his defeat at Culloden, Inverness-shire, in 1746), which contains the *Cutlins* (Sgurr Alasdair 3,309 feet), *Red Hills* (Ben Caillich, 2,403 feet), and many other picturesque mountains; Mull (367 square miles), containing *Ben More* (3,169 feet), *Ben Bui* (2,354 feet), and *Ben Creach* (2,289 feet); *Jura* (160 square miles), with a chain of hills culminating in the *Paps of Jura* (Beinn-an-Oir, 2,571 feet and Beinn Chaolais, 2,407 feet); *Islay* (235 square miles), and many smaller islands. The *Outer Hebrides*, separated from the mainland by the *Minch*, include *Lewis* with *Harris* (770 square miles), celebrated for its homespun "Tweeds," *North Uist*, *South Uist*, *Barra* and other islands. Thirteen miles W. of *Stornoway* (the largest town of Lewis and of the Hebrides) are the "Druidical" remains of *Callanish*, a well-preserved series of monolithic circles, cruciform in general arrangement, but usually regarded as a heathen monument of the remote Stone Age.

EARLY HISTORY

Prehistoric Man.—The *Picts*, believed to be of non-Aryan origin, and stated to have been named *Picti* by the Romans on account of the tribal habit of painting the body, seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. *Pict's Houses* are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands. Celtic *Goidels*, *Brythons* and *Belgae* arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Roman invasion of Britain.

The Roman Invasion.—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into *Caledonia* as far as the "Grampian" Hills, but after a victory at *Mons Graupius* (since corrupted to "Grampius") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked by the *Wall of Pius*, towards which ran military roads from the Cheviots. The Roman occupation of Southern *Caledonia* was not so effective as that

of South Britain, and before the close of the second century the northern limit of Roman Britain had receded to *Hadrian's Wall* (Tyne to Solway Firth).

The Scots.—During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by Scots (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these *Picts* and *Scots* were the principal enemies of the Celtic *Brythons*, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between Pict and Brython is still to be seen in the *Catrail*, or *Picts' Work Dyke*, of Roxburgh (from Torwoodlee, near Galashiels, to Peel Fell in the Cheviots). *Christianity* was introduced into Southern *Caledonia* about 380 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the Picts and Scots, the Brythonic *Waelisc* (Welsh) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the Lothians. The *Waelisc* were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (613), and towards the close of the 9th century the Scots under *Kenneth Macalpine* became the dominant power in *Caledonia*. In the reign of Malcolm I. (943-954) the Brythons or *Waelisc* (Welsh) of Strathclyde were brought into subjection, the lowland kingdom of the English (Lothian) being conquered by Malcolm II. (1005-1034). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being *William Wallace*, who defeated the English at Stirling Bridge (1297), and *Robert Bruce*, who won the victory of Bannockburn (1314). James IV. and many of his nobles fell at the disastrous battle of *Flodden* (1513), and in 1603 James VI., the Stuart King of Scotland and the heir to the Tudor line of England (his mother, Mary "Queen of Scots," was the great-granddaughter of Henry VII.), succeeded Queen Elizabeth I. on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII. and II., the crown devolved upon William III. (grandson of Charles I.) and Mary (daughter of James VII. and II.) and, their issue failing, upon Anne (second daughter of James VII. and II.). Anne's children died young, and the throne devolved upon George I. (great-grandson of James VI. and I.) In 1689 Graham of Claverhouse "roused the Highlands" on behalf of James VII. and II., but died after a military success at Killiecrankie. In 1713, armed risings led to the indecisive battle of Sheriffmuir, but the movement died down until 1745, when Prince Charles Edward defeated the Royalist troops under Sir John Cope at Prestonpans and advanced to Derby in England (1746). From Derby, the adherents of "James VIII. and II." (the title claimed for his father by Prince Charles Edward) fell back on the defensive, and the *Jacobite* movement was finally crushed by the Royalist troops under the Duke of Cumberland at *Culloden* (April 16, 1746).

The Hebrides did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III. by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III., in 1468, the Danish suzerainty being formally relinquished in 1590.

Scotland is represented in the *Imperial Parliament* by 71 members, of whom 39 represent Counties, and 32 represent Burghs. The election in Orkney and Shetland is exempted from the rule that all polls must be held on the same day.

PRINCIPAL SCOTTISH CITIES

EDINBURGH

EDINBURGH, the Capital of the Kingdom, has a municipal area of 34,781 acres, and a population at the Census of 1961 of 468,378 (preliminary figures). The city is built on a group of hills and contains in Princes Street one of the most beautiful thoroughfares in the world. The principal buildings are St. Giles's Church (restored 1879-83), and St. Mary's (Scottish Episcopal) Cathedral (Sir Gilbert Scott), the Castle (which contains, in St. Margaret's Chapel, the oldest building in Edinburgh), the Scottish National War Memorial, Parliament House (the present seat of the judiciary), the National and Signet Libraries, the University, the General Register House (Robert Adam), Royal Scottish Academy, National Portrait Gallery, and the Palace of Holyroodhouse (containing parts of the royal palace of James IV. and V.). The city is governed by a town council of 71 Members, and sends 7 Members to Parliament.

Rt. Hon. Lord Provost, J. G. Dunbar.

Town Clerk, W. Borland.

City Chamberlain, A. L. Imrie, C.B.E.

GLASGOW

GLASGOW, a Royal Burgh, City and County of a City, and the principal commercial centre in Scotland, has a municipal area of 39,725 acres and a population at the 1961 Census of 1,054,913 (preliminary figures). The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries in the world. The tonnage of shipping using the harbour in 1960-61 was 16,441,600. The principal industries are iron and steel works, ship-building, chemicals, leather, woolens, muslin-weaving, distilling, tobacco, cotton-mills and furniture. The chief buildings are the Early English Cathedral, built during the first half of the 13th century, and incorporating part of an earlier structure, the University (Sir Gilbert Scott), the City Chambers, the Royal Infirmary and the Western and Victoria Infirmary, the Art Galleries and the Mitchell Library. The city is governed by a town council of 113 Members, and sends 15 Members to Parliament.

Rt. Hon. Lord Provost, Mrs. J. Roberts.

Town Clerk, A. Rooke.

City Chamberlain, G. B. Esslemont, C.B.E.

ABERDEEN

ABERDEEN, a City and a Royal, Municipal and Parliamentary Burgh, 130 miles N.E. of Edinburgh, received its charter as a Royal Burgh from William the Lion in 1179. The municipal area is 11,034 acres, with a population (1961 Census, preliminary) of 185,379. The chief industries are tourist traffic, quarrying and granite working, white fish, salmon and herring fisheries, engineering, chemicals, ship-building, paper-making, woollen and linen manufacture. From an architectural point of view, Aberdeen is truly famous for its many beautiful buildings, including Marischal College, reputed to be the most imposing white granite building in the world, King's College

(1494), St. Machar Cathedral (1378), the Auld Brig o' Balgownie (1320) and the Municipal Buildings. There is a sea beach promenade, which stretches for fully two and a half miles along golden sands, and at Hazlehead an open public park of 800 acres, of which 200 are wooded, with one of the finest public golf courses in Scotland. The climate is bracing and healthy. The city is governed by a Town Council of 37 Members, and sends 2 Members to Parliament.

The Lord Provost (May 1961-May 1964), J. M. Graham, C.B.E., D.D.
Town Clerk, J. C. Rennie.
City Chamberlain, W. G. A. McInnes.

CHIEFS OF CLANS AND NAMES IN SCOTLAND

The following list of Chiefs comprises the persons officially recognized as such by inheritance of the ancestral arms "without brisur or mark of cadency" under the Act 1672 cap. 47, and/or relative supporters, under decree of the Court of the Lord Lyon. It does not purport to include self-styled, or Society-selected "Chiefs" but the hereditary Heads of "Honourable Families" who conform to the evidence that "clan and family mean exactly the same thing"; and the definitions of Sir George Mackenzie of Rosehaugh, Lord Advocate to Charles II., that the undifferenced arms denote the "Chief for so we call the Representative of the Family . . . and in the Erse (Gaelic) with us the Chief of the Family is called the Head of the Clan,"—and the unanimous opinions of the Law Lords in *Seaforth v. Allangrange*, Nov. 17, 1921, to the same effect viz. that the undifferenced shield of arms denotes the Chief of the Clan; which in this nebiliary, and hereditary familial sense of parental organization or kin, is accordingly denoted by the determination of armorial succession by decree of the Court of the Lord Lyon. These broadbased family organizations were termed "Names" in the Lowlands, where all members bore the same basic surname, and "Clans" in the Border and Highland areas where surnames were a later development and evolved from complicated genealogical descriptions, the "clan name" being normally the name of the chief's house.

CONSTITUTION AND GOVERNMENT

Under the Government of Ireland Act, 1920, a separate Parliament and Executive Government were established for Northern Ireland. Under the Constitution certain legislative and fiscal powers are reserved to the Parliament of the United Kingdom.

The Northern Irish Parliament consists of a *House of Commons* of 52 elected members (who receive an allowance) and a *Senate* of 2 *ex-officio* Senators and 24 Senators elected by the members of the House of Commons on the proportional representation system. At the General Election of March 20, 1958, there were elected, Unionists 37, Northern Ireland Labour 4, Nationalists 7, Republican Labour 1, Independent Labour 1, Independent Nationalist 1, Independent, 1. Northern Ireland continues under the Act of 1920 to return 12 members to the House of Commons at Westminster.

The Executive power is vested in the Governor on behalf of Her Majesty the Queen; he holds office for 6 years, and is advised by 9 Ministers responsible to Parliament.

POPULATION

A Census of Population was held in Northern Ireland on April 23, 1961. Preliminary figures issued in 1961 showed a total population of 1,423,127 (males, 693,978; females, 729,149) an increase of 52,206 over the total at the Census of 1951.

EDUCATION

On Dec. 31, 1960, there were 1,568 Primary (including Nursery and Special) Schools with 196,093 pupils, 81 Grammar Schools with 37,485 pupils, 100 Secondary Intermediate Schools with 47,773 pupils, and 33 Technical Intermediate Schools with 4,488 pupils. There were also 167 Institutions of Further Education, with 3,087 full-time and 39,016 part-time students. The Queen's University at Belfast had 50 Professors, 22 Readers, 275 Lecturers, Assistant Lecturers and University Tutors, and 3,871 students. Magee University College, Londonderry, had 5 Professors, 19 Lecturers, and 232 students.

FINANCE

The greater part of the taxation in Northern Ireland is imposed and collected by the United

Kingdom Government. After deducting the cost of collection, certain services reserved to the United Kingdom Parliament, and the Imperial Contribution, the balance is paid over to Northern Ireland's Exchequer. The Contribution so made by Northern Ireland to the cost of Imperial services, i.e. Navy, Army and Air Force, National Debt, etc., for the period from 1921 to March 31, 1960, amounted to £415,674,344. The Imperial contribution has been provisionally fixed at £6,000,000 for 1960-61 and £8,700,000 for 1961-62.

PRODUCTION

Industries.—The total value of the industrial production of Northern Ireland in 1959 was approximately £570,000,000, and employment on industrial production was given to about 216,000 persons. The textile industries, employing 55,000 persons, produced yarn, thread, twine and ropes as well as a wide variety of other textile products valued at approximately £96,000,000. The products of the engineering, ship-building and aircraft industries, which employed 56,000 persons, were valued at £85,000,000, and the food, drink and tobacco industries, giving employment to 30,000 people, produced goods valued at nearly £265,000,000. Clothing to the value of £25,000,000 was manufactured in 1959, of which some £9,500,000 represented shirts and collars, which are manufactured principally in Londonderry. Other industries of importance to the economy of Northern Ireland are furniture, toys, pottery, cardboard boxes and packing cases.

Minerals.—About 2,416 persons were employed in mining and quarrying operations in Northern Ireland in 1960, and the minerals raised were valued at some £2,463,000.

Fisheries.—The total value of sea and freshwater fish caught in 1960 was £520,000.

COMMUNICATIONS

Seaports.—The amount of shipping using the principal ports in 1960 was about 8,400,000 tons. Regular passenger and freight services are maintained from Belfast to Liverpool, Heysham, and Glasgow, from Larne to Stranraer and from Londonderry to Glasgow.

Vehicle ferry services operate between Belfast and Preston, between Larne and Preston and in the summer between Larne and Stranraer.

Road and Rail Transport.—The Ulster Transport Authority carried 88,276,000 passengers by road and 10,711,000 by rail, 1,973,766 tons of merchandise by road and 581,067 tons by rail, and 1,024,000 head of livestock by road and 13,000 head by rail, in the year ended Sept. 30, 1960.

Airways.—Passenger and freight services are in operation between Northern Ireland and airports throughout the British Isles. 367,800 passengers were carried to or from Nutt's Corner Airport, Belfast in 1960.

THE ARMS OF NORTHERN IRELAND

ARMS.—*Argent*, a cross *gules*, over all on a 6-pointed star of the field ensigned by an imperial Crown *proper*, a dexter hand couped at the wrist of the second.

BELFAST

BELFAST, a City, the seat of Government of Northern Ireland, situated at the mouth of the River Lagan at its entrance to Belfast Lough, has a municipal area of 15,357 acres, exclusive of tidal water (1,223) and a population (1961 Census, prelim.) of 415,039. The city received its first charter of incorporation in 1613 and has since grown, owing to its easy access by sea to Scottish coal and iron, to be a great industrial centre. The chief industries are ship-building and the manufacture of aircraft, machinery, textiles, ropes and tobacco. Belfast is an important seaport with extensive docks.

The principal buildings are of a relatively recent date and include the Parliament Buildings at Stormont, the City Hall, the Law Courts, the Public Library and the Museum and Art Gallery. The Queen's University (previously Queen's College) was chartered in 1908.

The city returns 16 members to the Parliament of Northern Ireland and 4 members to the House of Commons at Westminster. Belfast was created a city in 1888 and the title of Lord Mayor was conferred in 1897.

Lord Mayor (1961-62), M. K. Wallace.
Town Clerk, J. Dunlop, C.B.E.

LONDONDERRY

LONDONDERRY, a City and County Borough, situated on the River Foyle, has a population (1961 Census, prelim.) of 54,239 and was reputedly founded in 546 by St. Columba. Londonderry (formerly *Derry*) has important associations with the City of London. The Irish Society, under its royal charter of 1613, fortified the city and was for a long period closely associated with its administration.

Famous for the great siege of 1688-89, when for 105 days the town held out against the forces of James II. until relieved by sea, Londonderry was an important naval base throughout the Second World War. Interesting buildings are the Protestant Cathedral of St. Columba's (1633) and the Guildhall reconstructed in 1912 and containing a number of beautiful stained glass windows, many of which were presented by the livery companies of London. The famous Walls are still intact and form a circuit of almost a mile around the old city. The manufacture of shirts and collars is the staple industry. Other industries include motor and mechanical engineering and fancy box making. A large part of Ulster's agricultural export trade passes through the port.

Mayor (1961-62), G. S. Glover, C.B.E., E.R.D.
Town Clerk, R. H. Henderson.

THE ISLE OF MAN (MONA)

an island in the Irish Sea, in lat. $54^{\circ} 3' - 54^{\circ} 25' N.$, and long. $4^{\circ} 18' - 4^{\circ} 47' W.$, nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 acres (227 sq. miles), with a population (1961 Census, prelim.) of 48,121 (males, 22,060; females, 26,091). In 1959 the births numbered 641 and the deaths 760. 355 persons were returned at the Census of 1951 as able to speak the Manx language, compared with 4,657 in 1901 and 529 in 1931. The cultivated area (1959) was 77,043 acres, and the live-stock included 688 horses, 28,482 cattle, 100,292 sheep and 7,217 pigs. The Island's main industry is catering for holiday-makers (numbering about 500,000 in the year) from all parts of the British Isles.

The land is rich in minerals, lead, blende and slate, and exports some agricultural produce. There are forty-seven miles of railway and about 25 miles of electric tram road.

Government.—The Isle of Man is governed by a Legislature, called the Tynwald, consisting of two branches—the Legislative Council and the House of Keys. The Council consists of the Lieutenant-Governor, the Bishop of Sodor and Man, the two Deemsters, the Attorney-General, 2 members appointed by the Lieutenant-Governor, and 4 members appointed by the House of Keys. The House of Keys (possibly from the Scandinavian *keise*=chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the adult male and female population, 13 from the six *sheadings*, 7 from Douglas, 2 from Ramsey, and 1 each from Castletown and Peel. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. After receiving the Royal Assent, a Bill does not become law unless promulgated within the ensuing twelve months, and on the first "Tynwald Day" (July 5) following it is announced in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Lieutenant-Governor and the Speaker of the House of Keys.

Finance.—An annual contribution of 5 per cent. of the net "Common Purse" Receipts amounting to approximately £115,000 is made to the Imperial Government. In 1921 Tynwald accepted liability for the redemption of £250,000 War Stock, and in 1927 liability for a further sum of £500,000 of War Stock was accepted in final settlement of all responsibility to the Imperial Government in respect of the cost of the War (1914-18). The Isle of Man has made, in all, free gifts of £1,250,000 to the British Government and has lent £1,000,000 free of interest, £500,000 of the latter being converted into a free gift on June 15, 1948. The chief source of revenue is found in the customs duties, the only direct taxation being income tax. Income tax ranges from 2s. 3d. in the £ for taxable incomes over £250 to 4s. 6d. for taxable incomes of £750 and over. Surtax on incomes of £2,500 per annum, first levied in 1939-40, was abolished by decision of Tynwald on June 21, 1960. There are 31 primary, 4 secondary schools, a school of technology, arts and crafts and a domestic science college, in addition to King William's College and the Buchan School for Girls; the gross expenditure on public education in 1958-59 was £559,038.

THE CHANNEL ISLANDS

situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to the Crown, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), Alderney (1,962 acres), Brechou (74), Great Sark (1,035), Little Sark (239), Herm (320), Jethou (44), and Lihou (38), a total of 48,083 acres, or 75 square miles. At the 1961 census the population of Jersey was 57,200, and of Guernsey, etc. 47,198; (Guernsey, 45,150; Alderney, 1,449; Sark, 560).

The climate is mild, and the soil exceptionally productive. The land under cultivation in 1961 was 40,252 vergées (2½ vergées=1 acre) in Jersey, and about 16,500 vergées (2½ vergées=1 acre) in Guernsey, the principal product of the soil of Jersey being potatoes and tomatoes, and of Guernsey tomatoes, flowers and grapes. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebrity. The Lieutenant-Governors and Commanders-in-Chief of Jersey and Guernsey are the Personal Representatives of the Sovereign and the channel of communication between H.M. Government and the Insular Governments. The Bailiffs of Jersey and Guernsey, appointed by the Crown, are Presidents both of the Assembly of the States (the Insular Legislature) and of the Royal Court in their respective Bailiwicks.

The official language is English and a Norman-French *patois* is also in use (except in Alderney). The principal imports are coal and coke, building material and groceries and provisions, and the chief exports potatoes, tomatoes, grapes, flowers, granite and cattle. The chief town of Jersey is St. Helier, on the south coast; the principal town of Guernsey is St. Peter Port, on the east coast, and of Alderney is St. Anne's. A telephone exchange was opened on Alderney in May, 1949 and there is one in Sark. Herm is also connected to Guernsey by telephone.

The islands were in German occupation from 1940 to 1945.

PATRON SAINTS

St. George, Patron Saint of England.—St. George is believed to have been born in Cappadocia, of Christian parents, in the latter part of the 3rd century and to have served with distinction as a soldier under the Emperor Diocletian, including a visit to England on a military mission. When the persecution of Christians was ordered, St. George sought a personal interview to remonstrate with the Emperor and after a profession of faith resigned his military commission. Arrest and torture followed and he was martyred at Nicomedia on April 23, 303, a day ordered to be kept in remembrance as a national festival by the Council of Oxford in 1222, although it was not until the reign of Edward III, that he was made patron saint of England. His connection with a dragon seems to date from the close of the 6th century and to be due to the transfer of his remains from Nicomedia to Lydda, close to the scene of the legendary exploit of Perseus in rescuing Andromeda and slaying the sea monster, credit for which became attached to the Christian martyr. April 23 is not included among the Red Letter Days, the list of which was drawn up before the canonization of St. George.

St. David, Patron Saint of Wales.—St. David is believed to have been born near the beginning and to have died towards the end of the 6th century, his father being Prince Sandde and his mother Non (afterwards a Christian saint). St. David was an eloquent preacher and became Primate of South Wales while Bishop of Caerleon on Usk, but he afterwards moved the seat of the Primacy from Caerleon to Menevia, now St. David's. At

the request of Henry I, he was canonized in the early part of the 12th century and became the tutelary saint of Wales, his annual festival being observed on March 1. This date is not included among the Red Letter Days, which were settled before the canonization of St. David.

St. Andrew, Patron Saint of Scotland.—St. Andrew, one of the Christian Apostles and brother of Simon Peter was born at Bethsaida on the Lake of Galilee and lived at Capernaum. He preached the Gospel in Asia Minor and in Scythia along the shores of the Black Sea and became the patron saint of Russia. It is believed that he suffered crucifixion at Patras in Achaea, on a *crux decussata* (now known as St. Andrew's Cross) and that his relics were removed from Patras to Constantinople and thence to St. Andrews, probably in the 8th century, since which time he has been the patron saint of Scotland. The festival of St. Andrew is held on November 30, a church festival indicated in the calendar by red letters.

St. Patrick, Patron Saint of Ireland.—St. Patrick was born in England about 380 and was carried off to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. He was ordained deacon at Auxerre and having been consecrated Bishop in 432 was despatched to Wicklow to reorganize the Christian communities in Ireland. He founded the see of Armagh and introduced Latin into Ireland as the language of the Church. He died in 461 and his festival is celebrated on March 17, which is not reckoned among Red Letter Days, the list of which was drawn up before the canonization of St. Patrick.

The British Commonwealth of Nations

INTRODUCTION

AREA AND POPULATION.—The total area of the British Commonwealth is estimated to be about 14 million square miles. Details of the areas and populations of the member states and dependencies appear in the following pages and are also tabulated on pp. 195-9. The total population of the British Commonwealth was estimated in 1960 at 719,000,000.

GOVERNMENT.—The Commonwealth is a free association of sovereign independent states, the United Kingdom, Canada, Australia, New Zealand, Ceylon, the Federation of Malaya, the Federation of Nigeria, Sierra Leone* and the Republics of India, Pakistan, Ghana and Cyprus, together with their dependencies.

The Commonwealth has no written constitution but its members are bound together by a community of ideals and interest which springs from a common historical background and a common political heritage which in spite of diversities of race and tradition has given rise to a broadly common pattern of institutions, legislative, executive and judicial. Most members of the Commonwealth have certain constitutional features in common. They are parliamentary democracies, their laws being made with the consent of a freely elected parliament after discussion in that parliament, the executive government holding office by virtue of the support of a majority in parliament. Ministers, who must be members of parliament, are collectively responsible for the actions of the executive. With the exception of New Zealand, Pakistan, Ghana, Cyprus and Sierra Leone, the Parliaments of the Commonwealth have two chambers, but in the case of the upper house the method of choosing members varies. Although legislation can be initiated in them, the upper houses are principally revising bodies and the lower houses, elected by secret ballot on a basis of adult suffrage, are dominant. The office of Speaker of the lower house is a feature of all Commonwealth parliaments.

At the head of each of the Parliaments of the Commonwealth (except those of the Federation of Malaya and the Republics) is the Queen, in whose name the administration is carried on. In all member countries of the Commonwealth except the Federation of Malaya and the Republics, Her Majesty is represented by the Governor-General, who in all essential respects holds the same position in relation to the administration of public affairs as is held by the Sovereign in Great Britain. The Governor-General is appointed by the Queen on the recommendation of the Government of the country concerned and is wholly independent of the Government of the United Kingdom. He is in many cases a national of the country in which he holds office. Her Majesty is Queen of the United Kingdom, Canada, Australia, New Zealand, Ceylon, the Federation of Nigeria, and Sierra Leone, all of whom owe common allegiance to her, and is the symbol of their free association in the Commonwealth. Those countries which are Republics with Presidents as head of the state and the Federation of Malaya which has one of the Malay Rulers as Head of State, do not owe allegiance to the Queen, but accept her as the symbol of the free association of member nations of the Commonwealth and as such as Head of the Commonwealth.

The status of member nations was defined by the Imperial Conference of 1926 and given legal substance by the *Statute of Westminster, 1931*, in which the Commonwealth nations were described

as "autonomous communities within the British Empire, equal in status, in no way subordinate one to another, but united by a common allegiance to the Crown and freely associated as members of the British Commonwealth of Nations." (*See above* for modifications as regards Republics and the Federation of Malaya). Other parts of the Commonwealth, such as Colonies, while they may be described as "Commonwealth countries," are not members of the Commonwealth.

PAKISTAN.—In October, 1958, the constitution of Pakistan was abrogated and presidential rule introduced. Elections under a new Constitution were planned for 1962.

SOUTH AFRICA.—On May 31, 1961, the Union of South Africa became a Republic and left the Commonwealth. (*See* main article under FOREIGN COUNTRIES). Until May 31, 1962, United Kingdom law has the same operation in relation to the Republic as it would have had in relation to the Union.

FEDERATION OF RHODESIA AND NYASALAND.—Following a conference on Central African Federation held in London in January, 1953, and a referendum held in Southern Rhodesia on April 9, the *Rhodesia and Nyasaland Federation Act* was passed by the United Kingdom Parliament on July 14, 1953, and the Federation of Rhodesia and Nyasaland, consisting of the self-governing Colony of Southern Rhodesia and the Protectorates of Northern Rhodesia and Nyasaland, established by Order in Council. Southern Rhodesia, Northern Rhodesia and Nyasaland are each proportionately represented in a Federal Assembly consisting of a Speaker and 59 members, which has control of defence, overseas trade, currency, transport, postal services and other matters of Federal concern. The Prime Minister and other Ministers are appointed by the Governor-General. For a period of ten years from the inception of the constitution there will be no change in its provisions on matters on which the Federal Legislature may make laws, without the consent of all three territorial legislatures. The Federal Constitution provides for a constitutional review between 1960 and 1962. A Conference consisting of delegations from the Federation, from each of the territories and from the United Kingdom, chosen by their respective governments, was convened in London for this purpose in December, 1960; it adjourned to a date to be decided later. (*See* main article under DOMINIONS, COLONIES AND PROTECTORATES.)

CONSULTATION.—Before the Second World War it was customary for an Imperial Conference, a formal gathering of delegates from the Commonwealth nations headed by their Prime Ministers, to meet every few years for discussion of a wide range of common problems. Its functions were purely advisory or consultative, and, as it had neither legislative nor executive authority, its resolutions were not binding on the participating Governments, though normally these Governments conformed to resolutions adopted unanimously. The last Imperial Conference was held in 1937. During the War informal meetings of Ministers were substituted. Imperial Conferences have now been replaced by Commonwealth Prime Ministers' Meetings. There have also been frequent Commonwealth ministerial meetings and conferences on Defence, Finance, etc.

CITIZENSHIP AND NATIONALITY.—Each member of the Commonwealth of Nations defines the citizenship and nationality of its own people and determines the status of other Commonwealth

* And from Dec. 9, 1961, Tanganyika.

nationals within its own boundaries. The United Kingdom, Canada, Australia, New Zealand, Pakistan, Ghana, the Federation of Malaya, the Federation of Nigeria, and Sierra Leone have not only created a local citizenship but have also conferred on their citizens the common status of Commonwealth citizen or British subject.* Ceylon has created only a single citizenship without making provision for the common status, though to some extent drawing a distinction between citizens of other Commonwealth countries and aliens. India, in addition to creating Indian citizenship, has recognized in India, on a reciprocal basis, the common status possessed by citizens of other Commonwealth countries. The Republic of Ireland, which in 1949 ceased to be a member of the Commonwealth, is not regarded by the other Commonwealth nations as a foreign country or her citizens as foreigners. Although Ambassadors instead of High Commissioners are now exchanged between the Republic of Ireland and Commonwealth countries, her relations with the United Kingdom are conducted through the Commonwealth Relations Office and not through the Foreign Office.

THE JUDICATURE.—The Supreme Judicial Authority of the Colonial Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and also from the Courts of certain members of the Commonwealth (Australia, New Zealand, Ceylon, the Federation of Nigeria and Sierra Leone). Arrangements have been made under which appeals to the Head of the Federation of Malaya may be entertained by the Committee. The Committee consists of such members of the Privy Council as have held or are holding high judicial office, provision being made for the inclusion of representatives of other Commonwealth countries. The members of the Commonwealth have each a broadly similar judicial system, judges (except in the four Republics, where they are appointed by the President) being appointed by the Governor-General on the advice of the Government concerned. In the Federation of Malaya, puisne judges are appointed by the Head of State on the recommendation of the Judicial and Legal Service Commission. The Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords.

DEFENCE.—Each of the independent members of the Commonwealth and also the Federation of Rhodesia and Nyasaland is completely responsible for its own defence. Although there is no central organization to co-ordinate the defence strategy and resources of the Commonwealth, there is close liaison between the responsible governments and considerable day to day practical co-operation by the Services. This includes ministerial conferences, meetings between High Commissioners and the Governments to which they are accredited, constant exchange of information and correspondence, exchange and training of Service personnel and personal contacts between Service advisers and officials. During the Second World War collaboration between Commonwealth countries was comprehensive and continuous—each of the then members (except the Republic of Ireland) entered the war in 1939.

The territories for whose defence the United Kingdom is responsible play their part and make their contribution to Commonwealth defence as far as their means allow. While the United King-

dom safeguards sea and air communications, using bases in the territories and providing some garrisons, the dependencies are responsible for the forces necessary for their own security (although in some cases the United Kingdom meets the cost).

Membership of the Commonwealth imposes no formal collective security commitment, but individual members may of course assume special international obligations for the maintenance of peace and security. All are members of the United Nations. The United Kingdom and Canada belong to N.A.T.O.; the United Kingdom and Pakistan are in C.E.N.T.O.; the United Kingdom, Australia, New Zealand and Pakistan are members of S.E.A.T.O.; Australia and New Zealand are signatories of the Pacific Security Treaty. The United Kingdom, Australia and New Zealand co-ordinate their defence plans in South East Asia and the South West Pacific through a joint defence machinery specially devised for this purpose.

COLONIES AND PROTECTORATES.—The United Kingdom, Australia and New Zealand have dependencies for which they are independently responsible. The United Kingdom is responsible, through the Colonial Office, for the following colonies, protectorates, protected states, and trust territories.

Aden—colony and protectorates. The Governor of Aden is responsible for Khamran Island.

Bahamas—colony.

Bermuda—colony.

British Guiana—colony.

British Honduras—colony.

British Virgin Islands—colony.

Brunei—protected state.

Falkland Islands—colony with dependencies, of which the principal are South Georgia, South Orkney, South Sandwich, South Shetland and Graham Land.

Fiji—colony. The Governor of Fiji is also Governor of the Pitcairn Islands Group and responsible for relations with the protected state of Tonga.

Gambia—colony and protectorate.

Gibraltar—colony.

Hong Kong—colony and leased territories.

Kenya—colony and protectorate.

Malta—colony.

Mauritius—colony.

North Borneo—colony.

St. Helena—colony with dependencies (Ascension Island and Tristan da Cunha are the principal).

Sarawak—colony.

Seychelles—colony.

Singapore (State)—protected state.

Uganda—protectorate.

Western Pacific High Commission—the British Solomon Islands Protectorate, the Gilbert and Ellice Islands Colony, the Central and Southern Line Islands, and the New Hebrides Condominium, which share a High Commissioner.

West Indies—a federation of the colonies of Antigua, Barbados, Cayman Islands, Dominica, Grenada, Jamaica, Montserrat, St. Christopher-Nevis and Anguilla, St. Lucia, St. Vincent, Turks and Caicos Islands and Trinidad and Tobago (established, Jan. 1958).

Zanzibar—protectorate.

Basutoland, Bechuanaland Protectorate and Swaziland—three protectorates in South Africa administered by the United Kingdom, through the Commonwealth Relations Office and H.M. High Commissioner in Pretoria.

The Maldives Islands, a protected state, consisting of groups of coral atolls in the Indian Ocean.

Federation of Rhodesia and Nyasaland—included in the Federation are Northern Rhodesia and

*In addition, citizens of the Federation of Rhodesia and Nyasaland have the common status of British subject.

Nyasaland, which are Protectorates; the Secretary of State for the Colonies retaining certain responsibilities towards them under the Federal Constitution.

Colony (or Settlement): a territory belonging by settlement, conquest or annexation to the British Crown.

Protectorate: a territory not formally annexed, but in respect of which, by treaty, grant, usage, suzerainty, and other lawful means, Her Majesty has power and jurisdiction.

Protected State: a territory under a ruler which enjoys Her Majesty's protection, over whose foreign affairs she exercises control but in respect of whose internal affairs she does not exercise jurisdiction.

Trust Territory: a territory administered by the United Kingdom government under the trusteeship system of the United Nations.

Condominium: a territory over which responsibility is shared by two administering powers.

Leased Territories: this term applies only to that part of the mainland of China which was in 1898 leased to Great Britain for 99 years and is administered by the Government of Hong Kong.

Other Commonwealth Dependencies.—Australia is responsible for Papua, the trust territory of New Guinea and (jointly with U.K. and New Zealand) Nauru Island. New Zealand is responsible for the trust territory of western Samoa. In addition they administer a number of island territories and extensive Antarctic areas.

DEVELOPMENT AND FINANCE.—Complete financial autonomy is enjoyed by all members of the Commonwealth. Customs tariffs are generally lower for merchandise of British origin than for importations from foreign countries. There is no Imperial Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the United Kingdom Government, and grants in aid of revenue are also made at need.

Under the *Colonial Development and Welfare Act, 1940*, annual sums of £5,000,000 for Development and £500,000 for Research were made available from United Kingdom Funds for 10 years from 1941. An Act passed in 1945 extended the grant period from 1951 to 1956, making £120,000,000 available in that period subject to a maximum of £17,500,000 in any one year, of which not more than £1,000,000 might be spent on research. A further Act in 1950 increased the annual amount to £25,000,000, of which not more than £2,500,000 could be drawn in any one year for research and increased the total provision to £140,000,000 over the period 1946–56. The *Colonial Development and Welfare Act, 1955*, extended the life of the previous Acts to March 31, 1960, and provided an additional sum of £80,000,000, which, added to unspent balances remaining, made available for expenditure nearly £120,000,000, during 1955–60. In 1959 these Acts were extended to March 31, 1964, and a further £95,000,000 was made available. With the unspent balance this provides over £140,000,000 for expenditure in 1959–64.

COMMONWEALTH SCIENTIFIC LIAISON OFFICES (LONDON)

Africa House, Kingsway, W.C.2

[Holborn: 3422]

The Commonwealth Scientific Liaison Offices exist to keep in touch with scientific developments in the United Kingdom, to deal with scientific enquiries from and to their home countries and to act as scientific advisers to the Commonwealth High Commissioners and Governments concerned.

Joint headquarters were set up in May, 1948. Liaison offices of the various countries continue to act as separate autonomous units but share common services to the cost of which the Commonwealth countries contribute in agreed proportions. B.C.S.O. (London) serves as a headquarters for Commonwealth scientists visiting the United Kingdom.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first permanent settlement at Port Royal (now Annapolis), Nova Scotia, was founded in 1605, and Quebec was founded in 1608. In 1759 Quebec was captured by the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866.

Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean. In Eastern Canada, the southernmost point is Pelee Island in Lake Erie, at 41° 41'.

Relief.—The relief of Canada is dominated by the mountain ranges running north and south on the west side of the Continent, by the Pre-Cambrian shield on the east, with, in between, the northern extension of the North American Plain. From the physiographic point of view Canada has six main divisions. These are: (1) Appalachian-Acadian Region, (2) the Canadian Shield, (3) the St. Lawrence-Great Lakes Lowland, (4) the Interior Plains, (5) the Cordilleran Region and (6) the Arctic Archipelago. The first region occupies all that part of Canada lying southeast of the St. Lawrence. In general, the relief is an alternation of highlands and lowlands, and is hilly rather than mountainous. The lowlands area seldom rises over 600 feet above sea level. The great Canadian Shield comprises more than half of the area. The interior as a whole, is an undulating, low plateau (general level 1,000 to 1,500 feet), with the more rugged relief lying along the southern border in Northern Quebec and Labrador. Throughout the whole area water or muskeg-filled depressions separate irregular hills and ridges, 150 to 200 feet in elevation. Newfoundland as an outlying portion of the shield consists of glaciated, low rolling terrain broken here and there by mountains. The flat relief of the St. Lawrence-Great Lakes lowland varies from 500 feet in the east to 1,700 feet south of Georgian Bay. The whole area in the western part slopes gently to the Great Lakes. The most striking relief is provided by the eastward facing scarp of the Niagara escarpment (elevation 250 to 300 feet). The interior plains, comprising the Prairie Provinces, slope eastward and northward a few feet per mile. The descent from west to east is made from 5,000 feet to less than 1,000 feet, in three distinct levels, with each new level being marked by an eastward facing coteau or scarp. Horizontal strata and peneplanation make for slight relief of the level to rolling type. Five fairly well-developed topographic divisions mark out the Cordilleran region of western Canada. These are: (1) coastal ranges, largely above 5,000 feet with deep fiords and glaciated valleys, (2) the interior plateau, around 3,500 feet and comparatively level, (3) the Selkirk ranges, largely above 5,000 feet, (4) the Rocky Mountains with their chain of 10,000 to 12,000-foot peaks, and (5) the Peace River or Tramontane region with its rolling diversified country. The Arctic Archipelago, with its plateau-like character has an elevation between 500 and 1,000 feet, though in Baffin Land and Ellesmere Island the mountain ranges rise to nearly 7,000 feet. Two tremendous waterway systems, the St. Lawrence and the Mackenzie, providing thousands of miles of water highway, occupy a broad area of lowland with their dominant axis following the edge of the shield.

Climate.—The climate in the eastern and central portions presents greater extremes than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months.

GOVERNMENT

The Constitution of Canada has its source in the British North America Act of 1867 which formed a Dominion, under the name of Canada, of the four provinces: Ontario, Quebec, New Brunswick and Nova Scotia; to this Federation the other Provinces have subsequently been admitted. Under this Act Canada came into being on July 1, 1867 (Dominion Day), and under the Statute of Westminster, which received the royal assent on Dec. 11, 1931, Canada and the Provinces were exempted (in common with otherself-governing Dominions of the Commonwealth of Nations) from the operation of the Colonial Laws Validity Act, the Statute of Westminster having removed all limitations with regard to the legislative autonomy of the Dominions. Provinces admitted since 1867 are: Manitoba (1870), British Columbia (1871), Prince Edward Island (1873), Alberta and Saskatchewan (1905) and Newfoundland (1949).

The Executive power is vested in a Governor-General appointed by the Sovereign on the advice of the Canadian Ministry, and aided by a Privy Council.

FLAG.—Red shield with coat of arms of Canada in fly; Union Jack in first quarter next to staff.

THE JUDICATURE

The Judicature.—Justice is administered, as in England, by judges, police magistrates, and Justices of the peace, of whom the first-named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and eight puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by separate judges, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of Queen's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

NATIONAL DEFENCE

All matters relating to defence are the responsibility of the Minister of National Defence. Under his direction the Chiefs of Staff for the Navy, the Army and the Air Force are responsible for the control and administration of their respective Services. The Chairman of the Defence Research Board is responsible to the Minister for defence research and related matters.

Navy.—The Royal Canadian Navy is administered by Naval Headquarters in Ottawa through principal commands at Halifax, N.S., and Esquimalt, B.C., for the Regular Force, and a third command at Hamilton, Ont., for the R.C.N. (Reserve).

On May 23, 1961, the R.C.N. had 63 ships in commission. There were over 125 aircraft in operational and reserve strength. Among ships in commission were one light fleet carrier, 25 destroyer escorts, 18 frigates, 10 minesweepers, 2 escort maintenance ships, 3 patrol craft, one submarine and one diving depot ship. On March 31, 1961, the strength of the Regular Force was 20,655; and that of the Reserve Force was 3,672.

Army.—The Canadian Army comprises the Canadian Army (Regular) and the Reserves. The Canadian Army (Regular) consists of a field force of four Infantry Brigade Groups, and training, logistic support and headquarters units. Forces in Canada are organized into four Commands and ten Military Areas, with Army Headquarters at Ottawa, Ontario. The Reserves include the Canadian Army (Militia), the Regular Reserve, the Supplementary Reserve, the Canadian Officers' Training Corps, the Cadet Services of Canada and the Reserve Militia. Additional to, but not an integral part of, the Canadian Army are services

colleges, officially authorized cadet corps, rifle associations and clubs. The strength of the Canadian Army (Regular), at 31 Mar, 1961 was 48,051 officers and men and that of the Canadian Army (Militia) 43,229.

Air Force.—The Royal Canadian Air Force is administered by Air Force Headquarters at Ottawa, Ont. through: Air Defence Command, St. Hubert, P.Q.; 5 Air Division, Vancouver, B.C.; 2 Air Division, Metz, France; Air Transport Command, Trenton, Ont.; Air Material Command, Rockcliffe, Ont.; Maritime Air Command, Halifax, N.S.; Training Command, Winnipeg, Man. On March 31, 1961, the R.C.A.F. had 40 squadrons in service, 29 being regular and 11 auxiliary. The strength of the R.C.A.F. (Regular) was 51,349 and of the R.C.A.F. (Auxiliary) 3,130.

EDUCATION AND LANGUAGE

Education is under the control of the Provincial Governments, the cost of the publicly controlled schools being met by local taxation, aided by provincial grants. There were (1959-60) 26,185 publicly controlled schools with 3,813,711 pupils. In addition there were 183,786 pupils in private elementary, secondary and commercial schools. There are special schools for Indians with 31,465 pupils (1959-60). At December 1, 1960, there were 39 universities and about 310 other institutions of higher education with an estimated full-time university grade enrolment of 114,000.

Canada has two official languages, English and, French. At the last census about 67 per cent. of the total population gave English and about 20 per cent. gave French as their native tongue. Some 1,727,000 (or 12 per cent.) are bilingual. Owing to the spread of education the percentages of illiterates is very low: 152,775 were unable to speak English or French.

The length of telegraph lines operated in 1960 was 48,159 miles; number of telegrams transmitted totalled 15,546,292.

On Dec. 31, 1959, there were 5,439,023 telephones and 22,791,129 miles of telephone wire in use.

YUKON TERRITORY

The Yukon Act, 1955, as amended, provides for the administration of the Territory by a Commissioner acting under instructions from time to time given by the Governor in Council or the Minister of Northern Affairs and National Resources. Legislative powers, analogous to those of a provincial government, are exercised by the Commissioner in Council. The Council comprises five members elected from electoral districts in the Territory. The area of the Territory is 207,076 square miles with an estimated population (1960) of 14,000, including 1,700 Indians and a few Eskimos. Mining is the chief industry, though trapping remains important and there is considerable timber production. Oil has been discovered in the Peel Plateau area.

SEAT OF GOVERNMENT, Whitehorse. Pop. (1960) 6,000.

Commissioner, F. H. Collins.

NORTHWEST TERRITORIES.

Area 1,304,903 square miles; population (estimated, 1960) 21,000, including approximately 12,000 Indians and Eskimos.

The Northwest Territories are subdivided into the districts of Mackenzie, Keewatin and Franklin.

The Northwest Territories Act, 1952, as amended, provides for the government of the Territories by a Commissioner (who is responsible to the Government through the Minister of Northern Affairs and National Resources), and a council of nine (comprising 4 members elected in the district of Mackenzie and 5 appointed members). Legislative powers, analogous to those of a provincial government, are exercised by the Commissioner in Council.

The chief industry of the Northwest Territories is mining. The value of gold production in 1960 was \$13,961,924, crude petroleum \$619,257; silver \$64,904; pitchblende \$5,077,675; copper \$378,625; nickel \$3,200,000. Fur produced in 1958-59 was valued at \$808,154.

SEAT OF GOVERNMENT, Ottawa. The Commissioner in Council holds two sessions each year, one in Ottawa and the other in the Territories.

Commissioner, R. Gordon Robertson.

PROVINCES OF THE DOMINION OF CANADA

ALBERTA

Area and Population.—The Province of Alberta has an area of 255,285 square miles, including about 6,485 square miles of water, with a population (estimated March 1, 1961) of 1,313,000.

Government.—The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 65 members, elected for five years, representing 65 electoral districts into which the Province is divided. The present representation of parties is 61 Social Credit Party, 1 Liberal, 1 Progressive Conservative and 2 others. The Executive Council consists of 13 members.

Finances.—Estimated Revenue for 1961-62,

£326,076,151. Estimated net Expenditure (in-

cluding that for capital purposes) £339,966,599.

There is no direct debt.

Production and Industry.—The production levels of the four leading industries (as measured by value added to raw materials) were estimated for 1960 as follows: forestry, \$675,000,000; mining, \$175,000,000; agriculture, \$122,000,000; fishing, \$48,000,000. The total selling value of factory shipments was estimated for 1960 at close to two billion dollars. The principal manufacturing centres are Vancouver, Trail, Victoria, Kitimat, New Westminster, North Vancouver, Port Alberni and Prince Rupert. Manufacturing activity is based largely upon the processing of the products of the four leading basic industries. Forestry and forest-based industries form the most important economic activity accounting for approximately 40 per cent. of total production. British Columbia is the leading province of Canada in the quantity and value of its timber and sawmill products. Mining, the second most important economic activity, is based on zinc, lead, natural gas, asbestos, gold, copper, and crude oil. Lead production is approximately 80 per cent. of the Canadian total. The most important products of agriculture are livestock, poultry, fruits, and dairy products. Salmon accounts for approximately 75 per cent. of the value of fisheries. Other species include halibut, herring, soles, cod, and crab. The climate is healthy, quite moderate on the coast and continental east of the coast mountains. The economy is dependent upon markets outside the province for the disposal of most of the products of her industry. Canadian markets receive lumber, plywood, canned salmon, zinc, and fruit. World markets receive lumber, newsprint, woodpulp, aluminium, zinc, canned salmon, lead, and fruit.

Transport.—The province has deep water harbours which are well serviced by railways and modern paved highways. Vancouver is the base for regular scheduled air routes to other parts of Canada, the United States, Europe, Mexico, South America, Hawaii, Australia, and Japan.

Principal Cities.—CAPITAL, VICTORIA. Metropolitan population (1960 estimate) 142,000. Vancouver (founded in 1886), the largest city in the Province, metropolitan population (1960 estimate) 760,000, is the western terminus of the C.P.R. and the C.N.R. (the C.N.R. also has a terminus at Prince Rupert) and the southern terminus of the P.G.E., and possesses one of the finest natural harbours in the world. Other main trading centres are Chilliwack (7,800), Nanaimo (14,600), Penticton (12,000), Prince George (13,500), Prince Rupert (11,500), Kamloops (10,350), Dawson Creek (12,500), Trail (11,500), and Kelowna (12,100).

MANITOBA

Area and Population.—Manitoba, originally the Red River settlement, is the central province of Canada. The Province has a considerable area of prairie land but is also a land of wide diversity combining 400 miles of sea-coast, large lakes and rivers covering an area of 26,789 square miles and Precambrian rock which covers about three-fifths of the Province. The total area is 246,512 square miles with a population of 906,000 (1960).

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 9 Ministers, who are members of the Legislative Assembly of 57 members. Each member of the Legislative Assembly receives an annual sessional allowance of \$4,000.

Finances.—The revenues of the provincial government for the year ended March 31, 1960, were \$93,897,550, and the expenditure \$88,026,319.

Agriculture and Life Stock.—The total land area in Manitoba is 135,536,000 acres, of which 8,612,000 acres were under field crops in 1958. The gross value of agricultural production in 1958 was estimated at \$319,955,000, of which field crops represented \$167,307,000. Farm animals in 1958 numbered 865,000 cattle, 455,000 pigs, 78,000 sheep, 65,000 horses and 8,016,000 poultry.

Manufactures.—The gross value of manufactured products in 1959 was estimated at \$694,651,000. Manufacturing enterprises employed about 42,400 persons. The chief industrial centres are Winnipeg, St. Boniface, St. James, Brandon and Selkirk. The largest manufacturing industry is the food and beverage industry, followed by iron and steel products. Petroleum has grown into one of the most important industries in Manitoba.

Principal Cities.—CAPITAL, WINNIPEG, population (1960), 256,591. Other centres are St. Boniface (28,636), St. James (26,240), Brandon (24,579), Portage La Prairie (10,374).

NEW BRUNSWICK

Area and Population.—NEW BRUNSWICK is situated between 45°-48° N. lat. and 63° 47'-69° W. long, and comprises an area of 27,985 square miles, with a population (estimated at March, 1961) of 608,000. It was first colonized by British subjects in 1761, and in 1783 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 52 members elected by the people. At the General Election

of June 27, 1960, 31 Liberal and 21 Conservative members were returned.

Agriculture and Live Stock.—The total land area is 17,582,720 acres, of which 549,600 were under field crops in 1960. The live stock in 1959 included 133,700 horses, 144,000 cattle, 36,000 sheep, 59,000 hogs and 790,000 poultry. Settlement is encouraged and improved farms are obtainable at reasonable rates. The chief commercial fish are lobsters, sardines, herring, cod and salmon. The estimated value of production of the fisheries in 1960 was \$9,183,000. The cheese factories in operation produced 705,000 lb. of cheese and the creameries 8 056,000 lb. of butter in 1960.

Manufactures.—The principal manufacturing centre is Saint John. Natural gas has been found in immense quantities in Albert County, and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found (output, 1960, 1,028,064 tons, value \$8,651,571), also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities.

Principal Cities.—CAPITAL Ψ FREDERICTON: population (1956), 18,303. Ψ Saint John (pop. 52,492) is one of the principal winter ports of Canada and is connected by C.P.R. and Canadian National Railways with Montreal; Moncton (38,479); Lancaster (12,371); Edmundston (11,997); Campbellton (9,967).

NEWFOUNDLAND

Area and Population.—THE ISLAND OF NEWFOUNDLAND is situated between 46° 37'–51° 37' N. latitude and 52° 44'–59° 30' W. longitude, on the

north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle on the N.W. and by Cabot Strait on the S.W. The island is about 317 miles long and 316 miles broad and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.) and Cape Ray (S.W.) at the angles. It comprises an area of 156,185 sq. miles (inclusive of Labrador) with a population (estimated 1961) of 462,000.

Government.—On March 31, 1949, the island, with its dependency in Labrador, became the 10th Province of the Dominion of Canada. The Government is administered by a Lieutenant-Governor, aided by an Executive Council and a Legislative Assembly of 36 members.

The Legislature.

A General Election was held on Aug. 20, 1959. The present state of parties is: Liberal, 31; Progressive Conservative, 3; United Newfoundland Party, 2.

Speaker of the House of Assembly, Hon. J. R. Courage.
Clerk of the House of Assembly, R. Sheppard.

Finance.—The revenue in 1960–61 was \$80,748,000 and the expenditure \$76,796,700. The estimated revenue for 1961–62 is \$82,142,100 and expenditure \$80,550,800.

Production and Industry.—With the exception of Gander, Bishop's Falls, Badger, Millertown, Buchans, Holyday, Deer Lake and that portion of the West Coast between St. George's and Port aux Basques the inhabitants are chiefly located on the coast-line of the shore and bays. Seven mines are in operation: two iron ore, one limestone, one lead, zinc and copper, two fluorspar and one copper. Two pulp and paper mills are in operation with a total production of 497,683 tons of newsprint and 35,998 tons of sulphite pulp.

The value in 1960, of products of the forests was estimated at \$81,000,000; fishery products were valued at \$30,000,000 and the estimated value of agricultural products was \$12,000,000. The value in 1960 of mineral products was \$85,000,000. Lead, zinc and copper production in 1959 was 70,223 short tons, valued at \$21,933,000; iron ore production was 6,192,770 tons valued at \$42,696,000 and the value of fluorspar and gold production was \$1,974,000 and \$454,000 respectively.

Railways.—From April 1, 1949, the rail system, formerly owned and operated by the Newfoundland Government, was taken over by the Dominion of Canada and entrusted to the Canadian National Railway for operation. The main line of the railway extends from St. John's on the east coast to Port aux Basques on the west coast—a distance of 547 miles—with branches connecting with the ports of Argentia, Carbonear, Bonavista and Lewisporte, a total mileage of 705. There are also 56 miles of private line. Communication between various points on the coast and between Port aux Basques and North Sydney, Nova Scotia, is maintained by a fleet of 9 motor vessels and 7 steam vessels, operated by the Railway.

Posts and Telegraphs.—There were 636 post offices open in 1959. The number of telegraph and telephone offices was 677.

Civil Aviation.—Trans-Canada, British Overseas and 10 other lines (2 of them for local traffic only) operate from Gander Airport.

Shipping.—On Dec. 31, 1959, ships registered in Newfoundland consisted of 57 sailing vessels of 4,365 gross tons, 14 steam vessels of 12,457 gross tons and 726 motor vessels of 52,877 gross tons.

Principal Cities.—The Capital, St. John's (population 1956 census, 77,991) contains two cathedrals, several banks and numerous public buildings. Other towns are Corner Brook (23,225), Wabana (7,873), Grand Falls (6,064), Carbonear (3,995), Windsor (4,500), Gander (4,929), Bonavista (4,078), Goose Bay (Labrador) (4,007), Botwood (3,894), Stephenville (3,762) and Bishop's Falls (3,393).

LABRADOR

Labrador, the most northerly district in the Province of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, at the north-east entrance to the Straits of Belle Isle, on the south, to Cape Chidley, at the eastern entrance to Hudson's Straits on the north. The territory under the jurisdiction of Newfoundland has an area estimated at 110,000 square miles, with a population (1956) of 10,975. Labrador is noted for its cod fisheries. It also possesses valuable salmon, herring, trout and seal fisheries.

At the headwaters of the Hamilton River an investigation is being carried out in an area geologically of the same age as part of the Lake Superior iron ore. In this area some 400,000,000 long tons of iron ore have been outlined—by drilling. A railway from Seven Islands, in Quebec Province, a port on the northern shore of the St. Lawrence River, to the site of the iron ore deposits, near the headwaters of the Hamilton River, is now completed at an estimated cost of \$200,000,000. Construction of a shipping port at Seven Islands has also been completed.

Between Hamilton River and the southern boundary of Labrador there exists the largest stand of virgin timber on the North American continent. Estimates made, as a result of aerial and ground surveys, show some 40,000,000 cords of merchantable timber, with an approximate value of \$125,000,000 on the stump. The Hamilton River, flowing into Hamilton Inlet, is probably the largest undeveloped power river left in North America. It has a length of 560 miles and drains an area of 30,000 square miles. The two most important power sites on it are at Grand Falls and at Muskrat Falls. Theoretical continuous horse-power is 6,000,000.

NOVA SCOTIA

Area and Population.—NOVA SCOTIA is a peninsula between 42° 25'–47° N. lat and 59° 40'–60° 25' W. long., and is connected with New

Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 21,008 square miles (325 miles of which consists of lakes, rivers and inlets of the sea) with a total population (estimated 1960) of 723,000.

Government.—The Government is administered by a Lieutenant-Governor, aided by an Executive Council and a Legislative Assembly of 37 members.

Agriculture and Live Stock.—According to the 1956 census Nova Scotia has a total land area of 13,275,520 acres, of which 2,775,642 acres are held as farm land. At the same census, the total number of occupied farms was listed at 21,075. Of the total area in farm land, 379,000 acres are devoted to the production of principal field crops, valued at \$18,000,000.

The Annapolis Valley section of Nova Scotia is famous for its fruit production, with an average crop of nearly 2,500,000 bushels annually.

The number of live stock is estimated (1959) as follows: horses, 15,000; cattle and calves, 180,000; sheep and lambs, 73,000; hogs, 57,000; poultry, 1,850,000.

Manufactures.—In 1958 there were 1,297 establishments employing 29,000 people. The gross value of production was approximately \$900,000,000, foods and beverages, wood and paper, iron and steel, petroleum and coal products accounting for the larger proportion of this amount. The principal industrial centres are Halifax, Sydney, Pictou, Truro, Amherst, New Glasgow, Trenton and Yarmouth.

Fisheries.—The total landed value of the fisheries in 1959 was \$27,129,000. About 20,000 people are employed in fishing and fish processing.

Minerals.—4,391,832 tons of coal were produced in 1959. Gypsum production totalled 5,028,561 tons; barytes 207,386 tons; salt 121,834 tons.

Principal Cities.—CAPITAL, HALIFAX, population of Metropolitan area (1956) 164,200, one of the terminals of the Canadian National Railway, with a magnificent harbour, is one of the principal winter ports of Canada, and the *entrepôt* of a large trade

with the West Indies, South America and Europe. One of the largest bridges in the British Commonwealth spans the harbour and connects the city of Dartmouth and surrounding area with the city of Halifax. A shipyard for the building of large ocean-going steamers, with a dry dock, is one of the leading industries; other cities and towns are Sydney, Glace Bay and New Waterford (*see below*), Dartmouth (21,093), Truro (12,250), New Glasgow (9,998) Amherst (20,302), Sydney Mines (8,732) and Yarmouth (8,095).

CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, was incorporated with Nova Scotia in 1812. It contains an area of 3,975 sq. miles, population (1956) 162,859. The chief city, Sydney (pop. 32,162), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the third largest steel works in Canada. Glace Bay and New Waterford, also coal mining centres, have populations of 24,416 and 10,382 respectively. The Canadian National Railway provides service to the island. Construction of a large rail-highway causeway from mainland to island was completed in 1955.

ONTARIO

PHYSICAL FEATURES

Australia was separated from the other great land surfaces at a remote period, and exhibits therefore some very archaic types of fauna and flora. It may be regarded as the largest island or the smallest continent, being surrounded by the following waters:—*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean; *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and *West*, Indian Ocean. The total area of the Continent is 2,944,866 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the Commonwealth of 2,971,081 square miles. The coast-line of Australia is approximately 12,210 miles (including Tasmania, 900 miles), and the geographical position of the Continent is between $10^{\circ} 41' - 39^{\circ} 8'$ ($43^{\circ} 39'$, including Tasmania) South latitude and $113^{\circ} 9' - 153^{\circ} 39'$ East longitude; the greatest length East to West is 2,400 miles, and from North to South 1,971 miles. Its nearest distance from England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast of Queensland for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a fertile area devoted partly to agriculture, partly to dairying, while the inland districts particularly are admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The highest peak, Mount Kosciusko, in New South Wales, reaches an elevation of 7,328 feet. The principal rivers are the Murray, which debouches on the south coast, after receiving the waters of its tributaries the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the continent; on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. The scarcity of the natural water supply in the inland has been, however, mitigated by successful borings and by the construction of large dams. The work of conserving the vast quantities of water which run to waste in the wet season is being vigorously prosecuted by a system of locks and weirs on some of the rivers. Minerals comprise bauxite, coal, copper, gold, gypsum, iron, lead, limestone, mineral sand, pyrite, silver, uranium, and zinc in large quantities, antimony, asbestos, barite, beryllium, chromite, dolomite, feldspar, magnesite, manganese, mica, salt, silica, talc, tantalite-columbium, tin, tungsten, &c., and there are abundant supplies of building stones, clays, &c. The potentialities of the country in regard to its supplies of metals and minerals have not yet been fully tested. Traces of oil have been discovered in several places, but the commercial possibilities of these have yet to be proved.

Climate.—The seasons are: summer, December to February; autumn, March to May; winter, June to August; spring, September to November. The climate generally is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of the countries similarly situated.

GOVERNMENT

The Commonwealth of Australia was constituted by an Act of the Imperial Parliament dated July 9, 1900, and was inaugurated Jan. 1, 1901. The Government is that of a Federal Commonwealth within the British Commonwealth of Nations, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Ministry of twenty-two Ministers of State. Under the Constitution the Federal Government has acquired and may acquire certain defined powers as surrendered by the States, residuary legislative power remaining with the States. Trade and customs passed under Federal control immediately on the establishment of the Commonwealth; posts, telegraphs and telephones, naval and military defence, lighthouses and quarantine on proclaimed dates. The Federal Government also controls such matters as social services, patents and copyrights, naturalization, navigation, &c. The right of a State to legislate is not abrogated except in connection with matters exclusively under Federal controls, but where a State law is inconsistent with a law of the Commonwealth the latter prevails to the extent of the inconsistency.

FLAG.—Blue ground, with Union Jack in top corner of hoist above large seven pointed star; Southern Constellation on fly.

THE LEGISLATURE

The Parliament of the Commonwealth of Australia consists of the Queen, a Senate and a House of Representatives. An Act, assented to on May 18, 1948, provided for an increase in the number of members of the Senate from thirty-six to sixty, and for the number of members of the House of Representatives to be increased from seventy-four to as nearly as practicable twice the number of Senators. There are now 124 members in the House of Representatives, including the two members, with restricted voting powers, representing the two internal territories. Members of the Senate are elected for six years by universal suffrage, half the members retiring every third year and each of the six States returning an equal number. The House of Representatives, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of five members for each State. The present state of parties in the House of Representatives (excluding two Labour members for the internal territories) is Liberal 58, Country Party 19 and Labour 45. Members of both Houses receive £42,750 per annum, with allowances and free air and rail travel on parliamentary business.

DEFENCE

Subject to the authority of Cabinet the Minister and Department of Defence are responsible for the formulation and general application of a unified defence policy relating to the Defence Forces and their requirements. Separate Ministers and Departments of the Navy, Army and Air are responsible for the administration of their respective Services in accordance with defence policy. The Minister and Department of Supply are responsible for the supply, manufacture and overhaul of services and goods, including munitions, for the Defence Forces and for defence research and development, in accordance with approved policy.

Commonwealth Expenditure on Defence and War and Repatriation Services in the year ended June 30, 1961, was £A349,681,000 as compared with £A331,063,000 (including £A11,987,000 from Loan Fund) for the previous year.

Royal Australian Navy

Under the Naval Defence Acts, 1910-52, the naval forces of the Commonwealth are administered by a Naval Board of Administration responsible to the Minister of the Navy.

The Royal Australian Navy consists of the aircraft carrier *Melbourne*, 4 destroyers, 8 frigates, 4 survey vessels, 1 surveillance vessel, 1 trials vessel and 25 miscellaneous support craft. In addition, 3 submarines are on loan from the Royal Navy for anti-submarine training. In reserve there are the aircraft carrier *Sydney*, 2 destroyers, 1 frigate, 4 boom working vessels and 13 miscellaneous support craft.

Two anti-submarine frigates are under construction, and 6 coastal minesweepers are being purchased in the United Kingdom.

The strength of the Royal Australian Navy on May 1, 1961, was 1,273 officers and 9,382 ratings.

Army

The Military Forces of the Commonwealth are administered by a Military Board, with the Minister for the Army as President and 7 members. There are three elements—the Australian Regular Army, the Citizen Military Forces and the Cadet Corps.

For the financial year 1960-61, the establishment for the Australian Regular Army was 21,000 soldiers and 5,100 civilians. This includes a Field Force, Regular Army cadres for duty with the Citizen Military Forces, administrative staff for schools, training installations and headquarters and maintenance units, in addition to the Pacific Islands Regiment comprising European officers and non-commissioned officers and native troops. The Women's Royal Australian Army Corps forms part of the Australian Regular Army, being employed in direct substitution for male soldiers in mainland units. The Royal Australian Army Nursing Corps is also an important element of the Regular Army.

The strength of the Australian Regular Army on April 30, 1961, was 20,240 all ranks, of whom 2,227 were serving outside Australia.

The strength of the Citizen Military Forces on April 30, 1961, was 26,786. The two Women's Services are also represented in the Citizen Military Forces, the strength at April 30, 1961, being 569.

The Australian Cadet Corps, composed of students at educational establishments, had a strength of 34,953 on March 31, 1961.

Air

The total strength of the R.A.A.F. on May 1, 1961, was 15,377. The total number of squadrons was 14, and of training units 20. Three squadrons were serving in Malaya as the R.A.A.F. component of the British Commonwealth Far East Strategic Reserve.

War Losses

Australian battle casualties in the 1939-45 War:—

Killed (including died of wounds, died while P.O.W., and "missing, presumed dead")	27,073
P.O.W. escaped, recovered or repatriated	22,264
Wounded and injured	23,477

Total Non-battle casualties—7,220 killed,	72,814
157,650 injured.

(a) Excludes certain government subsidies aggregating approximately £6,008,446.

The *Trans-Australia* (Government) Railway, 2 ft. 8½ in. gauge, connects Kalgoorlie, W. A., with Port Pirie, S. A. (1,108 miles) and so forms a link (including Kalgoorlie-Perth 372 miles) between Perth and Brisbane, Q., a total length of 3,308 miles.

The gross earnings of all Government lines in 1959-60 were £194,162,773, working expenses £194,134,587, and net profit £28,126. In 1959-60 passenger journeys numbered 478,713,338 and 51,172,387 tons of goods and live stock were carried. There are 233 miles of electrified line in New South Wales and 262 miles in Victoria.

Tramways.—The total route mileage on June 30, 1960, under Government and semi-Government control was 275.

Shipping.—The entrances and clearances (one entrance and one clearance per voyage, irrespective of the number of ports visited) of vessels engaged in overseas trade at the various Australian ports in 1959-60 were: entered 2,976 (14,477,781 tons); cleared 2,969 (14,396,050 tons). Of the vessels entered, 1,645 of 7,618,634 tons were under the British flag and 1,331 of 6,859,147 tons under foreign flags.

The total, including local shipping, entering the ports of the capital cities during 1959-60 was: Sydney 4,794 vessels of 13,349,000 tons, Melbourne 2,743 (10,160,000), Brisbane 1,417 (4,675,000), Adelaide 2,658 (5,463,000), Fremantle 1,273 (6,602,000) and Hobart 488 (1,237,000). At December 31, 1960, there were 1,712 vessels of a total net tonnage of 354,846 on the shipping registers of the several States.

Posts and Telegraphs.—In the year ended June 30, 1960, there were 8,118 post offices dealing with 1,602,830,000 letters, 319,831,000 packets and newspapers, 13,671,000 registered articles and 16,433,000 parcels. 19,376,000 telegrams were despatched and 2,865,000 cablegrams received and despatched. At June 30, 1960, there were 7,246 telephone

exchanges with 1,514,022 lines and 2,163,962 instruments.

Broadcasting.—On June 30, 1960, the National Broadcasting and Television Service operated 66 stations, including 9 short-wave stations. Privately owned commercial broadcasting stations totalled 108. On June 30, 1960, there were in force in Australia 2,283,185 listeners' licences. Television transmissions commenced in September, 1956. On June 30, 1960, 16 television stations were in operation (Melbourne, 3; Sydney, 3; Brisbane, 3; Adelaide, 3; Perth, 2; Hobart, 2). Television licences in force at June 30, 1960, numbered 954,995.

Motor Vehicles.—At June 30, 1960, there were 2,833,941 motor vehicles registered in the several States. These comprised 1,924,197 cars, 102,490 motor cycles, and 807,254 commercial vehicles; revenue derived from motor registration fees and motor tax, &c., in 1959-60 was £47,606,305. Motor omnibus services are extensively operating in urban areas.

Civil Aviation.—At June 30, 1960, there were 472 recognized landing grounds, including 323 licensed public aerodromes, in the various States and Territories, and 13 flying boat bases and alighting areas. Aircraft on the Australian Register at Dec. 31, 1960, numbered 1,439. Mileage flown on regular internal air services in 1959-60 was 43,199,100 and on overseas services owned or partly-owned by Australia, 16,991,900.

CAPITAL

CANBERRA, the Capital of the Australian Commonwealth, is 203 miles by rail (153 by air) from Sydney, N.S.W. and was acquired in 1911 from the State of N.S.W. for the Australian Capital. The original area was 912 sq. miles, increased in 1917 by the acquisition of 28 sq. miles at Jervis Bay. Canberra contains the Australian (1914-18 and 1939-45) War Memorial, Parliament House, Commonwealth Offices, University College, and the Australian National University, and is connected with the N.S.W. railway system by a line (5 miles) to Queanbeyan and by good roads to Melbourne and Sydney. Frequent air services also link it with the State capitals. The estimated population of Canberra city area at Dec. 31, 1960, was 53,087. Total population of the Australian Capital Territory (est. Dec. 31, 1960) 55,272.

THE NORTHERN TERRITORY

The Northern Territory has a total area of 523,620 square miles, and lies between 129°-138° East longitude and 11°-26° South latitude. The administration was taken over by the Commonwealth on January 1, 1911, from the government of the State of South Australia. The headquarters of the Administrator are at Darwin. The Commonwealth Parliament in May, 1959, amended the Northern Territory (Administration) Act in order to enlarge the membership of the Council. The new Council consists of six official members, three non-official members and eight elected members. The official and non-official members are appointed by the Governor-General on the recommendation of the Administrator, and the elected members are elected by adult franchise. Under the amending legislation, procedures in connection with assent were changed. Ordinances passed by the Council must be presented to the Administrator who may declare his assent, withhold his assent or reserve the ordinance for the Governor-General's pleasure. The Administrator may return an ordinance to the Legislative Council with recommended amendments; but the ordinance with or without amendments must be again presented to the Administrator for assent. Certain

ordinances must be reserved for the Governor-General's pleasure. The Governor-General may return an ordinance with recommended amendments and this ordinance with or without amendments shall again be presented to the Administrator, who shall reserve it for the Governor-General's pleasure. Ordinances assented to by the Administrator may be disallowed by the Governor-General, and the Governor-General may recommend to the Administrator amendments to laws of the Territory. The new Act also sets up an Administrator's Council to advise the Administrator. The Council consists of the Administrator, two official members of the Legislative Council and three other members of the Legislative Council not being official members, and of whom at least two shall be elected members.

The population of the Northern Territory (excluding full-blooded aboriginals) at June 30, 1960, was estimated to be:—males 12,006, females 9,794, total 21,800. The number of full-blooded aboriginals was estimated (June 30, 1959) at 16,868.

Beef cattle raising is the chief pastoral activity, and the staple industry of the Territory. On June 30, 1960, there were 1,110,520 cattle, 38,340 horses and 14,960 sheep in the Territory. Imports of livestock for the year ending June 30, 1960, were: bulls 1,278, other cattle 4,591, horses 220, sheep 6,584. 137,192 cattle were exported during the same period. The Territory is capable under improved conditions of carrying successfully and profitably a great expansion of the beef cattle industry. Hides and skins exported from the Northern Territory during the year ended June 30, 1960, were as follows:—cattle 5,777, sheep 2,653 and crocodile 1,223.

Agriculture in the Northern Territory hitherto has been confined to small farm settlements in the Darwin, Katherine, Daly River, Alice Springs, Adelaide River and Pine Creek areas. Principal crops grown are peanuts, grain sorghum, vegetables and fruit (pineapples, paw-paws, bananas and citrus). However, extensive experiments are being carried out particularly in the area between Darwin and Katherine to determine what crops can be successfully grown in the Northern Territory on a commercial scale. Experimental work on pastures is also being undertaken. In recent years a great deal of interest has been shown in the possibility of large scale rice production on the sub-coastal plains areas of the Territory. Experiments are continuing with encouraging results.

Out of a total of about 335,117,000 acres in the Northern Territory, 376,000 acres are freehold, 143,910,000 acres are held in various forms of leasehold tenure, 35,000,000 acres are under annual licence, 59,591,000 acres are aboriginal and other reserves and 96,093,000 acres are unoccupied and unreserved.

The mineral industry has always contributed largely to the income of the Northern Territory and the value of mineral production exceeds that of the beef cattle industry. The search for uranium still holds the interest of many prospectors and companies. The other principal minerals produced are copper, gold, manganese, mica and wolfram. In 1959, the total value of minerals produced (excluding uranium) was £5,166,113. In addition, building materials valued at £770,463 were quarried.

The chief rivers of the Territory are Victoria, Adelaide, Daly, Roper, South Alligator, McArthur, Liverpool, and Goyder. The first six are navigable, from 40 to 100 miles from their entrance, for boats drawing 4 feet. Mother-of-pearl fishing is carried on round the coast, the shell being of good quality.

The railway extends from Darwin to Larrimah (316 miles) and Alice Springs is connected by rail with Adelaide. A good bitumen road links Darwin with Alice Springs (954 miles). The Commonwealth Government is carrying out a five-year plan to maintain and improve this highway and the Barkly highway to the Queensland border.

Ψ Darwin occupies an elevated site 97 feet above sea level, overlooking Port Darwin. Alice Springs is situated in the MacDonnell Ranges. Climate of the Northern Territory ranges from dry in the south to wet-monsoonal in the north.

TERRITORY OF PAPUA AND NEW GUINEA

The *Papua and New Guinea Act, 1949*, which came into force on July 1, 1949, approved the placing of the Territory of New Guinea under the International Trusteeship system and provides for the Government of the Territory of Papua and the Territory of New Guinea in an Administrative Union.

Provision is made for an Executive Council of not less than nine members, and a Legislative Council consisting of twenty-nine members, namely:—

(a) the Administrator; (b) sixteen officers of the Territory (who shall be known as official members); (c) three non-official members possessing such qualifications as are provided by Ordinance and elected, as provided by Ordinance, by electors of the Territory; (d) three non-official members representing the interests of the Christian missions in the Territory; (e) three non-official native members; and (f) three other non-official members.

PAPUA

The Territory of Papua, which was placed under the authority of the Commonwealth of Australia in 1906, comprises the south eastern portion of the island of New Guinea, together with the Trobriands, Woodlark, D'Entrecasteaux and Louisiade groups of islands and is separated from Australia by Torres Straits. The Territory lies wholly within the Tropics, between the 141st and the 155th meridians of east longitude and the 5th and 12th parallels of south latitude. The total area is 90,540 sq. miles, of which 87,540 are on the mainland. The non-indigenous population (1960) was 9,885. The official estimate of the native population is 493,518. Owing to heavy rainfall Papua is well watered in most parts and possesses a large number of streams. The best-known rivers are the Fly (650 miles long and navigable by steam launch for over 500 miles), the Strickland and the Purari. The climate is favourable to the cultivation of tropical products. Copra exports for 1959-60 totalled 14,649 tons and rubber exports 9,853,920 lbs.

(a) Includes £A4,772,537; (b) includes £A4,948,361 Australian Commonwealth grant.

NEW GUINEA

The German possession, on the mainland of New Guinea and certain adjacent islands were occupied by Australian forces on Sept. 12, 1914, and on Dec. 17, 1920, a mandate of the Supreme Council of the Allies entrusted the administration

to the Australian Government which established its administration on May 9, 1921.

The Trust Territory includes (1) *North-Eastern New Guinea*, the northern section of east New Guinea between $2^{\circ} 35' - 8^{\circ}$ S. lat., and $141^{\circ} - 148^{\circ}$ E. long., with a total area of 69,700 sq. miles. This includes adjacent islands (Manam, Karkar, Long, Bagabag, Schouten and D'Urville or Kairiru Island). The chief centres are Lae, Bulolo, Finschhafen, Wau, Madang, Wewak, Goroka and Mount Hagen. (2) *Bismarck Archipelago* (19,200 sq. miles), including New Britain, New Ireland, and islands adjacent to both, and (3) *Admiralty Islands* (chief town, Lorengau, in Manus Island); and (4) the two northernmost *Solomon Islands* (4,100 sq. miles) (Bougainville and Buka with adjacent islands). The total estimated area is thus 93,000 square miles. In 1960 the non-indigenous population was estimated at 14,980, and the native population at 1,386,808, giving a total of 1,401,788.

The principal river in N.E. New Guinea is the Sepik, which is navigable for 300 miles.

A road to the coast over rugged country now serves the areas of the Lower Watut, Sunshine, Bulolo, Wau and Edie Creek, and a small farming district at Wau, and another road system has been extended from Lae to Goroka and other centres in the Highlands, where a thriving coffee industry is established.

Trans-Australian Airlines operates a regular air service from Australia to Lae and Rabaul, and to Port Moresby, Papua, in addition to a fortnightly service from Lae to Hollandia, Netherlands New Guinea. There is also a service from Port Moresby to Rabaul and Bougainville. Commercial aircraft operators located on the New Guinea mainland maintain passenger and freight carrying services to many parts of the Territory.

Overseas vessels call at various ports and a regular service is maintained with Australia.

The climate is hot and moist along the coast, with a steady drop as the higher altitudes are reached. It is suitable to the growth of all tropical products. The copra export for 1959-60 was 50,747 tons. There are indications of mineral wealth, but difficulties of transport have prevented developments. The major output of gold is still from the Morobe District, but the yield is decreasing.

Trusteeship.—The Commonwealth Government has placed the Territory of New Guinea under the Trusteeship system established under the United Nations Charter and the agreement under which Australia became the sole administering authority was approved by the General Assembly of the United Nations on Dec. 13, 1946.

SEAT OF ADMINISTRATION.—Administrative Headquarters of the combined territories of Papua and New Guinea is Ψ Port Moresby, the principal port and town of Papua. Ψ Rabaul (in New Britain), is the largest port in the combined territories and second town, while Ψ Lae (in Morobe District) is the third port and town of the combined territories, being the outlet for the Morobe plywood and gold mining district and for the Highlands region, and the principal air centre in the territories. Ψ Madang (Madang District), Ψ Samarai (Milne Bay District), Ψ Kavieng (New Ireland District), Ψ Wewak (Sepik District) and Ψ Lorengau (Manus District) are the administrative centres and principal ports in their Districts. Sohano is the administrative centre for the Bougainville District (included in which are the islands of Bougainville and Buka) and Goroka and Mount Hagen the administrative centres of the Eastern and Western Highlands Districts respectively.

Administrator of the Government of Papua and New Guinea, Brigadier Sir Donald Cleland, C.B.E.

Port Moresby is distant from Sydney, N.S.W., 1,800 miles; transit by sea from Sydney 5 to 6 days; by air 10 hours.

NORFOLK ISLAND

This island is about 930 miles from Sydney and 400 miles from New Zealand. It is about five miles in length by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 8,528 acres and circumference 20 miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 53 inches. The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1856. A modern whaling station was established on the island in 1955. The estimated population on June 30, 1960, was 1,031.

Seat of Government and Administration Offices, Kingston. Local government was established in June, 1960, by the creation of the Norfolk Island Council with power to control roads, electricity, lighterage and other municipal services.

The construction of an airfield was completed in 1943, and fortnightly air services are now in operation from Australia and New Zealand.

Administrator, R. S. Leydin, O.B.E.

President, Norfolk Island Council, F. J. Needham.

NAURU ISLAND

This island, situated in $166^{\circ} 55'$ East longitude and 32 minutes south of the Equator, was discovered by Capt. Fearn, R.N., in 1798, and was annexed by Germany in 1888. It surrendered to H.M.A.S. *Melbourne* in November, 1914, and is now administered by Britain, Australia and New Zealand. Under an international trusteeship agreement approved by the General Assembly of U.N. on Nov. 1, 1947, this agreement supercedes the League of Nations' Mandate, but Australia continues to be responsible for the administration of the island on behalf of the grantor Governments. The island has an area of approximately 8 square miles, with a population (June 30, 1960) of 4,475, of whom 2,328 were Nauruans, 1,075 other Pacific Islanders, 715 Chinese, and 380 Europeans. Administrative and legislative powers of government are vested in the Administrator. The judiciary consists of a District Court, a Central Court and an Appeal Court. Expenses of the Administration so far as they exceed revenue are met by the British Phosphate Commissioners under an agreement made between the three administering Governments. There are valuable deposits of phosphates on the island, which were purchased from the Pacific Phosphate Company in 1919 by the Governments of Great Britain, Australia and New Zealand for £3,500,000, and vested in the British Phosphate Commissioners.

Nauru was occupied by the Japanese from Aug. 26, 1942, to Sept. 13, 1945. Since re-occupation the buildings and plant of the Administration and the British Phosphate Commissioners have been restored. Services provided by the Administration for the Nauruan people include medical and dental services, hospitalization, maternity and infant welfare, and education services up to fourth year secondary school standard, beyond which overseas scholarships and public service cadships are available. Exports of phosphates for the 12 months ended June 30, 1960, totalled 1,227.800 tons. *Administrator*, J. P. White.

COCOS (KEELING) ISLANDS

The Cocos (Keeling) Islands were declared a British possession in 1857, and in 1878 were placed under the control of the Governor of Ceylon and were later annexed to the Straits Settlements and incorporated with the Settlement (now the Colony) of Singapore. On Nov. 23, 1955, their administration was transferred to the Commonwealth of Australia. They are two separate atolls comprising some 27 small coral islands with a total area of about five square miles, situated in the Indian Ocean in latitude $12^{\circ} 5'$ South and longitude $96^{\circ} 53'$ East. The main islands are West Island (the largest, about 6 miles from north to south) on which is the aerodrome and the administrative centre, and most of the European community; Home Island, the headquarters of the Clunies Ross Estate; Direction Island, on which is situated the Cable and Wireless Station, the Admiralty Wireless Station, and the Department of Civil Aviation's marine base; and Horsburgh. North Keeling Island, which forms part of the Territory, lies about 15 miles to the north of the group and has no inhabitants. The climate is equable and pleasant, being usually under the influence of the south-east trade winds for about three-quarters of the year. The population (June 30, 1960) was 607.

CHRISTMAS ISLAND

Until the end of 1957 a part of the Colony of Singapore, Christmas Island was administered as a separate colony until October 1, 1958, when it became Australian territory by Order in Council. It is situated in the Indian Ocean about 190 miles S. of Java Head and 529 miles E. of the Cocos (Keeling) Islds. Area, 64 sq. miles. Population (June 30, 1960), 2,919. The island is densely wooded and contains extensive deposits of phosphate of lime.

THE ANTARCTIC CONTINENT

The area of the Antarctic Continent is estimated at approximately 5 million square miles. The greater part of the coastline has been charted with varying degrees of accuracy, but considerable portions of the interior have not been visited, or at best have been seen only from the air.

The question of territorial rights is complicated and there is no general international agreement thereon. Argentina has 3 Antarctic bases in the zone claimed as "Argentine Territory," one being on Deception Island in the South Shetlands, which is part of the British Falkland Islands; another in Scotia Bay, and a third on Gamma Island, in the Melchior Archipelago.

STATES OF THE COMMONWEALTH OF AUSTRALIA

NEW SOUTH WALES

The State of New South Wales is situated almost entirely between the 29th and 36th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 309,433 square miles (exclusive of 939 square miles of Australian Commonwealth Territory which lies within its borders).

POPULATION.—The population at December 31, 1960, was: Males, 1,937,580; Females, 1,935,229. Total, 3,872,809.

Births, Deaths and Marriages.

Year	Births	Deaths	Marriages
1940	49,382	26,143	30,364
1958	80,045	32,350	28,554
1959	80,866	35,249	28,201
1960	81,938	35,030	29,328

The Australian Antarctic Territory was established by an Order in Council, dated February 7, 1933, and the Australian Antarctic Territory Acceptance Act of June 13, 1933, which placed under the government of the Commonwealth of Australia all the islands and territories, other than Adélie Land, which are situated south of the latitude 60° S. and lying between the 160th and 45th meridians of East longitude.

The exception of Adélie Land from the Order in Council is due to French claims based on rights of discovery and occupation.

The area administered by the Commonwealth of Australia is estimated at 2,472,000 square miles. It adjoins that belonging to New Zealand. There is an Australian research station on Macquarie Island (north of the Antarctic Convergence and sub-Antarctic), which is about 1,000 miles south-east of Hobart and has been a dependency of Tasmania since the nineteenth century.

Heard Island, about 2,500 miles south-west of Fremantle, was transferred from United Kingdom to Australian control on December 26, 1947.

In February, 1954, a base known as Mawson, was established on the coast of the Antarctic continent at lat. $67^{\circ} 36'$ S. and long. $62^{\circ} 53'$ E. Meteorological and other research is being conducted at this station. A second base, named Davis, was established in Jan. 1957 at $68^{\circ} 35'$ S., $77^{\circ} 59'$ E. and in February, 1959, Australia took over the United States base at Wilkes (lat. $66^{\circ} 15'$ S., long. $110^{\circ} 33'$ E.).

Other British dependencies in the Antarctic are:—

(1) The Ross Dependency, placed under the jurisdiction of New Zealand by Order in Council dated July 30, 1923, and defined as all the islands and territories between the 160th meridian of east longitude and the 150th meridian of west longitude which are situated south of the 60th parallel of south latitude. The Ross Dependency includes Edward VII Land and portions of Victoria Land. There are no permanent inhabitants of the territory, but whaling is carried on extensively.

(2) The Falkland Islands Dependencies:—

- (a) South Georgia, with South Orkney and South Sandwich Islands.
- (b) South Shetland Island and Graham's Land.
- (c) Coats Land and territory adjacent to the South Pole.

South Georgia is permanently inhabited and is an important seat of the whaling industry.

So far as is known the total areas of these Dependencies have not been officially estimated.

Vital Statistics.—Annual rate per 1,000 of mean population in 1960:—Births, 21.41; Deaths, 9.15; Marriages, 7.66. Deaths under 1 year per 1,000 live births, 21.16.

Religions.

The members of the Church of England in New South Wales, according to the Census of 1954, number 1,466,571. Roman Catholic 844,453. Presbyterian 302,984. Methodist 275,188. Congregational 21,280. Baptist 40,283. Greek Orthodox 29,133. Lutheran 17,033. Salvation Army 12,825. and Hebrew 19,583. The religion of 301,203 persons was not stated in the census schedules.

PHYSIOGRAPHY.

Natural features divide the State into four strips of territory extending from north to south, viz., the Coastal Divisions; the Tablelands, which form the Great Dividing Range between the coastal districts and the plains; the Western Slopes

of the Dividing Range; and the Western Plains. The highest points are Mount Kosciusko, 7,328 feet, and Townsend, 7,266 feet. The coastal district is well watered by numerous rivers flowing from the ranges into fertile flats which form their lower basins. The western portion of the country is watered by the rivers of the Murray-Darling system and immense reservoirs have been constructed for irrigation purposes, and there are many artesian bores. The Darling, 1,702 miles, and the Murrumbidgee, 981 miles, are both tributaries of the Murray, part of which forms the boundary between the States of New South Wales and Victoria. Other inland rivers are: Lachlan, Bogan, Macquarie, Castlereagh, Namoi and Gwydir.

Climate.—New South Wales is situated entirely in the Temperate Zone. The climate is equable and very healthy. At the capital (Sydney) the average mean shade temperature is 63.7°. The mean temperature in the shade for the north coast is 66° to 69°, south coast 60° to 63°, northern tableland 56° to 60°, southern tableland 44° to 57°; in the north-western slope, the mean annual temperature ranges from 62° to 68°; in the central western slope 57° to 64°, south western slope 60° to 64°, and in the Western Plains and Riverina Division from 61° to 69°.

GOVERNMENT.

New South Wales was first colonized as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 Responsible Government was granted, the present Constitution being founded on the Constitution Act of 1902. New South Wales federated with the other States of Australia in 1901. The executive authority of the State is vested in a Governor (appointed by the Crown), assisted by a Council of Ministers.

THE LEGISLATURE.

The Legislature consists of the Sovereign and the two Houses of Parliament (the Legislative Council and the Legislative Assembly). The *Legislative Council* consists of 60 members, elected jointly by both Houses of Parliament. Membership is for 12 years, 15 members retiring in rotation triennially. Members receive an annual allowance of £500 and three guineas a day attendance allowance for members living outside the metropolitan area. The *Legislative Assembly* consists of 94 members. Each member of the Legislative Assembly receives £2,350 per annum, plus an electoral allowance (£650 to £950, according to location of electorate). The Women's Legal Status Act, 1918, removed disqualification regarding the election of women to be members of the Legislative Assembly. A provident fund for members of the Legislative Assembly was established in 1946; a pension is payable to those who on ceasing to be members have served in three parliaments. Natural-born or naturalized persons 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and 1 month in the electoral district are entitled to the franchise. Voting is compulsory. At the State General Elections in March, 1959, there were 1,010,096 men and 1,065,172 women electors, making a total of 2,075,268 enrolled; in contested electorates 94 per cent. of the eligible electors voted.

EDUCATION.

Education.—Education is compulsory between the ages of 6 and 15 years. It is non-sectarian and free at all state schools. The average weekly enrolment in 1959 in 2,706 state schools was 571,875 and the average daily attendance during the year was 514,375. In addition to the state schools there were, in 1959, 820 private colleges and schools, with an average weekly enrolment of 186,682 scholars, 677 being Roman Catholic schools with 160,292 scholars. The three universities had an enrolment of 13,045 full-time students in 1961; 9,427 at Sydney (incorporated 1850), 2,947 at the University of New South Wales (1948) and 671 at New England (1954). The State expenditure on Education was £56,568,000 in the year 1958-59. Students attending the State Agricultural Colleges and Farm schools numbered 1,685 in 1959.

* Excluding the self-balancing Road Transport and Traffic Fund.

The Public Debt of New South Wales at June 30, 1960, was £880,200,157, of which an amount of £111,474,539 was repayable in London (interest £4,268,447), £14,189,869 was repayable in New York (interest £591,772) and £754,535,749 was held in Australia, with an annual interest bill of £31,204,361.

Banking, &c.—There were (Dec. 1960) 12 trading banks with deposits of £718,600,000. Savings bank deposits amounted to £563,981,000, representing £147 per head of the population. The amount assured in New South Wales in

Life Assurance Societies in 1958 was £923,121,773 ordinary and £124,076,950 industrial. The membership of *Friendly Societies* was 146,495, and the funds at June 30, 1959, were £9,081,250. Members of *Trade Unions* at Dec. 31, 1959, numbered 665,384, the funds of 220 Unions being £2,462,470. Retail *Hire Purchase* balances outstanding to finance houses on June 30, 1960, were £163,808,000.

PRODUCTION AND INDUSTRY.

Value of Production.—In 1959-60 the net value of production of the primary and manufacturing industries was £1,339,257,000—primary £422,811,000 and manufacturing £916,446,000. The values for the principal primary industries were: pastoral £198,380,000, agricultural £78,518,000, dairying and farmyard, £69,117,000 and mining and quarrying, £56,542,000.

Agriculture.—During the year to Mar. 31, 1960, 6,935,868 acres were under cultivation.

The total area under wheat was 4,108,860 acres, of which 3,935,389 acres were harvested for grain, and 82,429 acres for hay. The production of wheat was 75,358,155 bushels of grain and 115,004 tons of hay. Other important crops in 1959-60 were 2,485,344 bushels of maize, 11,124,756 bushels of oats, 6,732,053 bushels of rice, besides other kinds of grain, 81,008 tons of potatoes, and 12,837 cwt. of dried leaf tobacco. Sugar-cane to the extent of 574,527 tons was crushed; while 4,171,022 bushels of bananas were obtained; almost every kind of fruit and vegetable is grown. There were 17,236 acres of vineyards, of which 15,978 acres were bearing.

Land Alienation.—The total extent of land alienated and in process of alienation from the Crown on June 30, 1959, was 65,923,645 acres, while the area of land under lease, &c., from the Crown was 116,832,078 acres, and the balance 15,281,397 acres, consisted of reserve and other lands neither alienated nor leased; the total area of the State, exclusive of the Australian Capital Territory, is 198,037,120 acres.

Livestock.—The country is admirably adapted for sheep-farming, the principal breed of sheep being the celebrated merino, which was introduced in 1797. On Mar. 31, 1960, there were 204,011 horses, 3,840,565 cattle, 71,000,000 sheep and lambs, 398,959 pigs. In 1959-60, 715,445,000 lb. (stated as in the grease) of wool were produced, 95,776,136 lb. of butter, 9,740,272 lb. of cheese, and 24,550,539 lb. of bacon and ham.

Forests.—The estimated forest area is 22,682,000 acres, of which State forests cover 6,420,000 acres and 1,442,000 have been set aside as timber reserves.

Mining Industry.—The principal minerals are coal, silver, lead, zinc, zircon and rutile. The total value of minerals won in 1960 was £79,900,000; the value of output of the coal-mining industry was £42,000,000, and of the silver-lead-zinc industry, £23,300,000. The mining industry gave employment to 22,638 miners during 1959. In 1960, 17,737,000 tons of coal were produced.

Factories.—In 1959-60 there were 23,274 factories. The average number of persons employed during the year was 467,139. The value of production, i.e. value added to raw materials, was £916,446,000. Large iron and steel works with subsidiary factories are in operation at Newcastle and Port Kembla in proximity to the coalfields. The products include iron and steel of various grades, pipes, boilers, steel wire, and wire netting, copper wire, copper and brass cables, spun cast-iron pipes and tin-plate. The production (1959-60) of pig-iron was 2,453,000 tons, and of steel ingots 3,510,000 tons.

OVERSEAS TRADE.

Year ended June 30	Oversea Imports £A (f.o.b.)	Oversea Exports £A (f.o.b.)
1939.....	52,898,424	45,903,080
1958.....	352,652,561	230,531,811
1959.....	352,711,936	221,372,019
1960.....	414,645,823	281,164,483

The chief exports in 1959-60 were foodstuffs, wool, hides and skins, minerals, metals and machinery. Chief imports were tea, tobacco, yarns, textiles and apparel, petrol, metals, motor vehicles, machinery, timber, paper, rubber, drugs and chemicals.

TRANSPORT AND COMMUNICATIONS.

Shipping.—Excluding coastal trade, 3,679 vessels entered ports of N.S.W. during the year ended June 30, 1960, the net tonnage being 13,825,000. The shipping entries at Sydney, including coastal, were 4,536 vessels of 11,592,000 net tonnage.

Roads and Bridges.—There are 127,000 miles of roads and streets in New South Wales, including 41,000 miles of natural surface and cleared only. The total expenditure by the Government and the local councils on roads, bridges, &c., in 1958-59 was £41,291,000. The construction of an arch bridge of Sydney Harbour was completed and the bridge opened for traffic in March, 1932. This bridge carries eight lanes of roadway with a total width of 84 ft., two footways each 10 ft. wide, and two lines of railway. At mean high water there is a headway of 17½ ft.

Motor Vehicles.—At March 31, 1961, there were 990,488 registered motor vehicles (cars, 657,809).

Railways.—The railways and tramways of New South Wales are controlled by the State, which also operates omnibus services. At June 30, 1960, the mileage of the State railways open for traffic was 6,108, earnings in the year 1959-60 being £83,563,000.

Aviation.—The principal overseas routes from Sydney are to the United Kingdom, New Zealand, U.S.A. and South Africa. Regular domestic air services with terminal in N.S.W. carried 1,554,721 paying passengers in 1959-60.

Posts, Telegraphs and Telephones.—The postal telegraphic, telephonic and radio services are administered by the Commonwealth Government. At June 30, 1960, there were 2,540 post offices in New South Wales. The postal matter carried during 1959-60 included 555,049,000 letters and registered articles and 115,359,000 newspapers and parcels posted for delivery in Australia. The overseas mails consisted of 34,996,000 letters and 10,165,000 newspapers and parcels despatched, 49,661,000 letters and 35,542,000 newspapers and parcels received. During the year 7,095,000 telegrams were despatched to places within Australia and 694,000 cablegrams were despatched and 720,000 received. Transit time between Sydney and London is approximately 2½ days for airborne mail and between 4 and 6 weeks for seaborne mail. The telephone line connections numbered 576,431.

Radio and Television.—In June, 1960, there were 19 National Broadcasting Stations in New South Wales and 38 commercial stations operating under licence. The number of broadcast listeners' licences was 832,659. Regular transmission of television programmes in New South Wales began in September, 1956. At June 30, 1960, there were 3 television stations (one national, two commercial) in operation and the number of viewers' licences was 409,334.

TOWNS.

Ψ SYDNEY, the chief city and capital, stands on the shores of Port Jackson, with a water frontage of 15½ miles; the depth of water at the Heads is not less than 80 feet, and at the wharves up to 40 ft. There are extensive facilities for handling cargo, and for storing and loading grain in bulk or bags; also for replenishing coal and oil bunkers. For 20 miles Sydney Harbour extends inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The principal wharves are situated in close proximity to the business centre of the city. The total area of water in the harbour is 13,600 acres, or about 21 square miles, of which approximately one-half has a depth of not less than 30 ft.: the rise and fall of the tide is from 3 to 6 ft. The metropolis contains approximately 671 square miles, with a population of 2,098,490 (estimated, June 30, 1960).

The parks in or adjacent to the metropolitan area include the National Park which measures 37,000 acres, Kurling-gal Chase 38,263 acres, Kurnell 248 acres, Centennial Park 474 acres, and Parramatta Park 252 acres.

Other cities and towns over 12,000 are Ψ Newcastle (urban area) 203,650; Wollongong (Greater) 125,090; Broken Hill 33,210; Blue Mountains 24,300; Maitland 28,300; Goulburn 21,150; Wagga Wagga 21,550; Penrith 26,500; Lismore 19,400; Lithgow 14,720; Albury 18,900; Orange 19,500; Cessnock (Greater) 37,320; Tamworth 18,700; Grafton 15,450; Bathurst 17,230; Dubbo 13,700; and Campbelltown 15,600.

QUEENSLAND

This State, situated in lat. 10° 40'–29° S. and long. 138°–153° 30' E., comprises the whole north-eastern portion of the Australian continent.

Queensland possesses an area of 667,000 square miles (i.e., equal to more than 5½ times the area of the British Isles).

POPULATION.—At June 30, 1960, the population numbered 1,463,245 persons (748,778 males and 714,467 females).

The total number of aborigines (estimated June 30, 1960) was 10,284 full blood and 7,920 half-caste, exclusive of Torres Strait Islanders.

Increase of the People.

Year	Births	Deaths	Marriages
1958	33,872	11,455	10,255
1959	35,599	12,349	10,581
1960	35,213	12,370	10,227

Infant mortality rate (1960) 21.0 per 1,000 live births.

Religion.

At the Census of 1954 there were 454,095 Church of England, 316,962 Roman Catholics, 151,586 Presbyterians, 146,456 Methodists, 28,612 Lutherans, 20,113 Baptists, 9,086 Congregationalists, 56,775 other Christians, and 1,340 Hebrews.

PHYSIOGRAPHY.

The Great Dividing Range on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a

narrow slope to the coast and the western a long and gradual slope to the central plains, where the Selwyn and Kirby Ranges divide the land into a northern and southern watershed. The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt into the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

Climate.—At Brisbane the mean temperature for 1960 was 68.3°, the maximum and minimum shade temperatures being 96.6° and 39.2°; mean barometer, 30.04 inches. The coastal regions are warm and moist, but the rainfall decreases away from the coast and is scanty in the far west. The rainfall in Brisbane during 1960 was 27.9 inches, compared with average rainfall of 40.1 inches.

GOVERNMENT.

Queensland was constituted a separate colony with Responsible Government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 11 members.

EDUCATION.

Primary Education is compulsory, secular and free. At the end of 1959 there were 1,600 state schools, including 89 high schools, in operation, with 8,713 teachers and a net enrolment of 240,532 children and 295 private and 8 grammar schools, with a net enrolment of 68,132. There were 13 state technical colleges with 693 teachers and 32,670 students and a state agricultural college with an enrolment of 969. The state-aided University had 3,867 full-time students in 1961. State expenditure on education in 1958-59 was £17,668,325.

FINANCE.

Receipts and Expenditure of the Consolidated Revenue Fund and Debt of Queensland for four years ended June 30:—

Year	Revenue	Expenditure	Debt (Gross)
	£A	£A	£A
1957...	85,158,100	85,142,870	269,319,683
1958...	87,955,575	89,469,883	285,947,364
1959...	93,795,804	94,986,459	303,470,019
1960...	101,912,092	102,076,767	322,424,113

Banking.—Advances made by Trading Banks (including the Commonwealth Trading Bank of Australia) at June 30, 1960, totalled £156,904,000. The deposits at the same date amounted to £239,174,000. Depositors' balances in Queensland savings banks at June 30, 1960, £182,586,000, averaged £125 for each inhabitant. There were 1,140,000 operative accounts.

PRODUCTION AND INDUSTRY.

The gross value of primary production in 1958-59 was £278,637,000 (agriculture £95,655,000, dairying £33,549,000, pastoral £107,089,000, poultry and bee-keeping £2,988,000, mining £28,353,000, forestry £9,256,000, fisheries £1,530,000, nunting and trapping £217,000), and net value of manufacturing £155,465,000.

Agriculture and Live Stock.—Of the total area of 426,880,000 acres the Government has parted with the fee simple of 25,564,896 acres, and 2,404,948 acres more were in process of alienation at Dec. 31, 1960.

The total area under crop in 1959-60 was 2,921,401 acres. The most important crop was sugar-cane, under which there were 461,885 acres, producing 1,217,020 tons of raw sugar, 683,134 acres were under wheat (yielding 13,522,578 bushels), 129,803 under maize (4,059,597 bushels), and 259,972 under barley (6,650,208 bushels). English and sweet potatoes are cultivated, as also are sorghum, tomatoes, pea-nuts, cotton, tobacco, linseed, sunflower seed, arrowroot, various citrus fruits, pineapples, bananas, grapes, mangoes,

custard apples, papaws, apples, peaches, plums, and other English fruits. The live stock on March 31, 1960, included 7,011,984 cattle, 1,255,009 being dairy cattle, 23,332,278 sheep, 234,364 horses, and 429,034 pigs.

Forestry.—There are about 17,920,000 acres of commercial timberland in Queensland, of which there have been reserved for forestry purposes 8,171,000 acres.

Minerals.—There are rich deposits of bauxite, copper, lead, silver, uranium and zinc, and deposits of gold, tin, limestone, ironstone, wolfram and mineral sands. Coal is mined in the Ipswich (near Brisbane) and some northern districts, and there is extensive production by open-cut method in Central Queensland. The output in 1959 included gold, £1,430,000; coal, £7,518,000; copper, £20,523,000; tin, £973,000; silver, £1,950,000; lead, £4,826,000; zinc, £1,453,000; uranium, £6,449,000.

Communications.—The State is served by 6,407 miles of railways, practically all 3 ft. 6 in. in gauge. During 1959-60, 32,369,000 passengers and 8,211,000 tons of goods and live stock were carried. At June 30, 1960, there were 67,326 miles of formed roads and 51,245 miles of unconstructed roads in the State, and 406,743 motor vehicles were on the register.

Aviation.—Regular services operate between Brisbane, the main Queensland coastal and inland towns and the southern capitals, connecting at Sydney with services to oversea countries. Brisbane is also a port of call on a service to and from London.

Radio and Television.—On June 30, 1960, 14 national and 20 commercial stations were broadcasting in Queensland, and 1 national and 2 commercial television stations operated in Brisbane.

OVERSEAS TRADE.

Year	Imports	Exports
1957-58.....	£A49,497,820	£A156,492,920
1958-59.....	47,736,946	169,997,854
1959-60.....	50,856,448	181,321,439

The chief overseas exports are wool, meat, sugar, minerals and butter.

TOWNS.

CAPITAL, ΨBRISBANE, population 578,000 (June 30, 1960), is situated on the Brisbane River, which is navigable by large vessels to the city, over 10 miles from Moreton Bay. The City Hall is a notable building, and there are fine Government and private buildings. The Greater Brisbane area (385 square miles) is controlled by a City Council presided over by a Lord Mayor.

ΨThe main ports in their order along the coast are Brisbane, Maryborough (20,000), Bundaberg (24,000), Gladstone (7,400), Rockhampton (45,000), Mackay (16,500), Bowen (3,720), Townsville (47,000), Lucinda Point, Mourilyan, Cairns (24,200) and Thursday Island.

Other towns are Ipswich (45,000), Gold Coast (26,200), Redcliffe (20,000), Gympie (10,600), Nambour (5,500) and Kingaroy (4,750) in the south-east; Toowoomba (50,000), Warwick (10,200) and Dalby (7,200) on the Darling Downs; Roma (4,900) and Charleville (4,650) in the south-west; Mt. Morgan (4,150) in Central Queensland; Ayr (7,900), Innisfail (7,400), Charters Towers (6,800) and Ingham (4,350) in the north-east; and Mount Isa (9,000) in the north-west.

Transmission of mails from London to Brisbane, by air, 2 days; by sea (approximate), 30 days.

SOUTH AUSTRALIA

The State of South Australia is situated between 26° and 38° S. lat. and 129° and 141° E. long., the total area being 380,070 sq. miles.

POPULATION.—In 1960 the population numbered 556,939 (485,424 males and 471,515 females). The number of full-blooded aborigines is estimated at less than 3,000.

Increase of the People

Year	Births	Deaths	Marriage.
1957	19,536	7,576	6,581
1958	20,047	7,743	6,505
1959	20,372	7,943	6,614
1960	20,566	7,804	6,607

Religion.

Religion is free and receives no State aid. At the Census, 1954, the persons belonging to the principal religious denominations were as follows: Church of England, 223,319; Methodists, 193,231; Congregationalists, 15,651; Baptists, 18,797; Lutherans, 42,056; Roman Catholics, 125,770; Presbyterians, 30,778; and Churches of Christ, 19,162.

PHYSIOGRAPHY.

The most important physical features of South Australia are broad plains, divided longitudinally by four great secondary features, which form barriers to east-west movement, and which have thus largely determined the direction of roads and railways, the sites of towns and villages and the manner of distribution of the population. These four barriers are Spencer Gulf, St. Vincent Gulf, the Mt. Lofty-Flinders Ranges and the River Murray. The long, deeply-indented coastline, which provides a few major, and a multitude of lesser harbours, trends generally south-eastwards, and largely determines the pleasant weather conditions and good rainfall near the coast.

The north-western portion of the State is mostly desert, while north of latitude 32°S. the country is unpromising by comparison with the fertile land which surrounds the hill country of the east. The Murray, which flows for some 400 miles through the south-eastern corner, is the only river of importance.

The lack of rivers and fresh-water lakes in the settled areas has necessitated the building of a number of reservoirs, which have been supplemented since 1947 by the construction of pipelines from the River Murray.

Climate.—The mean annual temperature at Adelaide is 63°, the winter temperature (July-August) averaging 53°, and the summer (November-March) 71°. During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight. The average annual rainfall at Adelaide, derived from over 100 years' record is 21 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas. In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while in Adelaide the precipitation has fallen as low as 11.32 inches.

GOVERNMENT.

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 8 Ministers, and the Lieutenant-Governor.

EDUCATION.

Public Education (Primary, Secondary and Tech-
 nical) is provided by the State, and controlled by a
 responsible Minister; it is secular, compulsory,
 and free. In 1959 there were 683 State schools,
 with 187,403 scholars; State expenditure in 1959-60
 was £14,971,469, including grants to University,
 Libraries, &c. The Government grants Exhibi-
 tions and Scholarships, carrying the holders to
 higher schools and the University. Private schools

number 172 with 40,449 scholars. There is an
 endowed University at Adelaide, founded in 1874,
 with 3,558 full-time students in 1961. A State
 Institute of Technology has also been established,
 and there are technical schools at 16 country centres
 and also special trade schools for apprentices and
 domestic art centres. The public library museum,
 art gallery and local institutes are supported or
 assisted by the State.

STATE FINANCE.

(For years ended June 30)

Year	Revenue	Expenditure	Debt
	£A	£A	£A
1957	65,761,000	65,810,000	276,440,000
1958	70,642,000	71,012,000	296,814,000
1959	72,680,000	73,707,000	317,702,000
1960	80,277,000	80,589,000	339,105,000

Banking.—There are 9 trading banks in Adelaide,
 including the Commonwealth Government Bank
 and the State Bank of South Australia, with about
 364 branches and agencies, having total average
 deposits of £129,192,000 in December quarter,
 1960. The three savings banks, with about 1,600
 branches and agencies, had deposits averaging
 £165,210,000 in December quarter, 1960.

PRODUCTION AND INDUSTRY

The gross value of primary production in 1959-
 1960 was: crops £35,546,000, pastoral £61,675,000,
 dairying £14,727,000, fisheries, game and poultry,
 and forestry £9,599,000.

Land Tenure.—Of the total area of the State
 (243,000,000 acres), 16,100,000 acres have been
 sold or are in the process of alienation by the
 Crown under systems of deferred payment;
 116,900,000 acres are held under pastoral leases and
 22,700,000 under other miscellaneous leases.

Agriculture.—The total area cultivated is
 8,401,000 acres—under wheat, 1959-60, 1,550,000
 acres, hay 245,000, oats 506,000, barley 1,290,000.
 Wheat harvest 1959-60, 11,929,000 bushels; barley,
 11,857,000 bushels. Oranges, lemons, apples,
 apricots, peaches, and all stone fruits and olives are
 successfully grown, and fruit drying is profitable.
 In 1959-60, there were 57,000 acres of vines with a
 production of 21,576,000 gallons of wine, 57,000
 cwt. of dried currants and 184,000 cwt. of sultanas
 and raisins. Considerable quantities of fruits
 (fresh and dried), wine and brandy, are annually
 sent to overseas countries, principally the United
 Kingdom, and to other Australian States. Some
 areas of the State, particularly near Adelaide, are
 also very suitable for growing all kinds of root
 crops and vegetables.

Live Stock (March 31, 1960).—There were
 14,025,000 sheep, 500,000 cattle, 30,000 horses,
 109,000 pigs. Wool production (1959-60),
 198,289,000 lb.

Minerals.—Iron, pyrite, gypsum, salt, coal, lime-
 stone, clay, &c., are found. The total mineral out-
 put was valued at £A25,435,000 in 1960, but of
 this total the value of iron ore, £15,444,000, was
 subject to revision.

Manufactures.—In 1959-60 there were 4,683 fac-
 tories, employing 99,018 hands, the gross value of
 the output being £385,702,000. Plant machinery,
 land and buildings were valued at £175,873,000.

Transport and Communications.—There were
 (1960) 3,801 miles of railway in South Australia,
 137 miles of tram and bus routes and 56,000 miles
 of roads. The railway mileage includes the South
 Australian part of the Transcontinental Railway
 from Port Pirie (South Australia) to Kalgoorlie
 (Western Australia) which forms a link in the sys-
 tem from Brisbane to Fremantle; and also part of

the Commonwealth line from Port Augusta to the Northern Territory. There are a number of excellent harbours, of which Port Adelaide is the most important. In 1959-60, 1,759 vessels with net tonnage of 6,744,740 entered South Australian ports direct from overseas or interstate. Nationality of these vessels was—Australian 875, United Kingdom, 445, other British 108 and foreign 391. There are 913 post offices in the State.

Civil Aviation.—There are 28 Government or licensed aerodromes, and 462,456 passengers and 9,923 tons of freight were carried in 1959-60.

Motor Vehicles.—The registrations in December, 1960, were 312,161, equal to 1 per 3.1 persons.

Wireless and Television (1960)—Broadcasting stations 16; listeners' licences 250,971. Television stations 3; viewers' licences 110,865.

Transit.—Transmission of mails from London to Adelaide, approximate, 29 days by sea and 4 days by air.

TASMANIA

Tasmania is an island in the South Pacific Ocean off the southern extremity of Australia, from which it is separated by Bass Strait, about 140 miles wide, in which are situated the Furneaux Group and King Island, included within the State. It lies between 40° 33'–43° 39' S. lat. and 144° 39'–148° 23' E. long., and contains an area of 26,215 square miles.

POPULATION.—On June 30, 1960, the estimated population numbered 347,438 (182,976 males and 164,462 females).

Year	Births	Deaths	Marriages
1939	5,004	2,425	2,264
1958	8,568	2,708	2,475
1959	8,625	2,780	2,567
1960	8,853	2,670	2,713

The birth rate in 1960 was 25.26, death rate 7.62, marriage rate 7.74 per 1,000. Infant mortality (1960) 19.1 per 1,000 births.

Religion.

In 1954 there were 147,407 members of the

Church of England, 27,069 Roman Catholics, 38,236 Methodists, 15,607 Presbyterians, 4,425 Congregationalists and Independents, and 6,392 Baptists.

PHYSIOGRAPHY

The surface of the country is generally hilly and timbered, with mountains from 1,500 to 5,000 ft. in height, and expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions; the north winds of Australia do not reach the island. At Hobart the mean annual temperature averages 53.9°, the mean temperature for Dec. Jan. and Feb. being 60.2°, and that of June, July and Aug. 47.1°. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England; the average rainfall varies from 20 inches to 100 inches in different parts.

GOVERNMENT.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was established. In 1901 Tasmania became a State of the Australian Commonwealth. The State executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of Ministers responsible to the Legislature.

GOVERNOR.

Governor of Tasmania. His Excellency The Lord Rowallan, K.T., E.B.E., M.C., *apptd.* May 29, 1959. *Official Sec.*, E. E. O'Farrell, M.V.O. A.D.C., Capt. H. M. S. Holme.

AGENT-GENERAL IN LONDON.

Agent-General for Tasmania, Hon. A. J. White.

Address, 457 Strand, Charing Cross, W.C.2.

THE LEGISLATURE.

Parliament consists of two Houses, a *Legislative Council* of 19 members, elected for six years (3 retiring annually, in rotation, except in every sixth year, when four retire) and a *House of Assembly* of 35 members, elected by proportional representation for five years, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 6 months; the electorate for the Council is smaller, having a property or educational qualification for both sexes, but war service is a qualification for enrolment. The General Election for the House of Assembly in May, 1959, resulted in the return of 17 Labour, 16 Liberal and 2 Independent members.

President of the Legislative Council, Hon. Sir Henry Baker, K.C.M.G., D.S.O.

Clerk of the Council, E. Briggs.

Speaker of the House of Assembly, Hon. C. B. Aylett.

Clerk of the House, C. K. Murphy, C.B.E.

THE JUDICATURE.

The *Supreme Court of Tasmania*, with civil, criminal, ecclesiastical, admiralty and matrimonial jurisdiction, was established by Royal Charter on October 13, 1823.

Chief Justice, Hon. Sir Stanley Burbury, K.B.E.

Puisne Judges, Hon. M. G. Gibson; Hon. M. P. Crisp; Hon. G. H. Crawford; Hon. W. E. Cox.

Local Courts established under the Local Courts Acts, 1896, are held before Commissioners who are legal practitioners, with a jurisdiction up to £250. Courts of General Sessions, constituted by a chairman who is a Justice of the Peace and at least one other Justice, are established in the municipalities for the recovery of debts and demands not exceeding £50. Courts of Petty Sessions are established under the Justices Procedure Act, 1919, constituted by Police Magistrates sitting alone, or any two or more justices.

EDUCATION.

State schools are divided into Primary, Area, High and Technical High Schools, with a net enrolment of 64,956 scholars in 1959. There were 57 private schools with an enrolment of 12,203. The University of Tasmania at Hobart, established 1890, had 789 full-time students in 1961; there are technical schools at Hobart, Launceston, Burnie, Devonport, Queenstown, Rosebery, Ulverston, Smithton and Zeehan.

FINANCE.

Year	Revenue	Expenditure	Debt
	£A	£A	£A
1938-39	3,614,764	3,640,748	26,366,990
1958-59	21,851,053	22,759,190	153,824,754
1959-60	24,296,249	25,328,254	105,522,348

Banking.—The average weekly deposits of cheque-paying banks during December, 1960 were £38,973,000; the savings bank deposits, December 31, 1960, were £47,622,000 or £132 7s. 3d. per head of population.

PRODUCTION AND INDUSTRY.

The net value of production in 1959-60 was £98,100,000—agriculture and pastoral £18,491,000, mines and quarries £5,398,000, other primary industries £14,015,000 and manufactures £60,196,000.

Agriculture and Live Stock.—Of the total area of 16,778,000 acres there were, in 1959-60, 334,000 acres under crops. The principal crops are potatoes, apples and other fruit, hay, hops, oats, peas, turnips, barley and wheat. The live stock included (March 31, 1960) 375,000 cattle, 3,494,000 sheep, 67,000 pigs and 11,000 horses. The wool production (1959-60) was 33,565,000 lb.

Electrical Energy.—The Hydro-Electric Commission of Tasmania has effected important water-power developments at the Great Lake (Waddamana and Shannon), Lake St. Clair—River Derwent (Tarraleah and Butler's Gorge), Nive River (Tungatimah and Wayatinah) and at Trevallyn. The network extends to practically all parts of the State and the advantages of cheap electric power exercise continued attraction for new establishment of manufacturing industries.

Forestry.—State forest areas in 1959-60, 2,091,544 acres. The quantity of timber of various species cut on Crown Land forests in 1959-60 was 313,347,000 super feet, including 71,703,000 super feet for wood-pulp.

Minerals.—The chief minerals produced are copper, zinc, tin, silver, lead, gold, the gross value of all minerals produced in 1959 being £A8,939,000.

Manufactures.—The chief manufactures for export are: refined metals, preserved fruit and vegetables, butter, woollen manufactures, paper, confectionery and sawn timber; the net value of production in 1959-60 was £60,196,000, the value of land, buildings, plant and machinery for the 1,683 establishments being £125,670,000.

CAPITAL, Ψ HOBART, which was founded in 1804. Population (June 30, 1960) (with suburbs) 111,250.

Other towns (with population at June 30, 1954) are Ψ Launceston and suburbs (pop. 49,303), Ψ Devonport (10,624), Burnie (11,193), Ulverston (5,361), New Norfolk (4,900) and Queenstown (4,526).

Transmission of mails, 34 days by sea; 5 days by air.

VICTORIA

The State of Victoria comprises the south-east corner of Australia, at that part where its mainland territory projects farthest into the southern latitudes; it lies between the 34th and 39th parallels or South latitude, and the 141st and 150th meridians of East longitude. Its extreme length from east to west is about 493 miles, its greatest breadth is about 290 miles, and its extent of coast-line is about 980 geographical miles, including the length around Port Phillip Bay, Western Port and Corner Inlet, the entire area being 87,884 square miles.

Population.—The population at Dec. 31, 1960 was 2,925,533 (1,473,501 males and 1,452,032 females).

Increase of the People.

Year	Births	Deaths	Marriages
1939	30,493	20,169	17,368
1958	61,269	23,625	20,549
1959	62,245	25,078	20,456
1960	64,025	24,547	20,627

Vital Statistics.—Annual rate per 1,000 of population in 1960:—Births, 22.14; Deaths, 8.49; Marriages, 7.13. Deaths under 1 year per 1,000 births, 18.46.

Religion.

Members of the Church of England at the date of the census in 1954 numbered 832,473, Roman Catholics 564,654, Presbyterians 326,422, Methodists 252,802, Baptists 34,316, Church of Christ 33,608 and Hebrew 24,016. The number of persons who did not state their religion was 243,555.

PHYSIOGRAPHY.

The *Australian Alps* and the *Great Dividing Range* pass through the centre of the State, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys. The length of the Murray River, which forms part of the northern boundary of Victoria, is about 1,200 miles along the Victorian bank. Melbourne, the capital city, stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

Climate.—The climate of Victoria is characterized by warm summers, rather cold winters, and rain in all months with a maximum in winter or spring. Prevailing winds are southerly from November to February inclusive, with a moderate percentage of northerlies often associated with high temperatures. Northerly or westerly winds predominate from March to October inclusive. Rain on an average falls in Melbourne on 156 days per year, the annual average being 25.89 inches.

GOVERNMENT.

Victoria was originally known as the Port Phillip District of New South Wales, and was created into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor, appointed by the Crown, aided by an Executive Council of Ministers.

Governor of the State of Victoria, His Excellency General Sir Dallas Brooks, K.C.B., K.C.M.G., K.C.V.O., D.S.O., born Aug. 22, 1896, appointed 1949, term extended for 3 years from Oct. 29, 1954 and for further 5 years from Oct. 1957... £7,500

EDUCATION.

Primary Education is compulsory, secular and free between the ages of 6 and 14. At December 31, 1959, there were 1,928 Primary Schools (including one Correspondence School) attended by 299,532 pupils; 256 Secondary Schools (including one Correspondence School) with an enrolment of 114,570; and 63 Technical Schools (57 of which possess a junior section with 30,690 pupils in attendance) with a roll call of 64,934 senior students.

During 1959, 156,193 pupils attended 545 independent schools, most of which are Roman Catholic, as the Roman Catholic Church in the State maintains an independent scholastic organization.

There are two State-aided Universities. Melbourne University has five affiliated colleges—Trinity, Ormond, Queen's, Newman (which have connections with the Anglican, Presbyterian, Methodist and Roman Catholic Churches respectively), and the University Women's College. The University had 7,199 full-time students in 1961. The Monash University, recently established in the eastern suburbs of Melbourne to provide for the increasing numbers of university students, at present accepts only a limited number of students of specified faculties (332 full-time students in 1961).

FINANCE

The revenue and expenditure of the Consolidated Revenue Fund and the State Debt for those years are given as follows:—

Year	Revenue	Expenditure	Debt
	£A	£A	£A
1957-58	142,336,624	145,549,280	518,212,671

1959-60	168,310,347	167,996,810	594,122,016

Banking, &c.—The state savings bank deposits at June 30, 1960, amounted to £298,136,000; in addition, deposits in the Commonwealth savings bank (in the State of Victoria) amounted to £131,243,000, and in other savings banks, £70,242,000.

Insurance (other than Life).—There were 190 companies or other bodies transacting business in Victoria during the year 1959-60. Total revenue amounted to £60,537,894, made up of premium income £58,118,474 and other income £2,419,420. Expenditure totalled £52,475,262, comprising claims £33,417,038, commission and agents' charges £5,936,879 and other expenditure £13,121,345.

PRODUCTION AND INDUSTRY.

The gross value of primary production in 1959-60 was £388,189,000—agricultural £92,600,000, pastoral £160,093,000, dairying £71,489,000, poultry and bee keeping £24,691,000, trapping £3,749,000, forestry £18,587,000, mining and quarries £14,935,000, fisheries £2,045,000. The net value of production of industries was £301,825,000 and of manufactures £686,501,000.

Agriculture.—Of the 6,663,000 acres under cultivation in 1959-60, 2,261,000 were wheat crops and 673,000 oats and 848,000 acres were cut for hay. In 1959-60, 2,147,000 gallons of wine were produced.

Live Stock.—There were in March, 1960, 26,597,000 sheep, 1,678,000 dairy cattle, 946,000 beef cattle, 285,000 pigs and 81,000 horses. The quantity of wool produced in 1959-60 was 323,226,000 lb., valued at £75,814,000.

Minerals.—Production of gold in 1960 was 28 506 ozs. Other minerals raised consisted principally of coal (black and brown), limestone, kaolin, tin, gypsum, antimony concentrates and bauxite. Production of brown coal in 1960 amounted to 14,967,000 tons.

Motor Vehicle Registrations.—The number of vehicles on the register at Dec. 31, 1960, was: private cars, 675,222; commercial, 104,329; hire 5,444; primary producers, 167,551; omnibuses, 751 and motor cycles, 20,617.

Victoria State Railways.—At June 30, 1960, there were 4 290 miles of railway open for traffic. The revenue and expenditure for the year ended June 30, 1960, were £39,198,134 and £39,541,704 respectively, and interest charges, exchange, etc., amounted to £4,017,610. Total traffic mileage was 18,281,683 and passenger journeys numbered 158,293,976. The tonnage of goods and live stock carried was 9,687,445.

Shipping.—During the year ended June 30, 1960, 3,355 vessels with net tonnage 13,267,648 entered Victorian ports and 3,351 vessels with total net tonnage of 13,268,859 cleared.

Trade and Industry.—Wool, wheat, flour, butter, live stock, fruits, milk and cream, meats, poultry and eggs are staple products; but secondary industry (16,979 factories, &c.), employing 387,514 hands in 1959-60) now plays a most important part in the economy of the State. The net value of factory production has risen from £65,996,000 in 1938-39 to £686 501,000 in 1959-60. The export trade (excluding inter-state trade) consists largely of agricultural and pastoral products. The principal over-sea imports of the State are apparel, textiles, manufactured fibres machines and machinery, metals and metal manufactures, rubber and rubber manufactures, tobacco, crude petroleum, paper, stationery, &c., and drugs and chemicals.

CITIES AND TOWNS.

Ψ MELBOURNE, the capital city, which is an episcopal see, was originally laid out in the year 1837 with wisdom and foresight; its wide streets, park lands, public gardens, university, public library, museum and large churches are the principal

features of the city. Melbourne and suburbs cover an area of 445,746 acres and contained on June 30, 1960 a population of 1,831,200. Other cities and towns are Ψ Geelong, 90 380; Ballarat, 54,800; Bendigo, 42,120; Ψ Warrnambool, 14,780; Mildura, 12,620; Hamilton, 9,720; Shepparton, 13 150; Maryborough, 7,510; Colac, 9,290; Horsham, 9 230; Castlemaine, 7,290; Ararat, 8,100; Wangaratta, 13,080; Echuca, 6,370; Sale, 7,630; Swan Hill, 6,290; Benalla, 7,520; Moe, 13,920 and Portland 6,020.

WESTERN AUSTRALIA

Includes all that portion of the continent west of 129° E. long., the most westerly point being in 122° 52' E. long., and from 13° 30' to 35° 8' S. lat. Its extreme length is 1,500 miles, and 1,000 miles from east to west; total area 975,920 sq. miles.

POPULATION.—At December 31, 1960, the population was 740,245 (379,751 males and 360,494 females).

The estimated number of full-blood aborigines on June 30, 1960, was 11,000.

Year	Births	Deaths	Marriages

Religions.—Census of 1954—268,135 Church of England, 143,489 Roman Catholics, 68,489 Methodists, and 37,659 Presbyterians.

Physica Features.—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,024 ft.) in the north-west division or that of Bluff Knoll (3,640 ft.) in the Stirling Range in the south-west. The coastal regions are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a seaward slope to the Indian Ocean, into which flow many streams, notably the Preston Collie, Murray, Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey. In the north, the Fitzroy flows from the King Leopold ranges into the Indian Ocean, and the Drysdale and Ord into the Timor Sea. The greater portion of the State may be described as an immense tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface or which varies from stretches of clayey soils to the sand dunes of the far interior. The climate is one of the most temperate in the world. The total rainfall at Perth during 1960 was 28.21 inches, the average for the past 84 years 34 89. Of the total area two-thirds is suitable for pastoral purposes.

GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administrator vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Acts of 1911, 1934 and 1955; the Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

The Legislative Assembly (elected March, 1959) is composed of Labour Party 24, Liberal and Country League 18, Country Party 8.

EDUCATION.

Education.—Education is compulsory and free. In 1960 there were 494 Primary Schools and 27 High Schools under the control of the Minister for Education representing a total of 112,718 pupils. There were also 318 private schools with an average attendance of 34,593. The total amount expended on education (from Revenue) during the year ended June 30, 1959, was £10,061,557, including grants of £999,875 to the University of Western Australia (1,970 full-time students in 1961).

PRODUCTION AND INDUSTRY.

The gross value of primary production in 1959-60 was: agricultural £65,513,695; pastoral and trapping £50,271,747; dairying, poultry keeping and bee-farming £12,314,234; forestry £5,459,406; fisheries £4,307,106; mining £23,243,700.

Crops and Live Stock.—Of the total area under crop (6,382,121 acres), 3,718,596 acres were under

wheat for grain, the 1959-60 crop being estimated at 58,670,000 bushels. On March 31, 1960, the livestock included 1,036,649 cattle, 16,411,589 sheep, 130,933 pigs and 40,740 horses. In 1959-60 there were 8,951 acres of vineyards and 23,192 acres of orchards. The wool clip in 1959-60 was 157,929,000 lb. in the grease.

Manufacturing Industries.—There were in the year ending June 30, 1960, a total of 4,279 industrial establishments in the State employing either machinery or at least four hands. The average number of persons employed in them during the year was 49,651.

Forestry.—The forests contain some of the very finest hardwoods in the world. The total quantity of timber sawn and hewn during 1959-60 was 225,460,905 super feet.

Minerals.—The mines of the Coolgardie and adjacent goldfields, which cover a vast portion of the interior and extend to the 125th meridian, and of the northern fields, are being constantly worked. The refinery production of gold in the State for 1960 was 855,758 fine oz. (£A14,069,503). The total amount produced from 1886 to Dec. 31, 1960, is 61,675,270 fine oz. (£A446,854,082). Magnetic iron, lead, copper, tin and manganese ores and coal, asbestos, bauxite, gypsum and ilmenite exist in large quantities.

Communications.—On June 30, 1960, there were 4,120 miles of State government railway (though operations on 820 miles have been suspended); 277 miles of private lines open for general and passenger traffic; and 450 miles of the Commonwealth line (Kalgoorlie-Port Pirie Junction). On Dec. 31, 1960, there were on the State register 391 vessels, of 17,382 tons, of which 179 were steam or motor vessels (13,807 tons) and 212 sailing vessels (3,575 tons).

PHYSIOGRAPHY

New Zealand consists of a number of islands of varying size in the South Pacific Ocean, and has also administrative responsibility for a large tract in the Antarctic Ocean. The two larger and most important islands, the North and South Islands of New Zealand, are separated by only a relatively narrow strait. The remaining islands are very much smaller and, in general, are widely dispersed over a considerable expanse of ocean. The boundaries, inclusive of the most outlying islands and dependencies, range from 8° South latitude to South of 66° South latitude, and from 160° East longitude to 150° West longitude.

Geographical Features.—The two principal islands have a total length of 1,040 miles, and a combined area of 102,374 square miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, extending over the entire length of the South Island and having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several volcanoes, two of which are active, others being dormant or extinct. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles long by 1½ wide), the Franz Josef and the Fox are the best known. The North Island is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for use in navigation. The more important include the Waikato (270 miles in length); Wanganui (180), and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau, 132) are abundant, many of them of great beauty.

Climate.—New Zealand has a moist-temperate marine climate, but with abundant sunshine. A very important feature is the small annual range of temperature which permits of some growth of vegetation, including pasture, all the year round. Very little snow falls on the low levels even in the South Island. The mean temperature ranges from 59° F. in the North to about 49° F. in the South. Rainfall over the more settled areas in the North Island ranges from 35 to 70 inches and in the South Island from 25 to 45 inches. The total range is from approximately 13 to over 250 inches. The number of rainy days is generally in the neighbourhood of 160 to 180 in the North Island and between 110 and 140 in the South, except in the southern portion of the west coast. The amount of sunshine is generally over 2,000 hours per annum and ranges between 1,600 and 2,500 hours.

GOVERNMENT

The west coast of the South Island of New Zealand was discovered by Abel Janszoon Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642.

The islands were visited, and charted, in 1769 by Captain Cook, who returned to them in 1773, 1774 and 1777. From 1800 onwards sealers and whalers settled along the coasts, and trade in timber and flax followed. Christianity was introduced in 1814, and in 1832 a British Resident was appointed. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, created a separate colony distinct from New South Wales. Organized colonization on a large scale commenced in 1840 with the New Zealand Company's settlement at Wellington. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Imperial Act of 1852, and on the New Zealand Constitution (Amendment) Act of Dec. 10, 1947. The Statute of Westminster was formally adopted by New Zealand in 1947. The executive authority is entrusted to a Governor-General appointed by the Crown and aided by an Executive Council, within a Legislature consisting of one chamber, the House of Representatives.

THE LEGISLATURE

Parliament consists of a House of Representatives consisting of 80 members elected for 3 years. The General Election of November, 1960, returned 46 National Party members and 34 Labour. Four of the members are Maoris elected by the Maori electors. Women have been entitled to vote since 1893, and to be elected Members of the House of Representatives since the passing of the Women's Parliamentary Rights Act, 1919. There are at present 4 women members. Members of the House receive £1,400 per annum, with an allowance of £275-705 per annum for expenses, depending on size of electorate. The Leader of the Opposition receives £2,200 per annum and £490 per annum for expenses, plus travelling allowance of £215.

POLICE

On March 31, 1961, the strength of the Police Force was 2,471 of all ranks, equivalent to 1 for every 977 of the population. The total cost of police protection in 1960-61 was £3,455,000.

PASSPORTS

With certain exceptions, no person over 16 years of age is permitted to land unless in possession of a passport or some other document satisfactorily establishing his or her nationality and identity.

DEFENCE

Navy.

The Royal New Zealand Navy was greatly expanded during the Second World War and a number of small vessels were built in New Zealand. New Zealand naval personnel totalled 10,000, of whom 4,000 were with the Royal Navy. Over 1,000 New Zealanders served with the Fleet Air Arm. The naval forces include the Women's Royal New Zealand Naval Service, and Volunteer Reserve forces in four divisions. The strength is 1 cruiser, 4 frigates, 1 survey ship, 1 Antarctic support ship and 10 other vessels in commission; 1 cruiser, 2 frigates, and 4 ocean minesweepers in reserve. Active naval personnel numbers 298 officers and 2,480 ratings. A cruiser or a frigate is normally attached to the Far East Station.

Naval expenditure in 1960-61 amounted to £8,859,001.

Army.

The New Zealand Army consists of the Regular Force, the Territorial Force, the Army Reserve and the Cadet Corps. The establishment of the Regular Force is 8,119 and recruiting is in progress to raise the strength of the Army to this figure.

During the war of 1939-1945 New Zealand sent a division (the 2nd) to the Middle East theatre, which took part in the campaigns in Greece, Crete, North Africa and Italy. Another division (the 3rd) saw service in the South Pacific and took part in a number of actions in that area.

In 1958 compulsory military training was abolished, and the Army is being organized on the basis of a Regular Brigade Group backed by a Volunteer Territorial Force. One battalion of the Regular Brigade Group is stationed as part of

the Commonwealth Far East Strategic Reserve in Malaya.

Army expenditure for the year 1960-61 was £9,494,759.

Air.

The Royal New Zealand Air Force was constituted as a separate defence service in 1937. The force was mobilized in September, 1939, and its organization was linked with the Empire Training Scheme. A number of New Zealand squadrons operated with the R.A.F., and additional squadrons, with supporting forces, operated in the Pacific area. The Air Force now consists of the Regular Air Force, the Air Force Reserve, the Women's Royal New Zealand Air Force and the Air Training Corps. The strength of the Regular Force at March 31, 1961, was 4,390.

Air Force Expenditure in 1960-61 was £9,874,830.

FINANCE

Figures of the Consolidated Fund shown in this table are quoted on a gross basis, i.e. credits have not been deducted from departmental expenditure, but have been included as receipts. In 1959-60 Social Security income tax was received into the Consolidated Fund under the general heading of income tax; a transfer was then made to the Social Security Fund. This change increased both the receipts and payments of the Consolidated Fund in 1959-60.

Year ended March 31	Revenue	Expenditure
	£(N.Z.)	£(N.Z.)
1957	206,276,000	202,951,000
1958	193,580,000	193,736,000
1959	241,310,000	240,888,000
1960	317,174,000	316,543,000
1961	285,347,000	284,950,100*

* Includes £9,830,000 for debt redemption and £20,337,000 for defence.

Revenue from taxation in 1960-61 amounted to £259,073,000, of which £237,378,000 was receipts of the Consolidated Fund, and £21,695,000 receipts into the National Roads Fund.

DEBT.

The gross Public Debt amounted on March 31, 1961, to £868,173,000, of which £108,163,000 was domiciled in London. The amount domiciled in London excludes £26,191,000 in respect of which interest payments have been suspended since 1931 by agreement with the Imperial Government.

BANKING.

There are five trading banks (with numerous branches) doing business, two of which are predominantly New Zealand banks. Of these the Bank of New Zealand is owned by the State. At March 29, 1961, total assets of all trading banks in New Zealand amounted to £343,428,000; liabilities, £356,310,000; and the value of notes in circulation amounted to £70,588,000. The Reserve Bank of New Zealand commenced business on August 1, 1934. The note-issuing powers of other banks have since been withdrawn and the Reserve Bank notes are legal tender. Net overseas assets of banks (on account of New Zealand business only) at March 29, 1961, amounted to £53,518,000, of which £11,176,000 and £33,297,000 represented the Reserve Bank's holdings of sterling exchange and sterling investments respectively. Trading banks' advances, including discounts, at the end of March, 1961, totalled £233,284,000 compared with £182,108,000 in the previous year. Deposits with trading banks at the end of March, 1961, amounted to

£331,530,000. At the corresponding date in 1960 they were £316,578,000.

Post-office and trustee savings banks had, at the close of the year 1960-61, 2,347,000 depositors having £380,319,000 to their credit. This amount does not include National Savings Accounts in which depositors had £57,559,000 to their credit at March 31, 1961.

As from Aug. 20, 1948, New Zealand restored her currency to parity with sterling, in place of the depreciated rate of £N.Z.125 = £100 adopted in 1933.

EDUCATION

The State system of education is free, secular, and compulsory. The school-leaving age was raised to 15 years as from Feb. 1, 1944. In 1960 there were 2,052 public primary schools, with 359,153 scholars; there were also 335 registered private primary schools with 52,779 scholars, 3 secondary schools with lower departments with 108 scholars and 156 Maori primary schools with 13,187 scholars, of whom 12,098 were Maoris. There were also 29,251 Maori children attending public primary schools. The secondary education of boys and girls in the cities and large towns is carried on in 150 state secondary schools, 96 state secondary departments of district high schools, 96 private secondary schools and 11 Maori private secondary schools. The total number of pupils receiving full-time secondary education in July 1960 was 119,206 and in addition there were 50,038 part-time students attending technical classes, 1,876 receiving part-time tuition from the Correspondence School and 4,807 from the Technical Correspondence School. The University of New Zealand, with power to confer degrees, consists of the University of Auckland, Victoria University of Wellington, the University of Canterbury and the University of Otago. Two Agricultural Colleges (Massey and Canterbury) are associated with the University. The 6 Colleges had a total of 7,965 full-time students in 1961.

The total expenditure on Education out of public funds in 1960-61 was £43,553,000.

Agriculture and Forestry.—The total area of New Zealand (excluding its Island Territories) is 66,390,700 acres, of this, approximately 43,000,000 acres are in holdings of one acre or more. The

greater part of this is pasture land, about 53 per cent. being unimproved land used for pasturage, and an additional 39 per cent. sown pasture. The output of sawn timber for 1960-61 was 714,106,000 board feet, of which 395,400,000 board feet represented exotic varieties, mainly pine.

Live Stock.—Cattle at January 31, 1960, numbered 5,992,000, including 1,887,000 dairy cows in milk; pigs 660,000, including 88,000 breeding sows; and sheep (June 30, 1960), 47,134,000.

Manufactures.—Statistics of factory production show (1959-60) 8,550 factories in operation, employing 172,106 persons. Salaries and wages amounted to £136,175,840; cost of materials used, £439,087,799. Total value of output, £705,616,999.

Minerals.—Coal output in 1959 was 3,012,000 tons. Gold-mining was formerly an important industry, but production has declined greatly in recent years, gold produced in 1960 totalling 36,758 oz. Other minerals produced on a relatively small scale are silver, iron ore, manganese ore, tungsten and asbestos.

New Zealand produce exported to the U.K. in 1960 was valued at £159,814,000 and included butter, 2,853,000 cwt., valued at £NZ44,776,000, cheese, 1,478,000 cwt. (£NZ17,371,000); frozen and chilled beef, 374,000 cwt. (£NZ2,846,000); frozen lamb, 5,203,000 cwt. (£NZ42,859,000); frozen mutton, 1,948,000 cwt. (£NZ2,706,000); canned meats, 50,000 cwt. (£NZ8,580,000); milk (dried) 742,000 cwt. (£NZ2,955,000) and wool 253,397,000 lb. (£NZ3,246,000).

Railways.—In March, 1961, there were 3,333 route miles of Government railway in operation. The number of passengers carried on Government lines in 1960-61, including season-ticket holders, was 26,233,000, while the Department's road motor services carried 21,370,000. Goods raised amounted to 10,850,000 tons. Railway total revenue and expenditure were £36,239,000 and £36,302,000 in 1960-61.

Motor Vehicles.—On March 31, 1961, there were 532,054 cars, and 337,054 other motor vehicles licensed, in addition to 28,581 motor cycles.

Shipping.—During 1960 the vessels entered inwards numbered 972 (net tonnage 4,500,892), and those entered outwards 961 (net tonnage 4,408,425), exclusive of coasting vessels.

Post Office Statistics.—(1960-61):—244,098,000 letters, letter cards and postcards, 236,696,000 printed and commercial papers, 22,388,000 newspapers, 6,748,000 packets and 7,838,000 parcels. Inland telegrams, 7,558,000; outward cablegrams, 709,000 and inward 600,000; telephones 745,000.

Civil Aviation.—In 1959-60 (internal) passenger miles, 169,846,000; cargo ton miles, 5,912,700; mail ton miles 311,700 and (overseas) 84,100 passengers carried, 470 tons mail carried, and 686 tons freight carried.

THE ISLANDS OF NEW ZEALAND

In addition to North, South, Stewart and Chatham Islands:—

The Three Kings (discovered by Tasman on the Feast of the Epiphany), in 34° 9' S. lat. and 172° 8' 8' E. long. (uninhabited). **Auckland Islands**, about 200 miles south of Bluff Harbour, in 50° 32' S. lat. and 166° 13' E. long. The islands contain several good harbours, but are uninhabited. **Campbell Island** (population 9 at April 18, 1961). **Antipodes Group** (40° 41' 15" S. lat. and 178° 43' E. long.) uninhabited. **Bounty Islands** (47° 4' 43" S. lat., 170° 0' 30" E. long.). **Snares Islands and Solander** (uninhabited).

The Kermadec Group (population 10 at 1961 Census), between 29° 10' to 31° 30' S. lat., and 177° 45' to 179° W. long., includes Raoul or Sunday, Macaulay, Curtis Islands, L'Esperance, and some islets.

Cook and other Islands, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga (8,032), Aitutaki (2,555), Mangaia (2,268), Atiu (1,483), Mauke (919), Mitiaro (321), Manuae (44), Takutika (uninhabited), Palmerston (96), Penrhyn or Tongareva (723), Manihiki (787), Rakahanga (398), Pukapuka or Danger (742), Suwarow (1), Nassau (93), Niue (4,845). The population figures are as at Dec. 31, 1960, the total for the Group being 23,307. The chief exports are citrus fruits, tomatoes, pineapples, copra, pearl shell and manufactured apparel. The trade is chiefly with New Zealand and the U.S.A. The exports (1960) were valued at £NZ464,315, imports at £NZ897,200 for Cook Islands, and at £NZ2,22,203 and £NZ2,232,415 for Niue Island. Rarotonga is the chief island of the Cook Group. Local administration is carried out by Resident Commissioners at Rarotonga and Niue, and Resident Agents on the other inhabited islands, the latter being answerable to the Resident Commissioner at Rarotonga. In their administration, commissioners and agents are assisted by the Legislative Assembly of the Cook Islands, which has an elected majority of Maori members, though ordinances may be disallowed by the Governor-General of New Zealand.

The revenue of the Cook Islands in 1960-61, exclusive of a subsidy from the New Zealand Government of £NZ575,435, was £NZ509,941, and expenditure, £NZ285,617. Revenue of Niue, exclusive of subsidy £NZ237,675, was £NZ242,718, and expenditure £NZ481,013.

Ross Dependency, see p. 720.

Tokelau (or Union) Islands.—A group of atolls (Fakaofu, Nukunono and Atafu) (population 1,938 at March 31, 1961), proclaimed part of New Zealand as from Jan. 1, 1948.

The Trust Territories are:—

Western Samoa, consisting of the islands of Savai'i (703 square miles) and of Upolu, which with its small adjacent islands, is 430 square miles. The population at Dec. 31, 1960, was 108,403, of whom 102,324 were Samoans. All the islands are mountainous. Upolu, the most fertile, contains the harbours of Ψ Apia and Ψ Saluafata, of which the former is the capital. The islanders are Christians of different denominations. Coconuts (copra), cocoa and bananas are the chief products of the islands. The revenue for 1960 was £1,463,000. Expenditure £1,371,000. The exports were valued in 1960 at £2,417,104 and the imports at £2,648,083.

There are now a Legislative Assembly with a large majority of Samoan members and a form of Cabinet government with a Samoan Prime Minister. Independence is fixed for Jan. 1, 1962.

Nauru Island (see p. 719).

Ceylon

AREA AND POPULATION

Ceylon is an island in the Indian Ocean, off the southern tip of the peninsula of India and separated from it by a narrow strip of shallow water, the Palk Strait. Situated between $5^{\circ} 55' - 9^{\circ} 50'$ N. latitude and $79^{\circ} 42' - 81^{\circ} 52'$ E. longitude, it has an area of 25,332 square miles, including 206 square miles of inland water. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles, no point in Ceylon being more than 80 miles from the sea.

At the Census of 1953, the population was 8,097,895, an increase of 21.7 per cent. over the last Census in 1946.

Races and Religions

The races of Ceylon are low-country Sinhalese, Kandyan Sinhalese, Ceylon Tamils, Indian Tamils, Ceylon Moors, Indian Moors, Burghers and Eurasians, Malays and Vedda. Generally Sinhalese who trace their descent to a low-country district are classified as low-country Sinhalese, others as Kandyan Sinhalese. The Western and Southern Provinces, the Chilaw District and the Western part of Puttalam District are low-country areas; the Central and North Central Provinces, Uva, Sabaragamuwa, Kurunegala and the Sinhalae divisions of the districts of Batticaloa, Trincomalee and Vavuniya are regarded as Kandyan districts. At the 1953 Census 42.8 per cent of the population were low-country Sinhalese, 26.6 per cent Kandyan Sinhalese. The religion of the great majority of inhabitants is Buddhism, introduced from India, according to ancient Sinhalese chronicles, in 300 B.C. Next to Buddhism, Hinduism has a large following.

PHYSIOGRAPHY

Ceylon is a compact area, except for the Island of Mannar and an almost detached portion in the north, the Jaffna Peninsula and its satellite islands of Delft, Kayts, etc. The relief of the island includes a mountainous area in the south-central region of 3,000 to 7,000 feet above sea level, surrounded by an upland belt of about 1,000 to 3,000 feet and a narrow coastal plain broadening out to a vast tract in the north. The coastal plain continues for a distance out to sea as a continental shelf and a coral reef, for the most part submerged, lies close to the coast. On the Central Ridge of the hill country are some of the highest peaks in Ceylon, Pidurutalagala (8,291 ft.), Kirigalpotta (7,856 ft.) and Totapola (7,741 ft.) and the high plains Nuwara Eliya (over 6,000 ft.), Elk Plains (6,000 ft.) and Horton Plains (over 7,000 ft.). The other principal peaks are Adam's Peak (7,360 ft.), Namunukula (6,679 ft.), Knuckles (6,112 ft.) and Haycock (2,167 ft.). The Peninsula of Jaffna and the Island of Mannar are featureless level stretches.

The Mahaveli-ganga, 206 miles long, is the largest river of Ceylon. Rising on the western side of the central hilly ridge, it flows north and east to empty into the Koddiiyar Bay on the east coast. Other rivers are the Kelaniganga (90 miles), Aruvi-arū (104), Kala-oya (97), Yam-oya (94) and Deduru-oya (87). Waterfalls girdle the central mountainous massif and offer some of the best scenic features in the island; Dunhinda (Badulla), Diyuluma (Koslanda), Elgin (Haton Plateau) and Perawela are among the outstanding falls. Forests, jungle and scrub cover the greater part of the island, often being intermingled. The forests, of varying species, extend from fairly near the coast right into the hill country. In areas over 2,000 feet above sea level grasslands (*patanas* or *lalawas*) are found. Their total area is some 250 square miles, principally in the Province of Uva.

Climate.—The climate of Ceylon is warm throughout the year, with a high relative humidity. Temperatures average 80° F. during the year and few areas record less than 60° F. Humidity is over 75 per cent. Temperature ranges vary little between wet and dry seasons. In hilly areas, frost, mist and hail occur occasionally, but snow is completely absent. Rainfall is generally heavy, with marked regional variations; fall on the south-west slopes of the hill country (200–250 inches) being heaviest. Some cyclonic activity of the tropical variety experienced in the Bay of Bengal occurs, generally during the north-east monsoon period.

GOVERNMENT

Early in the sixteenth century the Portuguese landed in Ceylon and founded settlements, eventually conquering much of the country. Portuguese rule in Ceylon lasted 150 years during which the Roman Catholic religion was established among the Sinhalese inhabitants and to some extent Portuguese modes of living adopted. In 1658, following a twenty-year period of decline, Portuguese rule gave place to that of the Dutch East India Company which was to exploit Ceylon with varying fortunes until 1796.

The Maritime Provinces of Ceylon were ceded by the Dutch to the British on February 16, 1798, becoming a British Crown Colony in 1802 under the terms of the Treaty of Amiens. With the annexation of the Kingdom of Kandy in 1815 all Ceylon came under British rule.

On February 4, 1948, Ceylon became a self-governing Dominion of the British Commonwealth of Nations under the Ceylon Independence Act, 1947. The Parliament of Ceylon consists of (a) The Queen (represented by the Governor-General) and (b) two houses, namely, the Senate and the House of Representatives. The Executive consists of the Prime Minister and a Cabinet chosen from the party which has the majority in the House of Representatives.

DEFENCE

Army.—The Ceylon Army Act provides for a Regular Force, a Regular Reserve, a Volunteer Force and a Volunteer Reserve. Steady progress has been made in the formation of the Regular and Volunteer Forces.

Navy.—The Royal Ceylon Navy, with headquarters in Colombo, mans 2 frigates, 2 minesweepers, a seaward defence boat and several patrol craft. The vessels are based on Colombo, Trincomalee and Karainagar.

Air Force.—The Ceylon Air Force Act came into force on October 10, 1950, and the Ceylon Air Force was established on that date.

PRODUCTION

Agriculture.—The staple products of the island are agricultural. The most important for home consumption is rice in its two forms of paddy and husked grain. The areas under cultivation in 1960 (provisional figures) in acres, were:—Paddy, 1,140,234; tea, 581,821; rubber, 668,213; areca nuts, 56,574; cinnamon, 20,115; citronella, 24,394; tobacco, 17,904; cocoa, 31,259. Production in 1960 (provisional figures) was: tea, 434,709,000 lb.; rubber, 97,276 tons; areca nuts, 1,577,524 cwt; cinnamon, 40,086 cwt.; citronella, 15,210 cwt.; tobacco, 63,943 cwt.; paddy, 40,000,000 bushels. The livestock in 1960 (provisional figures) included 1,552,386 cattle, 812,910 buffaloes, 491,003 goats, 76,329 pigs and 3,407,404 poultry.

Industry.—Factories are established for the manufacture or processing of ceramic work, vegetable oils and by-products, paper, tanning and leather goods, plywood, cement, chemicals, sugar, salt, textiles and ilmenite.

LOCAL GOVERNMENT

The local government of Ceylon, under the general supervision of the Ministry of Local Government, is in the hands of 7 municipal councils (Colombo, Kandy, Galle, Jaffna, Kurunegala, Nuwara Eliya and Negombo), 36 urban councils, 44 town councils and 407 village committees, all members of which are elected. For

local government purposes the island is divided into 14 administrative regions, each of which has an Assistant Commissioner of Local Government.

EDUCATION

In 1960, there were 8,163 Government and Assisted schools. The Assisted schools have now been taken over by the Government. The total cost of education was Rs.284,879.018 for 1959-60. The University of Ceylon was established on July 1, 1942, by the incorporation of the Ceylon Medical College (founded 1870) and the Ceylon University College (founded 1921) into the University, which in mid-1961 had 3,684 full-time students on the roll. On Jan. 1, 1959, the Vidyalankara and Vidyalaya Universities were established. The Ceylon Technical College provides a series of full-time and part-time courses in science, engineering, commerce, etc.

COMMUNICATIONS

There are about 10,777 miles of motorable road in Ceylon, of which 7,431 miles are bitumen surfaced. On Dec. 31, 1960, there were 136,976 motor vehicles on the register (82,576 private cars and cabs, 6,243 coaches, 27,429 lorries, 4,419 tractors, 2,404 trailers, 4,325 land vehicles and 16,403 motor cycles).

In 1960, 2,617 ocean-going merchant vessels of a total net register tonnage of 9,659,026 entered the port of Colombo.

There are 1,485 money-order offices and 932 telegraph offices with 11,326 miles of telegraph wire and 22,876 telephones. A commercial wireless telegraph station has a range of 500 miles by day and about 1,500 to 1,500 miles by night and handles ship-to-shore traffic.

Air Ceylon operates an international air service from Amsterdam — London — Rome — Cairo — Bahrain — Karachi — Bombay — Colombo and Singapore-Colombo. Air Ceylon also operates regional services from Colombo to Amparai and Jaffna, with branches to Madras and Tiruchirappalli, and Colombo to Trincomalee. Other services are B.O.A.C., Indian Airlines Corporation, K.L.M. Royal Dutch Airlines, Quantas Empire Airways and T.W.A.

Malaya

THE FEDERATION OF MALAYA

The Federation of Malaya is situated at the southern end of the Kra Peninsula between latitudes 1° and 7° North and longitudes 100° and 105° East. The country is bounded by Thailand on the north, the Johore Straits and the island of Singapore on the South, the China Sea on the East and the Straits of Malacca on the West. The total area is just over 50,000 square miles of which about 70 per cent. is still under forest and undeveloped. The climate is tropical, characterized by high humidity. Average temperatures at the lower altitudes vary between approximately 70° and 90°. The annual rainfall is about 90 inches, distributed fairly evenly throughout the year.

Racial distribution: Malaysians, 3,405,586; Chinese, 2,520,331; Indians and Pakistanis, 766,998; Other races 122,536.

FEDERAL CAPITAL.—Kuala Lumpur, capital of Selangor (population, 316,230).

LANGUAGE.—Malay is the national language, with English permitted for official use for a minimum of 10 years after Independence Day. RELIGION.—Islam is the religion of the Federation, each Ruler being the head of the religion in his State; the Supreme Head of the Federation is the head of the religion in Malacca and Penang. The Federation is, however, a secular State.

FLAG.—Equal horizontal stripes of red (6), and white (5); yellow star and crescent in blue canton.

GOVERNMENT

The Federation of Malaya became an independent country within the Commonwealth on August 31, 1957, as a result of an agreement between H.M. the Queen and the Rulers of the Malay States, whereby

Her Majesty relinquished all powers and jurisdiction over the Malay States and over the Settlements of Penang and Malacca which then became States of the Federation.

The Constitution, which came into force on Independence Day, is designed to ensure the existence of a strong Federal Government and also a measure of autonomy for the eleven State Governments. It provides for a constitutional Supreme Head of the Federation (His Majesty the *Yang di-Pertuan Agong*) to be elected for a term of 5 years by the Malay Rulers from among their number, and for a Deputy Supreme Head (His Highness the *Timbalan Yang di-Pertuan Agong*) to be similarly elected. Save in certain instances provided in the Constitution, the Supreme Head acts in accordance with the advice of a Cabinet appointed by him from among the members of Parliament on the advice of the Prime Minister. The Supreme Head appoints as Prime Minister the person who in his judgment is likely to command the confidence of the majority of the members of the House of Representatives.

There is a Conference of Rulers consisting of the Rulers of the nine States and the Governors of Malacca and Penang, presided over by the Supreme Head of the Federation. The Conference is empowered to elect the Supreme Head and Deputy Supreme Head and has certain other powers, notably in matters of religion; it has authority to deliberate on any subject.

LEGISLATURE

The Federal Parliament consists of two houses, the Senate and the House of Representatives. The Senate (*Dewan Negara*) consists of 38 members, under a President (*Yang di-Pertua Dewan Negara*), 22 elected by the Legislative Assemblies of the States (2 from each) and 16 appointed by the *Yang di-Pertuan Agong* from persons who have achieved distinction in major fields of activity or are representative of racial minorities, including the Aborigines. The first House of Representatives (*Dewan Ra'ayat*), consisting of 104 members elected on the principle of universal adult suffrage with a common electoral roll, was elected on Aug. 19, 1959, and met on Sept. 11.

The Constitution provides that each State shall have a simplified version of the Federal Constitution, with the Ruler or Governor acting on the advice of an Executive Council appointed on the advice of the *Mentri Besar* or Chief Minister and a single-chamber Legislative Assembly. The Legislative Assemblies are fully elected on the same basis as the Federal Parliament, but the Constitution

allows for a minority of appointed members for a transitional period. The present State Constitutions provide generally for the Chief Minister and Executive Council to be appointed by the Ruler at his discretion, but new provisions will be incorporated.

Legislative powers are divided into a Federal List, a State List and a Concurrent List, with residual powers vested in the State Legislatures. The Federal List comprises broadly, external affairs, defence, civil and criminal law and justice, the machinery of government, finance, commerce and industry, communications and transport, power, education, medicine and labour and social security. The State List includes land, agriculture and forestry, local government and services and the machinery of state government. In the Concurrent List are, *inter alia*, social welfare, wild-life, animal husbandry, town and country planning, public health and drainage and irrigation.

There is provision for formal consultation between the Federal Government and the States in a National Finance Council and a National Land Council.

JUDICATURE

The Judicial System includes a Supreme Court, composed of a High Court and a Court of Appeal, Sessions Courts, Magistrates' Courts and Local Courts, called *Penghulus' Courts*. The Supreme Court consists of a Chief Justice and up to 15 Puisne Judges.

DEFENCE

The Armed Forces of the Federation consist of the Army, Navy and Air Force, together with volunteer and auxiliary forces for each arm. The responsibility for command, discipline and administration, under the general authority of the Supreme Head of the Federation, rests with the Armed Forces Council under the Chairmanship of the Minister of Defence. The Council is not responsible for the operational use of the Forces. The General Officer Commanding, Federation Army, is also Chief of Staff, Federation Armed Forces.

An agreement exists between the Government of the United Kingdom and the Government of the Federation of Malaya on external defence and mutual assistance under which the United Kingdom has the right to maintain in the Federation such military forces, including a Commonwealth Strategic Reserve, as are agreed to be necessary for the fulfilment of Commonwealth and international obligations. The United Kingdom Government, on the other hand, has agreed to provide personnel, facilities, advice and assistance in the development of the Federal Armed Forces in addition.

tion to the financial assistance already being granted towards the capital cost of their expansion.

PRODUCTION AND TRADE

The Federation of Malaya is primarily a producer of raw materials, the chief of which are rubber and tin (of which it is the world's biggest individual supplier), iron ore, palm oil and kernels, coconut oil and copra and other agricultural products. These constitute nearly four-fifths of the total export trade, the other one-fifth being *entrepôt* trade consisting of re-export of raw materials and produce of neighbouring countries and manufactured and industrial goods of foreign countries.

Imports consist mainly of foodstuffs, beverages and tobacco, mineral fuels and lubricants, chemicals, textiles, manufactured and capital goods and raw products of neighbouring countries. The chief suppliers are the United Kingdom, Australia, the United States of America, Netherlands, W. Germany, Hong Kong, India, Japan, China, Thailand and Indonesia. Domestic industry includes manufacture of rubber goods, tobacco, cigarettes, pottery, cement, matches, pewter-ware, furniture, timber, bricks, ties, soap, biscuits and aerated waters.

Federation of Nigeria

Area and Population.—The Federation of Nigeria is situated on the west coast of Africa. It is bounded on the south by the Gulf of Guinea, on the west and north by Dahomey and Niger and on the east by the Cameroon Republic. It has an area of 356,669 square miles and at the last Census (held in 1952–53) had a total population of 31,200,000 (Northern Region 16,800,000; Eastern Region 8,000,000; Western Region 6,400,000). It is estimated that at mid-1961 the total population was about 35,700,000. The population is almost entirely African. There are some 28,000 Europeans, Americans, Lebanese and others engaged in Government posts, commerce and Missionary work. A new Census will be taken in May, 1962.

A belt of mangrove swamp forest 10–60 miles in width lies along the entire coastline. North of this there is a zone 50–100 miles wide of tropical rain forest and oil-palm bush. North of this the country rises and the vegetation changes to open woodland and savannah. In the extreme north the country is almost desert. There are few mountains, but in Northern Nigeria the central plateau rises to an average level of 4,000 feet. The Niger, Benue, and Cross are the main rivers.

The climate varies with the types of country described above, but Nigeria lies entirely within the tropics and temperatures are high. Temperatures of over 100° in the north are common while coast temperatures are seldom over 90°. The humidity at the coast, however, is much higher than in the north. The rainy season is from about May to October; rainfall varies from under 25 inches a year in the extreme north to 75 inches on the eastern coast line. During the dry season the *harmattan* wind blows from the desert; it is laden with fine particles of dust.

Government.—Nigeria is divided into three Regions, the Northern Region, the Eastern Region and the Western Region (with Regional Headquarters at Kaduna, Enugu and Ibadan respectively) and the Federal, Capital of Lagos. Eastern and Western Nigeria became self-governing in 1957 and Northern Nigeria in 1959. The Federation of Nigeria became fully independent on October 1, 1960, continuing as a member state of the Commonwealth.

The Federal Parliament consists of the *Senate* and the *House of Representatives* and its authority includes subjects as external affairs, aviation, banks, census, customs, defence, police, shipping, mines and minerals, posts and telegraphs, trunk roads and railways.

Each Region has an Executive Council presided over by a Premier, a House of Assembly and a House of Chiefs. The Governor of each Region acts on the advice of his ministers. Regional Governments have administrative and executive responsibility for regional legislation, development plans, health, education, local government, agriculture, justice, finance, natural resources, regional public works, communications (other than those under Federal control), regional trade, industry and production and welfare.

Education.—Education is the responsibility of the Regional Governments, the Federal Government retaining responsibility for education in Lagos and for those institutions of higher learning which have Nigerian significance, such as the University College and the University College Teaching Hospital at Ibadan, the Nigerian College of Arts, Science and Technology with branches at Zaria, Ibadan and Enugu, and the Man O' War Training Centre. There is a University at Nsukka, E. Region (opened Oct. 1960). Plans have been approved for the creation of universities at Lagos, Kano, Ibadan and Ife. Free and universal primary education for all children within the 6-12 year age group is now available in West and East Nigeria and in the Federal Territory of Lagos. About 3,000,000 pupils were enrolled at primary and higher schools in 1961.

Railways.—The Nigerian railway system, which is controlled by the Nigerian Railway Corporation, is the most extensive in Africa. There are 1,770 route miles of lines. Construction of a 400-mile extension to Maiduguri was begun in Sept. 1958. There are two major bridges, one over the Niger at Jebba and one over the Benue at Makurdi. The latter is 2,624 ft. long, and it is believed to be the second longest in Africa. The North-western main line runs from Lagos to Kano (700 miles) through the important towns of Abeokuta, Ibadan, Ilorin, Jebba, Minna, Kaduna and Zaria. From Kano the line continues for another 143 miles in a north-easterly direction to its terminus at Nguru, and there is a branch line from Zaria via Gusau to Kaura Namoda to serve north-western Nigeria. This line is also linked with Sokoto by a scheduled railway road service from Gusau. The eastern line runs from Port Harcourt deep-water quay on the Bonny river through the thickly populated oil palm area to Enugu, where it serves the collieries. It then crosses the Benue and joins the north-western line at Kaduna, 569 miles from Port Harcourt. A branch line of 63 miles from Kafanchan serves the tin mines at Jos. The railway hauled 2,797,000 tons of freight in 1959-60, and its passenger traffic totalled 7,990,650 passengers.

Roads.—There are 37,000 miles of motorable road. Most of the roads have gravelled or earth surfaces, but about 5,000 miles are tarred. An extensive programme of bituminous surfacing is now being carried out and contracts have been arranged for construction of a road bridge over the lower Niger between Onitsha and Asaba to provide a through trunk road between East and West Nigeria.

Civil Aviation.—Trunk route services operated by Nigerian, British, Netherlands, French and Belgian airlines bring Nigeria within less than 20 hours of the Western European capitals and South Africa. There are also connections to other parts of Africa and to the United States. A network of internal air services connects the main centres. Comprehensive radio navigational aids are installed at Kano and Lagos airports, and basic radio navigational facilities are provided at the twelve other aerodromes in regular use. Several flying strips are also in use by light aircraft. There is a network of meteorological reporting stations.

Production and Industry.—Nigeria is mainly an agricultural country. Four of the country's main agricultural products, *viz.* palm-oil and palm kernels, cocoa, cotton and ground nuts are of the greatest importance in Nigeria's export trade (see figures under "Trade" below). Other crops include benni-seed, capsicums, cassava, coffee, copra, guinea-corn, gum arabic, kola-nuts, maize, millet, piassava, rice, rubber, tobacco and yams. There are important tin and coal-mining industries, at Jos and Enugu respectively. The coal is mainly used within the country. Nigeria is the principal source of supply of the world's requirements of columbite. Timber and hides and skins are other major exports. Industrial products include soap, cigarettes, beer, margarine, groundnut oil, meal and cake, concentrated fruit juices, soft drinks, canned food, metal containers, plywood, textiles, ceramic products, cotton cloth and rubber shoes.

Trade.—The principal imports (1960) were cotton piece goods (£22,484,055), unmanufactured tobacco and cigarettes (£1,243,166), jute bags and sacks (£2,288,240), artificial silk piece-goods (£8,673,657), motor-vehicles and spares (£14,557,057), bicycles and spare parts (£2,044,886), cement machinery (£37,085,101), cement (£5,373,446), corrugated iron sheets (£3,260,811), stockfish (£7,935,355), beverages (£4,683,073), and petroleum products (£10,527,572). The principal exports were cocoa (£35,056,810), tin ore (£6,044,736), groundnuts (£21,955,510), palm-kernels (£25,097,417), palm oil (£13,181,148), timber, sawn and logs (£7,035,738), hides and skins (£3,920,016), cotton (£5,905,075), bananas (£2,605,880), columbite (£2,120,937) and rubber (£14,241,218).

CAMEROONS

(Trusteeship Territory of the Cameroons)

The German Protectorate of *Kamerun* on the west coast of Africa between (British) Nigeria and French Congo was obtained by conquest by

Franco-British forces during the War of 1914-18.

The approximate geographical limits of the German territory were 2°-11° 30' N. lat. and 8° 30'-16° E. long. and the area was about 177,496 square miles. By the Milner-Simon Agreement of July 10, 1919 the whole area was divided into a British sphere (about 34,481 square miles) and a French sphere (about 143,415 square miles). In 1922 the territories were placed by the League of Nations under British and French Mandates, and in 1946 by the United Nations under British and French Trusteeship. The Cameroons under United Kingdom administration marches the whole distance of the Nigerian Eastern boundary, save for one short break. A census conducted in 1952 and 1953 showed the population of the British sphere to be 1,440,000.

The two narrow strips of territory reach from the Atlantic Ocean to Lake Chad, a distance of 710 miles, and lie diagonally between 4°-12° 30' N. lat. and 8° 30'-14° 45' E. long. The nature of the country varies to a remarkable extent, from the coastal mangrove swamps and thick forest regions to the grasslands at height of 4,000 ft. to 7,000 ft. and more, and again to sandy and swampy areas in the region of Dikwa and Lake Chad. The highest point is the peak of the Cameroon Mountain, which rises to a height of 13,350 ft. It is volcanic and erupted in 1959, when a considerable volume of lava was discharged without doing any serious damage.

The Cameroons under United Kingdom administration were administered as part of Nigeria until October 1, 1960, when the Federation of Nigeria became independent. The Cameroons under French trusteeship became independent as the Cameroon Republic on Jan. 1, 1960. On February 11 and 12, 1961, at plebiscites held in the remaining trusteeship area of the Cameroons, the Northern Cameroons elected by a large majority to join the Federation of Nigeria and the Southern Cameroons by an equally large majority elected to join the Cameroon Republic. The elections were conducted by the British administration of the two sections of the territory under supervision of a United Nations commission. The Northern section of the Cameroons joined the Northern Region of Nigeria on June 1, 1961, and it was expected that the Southern section of the Cameroons would join in a federation, forming an enlarged Cameroon Republic. An appeal, alleging irregularities in the plebiscite in the Northern Section, lodged by the Cameroon Republic with the United Nations, was pending in 1961.

The country nearer the sea-coast is rich in timber, and the volcanic soil of the lower slopes of the Cameroon Mountain is particularly fertile. 250,000 acres of this land, formerly German-owned plantations, have been leased to the Cameroons Development Corporation, which was set up in 1946 for the production of bananas, oil palm products, rubber and cocoa, almost all of which are exported. Profits earned by the Corporation accrue to the general revenue of the Southern Cameroons, in which section the properties operated by the Corporation are situated.

The chief exports from the Territory are bananas, cocoa, rubber, palm oil and kernels, coffee and timber; the chief imports are textiles, motor spirit, provisions, ironware and salt.

The seaports ΨVictoria and ΨTiko are connected with Buea and all divisional headquarters by motor road.

Sierra Leone

Area and Population, etc.—The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs to be used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The total area of Sierra Leone is about 27,925 sq. miles, and the total population about 2,500,000. For administrative purposes, the interior portion of Sierra Leone is divided into 3 Provinces covering 12 Districts, each administered by a Commissioner. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

Government.—Sierra Leone became a fully independent state and a member of the British Commonwealth on April 27, 1961. Under the Constitution of 1958, there is a House of Representatives consisting of the Speaker (who is not an *ex officio* member of the House nor a person who holds any public office), fifty-one elected members and 2 nominated members. The House has full power to legislate. The Governor-General is advised by a Cabinet consisting of the Prime Minister and not less than 7 other ministers, who shall be elected members of the House of Representatives. The Ministers are appointed by the Governor-General on the recommendation of the Prime Minister. Seventeen members of the Cabinet hold ministerial portfolios, and the remaining two are Ministers without portfolio.

JUDICATURE

Chief Justice, Sir Salako A. Benka-Coker, O.B.E.

Puisne Judges, R. B. Marke, C.B.E.; S. B. Jones; C. O. E. Cole.

Communications.—A railway runs inland from Freetown to Pendembu (227½ miles) and a branch line of 83 miles extends in a north-easterly direction from Bauya to Makeni. A mining company, the Sierra Leone Development Company, owns a railway which runs for 57 miles from the iron ore deposits at Marampa to the shipping port of Pepel. There are about 3,000 miles of road in the country, of which about 200 miles are bitumen-surfaced. There is a trunk line network of 952 miles of telephone and telegraph routes connecting Freetown with most of the more important centres and towns.

The Freetown international airport is situated at Lungi, across the Sierra Leone River from Freetown. The main port is Freetown, which has one of the largest natural harbours in the world, and where a deep water quay, capable of berthing two medium-sized ships, came into operation in 1954. There are smaller ports at Pepel, Bonthe and Sulima. Inland waterways total some 493 miles, but several are only navigable for about three to four months of the year. The Sierra Leone Broadcasting Service operates a direct service, and is responsible for the Freetown Rediffusion System. Broadcasts are made daily in several of the more important indigenous languages, in addition to English.

Education.—There are more than 500 schools in Sierra Leone, of which 497 are primary, 25 secondary, 6 teacher-training and the rest technical and vocational. There are more than 60,000 pupils enrolled in secondary schools, 600 in teacher-training institutions and 1,000 in technical and vocational institutions. Higher education is provided at Fourah Bay College, the University College of Sierra Leone, with courses in divinity, arts, commerce, education and science. The College had 302 full-time students in 1961.

Trade.—The principal exports are iron, palm kernels, diamonds, cocoa, piassava, raw coffee, chrome ore, ginger and kola nuts. Some of the largest diamonds known have been found in Sierra Leone; in 1943 one of 530 carats and in 1945 one of 770 carats. The chief imports are cotton piece goods apparel, ale and stout, artificial silk piece

goods, machinery, motor vehicles, petroleum products, potable spirits, wheaten flour, tobacco, cement, corrugated iron sheets, sugar, soap, fish and fish preparations, electrical machinery, apparatus and appliances and rice.

	1959	1960
Total Imports . . .	£23,520,151	£26,342,213
Total Exports . . .	19,468,675	29,630,668
Imports from U.K.	9,237,916	10,035,751
Exports to U.K. . .	6,295,266	6,107,925

Finance.—The fiscal year 1960 was for administrative purposes extended to end on March 31, 1961. In future the fiscal year will be from April 1–March 31.

	1959	1960
Public revenue . .	£12,637,495	£10,430,680
Public expenditure	13,982,268	11,815,050

The net public debt of Sierra Leone on Dec. 31, 1960, amounted to £8,180,152.

CAPITAL.—**FREETOWN** (population 85,000). Freetown, which possesses the finest and most important harbour in West Africa, is 3,078 miles from Liverpool; transit, 9 days by sea; 2 days by air; there are also air connections with most of the capital cities of the world, and an internal air service between Freetown and some of the more important towns in Sierra Leone.

British Council Representative, J. Sanderson.

India and Pakistan

THE Indian Independence Act, 1947, which received the Royal Assent on July 18, 1947, brought to an end the whole structure of British Government in India and the handing over of power was completed by August 15, 1947. The Indian Empire, which extended over a territory larger than the Continent of Europe without Russia, is now represented by the *Republic of India*, the *Republic of Pakistan*, and Territories of Indian Rulers formerly under the suzerainty of the King-Emperor. Certain tracts of Tribal Territory on the North West and North East Frontiers are under the political influence, though not under the administrative rule, of the Government of Pakistan.

GEOGRAPHICAL INDIA

Physical Features.—The country may be broadly divided into three sections, viz. the Himalayan region, the northern river-plains, and the southern tableland.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,002 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,526 feet, near the centre of the range; and K. 2, 28,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes give a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, cedar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants.

The Great Plain.—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus; and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Deccan.—Just as the Himalayas on the N. and the Hindu Kush and Suleiman Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghats all but complete this environing triangle of mountain ranges. In the extreme N.W., south of the Vindhyas, and parallel to them, but north of the Western Ghats, we find the Nerbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghats lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghats, into the

Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical geography of Southern India has shaped its history: the S.W. coast, shut in by mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghats, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various small game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

CONSTITUTION

The Constitution of India came into force on January 26, 1950. The territory of the Indian Union comprises 15 States and six Union Territories. The Constitution provides for a single and uniform citizenship for the whole of India, with the right of vote for every adult citizen.

EXECUTIVE

The executive of the Indian Union consists of the President (Rashtrapati), the Vice-President and the Council of Ministers. The President is elected for five years by an electoral college consisting of all elected members of Parliament and of the various State Legislative Assemblies. The Vice-President is also elected for five years by members of the two Houses of Parliament. As head of the State the President exercises his functions with the aid and advice of the Council of Ministers headed by the Prime Minister. The Council is collectively responsible to the House of the People.

LEGISLATURE

The Legislature of the Union is called Parliament. It consists of two Houses known as the Council of States (Rajya Sabha) and the House of the People (Lok Sabha). The Council of States consists of not more than 250 members, of whom 12 are nominated by the President and the rest are indirectly elected by the Legislative Assemblies of the various States. The Council is not subject to dissolution, one-third of its members retiring every two years. The House of the People consists of not more than 500 members directly elected from territorial constituencies in the States and on the basis of adult franchise and not more than 20 members to represent the Union Territories, chosen in such manner as Parliament provides. The House has a maximum duration of five years.

Subject to the provisions of the Constitution the Union Parliament can make laws for the whole of India and the State legislatures for their respective units. The distribution of legislative powers is governed by a system of three lists—the Union, the State and the Concurrent—under which all legislative activity has been mapped out. The Union Parliament has exclusive powers to legislate on 97 subjects of all-India importance, such as defence, foreign affairs, communications, railways, currency and banking, insurance, customs duties, etc. The State List contains 66 headings, e.g.

public order and police, justice, education, public health, local government, agriculture, etc. The Concurrent List contains 47 subjects of common interest to the Union and the States.

OFFICIAL LANGUAGE

The Constitution (Art. 343) provides that the official language of the Union shall be Hindi in the Devanagari script and the form of numerals for official purposes shall be the international form of Indian numerals. English will, however, continue to be the official language for a period of not more than 15 years from the commencement of the Constitution (January 1950).

THE JUDICATURE

The Supreme Court of India, consisting of a Chief Justice and ten associate judges, is the highest court in respect of constitutional matters. It is also the final Court of Appeal in the country.

Chief Justice, B. P. Saha. Rs. 66,000.
Judges, J. Imam; S. K. Das; J. L. Kapur; P. B. Gajendragadkar; A. K. Sarkar; K. Subba Rao; K. N. Wanchoo; M. Hidayatullah; K. C. Das Gupta; J. C. Shah; Raghubar Dayal; N. Rajagopala Ayyangar; J. R. Mudholkar. Rs. 48,000.

PRODUCTION

About 70 per cent. of the inhabitants of India are dependent on agricultural pursuits. Most of the

agricultural holdings are less than 5 acres. Food crops occupy four-fifths of the cultivated land. There are about 159,000,000 cattle, or about a quarter of the world's cattle population.

Industrial

The output of coal in 1959 was 47,028,000 tons. Production of finished steel in 1959 was 1,736,400 tons. Cement 6,826,800 tons (metric) in 1959 against 6,068,400 tons in 1959. Paper production 294,000 tons, cotton cloth 4,925 mill. yards in 1959 and yarn 1,723,000 lbs. as compared with 4,927 mill. yards and 1,685,000 lbs. in 1958.

In 1959 17,053 tons of aluminium were produced. The yield of gold in 1959 was 165,321 ozs. Manganese ores have taken an important place in the list of minerals produced in India.

BANKS AND BANKING

The number of scheduled banks was 94 and the number of offices of scheduled banks was 4,151 in Oct., 1960. Advances by scheduled banks totalled Rs. 11,089 mill. at April 28, 1961.

COMMUNICATIONS

Civil Aviation.—India occupies an important place in civil aviation among the nations of the world. All air lines were nationalized in 1953 and two corporations formed, Indian Airlines Corporation and Air India International. During 1960, Indian aircraft flew about 30,900,000 miles, carrying about 920,000 passengers and nearly 16,850,000 lbs of cargo and mail on scheduled and non-scheduled services together. At the end of 1960, 85 aerodromes were maintained by the Civil Aviation Department of the Government.

Railways.—The railways are grouped into eight administrative zones, Southern, Central, Western, Northern, North-Eastern, North-East Frontier, Eastern and South-Eastern.

In 1959-60, passengers "originating" were 1,534,030,000, passenger mileage 46,065,706,000, goods traffic freight-ton miles 50,191,436,000.

Gross Traffic Receipts (1959-60) Rs. 4,223 million. Working expenses, Rs. 3,478 million. Net railway revenues, Rs. 745 million.

Roads.—At the end of March, 1961, it was estimated that there were 144,000 miles of surfaced roads and 250,000 miles of unsurfaced roads. The national highway system covers about 14,881 miles.

Ports.—The chief seaports are Ψ Bombay, Calcutta, Madras, Cochin, Vishkapatnam and Kandla (Kutch). There are over 150 minor working ports with varying capacity.

Shipping.—At the end of November, 1959, 173 ships totalling 852,000 gross tons were on the Indian Register.

Postal.—In 1958-59 there were 64,993 post offices, 10,746 telegraph offices, and 378,000 telephones.

DEFENCE

The supreme command of the armed forces is vested in the President. Administrative and operational control resides in the Army, Navy and Air Headquarters under the supervision of the Ministry of Defence.

The Army has 3 Commands, Southern, Eastern and Western, with headquarters at Poona, Ranchi

and Delhi respectively. A Territorial Force was inaugurated in Oct. 1949. It is intended to act as a second line of defence. A National Cadet Corps, with senior, junior, and girls' division, has also been raised.

The *Indian Navy* consists of two cruisers and a number of destroyers, frigates, minesweepers and auxiliary vessels. A Naval aviation wing and a hydrographic office have also been set up. The Navy's air station is at Cochin.

The *Indian Air Force* is organised in four formations, the Operational Command at Palam, the Training Command at Bangalore, the Main-

tenance Command at Kanpur and the Eastern Air Command. It also has seven Auxiliary Squadrons.

EDUCATION

In 1958-59, there were 1,164 pre-primary schools, 299,220 primary schools, 53,202 secondary schools, 3,410 vocational and technical schools, 51,300 special education schools, 873 arts and science colleges, 528 professional colleges, 152 special education colleges, 44 research institutions and 40 universities. 58.4 per cent. of children between the ages of 6 and 11 were at school in 1958-59, 20.6 per cent. between 11 and 14 and 9.7 per cent. between 14 and 17.

STATES AND ADMINISTRATIONS OF THE REPUBLIC OF INDIA

MADRAS

Madras (area, 50,251 sq. miles; population 33,650,917) was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 1801. The state has no good natural harbour, but an artificial harbour has been constructed at Madras at great expense. The state is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food grains, oilseeds, cotton, indigo, spices, tobacco, tea, etc., are cultivated. Madras is served by the Southern Railway. About 91 per cent. of the people are Hindus. The language principally spoken is Tamil, though Telugu, Malayalam and Kannada are also spoken. Madurai (424 975) and Tiruchinopoly (249,933), famous for their Hindu temples, are the chief cities after the capital.

CHIEF CITY, Ψ Madras. Population, 1,725,215. Governor, Shri Bisnuram Medhi.

MAHARASHTRA

The State of Maharashtra was formed on May 1, 1960 as a result of the bifurcation of the former Bombay State.

It stretches on the west coast of India between 22-1° and 16-4° north latitude and 72-6° and 80-9° east longitude. The State is bounded by the Arabian Sea on the west, Gujarat in the north-west, Madhya Pradesh in the north, Andhra Pradesh in the south-east and Mysore and Goa in the south. The region is drained by a number of rivers, large and small, most of them forming tributaries of the Tapi, Godavari, Bhima, Krishna, Wardha and Wainganga. The relief of the land shows high plateaux with plains on the western coast and along the river basins.

Maharashtra State contains 118,884 square miles with a population of 395 lakhs (provisional figures of the 1961 census). According to the 1951 census about 90 per cent. of the people in the State are Hindus and 7.65 per cent. Muslims. The Parsis (Zoroastrians) (83,379) who are very prominent in trade are mainly found in Bombay. Marathi is the principal language. 63.98 per cent. of the population are dependent on agriculture. The railway systems running through Maharashtra State

are the Western Railway running from Bombay to the north, the Central Railway to the north-east and south-east and the Southern Railway running from Poona to the south and the South-East Railway. According to provisional estimates of the 1961 population census the following 12 cities in the State have a population of more than 100,000. Greater Bombay (4,146,491), Poona (721,134), Nagpur (643,186), Sholapur (337,544), Kolhapur (187,306), Amravati (137,847), Nasik (130,834), Malegaon (121,427), Ahmednagar (118,266), Akola (115,820), Ulhasnagar (107,758) and Thana (101,103).

GUJARAT

On May 1, 1960, the new state of Gujarat, consisting of the northern part of Bombay State, was set up with a temporary capital at Ahmedabad, the remainder of the former Bombay state adopting the name of Maharashtra (*see above*). Gujarat, consisting of the districts of Kutch, Banaskantha, Mehsana, Sabarkantha, Ahmedabad, Kaira, Panchmahal, Baroda, Broach, Surat, Rajkot, Surendranagar, Junagadh, Jamnagar, Bhavnagar, Amreli and Dangs has a total area of 72,137 square miles and a population of 20,621,285 (1961 census, preliminary).

Governor of Gujarat, Nawab Mehdi Nawaz Jung, *Chief Minister*, Dr. Jivraj Mehta.

WEST BENGAL

West Bengal has an area of 34,214 sq. miles and a population (1961 census) of 34,967,634. The old Bengal Presidency included practically all Northern and Central India, but subsequently Bengal Province consisted of part of Bengal proper with Bihar, Orissa and Chota Nagpur. This Province of Bengal ceased to exist in 1947 when it was divided, West Bengal forming part of India and East Bengal part of Pakistan. The state of Cooch Behar was merged with West Bengal on Jan. 1, 1950, and the French settlement of Chandernagore, which came under Indian administration on May 2,

1950, was merged with West Bengal on Oct. 2, 1954. On Nov. 1, 1956, certain territories of Bihar were transferred to West Bengal.

The chief products are rice, oilseeds, sugar cane, tobacco, jute, silk, tea, coal, mesta and potatoes. West Bengal is now served by three State Railways, the Eastern Railway, the South-Eastern Railway and the North-Eastern Railway. The Eastern Railway is the great artery of the Ganges Valley. Howrah (pop. District, 1,611,373; Town, 423,630), the great jute manufacturing centre, adjoins Calcutta.

CHIEF CITY Calcutta. Population (including Howrah) 3,132,124; Calcutta proper 2,689,494.

ASSAM

Assam, which has an area of 47,098 sq. miles; pop. 11,860,059 (1961 census, provisional) (after the exclusion of Sylhet and Naga Hills) first became a British territory in 1826 and was constituted a separate administration in 1874. It was combined in 1905 with part of Bengal to form a new province, Eastern Bengal and Assam, but again became a separate administration in 1912. By the terms of the Indian Independence Act, 1947, the district of Sylhet was detached from Assam and amalgamated with East Bengal (Pakistan). A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Silchar and Gauhati respectively. The people are mainly Hindus, Muslims and Tribals. The North-East Frontier railway serves the state. Tea, petroleum, coal, timber, jute and rice are the principal products.

HIMACHAL PRADESH

The Union territory of Himachal Pradesh, formed in April, 1948 (present area 10,879 sq. miles, population 1961 census provisional, 1,348,982), consists of 22 former Punjab Hill States and their 9 tributaries. Bilaspur was merged into Himachal Pradesh in July 1954. The territory is divided into six administrative districts, Mahasu, Sirmoor, Mandi, Chamba, Bilaspur and Kinnaur. Capital, Simla.

Lieut.-Governor, Bajramg Bahadur Singh.

DELHI

The Union Territory of Delhi (area 578 sq. miles; pop. (census 1961 provisional figures) 2,644,058) has been administered directly since November 1, 1956 by the Government of India (Ministry of Home Affairs). An Advisory Council has also been set up.

A Municipal Corporation was set up in April, 1958 for providing civic amenities for the people of the Territory. The corporation is the first of its kind in India inasmuch as its jurisdiction spreads over the rural areas as well. There are 305 villages.

Chief Commissioner.—Bhagwan Sahay.

ANDAMAN AND NICOBAR ISLANDS

The Andamans are a group of 204 islands of various sizes, lying between the 6th and 14th parallels in the Bay of Bengal. The northern-most "Landfall Island" is 560 miles from the mouth of Hooghly River. The main part of the group is composed of five large islands, viz., North Andaman, Middle Andaman, South Andaman, Baratang and Rutland Islands, generally known as the Great Andamans. To the south of Great Andamans is the island of Little Andaman. The extreme length of the Great Andaman Islands is 290 miles and the extreme breadth 32 miles, the total land area being approximately 2,580 sq. miles. These islands consist mostly of a mass of hills covered with dense tropical forests and separated by three straits and several creeks; there are several very good harbours—Port Blair, Port Cornwallis, Mayabunder and Port Elphinstone.

The Nicobar Islands, numbering 19 from Car Nicobar in the North to Great Nicobar in the South, lie between Little Andaman and Sumatra. The southern island of Great Nicobar is about 100 miles from Pulo Brasse off Achin Head in Sumatra and the northern island of Car Nicobar 75 miles from Little Andaman. The extreme length of the sea space occupied by the Nicobars is 163 miles and the extreme width 36 miles. The most important harbour in the area is Nancowrie.

The total area of the Territory is 3,215 sq. miles, with a population of 63,438. Some 72 per cent. of the total area is covered by forests, from which 28,227 tons of timber were exported in 1959-60. Plywood is produced in the islands. Other important products are coconuts and rice, about 16,504 acres being under paddy cultivation in 1960-61. Budget estimates for 1960-61 were: Revenue, Rs. 15,859,000; Expenditure, Rs. 51,040,000.

The Andaman Islands are administered by the President acting through a Chief Commissioner.

CHIEF CITY, Port Blair. Population, 14,090.

Chief Commissioner, B. N. Maheshwari.

ANDHRA PRADESH

The State of Andhra, consisting of the Telugu-speaking areas of the old Madras State, with Kurnool as capital, was inaugurated on Oct. 1, 1953. The Telangana area of Hyderabad State was added in 1956, when the enlarged State assumed the name of Andhra Pradesh.

Andhra Pradesh has an area of 106,041 square miles with a population of 35,977,999.

The Legislature consists of two chambers, the Legislative Assembly and the Legislative Council.

CHIEF CITY, Hyderabad. Population 1,166,860. Governor, Bhimsen Sachar.

KERALA

The State of Kerala, constituted in 1956, consists of most part of the territories of Travancore-Cochin and the Malabar district of Madras. Bounded by Madras and Mysore, the State brings together the majority of the Malayalam speaking peoples. There is a Coalition Government of eight Ministers from the Congress Party and three from the Praja Socialist Party. The North-Eastern part of Kerala is rich in plantations

producing rubber, tea and copper. Area, 15,003 sq. miles. Population, 16,875,199.

CAPITAL, Trivandrum.

Governor, V. V. Giri.

MYSORE

The Mysore State, formed in 1956, consists of territories of the former State of Mysore, part of Coorg and parts of Madras State and the former Bombay and Hyderabad States. The State brings together the Kannada speaking people, previously distributed in five States. Its area is 74,122 sq. miles and population (1961 census provisional) 23,547,081. The State consists largely of an elevated table land. It is rich in hydro-

electric power and fairly rich in minerals; it is the major gold producing State of the Indian Union.

CAPITAL, Bangalore.

FLAG.—The National Flag of Pakistan is dark green, with white vertical part at the mast, the green portion bearing a white crescent in the centre and a five-pointed heraldic star.

GOVERNMENT

Pakistan was constituted as a Dominion under the Indian Independence Act, 1947, which received the Royal Assent on July 18, 1947.

In terms of the Act the Dominion of Pakistan consisted of former territories of British India, as shown in the above table. The Punjab States of Bahawalpur and Khairpur, with a Muslim population of almost 80 per cent. and with Muslim rulers, acceded to Pakistan in October, 1947. Boundaries of the Provinces of East Bengal and of Punjab (West Punjab) were defined by a Boundary Commission presided over by Sir Cyril Radcliffe, K.B.E., O.C. (now Lord Radcliffe). The following States have also acceded to Pakistan: the Baluchistan States of Kalat, Mckran, Las Bela and Kharan, and the North-West Frontier States of Amb, Chitral, Dir and Swat. The States of Junagadh and Manavadar which had acceded to Pakistan, were occupied by India on November 8, 1947.

The Constitution of Pakistan was passed on February 29, 1956. Pakistan became a Republic on March 23, 1956, when the provisions of the Constitution came into force. On October 7, 1958, however, this Constitution was abrogated and Pakistan came under martial law. General (now Field Marshal) Mohammed Ayub Khan, Commander-in-Chief of the Pakistan Army, was appointed the Chief Martial Law Administrator. On October 28, 1958, General Mohammed Ayub Khan also became President of Pakistan and an 11-man Presidential Cabinet was appointed to administer the country until the re-establishment of democratic institutions.

THE JUDICATURE

There is a Supreme Court of Pakistan. In addition the High Court of West Pakistan sits at Lahore, Karachi and Peshawar, and the High Court of East Pakistan at Dacca.

DEFENCE

Army—8 Infantry Regiments, 6 Armoured Corps units, 8½ Artillery Regiments and 34 Engineer units. Most infantry regiments of the Indian Army with a Moslem majority were allotted to Pakistan. In March, 1950, it was announced that the Government had decided to introduce legislation to establish a Territorial Force.

Navy—The Navy consists of 1 cruiser, 5 destroyers, 2 frigates, 6 minesweepers, 1 survey ship, 1 salvage vessel, 1 harbour oiler, and auxiliary vessels.

EDUCATION

The latest census (1961) shows that 15.3 per cent. of the total population of Pakistan (i.e. 14,382,700 persons) is literate. On Dec. 13, 1958, the President announced the formation of a National Commission on Education, charged with a thorough scrutiny of the education system. Its Report was approved by the Cabinet on Jan. 8,

1960. Its major recommendations were incorporated in the final draft of the Second Five-Year Plan.

Apart from the three Universities of Dacca, Panjab and Sind, which were inherited at the time of partition, three more, at Peshawar, Karachi and Rajshahi (in East Pakistan), have been established.

The Panjab University, founded in 1882, is mainly an affiliating University, but also provides for post-graduate teaching and research in a few subjects. It had 16,673 full-time students in 1961.

The University of Dacca (60,580 full-time students) was established in 1921 as an unitary residential university, but had to assume, on partition, the additional functions of an affiliating University for colleges in East Pakistan.

The University of Sind (6,981 full-time students), created in 1947 and removed from Karachi to Hyderabad, in May 1952, is an affiliating and examining University Peshawar University (7,912 students) was founded in 1950. It is a teaching, residential and affiliating University. The Federal University of Karachi (1,430 students) was established in 1951. It is being developed into an unitary residential university with all the colleges in Karachi as its constituent members and a number of halls of residence under its control and supervision. The Rajshahi University (17,087 full-time students) was established in East Pakistan in 1953, as a teaching and affiliating University.

The number of educational institutions in Pakistan in 1959 was: Primary Schools, 44,222; Secondary Schools, 6,030; Colleges of Arts and Science, 186; Medical Colleges, 12; Law Colleges, 10; Engineering Colleges, 6.

LANGUAGE

Urdu and Bengali are the two main languages of Pakistan. English is the official language.

IRRIGATION

Pakistan has one of the longest irrigation systems in the world. The total area irrigated is about 23,000,000 acres.

PRODUCTION

The estimated acreage (000's omitted) of principal crops in 1959-60 was: rice 24,487, wheat 12,032, bazra 2,003, jowar 1,097, sugar cane 1,302, rape and mustard 2,047, cotton 3,324, jute 1,528, maize 1,132, gram 3,154 and barley 550 acres.

COMMERCE

The chief exports of the country are raw jute, cotton, hides and skins, oil-seeds and tea. Industrial machinery and mill work, metals and ores, chemicals and drugs, mineral oils and hardware, instruments and spare parts are the principal imports.

During 1958, total exports of raw jute were 891,000 tons valued at Rs.839,500,000. Raw cotton exports were 537,000 bales valued at Rs.240,400,000. Other substantial exports during the period included raw wool, raw hides, raw skin, tea, cotton twist and yarn and cotton piece-goods.

FINANCE

The Pakistan rupee was revalued on Aug. 1, 1955. Exchange rates are now Rs.100 = £7.5 sterling or U.S. \$21.

The State Bank, established July 1, 1948, has a capital of Rs.30,000,000, 51 per cent. of which is held by the Government. Deposits at all banks in the country on June 30, 1960 amounted to Rs. 3,082,300,000. There are 73 insurance companies operating in the country, of which 28 are Pakistani businesses. Total life insurance in force in Pakistan at the end of 1959 was Rs.941,250,000. New life insurance business during the year amounted to Rs.257,990,000.

Revenue and Expenditure since 1957-58 are as follows:—

Revenue: (1957-58) Rs. 1,525.0 million; (1958-59) (15 months) Rs. 2,070.2 million; (1959-60, Provisional) Rs. 1,887.7 million; (1960-61, revised estimate) Rs. 1,967.4 million; (1961-62, Budget Estimate) Rs. 2,155.3 million.

The chief items of revenue for 1961-62 are: Customs Rs.634.0 million; Central Excise Duties Rs.336.9 million; Income Tax and Corporation Tax Rs. 320.6 million; Sales Tax Rs.247.3 million; Defence Services Rs. 75.0 million and Debt Services Rs. 129.4 million.

The chief items of expenditure for 1961-62 are:

PROVINCES OF PAKISTAN

PROVINCES OF THE ISLAMIC REPUBLIC OF PAKISTAN

1. WEST PAKISTAN

The Establishment of West Pakistan Act, 1955, came into force on October 3, 1955, and incorporated: (1) the former Governors' Provinces of the Punjab, North-West Frontier and Sind; (2) the former Chief Commissioners' Provinces of Baluchistan and Karachi; (3) the States of Bahawalpur and Khairpur and the Baluchistan States Union; (4) the Tribal Areas of Baluchistan, the Punjab and the North-West Frontier and the States of Amb, Chitral, Dir and Swat, into the Province of *West Pakistan* with effect from October 14, 1955.

At the 1961 Census the total population, excluding the Federal Territory of Karachi, was 40,815,000 (preliminary figures).

West Pakistan (including the Federal Capital), has an area of 300,839 square miles; 97.1 per cent. of the population are Muslim; 0.5 per cent. Caste Hindu; 1.1 per cent. Scheduled Caste Hindu and 1.3 per cent. Christian. Running through West Pakistan are five great rivers, the Indus, and its tributaries, Jhelum, Chenab, Ravi, and Sutlej. The upper reaches of these rivers are in Kashmir and their sources are in the lofty Himalayas.

West Pakistan is one of the richest wheat-producing areas populated by a hardy peasantry with great martial traditions. Of the other crops grown, cotton, rice, gram, jowar and oil-seeds

Defence Rs.985.9 million; Civil Administration Rs.445.5 million; Debt Services Rs.219.5 million; Civil Works and Central Road Fund Rs.30.6 million.

COMMUNICATIONS

There are 7,074 miles of railway line in the country. Of this total mileage, West Pakistan has 5,362 miles of railway line and East Pakistan has 1,712 miles. The Pakistan railways comprise two independent railway systems—the Pakistan Western Railway in West Pakistan and the Pakistan Eastern Railway in East Pakistan—managed and owned by the State.

ψ The principal sea ports are Karachi and Chittagong in West and East Pakistan respectively. These two ports handled in 1959-60 over 4,500,000 tons and 2,643,000 tons of traffic respectively. The anchorage of Chalna, established in Dec. 1950, on the river Pussur in East Bengal to relieve congestion of traffic at Chittagong, now has nine moorings.

Karachi is the main air port, and being situated on the trunk air routes of the world, holds an important position. Pakistan International Airlines is the chief air transport company in Pakistan.

Post and telegraph facilities are available to every country in the world.

are the most important. There are large deposits of rock salt, which with cotton forms the principal exports. The Province is served by the Pakistan Western Railway.

Chief City and Headquarters of West Pakistan: Lahore (population, 1961 census preliminary, 1,297,000).

Governor, Malik Amir Mohammad Khan of Kalabagh.

2. EAST PAKISTAN

The Province of East Pakistan: area, 55,134 sq. miles, population (1961 census), 50,844,000 (of whom 76.8 per cent. are Muslim; 10 per cent. Caste Hindu; 12 per cent. Scheduled Caste Hindu; 0.3 per cent. Christian and 0.9 per cent. others), comprises the Eastern territories of the partitioned province of Bengal and Sylhet, formerly a district of Assam (excluding certain thanas in the Karimganj sub-division), and the Chittagong Hill tracts.

CHIEF CITY (and Headquarters of East Pakistan): Dacca. Population 411,000 (1951 Census).

Governor, Zakir Husain.

CAPITAL OF PAKISTAN

An executive order was issued on Aug. 2 1960, proclaiming Rawalpindi (240,000) as Capital of Pakistan in place of Karachi, and providing that Karachi would in future be known as the Federal Territory of Karachi. Karachi Territory had a population of 2,153,000 (preliminary figures) at the 1961 Census; Metropolitan population, 1,916,000.

Ghana

Ghana (formerly the British Colony of the Gold Coast) is situated on the Gulf of Guinea, between 3° 15' W. long. and 1° 22' E. long. It is bounded on the west by the Republic of Ivory Coast, on the east by the Republic of Togo, and on the south by the sea. It extends about 334 miles along the coast-line and inland to an average distance of 440 miles or to 11° N. lat. Although a tropical country, Ghana is cooler than many countries within similar latitudes.

Area and Population.—Ghana has a total area of 92,100 sq. miles with a total population at the Census of 1960 of 6,690,730. Distribution by Administrative regions was as follows:—

Region	Area Sq. miles	Population Census, 1960
Eastern.....	8,750	1,088,843
Western.....	9,494	1,348,844
Central.....	3,656	..

Northern.....	27,122	1,282,164
Upper.....	10,478	..
	92,100	6,690,730

Figures for the Eastern Region exclude the population of the capital district, Accra, which with Adangbe-Shai, Tema and the Accra Rural Areas had a population in 1960 of 491,060.

GOVERNMENT

The Gold Coast region of West Africa was first visited by European traders in the fifteenth century. The Gold Coast Colony, Ashanti, the Northern Territories and Transvolta-Togoland, the constituent parts of the new State, came under British administration at various times, the original Gold Coast Colony, the coastal and Southern areas, being first constituted in 1874; Ashanti in 1901; and the Northern Territories Protectorate in 1902. The territory of Transvolta-Togoland, part of Togo, a former German colony, was mandated to Britain by the League of Nations after the First World War, and remained under British administration as a United Nations Trustship after the Second World War. After a plebiscite in May, 1956, under the auspices of the United Nations, the territory was integrated with the Gold Coast Colony.

The former Gold Coast Colony and associated territories became the independent state of Ghana and a member of the British Commonwealth on March 6, 1957, under the *Ghana Independence Act*, 1957 and adopted a Republican constitution on July 1, 1960.

LEGISLATURE

The Republican constitution of Ghana came into effect on July 1, 1960. It provides for a parliament consisting of the President and the National Assembly of 104 members, with a maximum term of 5 years. A further 10 seats have been created for representatives of the women of Ghana. At least one session of a month's duration is held each quarter. Electoral constituencies remained as for the Legislative Assembly and voting is on a basis of adult suffrage.

Houses of Chiefs

The Constitution guarantees the office of Chief in Ghana as existing by customary law and usage and provides for the establishment of Houses of Chiefs for each Region by Act of Parliament, and for a Head for each Region; the Asantehene to be Head of Ashanti, and for each of the other Regions a head to be chosen by the House of Chiefs. Houses of Chiefs have power under the Constitution to consider any matters referred to them by a Minister or by the Regional Assembly and may at any time offer advice to any Minister.

LEGAL SYSTEM

The *Supreme Court* of Ghana is the final Court of Appeal and consists of the Chief Justice and four Judges. The *High Court* has unlimited jurisdiction in all matters—criminal and civil. Cases go from the High Court, on appeal to the Supreme Court. The High Court, to which at present nine High Court Judges are appointed, sits in various parts of Ghana for administrative convenience. One High Court Judge sitting alone may constitute the High Court. A *Circuit Court* sits in each of the seven Circuits into which Ghana is divided. A Circuit Judge has original jurisdiction in all criminal cases except those which attract the sentence of death or life imprisonment and has original jurisdiction in civil matters where the subject matter is of the value of £500 or less. In addition circuit courts have appellate jurisdiction in cases from District Magistrate's Courts within their Circuits.

A *District Magistrate* has original jurisdiction within his Magisterial District, of which there are seven in Ghana. Seventeen Magistrates are at present appointed to sit in the various districts according to the amount of work. They deal with all criminal matters of a minor nature. Cases of more serious nature and civil cases where the value of the subject matter is of £150 or less are committed to Circuit or High Courts. The District Magistrate has appellate jurisdiction in all matters dealt with by the Local Court except land and succession cases which latter cases go on appeal to the High Court.

COMMUNICATIONS

There are four aerodromes in Ghana, situated at Accra, Takoradi, Kumasi and Tamale. Accra

Airport is an international airport and is the terminus for services from the United Kingdom, the Northern Region, Ashanti and the Western Province. There is a National Meteorological Service, providing forecasting, climatological and agrometeorological services.

Railway communications consist of a main line running from Takoradi to Kumasi thence to Accra, a distance of 357 miles, with branches from Kojokrom to Sekondi (3 miles), Tarkwa to Preslea (18 miles) and Achimota to Tema (16 miles). A link of 51 miles between the Huni-Valley-Kade line at Achiasi Junction and the Accra-Kumasi line at Kotoku was opened in 1956. Total route mileage is 591 miles of 3' 6" gauge track. The railway carried 5,198,612 passengers in 1958-59 and 1,694,538 tons of freight. Gross revenue was £3,997,144. On June 30, 1961, the mileage of all-weather roads was 4,425, comprising 2,002 miles of bitumen surface and 2,423 miles gravel surface. In addition there are 700 miles of roads at present maintained by the regional organization and local authorities.

Takoradi Harbour consists of two breakwaters enclosing a water area of 22 acres. Seven quay berths are situated on the lee breakwater—five are used for the handling of general cargo, one is leased specially for manganese exports and one is used for shallow draft colliers. The first stage is now being completed on the construction of Tema, Africa's largest artificial harbour and a prospective major port of the South Atlantic. Tema Harbour provides a sheltered water area of 500 acres, with a total length of three miles. The four-berth quay, the dock yard, oil berth, fishing harbour and slipways form part of the facilities within the harbour proper to accommodate shipping and to provide safe anchorage in a 42-foot depth. Extensive shore works include 20 miles of rail sidings, two cocoa sheds with a clear span of 170 feet, transit sheds and a 100-foot lithouse. New harbour extensions will provide another four berths. As part of the Tema Harbour project a new town, Tema, is being built, its ultimate population now envisaged at 50,000. Many light industries are already operating there.

Cyprus

Area and Population.—Cyprus is a large island in the Mediterranean Sea, between N. lat. 34° 33' and 35° 41', and E. long. 30° 21' and 30° 35'. It is about 40 miles distant from the nearest point of Asia Minor, and 60 miles from Latakia on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad, from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,572 square miles. In 1960 the estimated population was 563,000. There are two major communities, Greek Cypriots (78.8 per cent.) and Turkish Cypriots (17.5 per cent.); and minorities of Armenians, Maronites and others.

GOVERNMENT

Cyprus was formally annexed to Great Britain on Nov. 5, 1914, on the outbreak of war with Turkey. From 1925-60 it was a crown colony administered by a Governor, assisted by an Executive Council and also for a time by a partly-elected Legislative Council. A state of emergency was declared in November, 1955, and Archbishop

Makarios was deported. Further proposals for a workable constitution made in 1956 and a seven-year-plan for the government of Cyprus in association with Greece and Turkey were rejected by the Greek Government and Greek Cypriots. Archbishop Makarios was released in March, 1957, but was not allowed to return immediately to Cyprus. Following a meeting at Zürich between the Prime Ministers of Greece and Turkey, a conference was held in London and an agreement was signed on February 19, 1959, between the United Kingdom, Greece and Turkey, which provided that Cyprus would be a Republic.

Constitution.—Under the Cyprus Act, 1960, the island became an independent sovereign republic on August 16, 1960. The constitution provides for a Greek Cypriot President and a Turkish Cypriot Vice-President elected for a five-year term by the Greek and Turkish communities respectively. A Council of Ministers (7 Greek, 3 Turkish) is designated by the President and Vice-President, and a House of Representatives elected for five years by universal suffrage of each community separately, 70 per cent. by the Greek community and 30 per cent. by the Turkish. The number of representatives is fixed by agreement between the communities. The President and the Vice-President have the right of final veto on the decisions of the Council of Ministers and on any law or decision of the House of Representatives concerning foreign affairs, except participation in international organizations and alliances in which Greece and Turkey both take part. A Communal Chamber has been set up for each community with the right to levy taxes on its own community and with authority in matters of religion, education, culture and matters of purely communal character.

British Base Areas.—The United Kingdom retained full sovereignty and jurisdiction over two areas—Akrotiri-Episkopi-Paramall and Dhekelia-Pergamos-Ayios Nikalaos-Xylophagou—and use of roads and other facilities. The British Administrator of these areas is appointed by the Queen and is responsible to the Secretary of State for Air.

Commonwealth Status.—On March 13, 1961, the Commonwealth Prime Ministers' Conference in London accepted unanimously an application by Cyprus for Commonwealth membership.

Production and Industries.—Agriculture is the industry which provides the greatest employment

in Cyprus, the chief agricultural products being:—Cereals, carobs (locust beans), vine products, potatoes, onions, cheese, almonds, citrus and other fresh and dried fruit, tobacco and legumes. Various kinds of livestock are raised, donkeys and mules being the principal exports. The value of agricultural and livestock exports in 1960 was £5,947,000. By value of product the main industry of Cyprus is mining. The chief mineral extracted is pyrites. The value of minerals exported in 1960 was £9,718,000.

Education.—Each religious denomination has its own elementary schools. During the school year 1958-59 there were 711 elementary schools (Greek 497; Turkish 209; Maronite 5) with a total enrolment of 81,359. Secondary education is for the most part on a similar denominational basis with a total enrolment in 1960 of 24,639.

Communications.—Ψ Famagusta is the main seaport. In 1960 1,951 steamships (tonnage 3,783,549) and 318 sailing vessels (tonnage 16,361) engaged in the foreign trade. Air passenger traffic in, out and through Nicosia rose by 3,978 over the previous year to 137,210 and freight decreased by 96 tons to 1,181 metric tons. Nicosia Flight Information Centre controls and safeguards movements of civil aircraft through the Eastern Mediterranean.

NOTE.—Canada, Australia, New Zealand, Ceylon, Malaya, Nigeria, Sierra Leone, India, Pakistan, Ghana and Cyprus are shown separately in the preceding pages.

ADEN

(Aden Colony and Protectorate)

The area of Aden Colony is 75 sq. miles and of the Protectorate about 112,000 sq. miles. The population of the Colony (1955 Census) is 138,441. The estimated population of the Protectorate is about 650,000.

The peninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, was first occupied by the British in 1839. Aden was always an important centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance and is now a great oil bunkering and coaling station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. Aden is a free port. The

chief industries are fishing, salt, soap and cigarette manufacture, aluminium pressing of domestic utensils and dyeing and printing of cloth. The traffic in arms and ammunition is subject to special regulations. The British Government has treaty engagements with, and subsidises, the neighbouring Arab tribes, both inland and along the coast, from the Straits of Bab-al-Mandeb to Muscat territory at Ras Darbhat 'Ali.

Perim.—A small unfortified island with an area of 5 square miles was occupied in 1857 and is administratively attached to Aden. The port has been closed since November, 1936, on the withdrawal of the Perim Coal Company from the island. Population, 360.

Kamaran.—The island of Kamaran in the Red Sea about 200 miles north of Perim was taken by the British from the Turks in 1915, and is administered under the control of the Governor of

Aden. It has an area of 88 square miles and a population of about 2,200. *Commissioner, Kamaran, Col. R. G. W. E. Alban, O.B.E.*

The *Aden Protectorate* to the West of approximate longitude 46° is bounded on the East by the Qara country, which is part of the dominions of the Sultan of Muscat and Oman, and on the North and West by the Great Desert and the Kingdom of Yemen, whose Southern boundary was temporarily fixed by Article III of the Treaty of San'a (February, 1934) by which His Majesty's Government and the Yemen Government agreed to maintain the *status quo* frontier as it was on the date of the signing of the treaty. The coastline of the Aden Protectorate, which is about 750 miles long, starts in the West from Husn Murad, opposite the island of Perim, and it runs eastward to Ras Dharbat 'Ali, where it meets the Sultanate of Muscat and Oman.

The Aden Protectorate is divided into two parts, the Western Aden Protectorate and the Eastern Aden Protectorate. The former consists of 18 Sultanates, the chiefs of which are all in protective treaty relations with Her Majesty's Government.

On February 11, 1959, "The Federation of Arab Amirates of the South" was inaugurated in the West Aden Protectorate, composed of the Sultanates of Audhali, Lower Yafai, and Fadhi, the Amirates of Baihan and Dhala, and the Sheikhdom of Upper Aulaqi. They were joined later by four other States—Lahej, Lower Aulaqi, Dathina and Aqrabi. The Federation, which is governed by a constitution providing for a Supreme Council and a Federal Council, is open to other States in the Protectorate. Under a related treaty with Her Majesty's Government, the Federation continues to receive advice and financial and technical assistance from Her Majesty's Government. The treaty also provides for assistance and co-operation in defence and security. The objects of the Federation include concerted resistance to repeated incursions from the Yemen and the promotion of economic development programmes. The flag adopted by the Federation consists of an Islamic crescent moon with a central star and five horizontal stripes (black, yellow, green, yellow, blue).

The Eastern Aden Protectorate comprises the Hadhramaut (consisting of the Quaiti State of Shihr and Mukalla and the Kathiri State of Seiyun), the Mahri Sultanate of Qishn and Socotra, the Wahidi Sultanates of Bir Ali and Balhaf, and the Sheikhdoms of Irqa and Haura, all of which are in protective treaty relations with Her Majesty's Government. His Highness the Sultan of Shihr and Mukalla is the premier chief of the Eastern Aden Protectorate, and the Hadhramaut is the most important and best organised of these areas. It is bounded on the West by the Wahidi Sultanates and on the East by the Mahri Sultanate.

The Mahri Sultanate of Qishn and Socotra is the most easterly area in the Aden Protectorate, for it is bounded on the East by the Sultanate of Muscat and Oman. The Sultan of Qishn and Socotra resides on the island of Socotra (area 1,400 square miles) which lies 150 miles from Cape Guardafui. The island was occupied by the East India Company in 1834 and it came under British protection in 1886 when the treaty with the Mahri Sultan was concluded. It contains about 12,000 inhabitants principally engaged in livestock husbandry.

GOVERNMENT

Aden was for many years administered by the Government of India, and in 1932 it was separated from the Bombay Presidency and formed into a Province under a Chief Commissioner under the direct control of the Government of India. It ceased to be a part of British India on April 1, 1937, and is now a Crown Colony. The Governor has an Executive Council and a Legislative Council was established in 1947. In July 1955, the Legislative Council was enlarged and for the first time an elected element was introduced. At the end of 1958 the constitution was again modified to give the Council an elected majority, the elections for which were held in January 1959. The Legislative Council as it is now constituted consists of 23 members presided over by an impartial Speaker who has no vote. Twelve of the members are elected, 6 nominated, and 5 are *ex officio*, including the Chief Secretary, the Attorney-General, the Financial Secretary, the Assistant Chief Secretary (Colony) and a representative of the Commander, British Forces. Four elected members of the Legislative Council and one locally nominated member have been appointed ministers in charge of certain departments of Government, with full administrative and legislative responsibilities. The 5 ministers and the 5 *ex officio* members of the Legislative Council are also members of the 10-member Executive Council presided over by the Governor. There is a Court of unlimited civil and criminal jurisdiction called the Supreme Court from which appeals lie to the East African Court of Appeal.

THE BAHAMAS

The Bahamas (or Lucayos) are an archipelago near the British West Indies, lying between 20° 55'—27° 22' N. lat. and 72° 40'—79° 20' W. long., and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of twenty-two inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,403 square miles, and a population estimated (1960) at 106,677, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital Nassau), Cat Island, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Harbour Island, Inagua, Andros Island, San Salvador (at one time known as Watling's Island), Rum Cay, Long Cay, Ragged Island and Bimini. Watling's Island was the first landfall in the New World made (October 12, 1492) by Christopher Columbus, who gave it the name of San Salvador, which has been restored by an Act of the Bahamas Legislature. Originally settled by Englishmen, the Bahamas were, in 1732, surprised by the Spanish, but at the Peace of Versailles were restored to the English. The climate is salubrious and in the winter Nassau, which is outside the tropics, is frequented by many visitors from all parts of the world.

Industries.—Tomatoes and okra are cultivated in large quantities for shipment to Canada and the United States. Lumbering, salt raking and crawfishing are the chief national industries.

Education.—Education is compulsory between the ages of 6 and 14. There are 147 state-maintained schools with a total roll of 18,606; there are also 53 denominational and private schools with a total roll of 7,087. There are 6 Government and 5 denominational secondary schools and 1 private secondary school.

Civil Aviation.—Facilities for external traffic are provided by Pan-American Airways, B.O.A.C., Trans-Canada Air Lines, British West Indian Airways, Mackey Air Lines and Eagle Airways, while Bahamas Airways and Skyways, Ltd. provide internal schedule and charter flights to the outlying islands. There are several daily air services between Nassau, Miami, Palm Beach, Fort Lauderdale, Tampa and St. Petersburg (Florida), and a regular service between Nassau and Montego Bay, Jamaica, besides regular trunk communication with London, New York, Toronto, Montreal, Bermuda and Kingston.

Communications.—There is a General Post Office in Nassau, 4 branch offices in New Providence and 110 sub-offices in the Out Islands. In 1960, 10,820,000 letters and prints were handled. Wireless and telephone services are in operation to all parts of the world. There are 64 radio stations among the islands.

BASUTOLAND

(The Territory of Basutoland)

Basutoland is an enclave within the Republic of South Africa and is bounded north and west by the Orange Free State, east by Natal and East Griqualand, and south by the Cape Province, with an area of 11,716 square miles. The land, which is mountainous, rising to over 11,000 ft. in places, is held in trust for the Basotho by the Paramount Chief and is not made available for settlement. Sites are granted, however, for missions, schools, trading and commercial enterprises. The figures of the April, 1956 Census showed a population of 641,674 (638,857 Africans, 1,926 Europeans, 247 Asiatics and 644 persons of mixed race).

The economy of the Territory is predominantly agrarian.

The livestock figures for 1960 gave the following figures:—

Cattle, 331,203; horses, 83,910; mules, 3,022; donkeys, 48,564; sheep, 1,037,372; goats, 579,165.

During 1960, 6,786,356 lb. of wool were exported to the value of £731,513 at the coast. The total quantity of mohair exported during 1960 was 1,180,670 lb. valued at £371,618 at the coast.

Education.—In 1960 there were 1,052 primary schools and 21 secondary schools. The total enrolment of all schools was 137,947.

Communications.—There are no railways in Basutoland with the exception of 1 mile of the South African Railways which enters Basutoland at Maseru from the Orange Free State. A main road runs from Butha Buthe in Northern Basutoland to Quthing in the South. It connects all the Government Stations with the exception of Qacha's Nek and Mokhotlong. Qacha's Nek is accessible by road from Matatiele in East Griqualand and a jeep service up the Sani Pass to Mokhotlong has recently come into operation. There are 28 airstrips in the Territory, of which 5 are used by a regular internal air service, which carries mail and goods to and from otherwise inaccessible mountain regions. The remaining strips are held mainly by traders and Missions.

FINANCE

Basutoland is an extremely poor and unproductive country. The principal sources of revenue are customs and excise duty (£1,000,000), taxes (£500,000), and wool and mohair export duty (£800,000).

Total estimated revenue for 1961-62 is £2,000,000, and expenditure £2,700,000, the difference being met by a grant from the U.K. Government. There is no direct trade between the Territory and the U.K.

GOVERNMENT

Basutoland is an African territory without white settlers or landowners. It has a British administration which functions in conjunction with a hereditary chieftainship. As a result of recent constitutional reforms there is now an Executive Council and a Legislative Council. At the head of the administration is the Resident Commissioner, who works under the direction of the High Commissioner for Basutoland, the Bechuanaland Protectorate and Swaziland, and who is also the British Ambassador to the Republic of South Africa. For administrative purposes the territory is divided into nine districts each with a District Commissioner who works in close co-operation with the Principal and Ward Chiefs. The local authority in each district is the District Council which has certain local powers. Its members are elected from a single roll for Basotho and non-Basotho British

subjects and British protected persons. As a result of constitutional reforms, which came into operation in March, 1960, the territory has an Executive Council, which is the main policy making body, and a Legislative Council known as the *Basutoland National Council*. The Executive Council consists of the Resident Commissioner, who acts as Chairman, the Government Secretary, Financial Secretary, Legal Secretary, three persons chosen by the Basutoland National Council from among their own number, and one person nominated by the Paramount Chief. The Basutoland National Council consists of 80 members, divided equally between elected and non-elected members. The former are elected by District Councils sitting as electoral colleges for that purpose. The non-elected element is made up of three of the official members of the Executive Council (excluding the Chairman), the Commissioner for Local Government, the 22 Principal and Ward Chiefs, and 14 persons nominated by the Paramount Chief. The Basutoland National Council has power to legislate for all persons in Basutoland in respect of all matters, save the following, which are the High Commissioner's matters: External Affairs and Defence, Internal Security, Currency, Public Loans, Customs and Excise, Copyright, Posts and Telegraphs and the recruitment, etc., of officers to the Public Service. The Basutoland courts of law consist of: (a) The Court of Appeal, (b) The High Court, (c) the Subordinate Courts, including the Courts of Judicial Commissioners and (d) Basotho Courts. Appeals lie to the Privy Council by leave of the Chief Justice of the High Commission Territories who is also President of the Court of Appeal, and has jurisdiction in all cases, both civil and criminal, which arise in the Territory.

BECHUANALAND PROTECTORATE

The Bechuanaland Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and north-east by Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South-West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 222,000 square miles. The population at the census of May, 1946, was 293,964, of whom 2,325 were whites and the remainder Africans with a few Indians and coloured.

The climate is healthy during part of the year. Malarial fever is prevalent in some districts during February, March, and April, but with ordinary precautions is not seriously detrimental to health. The country is essentially pastoral, although sorghum, maize, beans, pumpkins and melons

are sown. Cattle thrive, and numbered 1,317,236 on Dec. 31, 1959. The population is almost entirely a native one, the principal tribes being those of Linchwe (Bakgatla), of Kgari Sechele, O.B.E. (Bakwena), of Bathoen, C.B.E. (Bangwaketse), of Mokgosi (Bamalete), of Elizabeth Pulane Moremi, Regent during the minority of Letsholathebe Moremi (Batawana), of Kgosi Matala (Batlokwa) and of Kebelepile (Barolong). The chieftainship of the largest tribe, the Bamangwato, is at present in abeyance.

Schemes for improvements in agriculture, medical services, education and communications, and schemes for combating soil erosion, investigating mineral resources, improving water supplies, irrigation dams, tribal granaries and roads and for improving living conditions are being carried out.

In 1959, there were 9 European and 184 African schools with enrolments of 451 and 32,837. Estimated expenditure on education in 1959 was £324,806.

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to the Rhodesias. There is a telegraph line from Cape Province through from Mafeking, *via* Gaberones and Francistown to Bulawayo and Salisbury. The chief European centres are Lobatsi, Gaberones, Francistown, and Serowe.

SWAZILAND

(The Swaziland Protectorate)

Swaziland is the smallest of the three High Commission Territories in Southern Africa. Geographically and climatically, it is divisible into four physiographic provinces; the broken mountainous Highveld of the west, adjacent to the Drakensburg, with altitudes averaging over 4,000 ft., the Middleveld which is mostly mixed farming country, about 2,000 ft. lower, and the Lowveld, a hot woodland region, bounded on the east by the Lubombo mountains, with an average altitude of 1,500 ft. The Lubombo mountains form the fourth physiographic province. Four rivers, the Komati, Usutu, Umbuluzi and Ingwavuma, flow from west to east, cutting their way through the Lubombo mountains to the Indian Ocean. The exploitation of these rivers is particularly important to the agricultural development of the middle and bush veld, where irrigation projects are giving the scenery a different aspect. The total area is 6,705 sq. miles and the estimated population figure in 1959 was 264,350 (254,000 Swazis, 8,720 Europeans and 1,630 Eurafricans).

Cotton, tobacco, citrus, sugar and rice are the main exported agricultural products. Two mills in the lowveld were constructed in 1959 and are capable of crushing 80,000 tons of raw sugar a year. The Usutu Pulp Company with an initial capital of £5,000,000 was formed in 1959 and a mill to exploit Usutu forests was under construction in 1960. There are rich asbestos and iron deposits in the west and asbestos is still the most valuable export of the territory.

In 1960 there were 11 schools for European pupils (10 maintained by Government) with 1,473 pupils. Of the 282 African schools 126 were Government aided and 26 Government maintained. The total Swazi enrolment is 34,060 or 57 per cent. of the school-going age. Five schools for Eurafrican pupils had a continued enrolment of 643.

There is a daily South African Railway motor omnibus service between Breyten and Mbabane (89 miles); Mbabane and Bremersdorp (27 miles); Bremersdorp and Steg (43 miles); Bremersdorp and Balegane (42 miles); Bremersdorp and Piet Retief (72 miles); Piet Retief and Hlatikulu (50 miles); Goedgegen and Hluti (33 miles) and Hluti and Gollel (26 miles). There are post offices and telegraph and telephone offices at all the chief centres.

Mbabane (European population, 1,092), the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. There are townships in the districts at Bremersdorp (European population, 652), Hlatikulu, Stegi, Goedegun, Emiembe, Pigg's Peak, Mankaiana and Mhlambamyati.

BERMUDA

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (about 20 only of which are inhabited) situated in the west of the Atlantic Ocean, in 32° 15' N. lat. and 64° 51' W. long., the nearest point of the mainland being Cape Hatteras in North Carolina, about 570 miles distant. The total area is now approximately 20.59 sq. miles which includes 2.3 sq. miles leased to, or reclaimed by, the U.S. authorities between 1941 and 1957 under the terms of the 99 year lease. The civil population (1960) was 42,640 (15,892 white and 26,748 coloured and others). The colony derives its name from Juan Bermudez, a Spaniard, who sighted it before 1525, but no settlement was made until 1609 when Sir George Somers, who was shipwrecked here on his way to Virginia, colonized the islands.

Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding, but since 1943 almost entirely destroyed by blight. At one time the islands enjoyed a flourishing export in onions, potatoes, and green vegetables, but the imposition of tariffs in U.S.A. made further growing for export unprofitable. The lily bud trade with Canada and U.S.A. and locally manufactured concentrates and pharmaceuticals are now the Colony's leading exports. Little food is produced except vegetables and fish, other foodstuffs being imported.

The Colony's economic structure is based on its importance as a tourist resort and as an air and naval base and from these sources most of its revenue is derived. It is now within less than two hours' air travel from New York, and in 1960 about 4,146 arriving and departing aircraft carried a combined total of 369,014 passengers. The island landing ground is used by B.O.A.C., Pan-American Airways, Trans-Canada, Eastern, Cunard Eagle Airways and 5 other scheduled air lines.

Education cost £580,392 in 1960. Free elementary education was introduced in May, 1949. In secondary schools, fees may reach £70 per annum, excluding books and stationery.

There is a broadcasting and television service, and overseas telephone and telegraph services are maintained. The use of motor cars was banned in the island from 1908 until 1946.

BRITISH BORNEO

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4' N. to 4° 10' S. and from long. 108° 50' to 119° 20' E. It is about 850 miles in length and 600 in breadth, and contains an area of 204,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 2,750,000. It is thought that the island was discovered by the Portuguese in 1521. About 202,000 sq. miles are included within Indonesia. Of the remainder of the island (the North Coast) approximately 50,000 sq. miles form the Colony of Sarawak and 30,000 sq. miles the Colony of North Borneo (including Labuan), all British.

NORTH BORNEO

The former State of North Borneo was governed by the British North Borneo (Chartered) Company, the last Chartered Company to administer an area of the British Empire, from 1882 to 1942, and became part of the new Crown Colony of North Borneo on July 15, 1946.

The Colony of North Borneo occupies the northern part of the island of Borneo, and has an area of 29,388 square miles with a coast-line of approximately 900 miles. The interior is mountainous. Mt. Kinabalu, sacred to the Dusuns, is the highest mountain in the East Indies, rising to 13,455 feet. Most of the Colony is densely timbered. On the west coast there is a narrow coastal plain which supports the main agricultural and rubber production of the Colony.

The seventh census of the population was held on August 10, 1960. According to a preliminary

report, since 1951, the year in which the last census was held, the total population of the Colony had increased by 36 per cent. from 334,141 to 454,328 and the native population by 28 per cent. from 243,009 to 309,833. The Chinese population has increased by 41 per cent. from 74,374 to 104,855. The number of Europeans, including Eurasians, has increased from 1,213 to 1,807. The Native population comprises Dasuns (mainly agricultural), Bajaus and Bruneis (fishing and agricultural), Muruts and Suluks and several smaller tribes. The main towns of the Colony are Sandakan (28,805) and Jesselton (21,714).

Climate.—North Borneo is favoured by a relatively cool climate for a place situated so near the Equator. The average mean temperature varies between a maximum of 88° and a minimum of 66° F. The annual rainfall varies from 60 to 180 inches according to locality.

Communications.—The only railway is a metre gauge line running from Jesselton on the coast through Beaufort (57 miles) to Melalap in the interior, a distance of 96 miles, with a branch line from Beaufort to Weston (20 miles). There are 233 miles of metalled road with sealed surface and 80 miles of other metalled roads. Work has started, however, on a network of roads eventually designed to connect up the main centres of population. Jesselton is served by four Viscount flights a week from Singapore, Sarawak and Brunei. Dakota aircraft operate on the other days. The Borneo Territories of Sarawak, Brunei and North Borneo are served by a once-weekly service to Hong Kong which terminates at Brunei. Borneo Airways and Malayan Airways provide connecting services to Brunei from Sarawak and North Borneo. Internal air services are operated by Borneo Airways. Twin Pioneer aircraft are used between North Borneo, Brunei and Sarawak.
